It will be noted that under the statute last above quoted there is provided a specific procedure to be followed, including compensation to be paid when contracts are modified or canceled pursuant to the provisions of the statute. In accordance with the provisions of said section, the President, in the Executive order of July 11, 1934, authorized and directed the Postmaster General and such officers of the Postal Service as might be designated by the Postmaster General to hold public hearings with respect to any ocean-mail contract under the Merchant Marine Act of 1928 entered into prior to June 16, 1933, to consider all the evidence adduced at such hearings and to report to the President within 6 months their findings and conclusions as to whether such contracts, or any of them, should be modified or canceled; and if so, in what respect, with substantial savings to the United States, pursuant to the provisions of law herein quoted. The first step under the law has been taken; that is to say, the Postmaster General has made a report as to his findings and recommendations in connection with the several ocean-mail contracts included in such report. However, there appears to have been no further action in modification or cancelation of the contracts. The fact that in the report there are contained statements to the effect that the ocean-mail contracts involved were entered into without unrestricted competitive bidding would not of itself be sufficient to authorize discontinuance of payment of the compensation provided under such contracts. Apparently it is conceded in your letter that the contracts are not void, it being suggested only that they are voidable. The mere fact that a contract may be voidable does not authorize this office to withhold, or disallow credit for, payments thereunder. Before this office can take such action there must be some Executive or administrative action to cancel, terminate, or modify the contracts, and there is no authority in this office to require that such Executive or administrative action be taken.

Even if this office should refuse to allow compensation for service under these contracts, the contractors could bring suit in the Court of Claims or in the appropriate district court of the United States for the compensation under the contracts. The contracts were entered into on behalf of the United States by the official authorized by law to make such contracts, and the fact that said official, in the exercise of the discretion vested in him under the statute, may have exercised poor judgment or failed to best serve the interests of the Government in awarding the contracts is no legal basis for this office to withhold payments under such contracts.

In the event action is taken pursuant to the provisions of section 5 of the act of June 16, 1933, supra, in modifying or canceling any or all of the contracts concerning which recommendations were made in the report of the Postmaster General, this office will, of course, take cognizance thereof in the settlement of accounts and claims under said contracts.

Sincerely yours,

R. N. ELLIOTT,
Acting Comptroller General of the United States.

It is contended that this appropriation should be passed because the Government should provide funds for contracts legally entered into and not violate such contracts. My reply to that statement is that we should not consider ourselves bound by star-chamber agreements arrived at in the manner employed in these cases. These contracts were obviously merely handed out to preferred persons, without any pretense whatever of competitive bidding, and on account of that fact we should not force the taxpayers of America to pay hundreds of millions of dollars more on such a specious argument. In order to prevent the recipients of these ocean-mail contracts from continuing to enjoy the fruits of such illegal arrangements, and in order to begin a constructive policy to rehabilitate the American merchant marine, this Congress should stop this appropriation today and pass an honest merchant-marine bill before the close of this session. I am fully convinced that if this appropriation is stopped that the holders of these contracts will be more cooperative than they now are to arrive at a real merchant-marine policy which will be fair to taxpayers as well as equitable to the shipping interests. If we continue this appropriation, I fear that there will be no new merchant-marine bill at this session of Congress; and if I am correct in that belief, then the American merchant marine will continue its present downward course, which means its practical elimination in a very few years.

Mr. TABER. Mr. Speaker, will the gentleman yield?

Mr. MORAN. I shall be very glad to yield.

Mr. TABER. The President was given authority by law to cancel contracts, but he has not canceled any.

Mr. MORAN. I realize that is true. The President was given authority to cancel, and he did not cancel. The President also, in his message to Congress, said that Congress should cancel them, and I personally lean to that theory. I think it is the Congress of the United States that ought to cancel these contracts instead of leaving it to the President.

Mr. O'MALLEY. Mr. Speaker, will the gentleman yield?

Mr. MORAN. I yield.

Mr. O'MALLEY. Are not those contracts entirely dependent upon congressional appropriations; and is not the denial of an appropriation practically the same thing as cancelation of them?

Mr. MORAN. A denial of the appropriation would, of course, prevent carrying out the contracts.

Mr. HILL of Alabama. Mr. Speaker, will the gentleman yield?

Mr. MORAN. I yield.

Mr. HILL of Alabama. The gentleman quoted the President as saying the contracts ought to be canceled. The President said, however, that before they were canceled the Congress ought to provide other means for an American merchant marine by passing this subsidy act.

Mr. MORAN. I agree with the gentleman.

Mr. HILL of Alabama. He did not think it right to cancel the contracts without making some other provision to aid the American merchant marine.

Mr. MORAN. Let me say to the gentleman I have very little time, and I did not want to have any misunderstanding regarding my statement. That is why I said we should read the President's message. The President himself told us in his message, for what it may be worth for the Congress to consider, that he felt the foreign ocean-mail contracts should be canceled.

Mr. CRAWFORD. Mr. Speaker, will the gentleman yield?

Mr. MORAN. I yield.

Mr. CRAWFORD. Would the gentleman dare make an expression as to why the other body has not enacted a ship-subsidy bill?

Mr. MORAN. I have a firm opinion. I doubt the propriety of commenting on the actions of the other body. Perhaps I had better not do it, but I have some positive ideas about the subject. The question has been asked: "Are these not contracts?" Why should we take a contract that is in existence which the Government has made, and then turn around and by the subterfuge, you might call it, of denying the appropriation for same thereby, in effect, stop a contract this Government in all good faith has entered into with the contracting parties? This, in brief, is the proposition presented by my very good friend the distinguished majority leader, and I know some other Members feel the same way. My answer is that the Postmaster General has stated, as a result of his exhaustive investigation of these contracts, and the special committee of the body at the other end of the Capitol which investigated this subject also has reported that 40 of the 43 contracts were awarded in violation of the requirement of the law providing for competitive bids; and, therefore, they are voidable ab initio. Certainly we should not take the position that contracts voidable ab initio should not even be considered or reconsidered, or even canceled. In further answer to the argument that we should not deny an appropriation for Government contracts actually in existence, this very bill does that very same thing in one instance. On page 61 of this bill appears this language:

Provided, That no part of the money herein appropriated shall be paid on contract no. 56 to the Seatrain Co.

Is that not a case of denying money to a contract in existence? Was not that a contract legally entered into by the United States? The very same reason for canceling the Seatrain contract exists for canceling 40 of the 43 contracts.

Mr. CULKIN. Mr. Speaker, will the gentleman yield?

Mr. MORAN. Yes.

Mr. CULKIN. The gentleman has studied this question closely, as I know. Does the gentleman believe we can continue an American merchant marine without substantial subsidy either for carrying the mails or by differential in building operation?

Mr. MORAN. I believe we must have an American merchant marine. I will state, in answer to the gentleman's question, that we cannot have an American merchant marine without some aid.

Mr. CULKIN. Does not the gentleman know that if something is not done at this session of Congress either by way of continuing these mail subsidies or by differentials in building operation that the American merchant marine will receive a death blow from which it will never recover? And may I say in this connection that I am in sympathy with many of the statements the gentleman has made. Is not my general contention correct, however?

Mr. MORAN. I think the gentleman is fundamentally correct in his position that our merchant marine is in such a condition that if some remedial action is not taken—and it should be taken at this session of Congress, and I have always advocated it—that we have a very dangerous situation confronting our merchant marine.

Mr. MARCANTONIO. Mr. Speaker, will the gentleman yield?

Mr. MORAN. I yield.

Mr. MARCANTONIO. Whatever we may do in the matter of subsidies, does not the gentleman think it is only proper that Congress lay down certain specific rules and regulations for the protection of passengers and the crews of these ships?

Mr. MORAN. The gentleman is exactly right so far as the labor and safety-at-sea conditions are concerned. What I object to is that no matter what forced or labored arguments may be presented, it is an absolutely proved fact that these ocean-mail contract people sat around the table and schemed with our officials to divide up these contracts among themselves, and the bids were issued and worded in such a way that no one else could bid against them. This is all a matter of public record. Some contracts exactly fitted the fleet of the person who got the contract and fitted no one else. It is inconceivable to me how the Congress of the United States will continue to stand for this situation. Talk about honesty in government; here is the right place to begin. The people are getting sick and tired of "invisible government", and if we do not change it, they will. I would like to see a "new deal" in the American merchant marine, and all I ask for is common honesty as a foundation for such new policy.

Mr. LUDLOW. Mr. Speaker, I yield 5 minutes to the gentleman from Minnesota [Mr. KNUTSON].

Mr. KNUTSON. Mr. Speaker, it seems to be quite popular on the part of some Members of this House to belittle and deride everything that is American. I happen to know something about the American merchant marine, and I can assure the Members of this body that there is nothing about the American merchant marine that we need to be ashamed of except possibly that it is woefully weak.

This great country of ours should have the greatest merchant marine of any country in the world. In fact, a strong merchant marine is absolutely essential in time of war and in peacetimes to carry our commerce to other lands. They talk about this subsidy or assistance that we are voting to the American merchant marine as though it were an out-and-out gratuity that is unnecessary. If by contributing $22,000,000 toward upbuilding our merchant marine we may succeed in placing it on the level where it rightfully belongs, it is money well spent.

Mr. O'MALLEY. Will the gentleman yield?

Mr. KNUTSON. I yield to the gentleman from Wisconsin.

Mr. O'MALLEY. We have already contributed $300,000,000 so far, and they seem to be in worse condition now than they were before.

Mr. KNUTSON. That may be true, but if we would lift some of the restrictions that now rest upon our shipping we would not have to appropriate so much money. As it now is, our merchant marine is unable to compete with the merchant marine of other countries.

Mr. O'MALLEY. The history of the *Morro Castle* shows that there are not very many restrictions.

Mr. KNUTSON. We have accidents at sea just like we have accidents on land, including railroad accidents, automobile accidents, and the like. Of course, we want to do everything we can to reduce these accidents to a minimum, but I am satisfied that Mr. Roper is doing everything he can to protect those who travel on ships flying the American flag.

Mr. DONDERO. Will the gentleman yield?

Mr. KNUTSON. I yield to the gentleman from Michigan.

Mr. DONDERO. American goods ought to be shipped in American bottoms?

Mr. KNUTSON. Yes; certainly. May I say to the gentleman from Wisconsin that this policy of subsidizing the merchant marine was inaugurated under the Shipping Act of 1916, at which time Woodrow Wilson was President of the United States and the gentleman's party controlled both

Houses of Congress. I would suggest to the gentleman that he inform himself.

Mr. O'MALLEY. But the gentleman will have to admit that some of us Democrats are willing to profit by our mistakes, which is more than may be said about the Republicans.

Mr. KNUTSON. The gentleman should inform himself before he addresses the House.

Mr. CRAWFORD. Will the gentleman yield?

Mr. KNUTSON. I yield to the gentleman from Michigan.

Mr. CRAWFORD. I want to ask a serious question, and I am serious-minded about it. It is my understanding that the subsidy which we grant is supposed to cover the difference in operating expenses and the cost of building the ships. Is that the gentleman's understanding?

Mr. KNUTSON. It is supposed to cover the differential; yes.

Mr. CRAWFORD. I am serious about this matter, and I am not trying to trip him up. If I came to him as a shipbuilder and laid down my comparative operating costs with foreign competition, including both operation and cost and the cost of the building of the ship, and you, the Government, grant me my operating differentials, wherein am I handicapped in competing with other foreign shippers?

Mr. KNUTSON. May I say that the cost of building ships in this country is one-third greater than in any other country in the world?

Mr. CRAWFORD. I included capital cost and other costs.

Mr. KNUTSON. It is for Congress to determine whether we are to have a merchant marine that will make us independent of all other nations in carrying on our foreign commerce. We know that financial help from the Government is necessary to keep it on a sound basis. England subsidizes her shipping, so does Germany, France, Italy, and Japan. The subsidies given by those countries greatly exceed that given by this Government, which should convince the House that such help is absolutely necessary if we are not to see the American flag driven from the high seas. That would be a national calamity.

The gentleman from New York [Mr. MARCANTONIO] has challenged my assertion that the seamen's strike in New York is being fomented by Communists and is an outlaw strike.

The facts are easily obtainable by anyone who cares to look for them.

The International Seamen's Union of America is the only bona-fide seamen's union in our country. It has been in continued existence since 1892 and is duly chartered by the American Federation of Labor.

In the early part of this year the International Seamen's Union held a convention here in Washington, D. C. That convention anticipated just such an outlaw strike as is now fostered in New York. The convention had from day to day received clear and positive proof that notorious fomenters of strife were at work seeking to bring about a tie-up of shipping along the Atlantic coast for any reason or no reason whatever.

It was because of this clear understanding of the situation that all the delegates at the convention, including the radicals, voted for the adoption of a resolution warning the membership against the poisonous propaganda that emanated in the main from the publicity bureau of the Communist Party. The resolution, unanimously adopted by the convention, follows.

Resolved by the Thirty-third Convention of the International Seamen's Union of America in regular session assembled at Washington, D. C., on February 13, 1936, That we hereby warn the district unions, members and seamen generally, of the Atlantic and Gulf against the danger of yielding to the subversive propaganda now being circulated from anonymous sources by irresponsible persons intended to stampede the seamen into a strike under circumstances leading straight to disaster, it being the opinion of the convention that strike action on the Atlantic and Gulf under existing conditions will not only result in defeat for the men in that district but will also seriously endanger the district unions and membership in the Pacific district.

Notwithstanding this emphatic expression by the authorized spokesmen of the organized seamen, a self-appointed committee in New York has attempted by the use of divers questionable methods, including gangster tactics, to tie up ships under a trade-union agreement with the International Seamen's Union.

It is no secret, and Mr. MARCANTONIO cannot deny that the Communist press is soliciting funds on a Nation-wide basis for this disruptive element in New York City. Nor can he deny that the notorious alien, Harry Bridges, who has kept the San Francisco water front in a turmoil for the last 2 years, is lending aid and assistance to the New York wrecking crew.

That these abortive efforts have been unsuccessful is due to the common sense and the inherent loyalty of the rank and file of the International Seamen's Union of America. Ships are sailing out of New York Harbor on schedule and they are manned by loyal union members.

I have referred to a trade-union agreement between shipowners and seamen. This agreement has been effective since January 1, 1935, and contains a clause granting preference in employment to union members when obtainable.

The same agreement provides for joint boards of conciliation and arbitration "to adjust any grievance, dispute, or difference which may arise or exist."

On March 15, 1936, the agreement was renewed and improved by the addition of this proviso:

All ratings increased $5 per month above existing scales.

With this change the agreement will remain in effect to December 31, 1937.

The shipping companies which signed the improved and extended agreement with the International Seamen's Union of America are American Merchant Lines, Baltimore Insular Line, A. H. Bull Steamship Co., Export Steamship Corporation, Grace Line, Inc., Luckenbach Gulf Steamship Co., Inc., Luckenbach Steamship Co., Inc., Munson Steamship Line, Panama Mail Steamship Co., Panama Pacific Line, Shepard Steamship Co., United States Lines Co., Inc., Columbian Line, American Foreign Steamship Co., Waterman Steamship, Pan-Atlantic, Calmar Line, Isthmian Steamship Line, Baltimore Mail, Standard Oil Co. of New Jersey, Sinclair Navigation Co., Mooremac-Gulf Line, New York & Cuba Mail Steamship Co., New York & Porto Rico Line, Newtex Line, Savannah Line (Ocean Steamship of Savannah), Sword Steamship Co., Clyde-Mallory Lines, Argonaut Line, American France Line, American Hampton Roads Oriole Line, American Republics Line, Mississippi Steamship Co., Black Diamond Line, American West African Line, Lykes Bros., Lykes Bros. Ripley, Tampa-Interocean.

For further clarification of these outlaw attempts to tie up the port of New York, I quote herewith an editorial under the caption "I. S. U. Honors Agreements", from the current issue of the Seamen's Journal, the official paper of the International Seamen's Union of America:

I. S. U. HONORS AGREEMENTS

The Atlantic agreement was arrived at by collective bargaining, and this process is recognized by custom and by law as the most logical and effective method of maintaining just and peaceful relations between shipowners and seamen.

No one claims that this agreement, or any other agreement arrived at through collective bargaining, is perfect or even bordering on perfection. For 14 long years American ships sailed the seven seas without any trade-union agreement of any kind whatever. They paid wages ranging from a total blank (received by the work-a-ways) up to such meager amounts as circumstances and necessity required.

Where were these self-appointed leaders who are now trying to kick over a trade-union agreement which definitely recognizes the union and provides for wages twice as high as formerly paid by many shipowners? Where were they and why did they not raise their voices during those lean and bitter years?

Let us bear in mind that only once before, for a comparatively short period, beginning during the World War and ending on May 1, 1921, have union conditions prevailed on American ships sailing from Atlantic ports. At that time, however, there was no negotiated or signed agreement. Union conditions were reluctantly conceded because of the exigency created by the war and the Nation-wide scarcity of men.

Needless to state the present signed pact between shipowners and seamen is not based either upon an emergency due to war or upon a scarcity of seamen. It is no secret that there are considerably more than enough seamen available to man every ship afloat.

The Atlantic agreement, therefore, spells a voluntary concession on the part of America's biggest shipowners toward a "new deal."

And for that new attitude, that expressed desire to have the seamen's cooperation in developing the American merchant marine, the shipowners deserve full credit.

In but few of the great basic industries of the United States has collective bargaining been established. The "right to organize" guaranty under section 7 (a) of the National Industrial Recovery Act has been declared unconstitutional by the United States Supreme Court. Certainly the hair-splitting interpretations of labor's rights by the courts can never be as satisfactory as the voluntary recognition of those rights by the employers.

The agreement now in effect on the Atlantic places a grave responsibility upon all the members of the Atlantic district unions. Every right has a corresponding duty, and every privilege is necessarily balanced by an obligation. Only by due restraint and frank recognition of our own responsibilities can we demonstrate that the International Seamen's Union will in the future as in the past honor and respect an agreement duly executed by its authorized representatives.

Recognition of the International Seamen's Union and collective bargaining seemed far away a couple of years ago. The promises of a shipping code faded away into thin air. And yet, due to the loyalty and cooperation of the International Seamen's Union membership—new and old, east and west—our union is now recognized everywhere except on the Steel Trust controlled fleet on the Great Lakes.

If we use our heads, if we frown upon internal strife and personal animosity, the days ahead will enable us to consolidate our forces and perfect in America a union of seamen that will be an example and inspiration to seamen the world over.

Mr. LUDLOW. Mr. Speaker, I yield 10 minutes to the gentleman from New York [Mr. BOYLAN].

Mr. BOYLAN. Mr. Speaker, it is very interesting to hear these fresh-water sailors talking about cutting the legs off the merchant marine and the Navy. They are ensconced safely only about 1,500 miles from the coast. I do not suppose there is any battleship or any gun yet developed that can throw a shell from either the Atlantic or the Pacific coast into the State of Iowa.

Mr. WEARIN and Mr. MORAN rose.

Mr. BOYLAN. Wait just a minute, please.

Now, they might be familiar with paddling canoes up and down the little tributaries that go to feed the mighty rivers that sweep on to the great Atlantic or to the great Pacific, but we who are living along the Atlantic and Pacific coasts want to have a little protection. We have no storm or cyclone cellar to go into when these ships shell our coasts.

Now, what is there about this subsidy? The House itself is on record. We do not favor, as a general proposition, subsidizing the mail carriers, but we say that until a subsidy bill is passed we must follow this course; we have no other alternative. The House expressed itself and passed the bill proposed by the gentleman from Virginia [Mr. BLAND] at the last session. Unfortunately nothing has yet been done relative to it in the Senate.

In the meantime, what are we going to do? Are we going to destroy our merchant marine? Are we going to break faith with the men who bought these ships with the provision of a mail contract, and by one fell swoop are we going to destroy the property value that they have in this contractual obligation of the Government?

Mr. O'MALLEY. Mr. Speaker, will the gentleman yield?

Mr. BOYLAN. I yield.

Mr. O'MALLEY. The gentleman refers to a lack of familiarity with these ships in the fresh-water country. We have no coast line, but neither have we any shipbuilders or ship operators.

Mr. BOYLAN. What better evidence is there that you do not know anything about it? You have no shipbuilders and you have no ships. You yourself confess you know nothing about it.

Mr. KNUTSON. Mr. Speaker, will the gentleman yield?

Mr. BOYLAN. I yield to the gentleman.

Mr. KNUTSON. The gentleman from New York must be aware of the fact there is a certain element in this House that will not be happy until the American flag is removed from the seas.

Mr. BOYLAN. Oh, I pray that that day will never come. We have enough patriotic Americans here to maintain the flag on the seas that was put there by the daring mariners of Revolutionary era and maintained during all the years. What a glorious history the American Navy and the American marine have—a history unparalleled in daring and enterprise by that of any country in the world.

Mr. MORAN. Mr. Speaker, will the gentleman yield?

Mr. BOYLAN. I yield.

Mr. MORAN. The gentleman, in his general accusation about the people on this side of the question being fresh-water sailors, rather fell into the difficulty that most people fall into when they state a generalization.

Mr. BOYLAN. All right; what is the question?

Mr. MORAN. The gentleman will admit, for example, that some of the opposition, particularly the gentleman who is now speaking, has quite an acquaintance with the Atlantic coast and is not a fresh-water sailor.

Mr. BOYLAN. Well, really, knowing as I do the splendid history of the old State of Maine and the magnificent keels laid down there and the exploits of the old Maine sailors, who went to every part of the world and displayed our flag, I am mystified and, indeed, I am at a loss to account for the position of the gentleman.

Mr. Speaker, as I have stated, the House has made known its decision on these matters and the Senate has not. Then, until a subsidy bill is passed by the Congress, we have no alternative. We must remember that these ships were purchased by many corporations now operating them with the proviso that they would have a mail contract. If you abrogated these contracts, if you denied appropriations, our flag would not be seen in many parts of the world where it is now flown. Therefore we have really no choice in the matter.

Some of the gentlemen now advocating that we do not continue in disagreement on this amendment have not hesitated to vote for subsidies for farmers. They believe that the farmers should be subsidized, and in many cases I believe so, too; but, if we want to carry on our merchant marine, why not apply the subsidy to the merchant marine as well as to the farmers?

Mr. O'MALLEY. Mr. Speaker, will the gentleman yield?

Mr. BOYLAN. Yes.

Mr. O'MALLEY. If the people who operate the ships upon the seacoast are such fine sailors and such wonderful businessmen, why do they need to reach into the taxpayers' pockets of my section of the country to help them get along?

Mr. BOYLAN. The gentleman knows enough about the question to know that the construction cost of ships' keels laid down in American yards is more and the materials cost more and we pay more for labor. Our mechanics work a shorter number of hours, and what is the result? The result is that a ship laid down in American yards is going to cost very much more than a ship laid down in foreign yards, where the wages of the mechanics are, perhaps, only 50 percent of our wages and where the cost of materials is less. As the gentleman well knows this immediately brings a differential. The cost of foreign labor is less and their seamen work longer hours and are paid less and are not fed as well as our boys are fed, and this makes another differential. Does the gentleman understand that?

Mr. O'MALLEY. Yes; the gentleman understands that; and that is why he wonders why one ship line, like the Bull Ship Line, could build a million dollar ship this year out of their profits and without a subsidiary, while these other ship lines that the gentleman is so worried about have to get subsidies. Why can one do it when the other cannot?

Mr. BOYLAN. The answer is, the line mentioned by the gentleman is not engaged in the foreign trade. I ask my colleagues to support the position of the committee and vote down the motion of the gentleman from Iowa. [Applause.]

Mr. LUDLOW. I yield 5 minutes to the gentleman from New York [Mr. DICKSTEIN].

Mr. DICKSTEIN. Mr. Speaker and colleagues, I am not disturbed about any subsidy that we grant to ships that fly the American flag. As a matter of fact, our merchant marine is the weakest in the world. I should like to see us build up a merchant marine that would be able to compete with every maritime country in the world, so that the seagoing

trade of the United States could be adequately carried on by American-manned ships flying the American flag.

When we build up a merchant marine we ought to start right, and to start right it is my thought we should as a Government policy provide subsidized facilities for expert training of American citizens in the duties on board ship. We should provide trained men to serve as American seamen on merchant ships which may be subsidized by American money.

You will find that every ship that is being subsidized today has 90 percent aliens that represent the League of Nations. Especially is this true on such ships when arriving from foreign ports into American ports.

There is not a real American crew on American ships that are being subsidized in the merchant marine. If we had a merchant marine today we could be proud of, we would not have enough Americans to run the ships; we would have to go to other countries to find sailors to operate those ships.

Some years ago when our efforts to establish a merchant marine reached low ebb, one of the natural results was that the younger generation of American citizen boys failed to turn his energies toward a sea-faring life. A natural consequence has been that shipowners, and ship captains, too, have been compelled to seek nationals of other countries for dependable crews. This increasing foreign make-up of the ships' crews only served to make the service on sea, even on American ships, less and less of an occupation encouraging to American youth.

It seems to me the first thing this Congress should do toward the permanent strengthening of our merchant marine is the definite establishment of an official school of equal standing with West Point and Annapolis for the primary purpose of selecting and training American young men for a sea-faring life on our own merchant-marine ships.

This Government spends vast sums annually to train selected men for officers in our Navy and Army and Coast Guard in order that this Nation may be assured of leaders of our armed forces. This is money spent in the nature of an annual premium on our own insurance policy against aggression and other emergencies involving our national welfare and our self-defense.

We have recently entered upon a most worthy policy of taking selected unemployed young men and placing them in C. C. C. camps under trained instructors in practical outdoor occupations. These young men are being trained to take their places in the useful, worthwhile activities of civilian life; and when they complete their camp life and camp training, they will find themselves better fitted to cope with their problems and will develop into more useful citizens and businessmen.

The permanent establishment by an act of Congress of a Merchant Marine Academy with sufficient financial support permanently assured by the Federal Government will be a forward step in the direction of creating an incentive for able-bodied young Americans to become sea-minded. The men selected to receive this Government training for the merchant marine service could be required to agree to a definite period of service at sea after graduation on ships under the American flag for guaranteed rates of compensation agreed upon by shipowners who receive a Government subsidy for the operation of our merchant marine ships.

A natural result of this policy would be that as time goes on, the seamen on our ships will be selected from American citizens by trained men graduated from our Merchant Marine Academy, not because of any Government coercion to employ citizens but because the American point of view of the trained American citizen would naturally as a line of least resistance seek and secure American seamen.

In the examinations conducted by the Committee on Un-American Activities, while in search of propaganda activities, we found on one vessel 350 aliens in the steward's department, all brought from foreign countries, some of them held certificates of United States citizenship, but told us frankly that they did not owe allegiance to the United States, that they maintained in foreign countries their families, that they paid taxes in their own countries, and that they were on the American ships only for the job.

Mr. McCORMACK. Will the gentleman yield?

Mr. DICKSTEIN. I yield.

Mr. McCORMACK. And some of them voted in the countries of their birth.

Mr. DICKSTEIN. Yes; voted and paid taxes in their own countries, but were holding jobs on American vessels—jobs that belonged to American citizens.

Our investigation of another ship indicated clearly that the members of the crew were almost entirely aliens picked up at foreign ports, although in some instances we were convinced a fraudulent citizenship certificate was used to conceal the large alien make-up of the crew. These aliens deserted the ship when an emergency arose, leaving American citizens to perish with the ship.

Nothing like that could have happened if the crew had been made up of American citizens with the viewpoint and spirit of American justice and fair play and trained in the traditions of the sea.

A very frequent complaint from the shipping interests whenever any kind of restrictions are proposed upon them in the matter of selecting their crews is that it is impossible to select a full crew from American seamen.

Without agreeing that the complaint is correct, nor denying that such a condition prevails, I say to you, my colleagues, that the Government should do everything in its power to make the work and life on board our American merchant-marine ships, whether operating under subsidy or not, so promising as a career that the rising American generation of young men will be attracted to service on the sea under the American flag.

High wages alone will not bring about the respect for service in American merchant marine which is needed. We must create prestige for seamen in the American merchant marine service which will fix it definitely in the minds of young American citizens as an honorable and desirable career worthy of the best men to build for themselves.

We need to restore to sea service the romance of achievement that urged the old-time seamen to follow the sea, notwithstanding the hardships of the life; but our modern young man should be led to see the romance of the sea from the viewpoint of our own American shipping interests and achievement for himself in an honorable career in the American merchant marine service.

All of our seaports have a great many unemployed American seamen anxious to get any available ship job. Many ship captains and shipping companies will still give a preference to an alien seaman if possible, because the alien as a rule will accept lower wages and can be more easily compelled to take what he finds on board in the way of food and quarters.

The owners, operators, and captains of ships, either ocean going or in coastwise trade, of American registry, flying the American flag, whether they enjoy a Government subsidy or not, should be under legal restraint to employ only American seamen on shipboard when American citizen passengers or American merchandise is being transported in international travel.

Mr. MARCANTONIO. Is not that the fault of the shipping companies who are discriminating against the people of our own country because these companies insist on employing cheap labor?

Mr. DICKSTEIN. I think it is the fault of Congress that it does not put a provision in the bill that will employ all American seamen.

Mr. BLAND. The gentleman must know that in the present bill it is provided that 66⅔ percent shall be American citizens.

Mr. DICKSTEIN. But they are not. That does not apply to ocean-going vessels arriving from foreign ports, but only upon departure from an American port carrying mail under an ocean-mail contract.

Mr. BLAND. It applies to ocean-going vessels.

Mr. DICKSTEIN. Furthermore, many of the men on these vessels who hold certificates of citizenship still say they retain their allegiance to their own native country. I called the gentleman's attention to it.

There is another point in that connection to which I wish to direct your attention.

As I understand the present law, every ship holding an ocean-mail contract is required at each departure from an American port for an overseas journey to have a crew made up of not less than 66⅔ percent of citizens of the United States, either native-born citizens or fully naturalized citizens.

The weak point of this provision of law, as repeatedly shown during recent investigations, is that the citizenship of the crew is based upon the entire crew.

The Committee on Merchant Marine should agree to certain amendments to this, or some other, bill on this subject, so as to require that not less than 80 percent of the members of the crew in each department of the ship, namely, the deck department, the engine department, and the steward department, should be either native-born citizens or fully naturalized citizens, and further that not more than 20 percent of the members in each department of the crew on board may be unnaturalized aliens, but with a strict preference given to aliens who have valid declarations of intentions to become citizens when filling this 20-percent alien quota. The point I make is that the crew in each department on board, rather than the total crew on the ship, should be the basis for requirement of citizen-crew members.

Finally, I would direct your attention to the three primary objectives we should endeavor to reach: First, a merchant-marine academy operated and financed by the Federal Government and with a national standing and importance to that now possessed by West Point, Annapolis, or London (Conn.)—Coast Guard—Academies; second, an awakened American spirit among the younger men upon which to establish an honorable prestige for the American merchant-marine service as a career; and, third, a new requirement upon captains of American-registry merchant ships that they maintain their ship crews at all times to a standard of 80 percent either native-born or fully naturalized citizens in each of the three departments of the crew, and that in filling the balance of 20 percent in each department of the crew strict preference be given to aliens who have declared their valid intention to become citizens.

Such a program, when put into effect, will do much to give the American merchant marine a place in international commerce that all patriotic Americans will be proud of and will mean a new day for the American citizen who may choose the American merchant-marine service as his life work. The American seamen will find their lot at sea and in port more of a career than just a money job.

Such a program will also operate to the financial and business improvement of every phase of the shipping interests concerning American operators. An able citizen crew trained to regard his sea service as a career and serving under men trained to uphold the prestige of an wholly American merchant marine service will tend to improve service, profits, and continuity of contracts.

Such a program will operate to the benefit of the Federal Government by reason of improvement of American shipping business and international commerce with attendant actual increase of revenue from taxes, export and import duties, and improvement of general welfare and employment conditions.

I believe the constructive features of this three-point program will appeal to the common sense of every fair-minded American citizen who is interested in increased employment opportunities for citizens and in a logical method of improving the personnel and the prestige of the American merchant-marine service.

The SPEAKER pro tempore. The time of the gentleman from New York has expired.

Mr. MARCANTONIO. Was the gentleman from Virginia [Mr. BLAND] referring to the provisions of his own bill, or to this contract?

Mr. BLAND. Oh, no. The provision of my bill is 75 percent. The provision of the existing law is 66⅔.

Mr. MARCANTONIO. The gentleman is aware that under the present contracts that provision is being grossly violated.

The SPEAKER pro tempore. The time of the gentleman from New York [Mr. DICKSTEIN] has expired.

Mr. LUDLOW. Mr. Speaker, I yield 5 minutes to the gentleman from Oklahoma [Mr. MASSINGALE].

Mr. MASSINGALE. Mr. Speaker, my interest in this bill is purely incidental. If residence by the sea is a qualification to say anything for or against this bill, I surely would be disqualified, because I live a thousand miles from it.

About 3 or 4 weeks ago I got into this thing just by accident. The House was almost deserted. There was up for consideration an item in this bill providing for $26,500,000 to be paid to some ship company that was drawing it illegally, as I understood from statements made by gentlemen who were piloting the bill. Nobody did it, so I picked up a pad and wrote out an amendment to take that $26,500,000 out of the bill. I think probably I am the only man in the House who voted for the amendment. It was defeated. When it went over to the Senate, I took enough interest to telephone over there and call somebody's attention to it, and the Senate cut that $26,500,000 out of the bill, and I think they should have done it. Having taken a little interest in it in the way I did, I read the arguments that were presented in the Senate both for and against the idea of excluding this $26,500,000 from this bill, and the Senate came to the conclusion that it was a steal. You read the arguments. Such men as Senator GLASS and Senator BLACK investigated it, and they said, in effect, that the Government of the United States was being filched not out of $26,500,000, because they said that after the investigation, Mr. Farley advised somebody that four and one-half million was really necessary to take care of these contracts. These contracts that were entered into were given to men who owned ships that had never come up to the specifications required by the Government of the United States.

Mr. DONDERO. Mr. Speaker, will the gentleman yield?

Mr. MASSINGALE. I yield.

Mr. DONDERO. Has not the President of the United States the authority to cancel any contract that may contain such a provision?

Mr. MASSINGALE. I understand he has, but that is not the question. The question in this case is, Is this Congress going to take the position that it is not going to stop spending money by the millions to fulfill unlawful and illegal contracts?

Mr. O'MALLEY. Mr. Speaker, will the gentleman yield for a question?

Mr. MASSINGALE. I yield.

Mr. O'MALLEY. The question is whether or not this Congress, because the President has not done anything, will not do anything itself?

Mr. MASSINGALE. Yes; that is the idea. As I understand it, the President has put this up to the Congress.

Mr. O'MALLEY. And the question is whether the Congress will pass the buck to the President?

Mr. MASSINGALE. That is the idea. Now, if we do not put up the money, they are not going to get any contracts. They do not want them.

Mr. MORAN. Mr. Speaker, will the gentleman yield?

Mr. MASSINGALE. I yield.

Mr. MORAN. Does the gentleman realize that these contracts were lined up on the basis of speed of the vessel?

Mr. MASSINGALE. That is the idea.

Mr. MORAN. And that this summer speed contests have been conducted at several points, one of which is in my freshwater harbor in Maine, and most of them were found to be wrong under the speed test.

The SPEAKER pro tempore. The time of the gentleman from Oklahoma has expired.

Mr. LUDLOW. Mr. Speaker, I yield 10 minutes to the gentleman from Iowa [Mr. WEARIN].

Mr. WEARIN. Mr. Speaker, we have heard considerable discussion this afternoon with reference to ship subsidies, much of which is entirely irrelevant to the question under consideration; namely, whether or not this House should recede and concur in the Senate amendment to strike out

$26,500,000 from the House appropriation bill for payments on fraudulent contracts.

One would think from some of the speeches that have been made, that the attitude of those who oppose this appropriation is such that we are about to sweep the American flag from the high seas and that we are going to destroy the American merchant marine, when many of us have been laboring for weeks and months to prepare an honest, fair, decent, respectable ship-subsidy bill that will give America the merchant marine that she demands and protect the taxpayer's Treasury.

Mr. McFARLANE. Mr. Speaker, will the gentleman yield?

Mr. WEARIN. I yield.

Mr. McFARLANE. Is that not just what they do not want?

Mr. WEARIN. Exactly.

Mr. MORAN. Mr. Speaker, will the gentleman yield?

Mr. WEARIN. I yield.

Mr. MORAN. In the report of the House committee on the so-called Bland subsidy bill that was brought in last session there is this statement on page 2:

The reports of the Postmaster General and shipping-policy committee showed that the financial condition of the operators will not permit them to refinance the replacement program.

Mr. WEARIN. Exactly. In other words, we do not have an American merchant marine on the high seas at the present time adequate to carry American trade, and those who have received the subsidies now say they do not have any money with which to give us a merchant fleet. I want to call to your attention a very important matter that was raised by the majority leader of this House, which is a justifiable question, as to whether or not this House has the right to refuse to appropriate funds for contracts which are already in existence and with which I have already dealt to some extent. I have gone into this thing very carefully and have consulted the best of legal advice. I want to give you a careful picture.

It has been suggested that unless we appropriate this money to make the payments falling due in the next fiscal year on the existing ocean-mail contracts, the Government will be in default on its obligations and will be liable to suit in the Court of Claims for breach of contract.

Let us examine this suggestion in the light of the facts.

These ocean-mail contracts were awarded by the Post Office Department during Mr. Hoover's administration under authority of the Jones-White Act passed in 1928.

Title IV of that act authorized the Postmaster General to enter into contracts with citizens of the United States whose bids were accepted for carrying the ocean mails—section 404—and the act prescribed in detail the manner in which the competitive bids should be invited by public advertisement and the manner in which the contracts should be awarded—sections 406, 407. Congress did its part in laying down the rules that were to be followed by the Post Office Department and also by the Shipping Board in administering the generous ocean-mail subsidies which were to build up and maintain an American merchant marine.

Let us see what happened. Instead of carrying out the mandate of the act and following the direction of Congress that the ocean-mail contracts be let to the lowest bidder after due notice, adequate public advertisements, and under competitive bidding, these contracts carrying enormous subsidies to private shipping interests were awarded to favored interests without any real competition whatever. The advertisements for bids were so framed that there could be no real competition, and the compensation carried by the contracts was, in each instance, the highest compensation allowable under the act.

This scandalous abuse of the law was investigated by a special committee of the Senate. I invite the Members of this Chamber who are not familiar with the background of these ocean-mail contracts to glance through the nine volumes of printed testimony produced before the Senate's investigating committee. You will be amazed to read how a little group of officials from the Post Office Department, the Shipping Board, and the Commerce Department sat around a table and calmly passed out "the gravy", as one of them termed it, to the shipping company they had selected for a particular ocean-mail route.

These ocean-mail contracts were all made during the Hoover administration. Some of them were not signed until just before the 4th of March 1933. They just got under the wire. None have been awarded under this administration. These contracts are a legacy from our Republican friends.

As soon as this scandalous state of affairs was brought to the attention of President Roosevelt, he directed the Postmaster General to make an investigation and submit a report. Mr. Farley's Department devoted months to this task. All of the holders of ocean-mail contracts were notified to appear and defend the legality of their contracts. They did appear with the witnesses and with their high-priced lawyers. They were given every opportunity to establish the legality and the bona fides of their contracts. They had their day in court. They were given a fair hearing. And with what result?

After weighing all the evidence and upon the record submitted, Postmaster General Farley reported to the President that all of the ocean-mail contracts except one had been awarded without any real competition. I invite you to read his report. It is printed as a Senate committee print.

The Postmaster General recommended that the contracts be canceled, and the Congress gave the President express power to cancel these contracts in the Independent Appropriation Act.

Upon receiving Postmaster General Farley's exhaustive report, the President sent a special message to Congress on March 4, 1935, in which he recognized the abuses brought to his attention and recommended that we end this method of extending Government aid to private shipping interests.

So we have this situation: The Senate, through its special committee, has made a record showing that these ocean-mail contracts were surrounded by fraud and chicanery in their making. The Postmaster General, in an independent investigation, has reached the same conclusion. The President has condemned the system of paying these subsidies. He termed it a "subterfuge."

Yet, on this record, it is suggested and proposed to this body that we should approve another appropriation of $26,000,000 to go into the pockets of these special interests on these alleged contracts.

I am not a lawyer, but many of the Members of this Chamber are learned in the law. I ask you gentlemen who are lawyers this question:

If a contract with the Government is obtained in violation of statutory requirements, and if there is favoritism—crookedness—in its inception and execution, is the Government bound by such a contract?

I have been told there can be only one correct answer. Fraud taints every transaction. A contract obtained through fraud is voidable at the election of the injured party, even between private persons. Moreover, when the Government is a party, a contract made by the Government's agent is illegal unless all statutory requirements have been followed.

I also understand that when a contract is tainted with fraud or illegality, and this is particularly true of Government contracts, that no recovery can be had against the injured party if he refuses to further perform the fraudulent or illegal contract. If that is not the law, I invite correction of my statement.

No one dares challenge the statement, because it is true. I cite you to these facts in support of my contention—on page 386 of part 2 of Postmaster General Farley's individual reports to the President, afterward submitted to a committee of another body investigating air-mail and ocean-mail contracts, I find the following statement with reference to foreign ocean-mail route no. 54 involving the Waterman Steamship Corporation:

This contract may be canceled without any offer of compensation for the reason—

(a) The contract was a negotiated one and was not awarded as a result of competitive bidding, as required by law.

(b) The Shipping Board entered into a contract for the sale of ships on this route prior to the date of the contract, and the contract was signed on the same date of the mail contract, and under the terms of the Shipping Board agreement the purchaser of the vessels, the Waterman Steamship Corporation, was obliged to operate these vessels purchased over this identical route for a period of 5 years, and it was, therefore, contrary to public policy.

(c) The contract was not established as an essential mail route and is not now of any value as a mail route.

The same investigation on the part of Postmaster General Farley disclosed the fact that all other contracts, with the exception of one or two, and including such offenders as the American Diamond Lines; the Baltimore Mail Steamship Co.; the Tacoma Oriental Steamship Co.; the Pacific Argentine Brazil Line; the South Atlantic Steamship Co.; United States Lines, Inc. (Delaware), contractor, and United States Lines Co. (Nevada), subcontractor; the Dollar Steamship Lines; the Gulf Pacific Mail Line, Ltd.; the Grace Steamship Co.; the Panama Mail Steamship Co.; Eastern Steamship Lines; Colombian Steamship Co.; Lykes Bros. Steamship Co.; Tampa Interocean Steamship Co.; Lykes Bros.-Ripley Steamship Co.; and a number of others, were all recipients of graft to the extent of negotiated contracts, in express violation of the law as enacted by the Congress. These conclusions were arrived at through Mr. Farley's investigation as a result of information obtained from representatives and officials of the various companies submitted under oath. When such evidence is compiled indicating negotiated contracts and the law specifically provides that they shall be let on the basis of competitive bids it is childish for layman or lawyer, and much less the latter, to call them other than fraudulent. Let us refrain from hiding behind technicalities in this matter and face the facts. Certainly the Members of the United States Congress are not going to appropriate money to make payments under the terms of contracts that were entered into in violation of law.

My contention is that we should vote aye on my motion to recede and concur in the Senate amendments 48 and 52 striking the subsidy item of $26,500,000 from the Treasury and Post Office appropriation bill, which also provides for the continuation of the carriage of mail on a poundage basis.

The fact of the matter is the gentlemen who are lamenting that our merchant marine may be destroyed in the event that this money is not appropriated fail to recognize the fact that all such similar subsidies appropriated by this Congress have been paid to the same shipowners to which this will be paid under the terms of the 1928 act without securing an adequate merchant marine or even a respectable one. The gentlemen who follow me will probably ring the changes until one might expect to see American flags dotting the high seas like stars in the heavens. In reality the shipowners who have been recipients of these appropriations have broken faith with us, as was evidenced by testimony introduced before Mr. Farley's investigation and the fact that the same subsidized shipowners have been here in Washington all during the seventy-fourth session of Congress wailing for more subsidy and stating before the House Committee on Merchant Marine, of which I am a member, that they do not have any money with which to build new ships for those we practically gave them a few years ago that are now obsolete and unpaid for. In view of the fact that they have not produced a merchant marine with the aid of former appropriations similar to this one, the proponents of this appropriation have little to talk for in that respect. If we appropriate another $26,000,000 plus to continue payment under the fraudulent contracts now in existence for the maintenance of a merchant marine that has not been properly maintained by the subsidized shipowners, we will, in addition to becoming parties to the crime, be throwing that much more money into the pockets of attorneys, highly paid officials of shipping companies, and subsidiary institutions with no prospects of results.

By way of substantiating my statement that the subsidized ship owners have failed to build up a merchant marine in accordance with the intent of Congress allow me to quote you this paragraph from part I, page 202, of the Postmaster General's individual reports to the President, as published in a Senate committee print, and obtainable in four small volumes that you should read from cover to cover:

The Lykes Bros. have, as a result of operating Shipping Board vessels, and through their several ocean-mail contracts (routes 23, 45, and 57) made large profits on a small original capital investment. The record shows that in their dealings with the Shipping Board and the Post Office Department they have been actuated largely by a desire to obtain as much from the Government as possible upon minimum commitments looking to the upbuilding of the American merchant marine.

Mind you the above is from the conclusions of Postmaster General Farley's investigation of the subsidized shipowners themselves.

To further substantiate my position that this appropriation is fruitless with respect to accomplishing anything in building up a merchant marine that is rapidly becoming obsolete in spite of the payment on the part of the United States Government of over $160,000,000 in mail subsidies since 1928, plus the merchant fleet that we practically gave them along with trade routes developed under Government operation at the expense to the taxpayers, allow me to quote this paragraph with reference to the Lykes Bros.-Ripley Steamship Co. on page 202, part I of Postmaster General Farley's individual reports to the President:

In view of the reluctance of the contractor to obligate itself to build any ships and, in view of the interpretations placed upon the replacement provision by its agent who negotiated it, as hereinbefore shown, it is possible that the contractor may elect to forfeit its $300,000 performance bond if it is unable to persuade the Post Office Department when the time comes for it to begin replacements that traffic conditions do not warrant the expenditure.

You will find by reading the reports quoted from above that similar attitudes toward building a merchant marine are to be found in connection with the other subsidized lines. Now, in order to keep this discussion straight, let us remember that in the first place the inference of the proponents of this appropriation that we have a great merchant marine which is about to be destroyed through our failure to appropriate this money is not based on the actual facts. We have nothing to talk about in that respect. Furthermore, let us remember that the money is to be used in making payments upon contracts admitted by the owners to be negotiated, which would certainly be a fraudulent contract in any court of law when the statute under which it was drawn specifically states that the same should have been let upon the basis of competitive bidding.

Now I want to call your attention right here to some situations that exist in this Congress at the present time. This House passed the Bland-Copeland ship-subsidy bill at the last session by a bare majority of eight votes, sent it to another body for action, and what happened over there? It was held up because of the fact that we pointed out on the floor some things that were not in accordance with the suggestions of the President, and that bill has not been passed to this date. These shipowners are hoping the bill will not pass, that no bill will pass, but that the 1928 act will be left in existence, with the result that we will appropriate $26,500,000 to go toward paying these fraudulent contracts.

If the House insists upon taking such action, I venture this prediction: The ship-subsidy crowd, who have been hauling away the taxpayers' money from the Public Treasury without giving them back an adequate merchant marine that the country needs from coast to coast, will fight any decent subsidy bill, if one can be devised by this Congress or any Congress, and urge a continuation of payments under the Jones-White Act of 1928; and that goes for fresh-water sailors or sidewalk sailors of old New York. If the lobby representatives of the shipowners are thus successful in defeating a respectable subsidy bill, granting that one can be drawn, and the Seventy-fourth Congress adjourns without further action, the President will be forced to cancel the contracts without having a merchant-marine program to offer as a substitute, or else continue payments that some of you want to provide for today, and thereby place the administration's stamp of approval upon a corrupt system of

ship subsidies that he has already branded a subterfuge in a special message to Congress. I do not want to be a party to placing our leader in that kind of a position, especially when he asked the Postmaster General of his Cabinet to investigate the mess and followed up by specifically asking us to do something about it.

If the House will defeat this appropriation of $26,500,000, as it should do upon the ground that it is not obligated to make payments on fraudulent contracts, you will see some action in another body in an effort, and it will be successful, to get out some respectable merchant-marine legislation. If we fail to take the above action, we will simply guarantee payments regardless of the advent of a bill, which is exactly what the shipowners want and which will, as I said before, place President Roosevelt in the embarrassing position of having to cancel the contracts without having a program to offer in place of them or continue payments and commit the administration to the corruption exposed at his request by his own Postmaster General, Mr. Farley.

Mr. McFARLANE. Mr. Speaker, will the gentleman yield?

Mr. WEARIN. I yield.

Mr. McFARLANE. In regard to the ship-subsidy bill that was passed by eight votes, after we got a roll-call vote that was not expected, is it not true that on the floor in the debate it was said this was an administration bill and that it was represented on the floor as being such, but that the President the very next day repudiated it?

Mr. WEARIN. That is correct. Of course, the proponents of that bill were careful not to state specifically on the floor that it was endorsed by the White House, but they did what to my mind was just as bad and almost as misleading; they inferred in an evasive manner that the proposal was an administration measure.

So I say to this House, that if you refuse to concur in the action of the Senate in striking out this appropriation for these ocean-mail contracts, if you insist upon appropriating the taxpayers' money to continue these contracts in force for another year, you are in effect placing this House on record as approving the fraud and the collusion surrounding these shady transactions, as well as the entire Democratic administration, unless the President sees fit to cancel them.

If you vote for this appropriation you are repudiating the recommendations of Postmaster General Farley, you are ignoring the President's message of March 4, 1935, and you are in effect saying to the Senate that you approve of these illegal transactions and intend to ratify them after having a full knowledge of the facts.

More than that, you are saying to your constituents, you are serving notice on the taxpayers of this country, that you are indifferent to their interests, that you are unwilling to oppose the shipping lobby that is urging this appropriation. I cannot believe that a majority of this House will allow themselves to be placed in such a false position. I urge you to concur in the action of the Senate in striking down this improvident use of the public's money.

[Here the gavel fell.]

Mr. LUDLOW. Mr. Speaker, I yield 10 minutes to the gentleman from Virginia [Mr. BLAND].

Mr. BLAND. Mr. Speaker, this matter is of sufficient importance for us to approach it free from feeling, free from bias, free from prejudice, with the sole desire of doing that which is best for the country. It is unfortunate that in the heat of debate, statements are made which frequently cannot be justified by the facts. A gentleman just a short while ago, I know with sincere honesty, made the statement that it was represented upon the floor of this House that the bill that was passed last year was an administration measure. Such a statement never came from me and I do not believe it appears in the RECORD. If it does, I never made it.

Mr. McFARLANE. Mr. Speaker, will the gentleman yield?

Mr. BLAND. I cannot yield.

Mr. Speaker, I said that I did not know what an administration measure was unless the President of the United States wrote to me and said, "I want this bill;" and I said that if the approval of the Secretary of Commerce, under whom merchant marine matters come, saying that he approved that subsidy bill, with the exception of two particulars, would make it an administration measure, then it was an administration measure. This should appear in the RECORD.

Another Member says that 90 percent of the sailors are aliens. I call your attention to a provision in the Merchant Marine Act of 1928 requiring that two-thirds of the crews shall be American seamen. It was avoided in the case of the *Morro Castle* because we had been trying in this Congress for years to get through legislation that would prevent those aliens who had 3-year certificates and who had applied for admission into the United States from being classed as American citizens. We thought the Jones-White Act would not permit those men to be classed as American citizens, but the Attorney General ruled against us. Under the leadership of Mr. Davis this House passed a bill repealing the old law under which these men were classed as citizens. The bill went to the Senate, but not until after the *Morro Castle* disaster was that law repealed. The gentleman surely recalls that.

So far as the situation in New York is concerned, I will take my stand with the International Sailors' Union, with Sharenberg and Furuseth, rather than with the men who are represented by the gentleman from New York [Mr. MERCANTONIO].

Mr. MARCANTONIO. Mr. Speaker, will the gentleman yield?

Mr. BLAND. I yield.

Mr. MARCANTONIO. I call attention to the fact that last week the Supreme Court of New York County decided in favor of these men and against the leadership which, incidentally, has been repudiated by an overwhelming majority of the union. Mr. Sharenberg has been kicked out by his own union.

Mr. BLAND. That is all right; I still take my stand with Sharenberg and the union that has been fighting for the Americans. But let us get to the bill. We have been told that the Postmaster General has said these are fraudulent contracts.

I deny that. I read the conclusions of the Postmaster General as given to the President of the United States in the report which he made. He said:

> Proceeding upon the sound theory it is necessary that this Government must have an adequate merchant marine, I am definitely of the opinion that decided changes must be made in the administration of the subsidy. The reports on each contract, which are sent herewith, do not contain positive, definite recommendations as to what treatment I would advise being given in each case.

If these had been fraudulent contracts, would Postmaster General Farley have made that statement; and if the recommendations were shown to be fraudulent, do you believe that the President of the United States, Franklin D. Roosevelt, who would not stand for any fraud, would have permitted 15 months to have passed and not have canceled any of these contracts? The question answers itself.

Mr. Speaker, I come now to a broader proposition. What will be the effect of the elimination of this $26,000,000? What does it mean? The gentleman from Indiana has received a letter from Mr. Peacock, Director of the Shipping Board, in which it is stated that unless this money is appropriated approximately $53,000,000 of a total of $85,000,000 loaned and still owing for the construction of ships will go into default, and that the owners would probably find it necessary to turn their fleets back to the Government unless subsidies were provided. These ships will come back into the hands of the Government. What will the result be? Instead of paying $26,000,000 for the operation of ships, we will have to pay $30,000,000 to $50,000,000 to have the Government run them, and we will have no ships in the end. That will be the ultimate result.

The letter of Mr. Peacock to the gentleman from Indiana also tells you that the elimination of this amount from the deficiency bill has already done immense damage. American ships are in contest with the most competitive conditions in the world. We spent $148,000,000 in loans to our shipowners

for the construction of these ships. In the same time, or from 1922 to date, Great Britain, through the Trade Facilities Act, has lent $206,000,000, and is continuing to lend for the building and modernization of her ships, because she knows that it is to her interest that while we are holding down the merchant marine on this side of the water she should put into service modern, up-to-date, speedy, fine, economical ships in service in order to get the business.

Let one of our shipowners go to you or to anyone who may have automobiles or grain to ship and ask for your contract. You would say to him, "Upon what terms will you carry it?" He will reply, "I will take it for so much." "How long will you carry it at that rate?" "I will take it for a year." "Look at your subsidy bill, look at your deficiency bill; can you tell me that your ships will be operating all that time?" "No." The answer of the shipper inevitably will be that he must contract with carriers who can give assurance of permanent service.

The foreign shipowner can make a contract whereby he will carry these automobiles and the grain which is offered indefinitely, and, of course, the shipper will contract with him. Do you think the shippers of automobiles and grain or other commodities are going to contract with the American ships under those circumstances? The gentleman from Indiana [Mr. LUDLOW] will tell you that Mr. Peacock in his letter states that the elimination of the appropriation has already been made "sales talk" by our competitors and they are taking the business from our ships, driving them off the seas. What are other nations doing? Look at the *Queen Mary*, which will come over here in a little while, with an appropriation from Great Britain of about £3,000,000, and another £5,000,000 appropriated for another ship, and additional funds for the operation of the ships. Look at the *Normandie*, which was built by France with French money and operated with French money. Look at the budget of France for 1935, with over $28,000,000 to be paid as their contribution to their own ships, $27,000,000 of which is going to four lines in France alone. Can we maintain a merchant marine without the support of our Government? Mr. Speaker, in a little while we will be called upon to vote upon this matter. If the Members want to deny our merchant marine this amount, if they want to do that, the inevitable result will be that American ships are either going to be tied up to the dock or else we must appropriate, as we did formerly, thirty, forty, or fifty million dollars, to continue the ships upon the seas. [Applause.]

Extending my remarks under permission granted, I desire to present additional salient facts.

The question before Congress for decision is whether an American merchant marine shall be continued, or whether we shall make abject surrender to foreign-flag ships. No subsidy legislation exists. No aids other than ocean mail is provided. Is aid essential? Let the President of the United States answer. In his message of March 4, 1935, he said that a subsidy for the American merchant marine must be based upon providing for American shipping Government aid to make up the differential between American and foreign shipping costs. He said:

> It should cover, first, the difference in the cost of building ships; second, the difference in the cost of operating ships; and, finally, it should take into consideration the liberal subsidies that many foreign governments provide for their shipping.
>
> Only by meeting this threefold differential can we expect to maintain a reasonable place in ocean commerce for ships flying the American flag and at the same time maintain American standards.
>
> In setting up adequate provisions for subsidies for American shipping, the Congress should provide for the termination of existing ocean-mail contracts as rapidly as possible, and it should terminate the practice of lending Government money for shipbuilding. It should provide annual appropriations for subsidies sufficiently large to cover the differentials that I have described.

The contracts under consideration involve 43 ocean-mail contracts and trade routes, many, if not all, of which, are essential to the commerce of the United States. Cancelation or modification may involve the United States in lawsuits for damages amounting to millions of dollars with counterclaims on the part of the Government. Termination of these contracts without some alternative measure which may form the basis of adjustment will result in a chaotic condition for the Government so far as its merchant marine is concerned and for the merchant marine as well.

The President has said emphatically, affirmatively, and unequivocally that aids are necessary, and that Congress should provide annual appropriations for subsidies large enough to cover the differentials mentioned by him. He has distinctly recognized the need for a gradual transition, through negotiation, from ocean-mail pay to direct subsidies. Until subsidies are provided by law, the only legal way aid can be provided is by an appropriation for ocean-mail pay under the Mail Pay Act.

To cut off that pay is to destroy the American merchant marine, since no aid is provided even though the President has said that without aid the merchant marine cannot continue.

Failure to provide such aid is notice to foreign-flag owners and shippers of our intent to abandon the American merchant marine.

If any bill is passed providing subsidy in accordance with the suggestion of the President, provision must be made, says the President, for the termination of existing ocean-mail contracts as rapidly as possible.

The appropriation in the pending bill continues the ocean-mail pay, thereby providing funds for the continuance of aid to ships while the change is being made from ocean-mail contracts to such subsidy as may be provided.

Without aid the merchant marine cannot continue. If a subsidy is provided, the change from the present method to the new will require time, and the ocean-mail pay will be needed to bridge the gap. Changes cannot be made immediately.

What is the situation as the Director of the Shipping Board Bureau sees it?

Under date of May 1, 1936, the Director answers the inquiry of Mr. LUDLOW as to the probable effect of the Senate amendment which eliminates the appropriation for ocean-mail contracts. The letter will be found in the record. He said that with relatively unimportant exceptions, most of the 28 companies which hold the 43 existing ocean-mail contracts are indebted to the Government on construction loans or ship-sales mortgages or both, and that at the close of business on April 30, 1936, 17 companies holding 21 of the most important mail contracts owed the Government construction loans aggregating $83,387,904.73. Mr. Peacock's best estimate, based upon long acquaintance with financial, tariff, and other conditions affecting those operations, is that within a very short time after the termination of the ocean-mail contract payments, 11 companies holding 13 of these contracts, representing approximately $52,500,000 of the above-mentioned indebtedness, would be in default and would probably find it necessary to turn their fleets back to the Government unless the mail payments are replaced by some other substantial subsidy. The current indebtedness of ocean-mail contractors on ship-sale mortgages is $12,984,773.07, and on the same basis it is estimated that a large part of this amount would also be defaulted, and that several additional holders of mail contracts would be forced to turn back their ships.

Mr. Peacock said that it appears inevitable that if the mail-contract payments are terminated in this way, a very large proportion of the privately owned and operated fleets which have been built up under the Merchant Marine Acts of 1920 and 1928 will revert to the Government within a short time thereafter.

Concerning the injury already done, Mr. Peacock said that the proposed elimination of this appropriation, even though it be not carried through, has already caused injury to the American merchant marine. The Bureau has received several reports of its being used as sales talk in the solicitation of traffic for foreign lines. Bookings are often made for a considerable period in advance and foreign lines have apparently not been slow to capitalize the doubt which has thus been raised as to the possible continuance of the operation of certain of our lines.

Attention was also directed to the fact that the possible enactment of new subsidy legislation which would replace the ocean-mail contracts with more direct subsidies affords no reason for discontinuance of the appropriation in question for the coming fiscal year. It is generally recognized in all the proposed bills that the transition would take a number of months which, in any event, would carry over until well after June 30 of this year. Omission of this appropriation would, therefore, seriously endanger at the very outset a successful transfer to the new system of subsidies. Furthermore, both the subsidy bill which was passed by the House at the last session and that which was recently reported to the Senate would make this appropriation available for the purposes of the new act. Its continuance is, therefore, highly desirable, entirely irrespective of whether the ocean-mail contract system is or is not replaced by more direct subsidies.

A little less than $85,000,000 remains unpaid. Unless the ships can continue operation, companies owing about $53,000,000 are in danger of immediate bankruptcy. If receiverships follow, the ships must be tied to the docks, unless the Government continues them in operation at its own expense. They cannot obtain credit. The Government must lose the routes it has spent millions to establish and maintain, or it must continue their operation at Government expense. If Government operation is to follow, an appropriation equal in amount must be provided.

APPROPRIATION IN DEFICIENCY BILL WILL NOT SUFFICE

The contention has been made that if a subsidy bill should fail, an appropriation may be made in the deficiency bill. In the meantime, irreparable damage has been done and will continue. Ships depend upon shippers. Shippers contract months in advance. They demand certainty and stability of service. Uncertainty as to continuance of operation requires them to protect their interests by making contracts with foreign-flag ships on whose operation they can depend. They have no assurance that the American lines will continue. Self-protection demands that they turn to foreign-flag ships. The loss of business makes continued operation of American-flag ships more uncertain. One of the greatest obstacles to the establishment and maintenance of an American merchant marine has always been, and is now, lack of confidence in its permanency. Greater doubt is inspired by the failure at present to make an appropriation. The situation is more critical in the South than in the North. It is probable that there will only remain three or four companies, if that number, and they will be in the North or on the Pacific.

In the absence of an appropriation, agents soliciting cargo at home and abroad can give no assurance that the service will continue. They can only express the hope that Congress will provide the necessary funds. This assurance gives no certainty either to domestic or to foreign shippers. In self-protection they must turn to foreign-flag lines which can give assurance of continued service. No business of any kind could survive such uncertainty. Patronage and connections secured by years of service and at immense cost will be lost. Once lost, their recovery will be impossible. The continuance of an appropriation, with some assurance of permanency of operation, is imperative.

MERCHANT MARINE VITAL TO NATION

The merchant-marine problem is one of the most vital now facing the Nation. It is a problem involving the commercial and military security of the Nation.

The Nation is now without any shipping policy. We have been going from bad to worse. As a result, there has not been a single vessel built in several years in this country for overseas trade. Under the stimulus of the 1928 legislation 366,000 tons of new ships costing $145,000,000 were constructed for our foreign-trade fleet.

Much has been said about the number of companies which are in arrears to the Government on loans from the construction-loan fund. The fact is a comparatively small amount is in arrears. Out of a total cost of $214,800,000 for the building and reconditioning of ships, on which $148,000,000 was loaned by the Government, less than $3,000,000 was in arrears on March 1 of this year. Considering the period over which these loans were made—the worst slump ever experienced in the history of shipping—this is a remarkable showing, compared with defaults in other industries.

The terrific effect of this depression may be realized more fully when it is considered that water-borne commerce of the United States—excluding traffic on the Great Lakes and tanker tonnage—declined from 62,113,000 tons in 1929 to 35,156,000 tons in 1935. Yet during this period American-flag ships were able to maintain a percentage practically uniform, the percentages being: 1929, 31.5; 1930, 31.7; 1931, 31; 1932, 29.2; 1933, 31; 1934, 32; and 1935, 30.5.

American shipping in the foreign trade, despite the unprecedented depression in world commerce, has demonstrated that even though seriously handicapped by a high degree of obsolescence, our ships competing in that trade have succeeded in carrying throughout the slump a higher percentage than in previous years, except in 1922. It has been able to do this only through Government assistance rendered the industry under the ocean-mail contracts provided for in the 1928 act.

It is true that the financial standing of this industry is precarious. American shipping is not alone in this difficulty. Shipping of practically all the principal maritime countries has been able to survive the world-wide slump only through the liberal financial support accorded by their governments during the past 7 years. Not only have the governments of these countries assisted their nationals financially in completing their ships on the ways but have helped them in the building of new ships, and when necessary have furnished them with working capital. Despite the unsatisfactory conditions in world trade and shipping and the financially weak position of many of their lines, none of these governments has been willing either to abandon, take over, or curtail their shipping activities. We alone among the nations have hesitated and delayed action in formulating a strong shipping policy, and at this late date actually propose to deny them the assistance promised and written into law and in the contracts between the Government and the shipowners for operation over a fixed period of years.

The item of $26,500,000 which has been stricken from the Treasury and Post Office appropriation bill will deny our shipping industry the aid which enables it to survive the keen competition now prevailing and offset strong support given to foreign shipowners by their governments. This is a comparatively insignificant sum when compared with the generous aid given other domestic industries to enable them to survive.

While we have been without any definite policy for shipping, our competitors have been making the most marked progress. Other nations have lost no time in building up their sea strength for both commercial and national-defense purposes, and in doing so they have materially helped in meeting their unemployment problem. It will prove interesting to consider our present condition.

THE STATUS OF THE AMERICAN MERCHANT MARINE IN THE INTERNATIONAL CARRYING TRADE

On January 1, 1936, there were in our foreign-trade fleet 3,057,000 tons, in which ships with speeds between 10 and 11 knots predominate. Over 85 percent of the total tonnage is 14 years old or over, averaging 17 years, with nearly 11 percent, or 281,000 tons, 20 years old or over.

In our domestic-trade fleet, which consists of about 2,000,000 tons, ships with speeds between 10 and 11 knots again predominate, but to a greater extent than in our foreign-trade fleet. Over 92 percent of the total tonnage is 14 years old or over, averaging 19 years, with nearly 27 percent, or 489,000 tons, 20 years old or more.

In our tanker fleet, of 2,377,000 tons, 92 percent of this tonnage are vessels with speeds of less than 12 knots, 88 percent of the total tonnage being 14 years old or over, averaging 18 years, with 14½ percent, or 303,000 tons, 20 years old or over.

These figures disclose the imperative need for the prompt modernization of our foreign, domestic, and tanker fleets, of

which nearly 38 percent, or about 6,528,000 gross tons, is 14 years old or over, and of which nearly 16½ percent, or over 1,000,000 tons, are already 20 years old or over.

The foregoing figures illustrate the high percentage of old and slow ships and the lack of modern and suitable types to serve as efficient commercial, naval, and military units.

The prime purpose of Government financial aid to American shipping is to place it upon an economic parity with our foreign competitors whose capital and operating costs are on a lower level. The rendering of such aid will not accomplish the purpose for which it is intended unless our ships are on an equality in type, speed, and economy of operation with those of our competitors. Five million dollars a year could be saved in fuel consumption alone if the present obsolete ships operating on foreign ocean-mail routes were replaced with modern types. It is difficult to meet competition successfully with such a handicap.

The last ships contracted for by the Government during the war were delivered in 1922. Since then and up to June 1935, nearly 13,000,000 tons of ocean-going ships, 2,000 tons and over, were built for the six principal maritime nations, which included the United States, Great Britain, Germany, France, Italy, and Japan. Of the 13,000,000 tons of ships constructed during that period, the United States built about 800,000 tons, averaging approximately 65,000 tons per annum. No cargo or combination cargo and passenger vessels have been built or contracted for during the last 3 years for the foreign trade, while during the same period five of the principal maritime countries have built or are building over 1,500,000 tons of such types.

DIFFERENTIALS IN CONSTRUCTION AND OPERATION

Great Britain is the world's largest shipbuilding nation, and shortly before the World War tonnage built in Great Britain was more than half of the world's total. Great Britain is still the largest producer of ships and is able, even today, to underbid some countries abroad which have lower labor costs. This may be attributed to the availability of native raw materials, the volume of work, and an abundant supply of skilled shipyard workers. The estimates on construction differentials will therefore be confined to American and British costs. Construction differentials will vary according to the type of vessel under consideration and the condition of the yards which are bidding on the vessel. On the assumption that comparable conditions prevail in both American and British yards and the bids are based on identical plans and specifications, the construction differentials will vary approximately as follows:

For a plain specification cargo ship corresponding to a modern tramp vessel the construction differential will range from 40 to 50 percent of the American cost, for a first-class, cargo-liner type of vessel from a third to 45 percent of the American cost, and for a combination freight and passenger liner from 20 percent to a third of the American cost.

The differentials between domestic and foreign ship operation are caused mainly by the higher wage, subsistence, and repair costs on American ships. For example, the average monthly wages on a cargo vessel of 5,000 gross tons or over, reduced to percentages, will vary as follows:

	Percent
United States	100
France	74
Germany	68
Great Britain	64
Italy	58
Japan	25

On vessels of the combination freight and passenger types and passenger vessels the wage differential against the American ship is somewhat less than on cargo vessels, due to the increased numbers of foreigners employed in the stewards' department on American ships at wages more nearly comparable to those of foreign-flag ships. The subsistence cost on American cargo ships, compared with those operating under foreign flags, would vary approximately in the same proportion as the wage differential, while in the case of the combination freight and passenger types and passenger vessels the subsistence costs would be more nearly in proportion to the wage differential on such ships.

The differential in repair costs between American and foreign ships would vary in about the same proportion as the construction differential, since the same kind of labor and material is used in repairing vessels as in the building of them.

MERCHANT SHIPBUILDING THROUGHOUT THE WORLD

It appears from Lloyd's Register of Shipping Report that there has been a decided increase in merchant shipbuilding abroad during 1935. No such improvement has taken place in the United States. At the end of the year no less than 75 merchant vessels, above 4,000 gross tons each, were under construction in Great Britain, and only 4 such vessels—all tankers—were being built in American shipyards. Twenty-eight large vessels were under construction in Germany and 15 in Japan.

During the past 4-year period figures show a consistent improvement in British yards. Take, for example, ships of 4,000 gross tons each: What is the comparative situation as between Great Britain and the United States at the close of the past 4 years?

Let Lloyd's Register of Shipping answer:

Merchant vessels under construction

[Each of 4,000 gross tons or over]

Date	Great Britain	United States
Dec. 31, 1932	18	4
Dec. 31, 1933	32	2
Dec. 31, 1934	56	2
Dec. 31, 1935	75	4

What was the situation throughout the world?

At the close of 1935 there were under construction 157 merchant vessels of above 4,000 gross tons. At the end of 1934 there were 120. At the close of 1932 there were 62.

Consider the progress in other countries as compared with the United States. Look at the record supplied by Lloyd's Register of Shipping:

Merchant vessels, each of 4,000 gross tons or over, under construction at the close of the past 4 years

Country where building	Dec. 31, 1935	Dec. 31, 1934	Dec. 31, 1933	Dec. 31, 1932
Great Britain and Ireland	75	56	32	18
Germany	28	13	1	6
Japan	15	16	14	8
France	5	5	3	3
United States	4	2	2	4
Other nations	30	28	23	23
Total	157	120	75	62

What do these figures reveal? That the United States has been decidedly outbuilt by Great Britain, Germany, and Japan. These figures show the extent of last year's improvement in Great Britain and Germany. At the end of 1933 there was only one merchant vessel of 4,000 gross tons and over under construction in Germany, at the close of 1934 there were 13, and at the close of 1935 there were 28.

At the close of 1935 there were no merchant vessels between 2,000 and 4,000 gross tons each under construction in the United States. There were 21 such vessels being built in Great Britain and a total of 51 throughout the world. No such tonnage has been reported for the United States during the past 4-year period.

Again, let the detailed figures answer:

Merchant vessels from 2,000 to 4,000 gross tons under construction at the close of the past 4 years

Country where building	Dec. 31, 1935	Dec. 31, 1934	Dec. 1, 1933	Dec. 31, 1932
Great Britain and Ireland	21	11	9	9
Germany	5	3	4	
Japan	4	1	1	1
France	3			3
United States	None	None	None	None
Other nations	18	8	6	11
Total	51	23	20	24

Consider the 157 vessels above 4,000 tons under construction at the close of 1935, the 4 under construction in the United States were tankers, and these are the only vessels reported as being under construction in American shipyards at that time.

The large volume of merchant construction abroad is indicative of the fact that foreign nations are continuing to replace their obsolete tonnage with modern vessels.

Of the 157 vessels under construction, above 4,000 gross tons each, 58 are steamships and 99 are motorships. A break-down of this tonnage according to size reveals one steamer above 50,000 gross tons—the *Queen Mary*—under construction in Great Britain, one steamer between 30,000 and 50,000 gross tons in Holland, and two motorships between 25,000 and 29,999 gross tons in Great Britain. A total of 124 vessels are between 4,000 and 9,999 gross tons each, of which 77 are motorships and 47 are steamers.

Classification according to size and type is as follows:

Merchant vessels each of 4,000 gross tons or over under construction on Dec. 31, 1935

[Classified according to size and type]

Size	Steamers	Motorships	Total
4,000 to 9,999 gross tons	47	77	124
10,000 to 14,999 gross tons	5	17	22
15,000 to 19,999 gross tons	3	3	6
20,000 to 24,999 gross tons	1		1
25,000 to 29,999 gross tons		2	2
30,000 to 50,000 gross tons	1		1
Above 50,000 gross tons	1		1
Total	58	99	157

At the end of 1935 a total of 59 tankers, each of 1,000 gross tons or over, were under construction throughout the world, aggregating 438,560 gross tons. Fifty-one of these tankers were motorships, the other eight being steamers.

CONSTRUCTION IN GREAT BRITAIN

Lloyd's Register of Shipping in a recent issue shows that on December 31, 1932, Great Britain had under construction 18 merchant vessels of 4,000 gross tons or over, 32 at the end of 1933, 56 at the end of 1934, and 75 at the end of 1935.

The Journal of Commerce of April 23, 1936, carried special correspondence from London under date of April 14 to the effect that the Cunard-White Star Line was reported as planning three ships, one to be a new superliner and two of the *Mauretania* type. This article said that the public did not realize the enormous strides that have been made in marine engineering during recent years and the enormous potentialities which are opening up as the result of experience with the latest types of high-pressure boilers.

There already exists provision by Parliament for a sister ship to the *Queen Mary* for £5,000,000.

CONSTRUCTION IN JAPAN

In order to aid her merchant marine Japan enacted the ship improvement facilities act, which became effective October 1, 1932. This law was a definite policy. The moving causes for it as summarized in a recent article on the subject were, first, too many obsolete ships; second, need of faster, more economical ships to enter competitive world trades; third, industrial and national strategic value of maintaining efficiency of private shipyards and furnishing employment to skilled labor. This law provided varying construction bounties dependent upon speed. The ships were required to be constructed under the supervision of the ministry of communications and of the navy. The shipping company was required to scrap 2 tons of obsolete tonnage for each new ton built, and the subsidy is to be paid upon the keel being laid, the other half when the vessel was commissioned for sea, provided the obsolete tonnage was placed in the hands of the scrappers. All new construction was required to be in national yards with Japanese labor and materials, including fittings and engines. All vessels built under the terms of the subsidy are not to be disposed of or rebuilt without the approval of the ministry of communications.

This ship-improvement facilities act of 1932 resulted from a study previously made, which showed that more than 1,000,000 tons were obsolete.

Under the provisions of the first act 31 ships aggregating a gross tonnage of 200,027 tons were built, all being over 4,000 tons and having speeds of 15 knots and over, as the policy was a scrap and build on the basis of 2 tons scrapped for 1 built, and 400,000 gross tons were eliminated. The total cost of the subsidy was about 10,400,000 yen.

The first ship-improvement facilities act proved so beneficial to industry it was extended for another 12 months from March 1935. In this act the ships which might qualify for the subsidy were to be over 4,000 gross tons. The ratio of the new tonnage was to be 1 to 1, the total appropriation being 1,500,000 yen for new shipping aggregating 50,000 gross tons.

The appropriation under the second act has been completely allocated, and eight ships over 4,000 tons gross and having speeds of 15 knots and over were contracted for by August 1935.

In addition to these subsidized ships there were a number of fast ocean-going and home-trade ships of various types and sizes, built or being built, for which no exchequer's grant was made.

The majority of the ships built or being built under the first and second acts are of 6,000 gross tons and over, the designed speed being in excess of 18 knots, and some having speeds of nearly 19 knots.

An article appeared in the New York Times of April 26, 1936, to the effect that, according to word received in San Francisco on April 25, 1936, an eight-ship construction program for the express silk-trade service of the Kawasaki-Kaisha interests had been arranged. It was said that the first to be built would be four express Deisel freighters for the Japan-Pacific coast-New York run, and it was said that these ships would be the world's fastest cargo carriers. It was said in this article that these ships would register 9,300 deadweight-tons capacity each, would be powered with 10,000-horsepower Deisel engines, were expected to maintain a 19-knot schedule in service, and the first would be commissioned in February 1937, followed by others in April, June, and August.

The success of the first 3-year program brought on a demand for further modernizing the Japanese merchant fleet, and this was provided for in a new program covering a 5-year period, with 500,000 gross tons of obsolete shipping to be scrapped, and new ships to be built which are to be large and speedy, including both cargo ships and combination freight and passenger liners, additional high-class liners for the San Francisco route being stressed.

Today Japan has more than 50 new economical motorships of from 5,500 to 9,800 gross tons each, with a speed of from 16 to 18¾ knots, actually operating in Pacific waters. These are cargo ships, not passenger or combination carriers. It does not seem necessary that such speed is required for the type of cargo imported into Japan. It must follow that these ships are for quick delivery of manufactured goods which are in competition with all other manufacturing nations of the globe. Their value as naval auxiliaries to the Japanese Navy is obvious.

FUTURE OF AMERICAN MERCHANT MARINE

The American merchant marine is more strongly entrenched on world trade routes than at the beginning of the depression. This depression was not foreseen, and it has obliged the Government to come to the aid, financially and otherwise, of everyone in the country—agriculture, banking, manufacturing, and railroads. It is not surprising that while Americans appear indifferent to relief for American ships, Great Britain, France, Germany, Italy, and Japan are bending every effort to modernize their fleets, increase their speed, improve their services, and secure for themselves American trade to which our ships are entitled, and which they could retain if we would only adopt a definite shipping policy. It is not surprising that foreign lines ardently hope that the United States will cut down its aid to American shipping so

that foreign ships may carry more of our exports and imports. Foreign commerce for the last fiscal year was the best since 1931. Exports for the fiscal year 1935 increased $79,000,000 over the preceding year. Imports increased around $65,000,000.

American ships are carrying increasing numbers of passengers in proportion to their accommodations, but there is ample room for improvement, especially in the North Atlantic, where American vessels still get but an eighth of the business while our American citizens constitute three-fourths of the total travel.

The crying need at present is a replacement program for our rapidly obsolescing tonnage. Except for the ships built under the Jones-White Act, practically all seagoing American ships date back to the war period. All of our ships must be replaced within the next few years.

Are we, as Americans, to confess that we are incompetent to solve this problem? Great Britain met the situation in the nineteenth century with the payment of mail subventions to essential services. They have kept up their aids ever since. Consider their discriminatory or preferential duties, imperial preference policies, such as the Ottawa agreement, naval-reserve pay to ships, officers, and crews; special loan grants and the like.

Compare the loans made by Great Britain with our own loans. Under the Trade Facilities Acts, the British have loaned between 1922 and 1929, £27,487,745; under the Irish Trade Facilities Act they have loaned £14,909,237 between 1922 and 1934. In other words, they have loaned $206,000,000 while we were lending about $150,000,000. Great Britain advanced in addition about $50,000,000 to the Cunard Line, about fifty million for a scrap and build program, and another £2,000,000 for tramp-ship subsidy.

Since the loans mentioned above, further huge sums have been guaranteed under those British and Irish acts. Our loans have run along from 66⅔ to 75 percent of the total costs. The British loans have been based upon 80 percent to 100 percent, and their interest charges have run around 3 percent.

The British are always keen to promote their shipping. When American interests formerly threatened they answered with an advance by the British Government of funds to build the *Lusitania* and the *Mauretania* at 2¾-percent interest, and provided mail contracts and naval-reserve bounties to amortize the loan.

Consider other nations. France has continued a policy of aid from the days of Louis XIV. In 1935 French subsidies totaled around $37,000,000, with $27,000,000 going to four lines.

I regret that I cannot go at this time more fully into the benefits granted by other nations. It is well known that France bore practically the entire cost of building the *Normandie*, and has to bear now a large part, if not all, of the cost of the operation. Every maritime nation on the face of the globe is trying to promote a merchant marine. It remains for the United States alone to muddle along with no policy except a policy of destruction.

[Here the gavel fell.]

Mr. BLAND. Mr. Speaker, I ask unanimous consent to revise and extend my remarks in the RECORD and to include therein certain excerpts from newspapers, public documents, and also statistics from the Lloyds' Register of Shipping.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. LUDLOW. Mr. Speaker, I yield 8 minutes to the gentleman from New York [Mr. CULKIN].

Mr. CULKIN. Mr. Speaker, during the discussion of the amendment offered by the gentleman from Iowa [Mr. WEARIN] I queried the gentleman from Maine on the effect of the failure to make provision for the continuance of this mail subsidy, or in the alternative the passage of subsidy legislation, and the effect of the failure of those two procedures upon the future of the American merchant marine. The gentleman from Maine, for whom I have the highest respect, and who has made a diligent inquiry into this situation, stated it would have a fatal effect upon the future of the American merchant marine. The gentleman is sincere and well informed, and his statement was absolutely correct.

The gentleman from New York [Mr. MARCANTONIO] is very solicitous about the future of the American sailor. I do not yield to him in my desire to advance the welfare and economic standing of the American sailor, but I may say now, with full knowledge of the facts, and from a somewhat expert knowledge gained by service on the Merchant Marine Committee, that if the motion of the gentleman from Iowa prevails, and the Senate fails to pass subsidy legislation, there will be no American sailors working on any American ships. American tonnage will be carried under foreign flags and there will be no place for American sailors under that scheme of things. Pending the passage of a constructive act which will build up an American personnel and provide proper seagoing environment, adequate pay for the American sailor, and also safety at sea, the present mail subsidy should be continued so that our flag may not pass from the sea.

Mr. WEARIN. Mr. Speaker, will the gentleman yield?

Mr. CULKIN. I am sorry, I cannot yield now.

The fact is that at the present time men who are deeply concerned with the welfare of the American sailor and who are not tinged with "red" realize that if this legislation fails in both of its phases the American sailor will be on the docks without employment.

I am deeply sympathetic, Mr. Speaker, with the necessity of writing legislation which contains an adequate provision for the development and protection of American personnel. I am frank to say that the message of the President in this respect was not broad enough to meet my views. The subsidy legislation for which I voted and which has been referred to here was not broad enough to meet my views. In view of the fact that this legislation is hopelessly enmeshed and in a pocket in the Senate, the procedure provided by this committee of continuing the mail subsidy temporarily is sound and should be carried out.

As you know, every nation in the world today is heavily subsidizing its merchant marine. The chairman of the Committee on the Merchant Marine has referred to the activities of France, England, and Japan. You know that if we are to survive as a nation we must continue our merchant marine, despite the sins of the past to which the opponents of a merchant marine are continually referring.

The President, with full power to do so, has failed to cancel these contracts. The inference is he does not find them illegal and that he does not find them lacking in integrity. The inference is plain that he finds their continuance necessary for the preservation and protection of the American merchant marine and for the purpose of keeping the American flag on the high seas.

I beseech you gentlemen on both sides of the aisle, for the honor of America, for our national development, in the interest of the farmer who has crops to export, to get back of proper subsidy legislation at the appropriate time when the Senate has composed its differences, and for the present at least to continue these mail subsidies, so that the seamen whom my friend from New York [Mr. MARCANTONIO] is so solicitous about, and for which solicitude I commend him, may not be thrown out on the docks and their opportunity for employment forever destroyed.

I urge the Members of the House, in the name of America, which is being outbuilt in freight and passenger carriers by France, England, Italy, and Japan, not to permit your eyes to be closed by prejudice or passion, but to get back of the American merchant marine, and in doing so, vote down the preferential motion of the gentleman from Iowa [Mr. WEARIN].

Mr. MORAN. Mr. Speaker, will the gentleman yield?

Mr. CULKIN. I yield to the gentleman from Maine.

Mr. MORAN. Does the gentleman agree with me that the present system has not produced and, presumably, will not produce an adequate merchant marine, and, therefore, some new policy is necessary?

Mr. CULKIN. I agree with the gentleman on that proposition. We cannot return to the old state of things. The operators must be held to a stricter loyalty to America. That can be accomplished without destroying the American merchant marine, which both the gentleman from Maine and myself wish to conserve.

Mr. MORAN. The gentleman and I are in accord on that point.

[Here the gavel fell.]

Mr. LUDLOW. Mr. Speaker, I yield 8 minutes to the gentleman from New York [Mr. BACON].

Mr. BACON. Mr. Speaker, I ask unanimous consent to extend my remarks, and to include therein certain papers and quotations from various documents.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BACON. Mr. Speaker, this should not be a partisan question. I believe it should be an American question. I frankly admit I want to see an American merchant marine. I frankly admit I want to see the American flag on the high seas, not only in the coastwise trade but on all the seven seas of the world. I think it is admitted to be impossible to maintain an American merchant marine flying the American flag without some kind of Government help.

Whether the so-called Jones-White Act is the ultimate solution of this question is something we should not consider in adopting a conference report. I think it is admitted that the contracts made in accordance with the provisions of the Jones-White Act are enforceable in the Court of Claims, and if we refuse to appropriate the money the shipping concerns will go into the Court of Claims and collect not only the money due them but also collect damages; and I believe whether the Jones-White Act is the proper and eventual solution or not, we ought to continue to pay on our contractual obligations under that act and as a Congress we ought not to repudiate a legal Government contract. Then let us in this Congress, if we have time, or in the next Congress revamp the whole proposition so we may have a real American merchant marine on the high seas.

Mr. Speaker, my interest in a merchant marine, I am frank to confess, is also sentimental. My great-grandfather started out from Cape Cod when he was 17 years of age and went to sea. Before he was 21 he was a second mate on a ship sailing between Boston and Canton, China. This was in about the year 1802. By the time he was 27 he was captain of a clipper ship that sailed from Boston to China. My grandfather followed him and also went to sea as a boy. So I come from a line of old Yankee ship captains who carried the American flag from Massachusetts to China [applause], and this is the reason I have a sentimental interest in seeing that the American flag continues to remain on the high seas. In those days 90 percent of all our imports and exports were carried in American ships. Those were the days of wooden ships and iron men. We have iron ships now. Do not let us be wooden men.

Between 1820 and the Civil War in 1860 we carried 70 percent of all our imports and exports in American ships. In 1914, when the World War began, we were carrying 9.7 percent of our imports and exports, and our foreign trade was controlled by our competitors.

This is not a partisan question. Let me read you what Thomas Jefferson said:

> The marketing of our productions will be at the mercy of any nation which has possessed itself exclusively of the means of carrying them.

[Applause.]

Thomas Jefferson was the first American President who realized the importance of carrying American goods in American ships under the American flag. Woodrow Wilson, another great Democrat, was one of the strongest Presidents we ever had in favor of an American merchant marine.

Something has been said here about the matter of competition and the differential between our ships and foreign ships. Let me refer to some actual figures which I have obtained from the Shipping Board. For example, here is a summary of capital and operating differentials on a United States vessel of 11,900 gross tons and a British vessel of the same gross tonnage.

The American cost was $3,375,000. They were both built in the same year, and the British cost was $2,250,000, a capital differential in favor of Great Britain of $1,125,000 for an identical boat.

Let us follow this same boat into its operation. We find that the wage differential in favor of the British boat was $1,926.35 a month.

In other words, on the two identical boats built the same year, the wages of the American ship per month was $1,926.35 greater than the wages on the British ship.

Let us go further. The crews were about the same in number. We find that the cost of food given to these American seamen on that ship was $780.41 per month more than the food given the same number of seamen on the British ship. Of course, these differentials would have been greater if the foreign boat had been, for example, Greek, Norwegian, or Japanese.

Let me give you another one. Here is the case of two other boats built the same year, tankers, both approximately 10,387 dead-weight tons. The American boat cost $1,142,570 and the British boat cost $758,000, a difference of $384,570 in favor of the British boat.

Now, look at the wage difference. The wages on the American vessel was $1,570 per month more than the wages paid on the British boat. [Applause.]

[Here the gavel fell.]

Mr. LUDLOW. Mr. Speaker, I yield 5 minutes to the gentleman from Alabama [Mr. BANKHEAD].

Mr. BANKHEAD. Mr. Speaker, during my early years of service in the House I was a member of the Committee on Merchant Marine and Fisheries. During that service, although I am a landlubber by birth and residence, I took a great interest in the development of a merchant marine.

I think I know something about the problems and the difficulties and about the conditions that prevail against the successful operation of an American merchant marine.

I think there is no question of more supreme national importance to all sections of the country, not only on the seacoast but in the interior, than for America, at all times, to have at least a fairly adequate merchant marine, manned by American sailors, under the American flag, and carrying a legitimate proportion of our own commerce to the markets of the world.

I hope we are also approaching the time when there will be a great restoration of the volume of our export trade. Unfortunately during the past few years it has been greatly diminished, down, down, down, until it has almost disappeared. I am one of those who believe that industrial prosperity in America is largely based upon a large volume of export foreign trade, because I know that the men who produce articles for export compose several million of our employable workmen who are now out of work.

What is the issue presented by this motion? In essence it is purely a proposition of the Government of the United States carrying out the contractual obligation with those operators of American ships which are carrying the mail.

Mr. MARCANTONIO. Mr. Speaker, will the gentleman yield?

Mr. BANKHEAD. No. I am sorry; I do not have time.

Whether or not it is an unwise policy which we have embarked upon is beside the issue. Whether or not there is now pending, with extreme possibility of passing shortly, a new merchant marine bill involving some principles of subsidy is beside the issue. But here we are confronted with what, in my opinion, is a plain contract, in which the Post Office Department of the United States is obligated to pay these men during the period of these contracts a specific sum of money for services to be performed by them. If that is not the issue, then what is the issue?

Mr. WEARIN. Mr. Speaker, will the gentleman yield?

Mr. BANKHEAD. No. I cannot yield. The gentleman has had a fair opportunity to present his views. If I had more time, I would be glad to yield.

Probably the question which the gentleman wished to propound would be the question of fraudulent contracts. That has been answered. Those contracts have not been canceled. They are an existing obligation, and I think the attitude of the House committee on this proposition is a sound and correct one. In other words, until those obligations are canceled, or until some new method or contract is established to meet the existing situation, then certainly we can do no less, as an honest government, than to carry out our promise to pay these men during the existence of these contracts.

Mr. COLDEN. Mr. Speaker, will the gentleman yield?

The SPEAKER. The time of the gentleman has expired.

Mr. BANKHEAD. I am sorry. If I had more time, I would be glad to answer the gentleman.

Mr. LUDLOW. Mr. Speaker, I yield 9 minutes to the gentleman from New York [Mr. TABER].

Mr. COLDEN. Mr. Speaker, will the gentleman yield for a brief question?

Mr. TABER. I yield for a brief question.

Mr. COLDEN. I call attention to the statement of our eminent colleague [Mr. BACON] that in his comparison of wages and cost of ships he took a foreign competitor which pays the highest wages in the world outside of the United States. In Scandinavia, Italy, and France the wages and cost of ships are much less than in England.

Mr. BACON. The gentleman is quite correct.

Mr. TABER. Mr. Speaker, I will be unable to yield any further because I only have a few minutes.

Personally I am supporting the position which the chairman of the committee [Mr. LUDLOW] took when he made the motion that the House insist upon its position. I hope the House of Representatives will support that motion. I want to call your attention to a few facts. The object of this Senate amendment is to wipe out about twenty-one or twenty-two million dollars of appropriation which the House carried in the Treasury-Post Office bill to meet the contractual obligations of the Government under these ship-subsidy contracts. What the object of the Senate was in striking out this proposition I do not know, because they have before them, reported by the Senate Commerce Committee, absolutely no bill to meet the ship-subsidy situation. To my mind, it is absolutely essential that this Government maintain ships on the seas. I believe in economy just as much as any man, and will go just as far as any man to promote economy in the United States, but our foreign trade is absolutely dependent upon American ships on the seas. If we do not have those ships on the sea, the freight rates discriminate against American goods going to other ports and in favor of foreign goods coming to American ports and elsewhere, and we have no recourse except to have either Government-owned ships or Government subsidies, just like other countries have.

Frankly I am not just satisfied with the type of subsidy and the type of operation we have. I believe we should have a better one, but this is the kind we have and it is the only opportunity to have any.

Now, what is the situation? The Congress of the United States 3 years ago passed a bill which gave the President the power to cancel these contracts. After careful investigation by the Postmaster General not one single contract has been canceled. The Postmaster General's office has told our committee when we have had them before us that they did not have any evidence on which to cancel these contracts.

Here is the picture. The gentleman from Indiana, Mr. LUDLOW, will read to you shortly a letter from the Comptroller General of the United States. I want to call attention to a word or two of that letter only, because I do not want to trespass on what the gentleman from Indiana will give you. The Comptroller General says that the Treasury would be permitted to pay out of whatever funds are appropriated here $14,300,000. Even if the motion of the gentleman from Iowa were carried, the whole of that money could be used for the purpose of paying, as far as it would go, the Government's obligation. In other words, the adoption of the Senate amendment means a mess of the worst kind; a mess where some of these people can be paid and others cannot be paid. In other words, it is all mixed up. The only thing we can do, and do fairly and honestly, is to vote "no" on the motion of the gentleman from Iowa to recede and concur in the Senate amendments and send the matter back to the Senate and let them withdraw that amendment.

I do not believe the House of Representatives should attempt to create a situation where we are trying to get out of paying our contractual obligations.

If we get out of them, one immediate result will be a default upon $53,000,000 of contracts which have been made with the Shipping Board for the purchase of ships, and upon which the shippers are paying their installments and their interest, meaning altogether right there $4,000,000, $5,000,000, or $6,000,000 of loss immediately—at least one-third the amount of this appropriation—and this will be a recurring item.

On top of all that we have another situation. Our ships, it is true, are not so good as I wish they were. At the same time, since this operation has been commenced and these contracts have been in force, we have put on the sea two of the finest trans-Atlantic ships in the world, the *Washington* and the *Manhattan;* and it is worth a good deal to us to have them on the sea. In addition to that, when I came to Washington, first it was costing us for Government operation of the Shipping Board, in one way or another, practically $100,000,000 a year. The result of this operation and these contracts and the things that have been done in between has been to cut down this expense from $100,000,000 to $25,000,000 a year. That is the way it works, and that is the way it would work. It will cost you an awful lot more to have Government operation than it will to have these contractual subsidies. I want to get out of it and give decent service the best and the cheapest way we can. I hope that when you come to vote on this proposition that you will vote "no" on this motion to recede and concur and will insist on the House position.

Mr. LUDLOW. Mr. Speaker, I yield 3 minutes to the gentleman from New York [Mr. MEAD].

Mr. MEAD. Mr. Speaker, I favor the position taken by the members of the Appropriations Committee, because this is not a time to legislate. When that time comes we can correct such evils as in our judgment exist. I also favor the elimination of this postal subsidy whenever that is possible. But I want to say in passing that the present administration of the Post Office Department, together with the cooperation of the subcommittee, has pared down the appropriation for the mail subsidy approximately $3,000,000 in the last 3 years. The Department is doing excellent work. By investigating, by inspecting ships, and in other ways, the postal officials have achieved a maximum saving under existing conditions.

There are two ways, as I see it, to correct the evils that have been mentioned in this debate: If there are violations of law not properly attended to by the agencies of the Government which should deal with them, the matter should be made the subject of investigation by a committee of Congress. Secondly, a new law should be brought in here before we disturb the contractual relations and produce a chaotic condition in the dispatch and delivery of the United States mails. In view of the splendid record accomplished so far by the Post Office Department and by the House committee, I feel we ought to act favorably upon this conference report as presented by the chairman of the subcommittee, and then let us make an effort to bring out new legislation to correct such ills as we believe exist in our merchant marine. I, for one, favor taking this subsidy out of the Post Office Department, where it is now a direct charge against that service. However, until such legislation is brought in for our consideration, I believe we ought to sup-

port the position taken by the committee. They considered this matter in conference and prepared a report which, in my judgment, squares with existing conditions.

The present administration of the Post Office Department had one of these ocean-mail contracts eliminated by mutual agreement. A legislative committee of the House recommended that the Seatrain contract be abrogated. That contract has never gone into effect.

[Here the gavel fell.]

Mr. LUDLOW. Mr. Speaker, I yield 2 additional minutes to the gentleman from New York.

Mr. MEAD. I believe that under existing conditions we are carrying the mails in American bottoms, aiding our American merchant marine in a most economical and efficient manner. I hope that legislation will be presented to us before the termination of this session so that we may be able to correct conditions which we know merit consideration and correction, but we have before us nothing but a conference report the rejection of which will mean a test case between the Government and those contractors carrying the mails. Rejection of the report will result in a chaotic condition so far as the dispatch of the mail is concerned. I believe we ought to await that better opportunity which will come to us in a legislative way when a bill is reported by the Senate committee bearing upon this subject.

The Appropriations Committee in charge of this bill have gone as far as possible. They have accomplished everything they possibly could within the existing law, and not until we change the law is it time for us to find fault and differ with the committee in the event they are not doing their level best to carry out its provisions.

[Here the gavel fell.]

Mr. LUDLOW. Mr. Speaker, I shall use the remainder of my time myself, and request the Chair to notify me when I shall have consumed 9 minutes.

Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and to include therein certain letters from high governmental officials bearing upon the subject matter of ocean-mail contracts.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. LUCAS. Mr. Speaker, will the gentleman yield?

Mr. LUDLOW. I would like to yield; I would like to be courteous; but I have such limited time that I must ask the gentleman first to let me proceed with my statement.

Mr. Speaker, this is a very interesting subject to discuss, and I have tried to be very kind in yielding to all gentlemen who desired to be heard, so that I have whittled down my own time to almost the vanishing point. For this reason I respectfully request that I be permitted to proceed without interruption during the few minutes at my disposal.

Mr. Speaker, I find myself torn by conflicting emotions in respect to this ocean-mail question. I agree absolutely with the objective that is sought—the complete divorcement of the carriage of ocean mail from merchant marine subsidy—while at the same time I disapprove the irregular, strong-arm, revolutionary means by which it is proposed by another branch of Congress to attain that objective.

For the information of Members I wish to make a brief, concise statement, showing the present status of this particular matter. The act of 1928, under which these ocean-mail contracts have been executed and enforced during the last 8 years, is to a large extent a misnomer. In legislative history and the general understanding among our people it is tied in with the Postal Service, but really its major significance is in the fact that it is the vehicle for carrying a large subsidy to steamship companies—a subsidy which, roughly speaking, amounts to 10 times the size of the appropriation that would be required to carry the same volume of ocean mail if there were no subsidy involved.

Forty-three contracts are now in existence under this statute of 1928, and on the basis of 100 percent performance the Government would be obligated to pay the steamship companies something in excess of $33,000,000 during the fiscal year 1937. To a certain extent there is administrative leeway to reduce the amount where the steamship companies do not meet all of the statutory requirements and the Budget Bureau added its own arbitrary cut so that the estimate, when it reached our subcommittee, provided for a minimum appropriation of $26,500,000 as being necessary to discharge the Government's obligations under the ocean-mail contracts during the next fiscal year.

The House Appropriations Subcommittee approved this amount on the theory, which up to that time had never been challenged or disputed, that as an appropriating committee it had no authority to annul existing law and that money must be provided to pay these contractual obligations as long as the so-called Merchant Marine Act of 1928 remains on the statute books. There is nothing in the history or precedents of Congress that told us that we might take action which in effect would nullify the act of 1928 by denying the funds to carry out the contracts legally executed under it.

The House sustained our viewpoint and the Postoffice and Treasury Departments' appropriation bill for the fiscal year 1937, as it passed the House and went over to the Senate, carried the Budget item of $26,500,000 for the ocean-mail contracts.

When the bill reached the Senate Committee on Appropriations that committee struck out the specific item of $26,500,000 for transportation of mail under the ocean-mail contracts and added $4,500,000 to the item of $9,450,000 in the bill for carrying ocean mail on a poundage basis. By so doing the committee undertook to squeeze $22,000,000 of subsidy out of ocean-mail transportation, the admitted purpose being to hasten the enactment of a new ship subsidy bill which would subsidize the merchant marine on a basis entirely free and independent from the Postal Service.

The Senate adopted the views of its Appropriations Committee and thus the issue was squarely presented in conference between the Senate's position and the House's position on this matter. After an animated discussion in conference, the Senate conferees refusing to yield, your conferees have brought the issue back to this chamber for a vote of the House.

The gentlemen who are associated with me on the conference committee will speak for themselves in voicing their opinions of the Merchant Marine Act of 1928. For myself alone I will say that if I had been a Member of Congress when it was passed I would have voted against it and I would gladly vote this instant for its repeal.

To hang a huge subsidy on the fiction of carrying the mails is to my way of thinking a base deception. There is about it a certain tincture of fraudulent pretense when the American people are led to believe that they are paying a large sum for carrying the ocean mail when, as a matter of cold fact, a relatively small part of the expenditure is for mail service and a very large part of it goes into the coffers of steamship companies. I confess that the word "subsidy" grates on my ears.

It seems to me almost a hateful word, something synonymous with special privilege. Under our American form of government special privilege should not be allowed to enter. Certainly it is outlawed by the philosophy of Thomas Jefferson, to whom we on this side of the Chamber profess our allegiance.

Entertaining these beliefs I would hasten the day, if I could, when there will be a complete divorcement of the mail service and ocean subsidies but I question whether the end, desirable as I believe it to be, would justify the means by which the Senate proposes to bring about this separation.

However, the merit or demerit of the Merchant Marine Act of 1928 is not the question involved here today. The question is whether it is wise or justifiable for the Government to repudiate contracts that have been legally authorized and executed.

What the Senate proposes is nothing less than a caesarian operation, the like of which, I believe, has never been witnessed in legislative annals. If we establish such a precedent I am wondering how often, and in what embarrassing ways, it will arise to haunt us in the future. Can an appropriations committee, by arbitrarily exercising its power of withholding funds, nullify an act of Congress, thus to all intents and purposes destroying that act as completely as if it had been repealed by another act of Congress?

Take, for instance, the Social Security Act. It makes certain specific appropriations to carry out the purposes mentioned in the act—$8,000,000 in one paragraph, $2,000,000 in another, and so forth. Could members of the Appropriations Committee say, "We do not like the Social Security Act and we will not appropriate any money to enforce it." There is an even stronger reason why we should not assume such an attitude in reference to the Merchant Marine Act, for in the latter instance binding contracts have been entered into in good faith"?

If members of the Appropriations Committees were to say that and Congress were to back them in that attitude, what would become of orderly legislative procedure? Would we, or could we, ever know that any legislative act that Congress might pass would be safe from annulment? With such a situation and precedent staring us in the face, I doubt whether the caesarean operation performed by the Senate on the ocean-mail contracts, in order to bring about the birth of a new ship-subsidy law, is justified. As much as I would like to see the existing hybrid, deceptive system of ocean-mail contracts abolished, I cannot convince myself that the end would justify the means.

I am thinking, too, of other consequences of the proposed annulment of the ocean-mail contracts through enforced starvation and I am wondering whether we would not find that we have made a very bad bargain before we get through with it. Undoubtedly lawsuits would pile up for recoveries under the contracts.

It could hardly be pleaded that the contracts are nonenforceable on account of fraud, as the President long had the authority to cancel these contracts for fraud or for any reason whatsoever which he conceived to be in the public interest, and he never exercised that authority in a single solitary instance. If Government contractual obligations mean anything, there is no reason to doubt that the steamship companies would be entitled to heavy recoveries.

This problem is one of many faces and angles and one of its facets has to do with the loans made by the United States Shipping Board to these ocean-mail contractors. Seventeen companies, holding 21 of the most important ocean-mail contracts, owe the United States Government $83,387,904.73 on construction loans. If money is not appropriated to pay the ocean-mail contracts the Shipping Board estimates that $52,500,000 of these loans will be immediately defaulted, with a prospect that a considerable part of the remaining $30,887,000 will be defaulted later. This can have but one result—a large part of this shipping will be thrown back on the Government, to be tied up in our harbors and rot as so much junk.

Your conferees leave the decision with you. After all, it is a matter for the House to decide. If subsidies could be divorced from the mail service without the serious consequences and repercussions that undoubtedly would result from this drastic Senate action I would give the program my personal blessing, but I am fearful of what will happen if we follow this uncharted course. Under the circumstances it is my belief, and I think I reflect the views of the other House conferees, that the normal way is the best way, and that safety and prudence suggests that we continue the ocean-mail appropriation for 1 more year, thus affording time to enact a new merchant marine subsidy law and work out the problem in an orderly manner with full protection to the rights of both the contractors and the Government.

In my opinion the Government ought to meet its obligations under these contracts until the Merchant Marine Act of 1928 is repealed. That is the just thing to do; it is the right thing to do. By withholding the appropriation until the matter is adjusted in this way we will be inviting reprisals which, in the long run, if I am not mistaken, will pile a cost and a burden on the Government several times the amount involved in this appropriation. To my mind repudiation would not only be wrong and unethical, but it would be a very bad bargain from the Government's standpoint.

With the permission of the House I submit herewith correspondence with Postmaster General Farley, J. C. Peacock, Director of the Shipping Board, and Comptroller General McCarl, which has an illuminating bearing on this question.

These letters are as follows:

OFFICE OF THE POSTMASTER GENERAL,
Washington, D. C., May 2, 1936.

Hon. LOUIS LUDLOW,
Committee on Appropriations, House of Representatives.

MY DEAR MR. LUDLOW: This is in reply to your letter of April 30, 1936, addressed to the Hon. Harllee Branch, Second Assistant Postmaster General, stating that the Senate struck out the appropriation for the ocean-mail contracts and provided in lieu thereof an appropriation of $4,500,000 to carry on the ocean mail on a strictly poundage basis, and requesting advice as to what would be the effect of withholding this appropriation as far as the interests of the United States, particularly the interests of the Postal Service, are concerned.

A sum of approximately $4,500,000 will be needed for carrying the mails on a strictly poundage basis. It is believed in the Department that the efficiency of the mail service will not be affected in the least if Congress provides that sum for carrying the mails on a poundage basis. The remainder of the appropriation is a subsidy to the holders of ocean-mail contracts.

The Post Office Department is primarily concerned with the transportation of mails and cannot undertake to express an opinion as to the amount of any subsidy that should be provided for a merchant marine or the effect in detail of eliminating subsidies from the present appropriation. It would seem to me that whether subsidies are to be provided for under the present laws is a question for the determination of Congress itself.

Sincerely yours,

JAMES A. FARLEY,
Postmaster General.

DEPARTMENT OF COMMERCE,
UNITED STATES SHIPPING BOARD BUREAU,
Washington, March 16, 1936.

Hon. LOUIS LUDLOW,
House of Representatives, Washington, D. C.

MY DEAR CONGRESSMAN: In response to your inquiry, I find that at March 15, 1936, 18 lines holding 21 ocean-mail contracts were indebted to this Bureau on unpaid construction loans aggregating $84,104,932.86. I am enclosing a statement showing the outstanding loans of each company.

These loans relate to vessels which have already been constructed while of course the construction subsidy provisions of the pending subsidy bill would apply only to new construction. If all ocean-mail contract payments should be terminated without some provision for adjustment of existing construction loans as is contemplated in S. 3500, our best estimate is that approximately $53,000,000 of the above loans might immediately default, and it is of course possible that some indeterminate part of the remaining balance of $31,000,000 might also eventually default.

If there is any further information that I can furnish you, please let me know.

Very truly yours,

J. C. PEACOCK, *Director.*

DEPARTMENT OF COMMERCE,
UNITED STATES SHIPPING BOARD BUREAU,
Washington, May 1, 1936.

Hon. LOUIS LUDLOW,
House of Representatives, Washington, D. C.

DEAR MR. LUDLOW: Your letter of April 30, inquiring as to the probable effect of the Senate amendment which would eliminate the appropriation for the ocean-mail contracts, is at hand.

With relatively unimportant exceptions most of the 28 companies which hold the 43 existing ocean-mail contracts are indebted to the Government on construction loans or ship-sales mortgages, or both. An analysis of those mortgages therefore affords a very good picture of the probable effect of the elimination of this appropriation.

At the close of business last night, 17 companies holding 21 of the most important mail contracts owed the Government construction loans aggregating $83,387,904.73. Our best estimate, based upon long acquaintance with financial, traffic, and other conditions affecting those operations, is that within a very short time after the termination of the ocean-mail contract payments 11 companies holding 13 of these contracts, representing approximately $52,500,000 of the above-mentioned indebtedness, would be in default and would probably find it necessary to turn their fleets back to the Government unless the mail payments are replaced by some other substantial subsidy. The current indebtedness of ocean-mail contractors on ship-sales mortgages is $12,984,773.07, and on the same basis it is estimated that a large part of this amount would also be defaulted and that several additional holders of mail contracts would be forced to turn back their ships.

It appears inevitable that if the mail-contract payments are terminated in this way, a very large proportion of the privately owned and operated fleets which have been built up under the Merchant Marine Acts of 1920 and 1928 will revert to the Government within a short time thereafter.

In this connection I would also point out that the proposed elimination of this appropriation, even though it be not carried through, has already caused injury to the American merchant marine. We have received several reports of its being used as sales talk in the solicitation of traffic for foreign lines. As you probably know bookings are often made for a considerable period in advance and foreign lines have apparently not been slow to capitalize the doubt which has thus been raised as to the possible continuance of the operation of certain of our lines.

Might I also call your attention to the fact that the possible enactment of new subsidy legislation which would replace the ocean-mail contracts with more direct subsidies affords no reason for discontinuance of the appropriation in question for the coming fiscal year. It is generally recognized in all the proposed bills that the transition would take a number of months which in any event would carry over until well after June 30 of this year. Omission of this appropriation would therefore seriously endanger at the very outset a successful transfer to the new system of subsidies. Furthermore both the subsidy bill which was passed by the House at the last session and that which was recently reported to the Senate would make this appropriation available for the purposes of the new act. Its continuance is therefore highly desirable entirely irrespective of whether the ocean-mail contract system is or is not replaced by more direct subsidies.

Sincerely,

J. C. PEACOCK, *Director.*

COMPTROLLER GENERAL OF THE UNITED STATES,
Washington, May 4, 1936.

Hon. LOUIS LUDLOW,
House of Representatives.

MY DEAR MR. LUDLOW: I have your letter of April 30, as follows:

"The Senate, as you know, struck out the appropriation for the ocean-mail contracts and provided in lieu thereof an appropriation of $4,500,000 to carry the ocean mail on a strictly poundage basis.

"As chairman of the House conferees I would like to be provided with all available information as to the probable consequences of the Senate's action if it should prevail in the final adjustment of this matter.

"Without asking you to commit yourself as to the wisdom or unwisdom of the withdrawal of this appropriation, unless you should care to volunteer an opinion, I would like to get all the information you can send to me as to the probable effect of this proposed action, as it is an important matter and, without prejudice to either side of the question, I would like to know, as nearly as is humanly ascertainable, the results we may expect if this action is taken. I need all the light it is possible to obtain, so that I may give correct information to the House.

"What would be the effect of withholding this appropriation, as far as the interests of the United States are involved?

"In cases where there has been partial fulfillment of contract what would be the process of settlement for performance already rendered? In other cases—that is to say, in cases where claims may be filed under the contracts—what would be the process of determination? What would be the situation in regard to loans made to the ocean-mail contractors by the Government?

"I would greatly appreciate any information you may send to me on all phases of this subject and, of course, if you care to express any opinion your views would be most welcome and I will be grateful for an early answer."

Your submission states that the Senate "struck out the appropriation for the ocean-mail contracts and provided in lieu thereof an appropriation of $4,500,000 to carry the ocean mail on a strictly poundage basis." This statement does not appear to be quite accurate.

Heretofore the Congress has appropriated by separate items for transportation of foreign mails, that is, one item for transportation of foreign mails under contracts entered into pursuant to the Merchant Marine Act of 1928, and a separate item for other means of transportation—steamship (poundage basis), aircraft, and otherwise. As the bill, H. R. 10919, was passed by the House of Representatives this form was continued, $26,500,000 being provided for transportation under such contracts, and $9,450,000 for transportation by other means. The Senate, by amendments 48 and 52, eliminated the specific item of $26,500,000 for transportation under ocean-mail contracts, increased the amount under the other item from $9,450,000 to $14,200,000, and struck out the limiting clause employed by the House of Representatives, reading as follows: "(exclusive of mail carried under contracts awarded under the provisions of the Merchant Marine Act of 1928)", so that said item as amended by the Senate (amendment 48) reads as follows:

"Foreign mail transportation: For transportation of foreign mails by steamship, aircraft, or otherwise, $14,300,000: *Provided*, * * *."

You will note there appears no limitation on the uses of this appropriation item, as amended by the Senate, to carry the ocean mail "on a strictly poundage basis", and in the absence of such a limitation such appropriation would be available, among other things and while it lasts, for carrying the ocean mails under contracts heretofore entered into pursuant to section 404 of the Merchant Marine Act of 1928, some of which have several years yet to run. (See list of contracts in S. Doc. No. 69, 72d Cong., pp. 2 to 11.)

You ask:

"What would be the effect of withholding this appropriation, as far as the interests of the United States are involved?

"In cases where there has been partial fulfillment of contract what would be the process of settlement for performance already rendered? In other cases—that is to say, in cases where claims may be filed under the contracts—what would be the process of determination? * * *."

There appears nothing in this pending appropriation bill purporting to amend the provisions of the Merchant Marine Act of 1928, under which existing ocean-mail contracts were entered into, and nothing purporting to operate upon such existing contracts. Therefore, the condition will be, if the measure is enacted as amended by the Senate, that the appropriation item of $14,300,000 will be available for lawful payments for transportation of foreign mails by "steamship, aircraft, or otherwise", including transportation of foreign mails under lawful contracts entered into pursuant to the provisions of the Merchant Marine Act of 1928, and if the amount appropriated should prove to be insufficient there would be an accounting duty, pursuant to the provisions of section 4 of the act of June 14, 1878, as amended (U. S. C., title 31, sec. 714), to examine and allow, in the amount appearing legally due, such claims as might result for services rendered under ocean-mail contracts and certify them to the Congress for appropriations with which to make payment. And in this connection see, also, section 401 of the Merchant Marine Act of 1928, as amended (45 Stat. 692), which provides:

"All mails of the United States carried on vessels between ports which it is lawful under the navigation laws for a vessel not documented under the laws of the United States to carry merchandise shall, if practicable, be carried on vessels in respect of which a contract is made under this title."

There is another phase of the problem which apparently should have the consideration of the Congress—the possible early depletion of the appropriation through payments under ocean-mail contracts and the effect of such depletion with respect to payments for other means of transportation of foreign mails, some of which may not enjoy the contractual basis entitling to allowance and certification of claims under the act of June 14, 1878.

With respect to how loans made by the Government on vessels under the Merchant Marine Act would be affected by the withholding of amounts becoming due under ocean-mail contracts—either temporarily pending sufficient appropriations or permanently in the event of performance and failure of the Congress to appropriate for the payment of the certified claims reported to it, I would suggest you seek the views of the Secretary of Commerce, who is charged with administration of that portion of the Merchant Marine Act.

Sincerely yours,

J. R. MCCARL,
Comptroller General of the United States.

Mr. Speaker, I move the previous question.

The question was taken; and on a division (demanded by Mr. TABER) there were—ayes 60, noes 4.

Mr. MILLARD. Mr. Speaker, I object to the vote on the ground there is not a quorum present.

The SPEAKER. Evidently there is not a quorum present. The Doorkeeper will close the doors, the Sergeant at Arms will notify the absent Members, and the Clerk will call the roll.

of 1928 is repealed. That is the just thing to do; it is the

Total	84,104,932.86

The question was taken; and there were—yeas 302, nays 13, not voting 112, as follows:

[Roll No. 97]

So the previous question was ordered.

The Clerk announced the following pairs:

General pairs:

Mr. Sears with Mr. Jenkins of Ohio
Mr. Taylor of Colorado with Mr. Lehlbach.
Mr. Cary with Mr. Eaton.
Mr. Boland with Mr. Andrew of Massachusetts.
Mr. Greenwood with Mr. Cooper of Ohio.
Mr. O'Connor with Mr. Wolfenden.
Mr. Schulte with Mr. Ahrends.
Mr. Steagall with Mr. Perkins.
Mr. Vinson of Georgia with Mr. Focht.
Mr. Mansfield with Mr. Hess.
Mr. Larrabee with Mr. Brewster.
Mr. Sullivan with Mr. Bacharach.
Mr. Kleberg with Mr. Halleck.
Mr. Green with Mr. Bolton.
Mr. Boehne with Mr. Fish.
Mr. Granfield with Mr. Cavicchia.
Mr. Bulwinkle with Mr. Higgins of Connecticut.
Mr. Chapman with Mr. Collins.
Mr. Parsons with Mr. Gifford.
Mr. Kennedy of Maryland with Mr. Thomas.
Mr. Maloney with Mr. Doutrich.
Mr. Dingell with Mr. Hartley.
Mr. Weaver with Mr. Fenerty.
Mr. Fernandez with Mr. Hope.
Mr. Parks with Mr. Martin of Massachusetts.
Mr. Connery with Mr. Welch.
Mr. Fitzpatrick with Mr. Marshall.
Mr. Corning with Mr. Wigglesworth.
Mr. Kerr with Mr. Rich.
Mr. Romjue with Mr. Crosby.
Mr. Bell with Mr. O'Brien.
Mr. White with Mr. Berlin.
Mr. Gassaway with Mr. Pfeifer.
Mr. Brown of Michigan with Mr. Hennings.
Mr. Secrest with Mr. Dear.
Mr. Utterback with Mr. Ferguson.
Mr. Nichols with Mr. Eagle.
Mr. Walter with Mr. Dempsey.
Mr. Taylor of South Carolina with Mr. Kee.
Mr. Sirovich with Mr. Caldwell.
Mr. Polk with Mr. Hancock of North Carolina.
Mr. West with Mr. Montet.
Mr. Dobbins with Mr. Keller.
Mr. Sanders of Louisiana with Mr. Buckley of New York.
Mr. Harlan with Mr. Smith of West Virginia.
Mrs. Jenckes of Indiana with Mr. DeRouen.
Mr. Sisson with Mr. Dorsey.
Mr. Quinn with Mr. Harter.
Mr. Edmiston with Mr. Moritz.
Mr. Dickstein with Mr. Claiborne.
Mr. Duffey of Ohio with Mr. Celler.
Mr. Oliver with Mr. Brennan.
Mr. McGroarty with Mr. Zioncheck.
Mr. Brooks with Mrs. Greenway.

Mr. BACON and Mr. CULKIN changed their vote from "nay" to "yea."

Mr. MARCANTONIO changed his vote from "yea" to "nay."

The doors were opened.

The result of the vote was announced as above recorded.

Mr. LUDLOW. Mr. Speaker, I ask unanimous consent that the Clerk may state the two motions now pending before the House and that the Speaker state the order in which they will be voted upon.

Mr. TABER. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. TABER. A vote "nay" is a vote to sustain the position of the House conferees, is it not?

The SPEAKER. The gentleman is correct.

Is there objection to the request of the gentleman from Indiana?

There was no objection.

The Clerk read the motions, as follows:

Mr. WEARIN moves to recede and concur in Senate amendments nos. 48 and 52.

Mr. LUDLOW moves that the House insist on its disagreement to Senate amendment nos. 48 and 52.

The SPEAKER. The question is on the preferential motion offered by the gentleman from Iowa [Mr. WEARIN].

Mr. WEARIN. Mr. Speaker, upon that I demand the yeas and nays.

The yeas and nays were refused.

The question was taken; and on a division (demanded by Mr. WEARIN and Mr. O'MALLEY) there were—ayes 61, nays 187.

So the motion was rejected.

The SPEAKER. The question is upon the motion of the gentleman from Indiana [Mr. LUDLOW] that the House insist on its disagreement to Senate amendments nos. 48 and 52.

Mr. O'MALLEY. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were refused.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Page 60, line 89, amendment no. 49: Strike out "$9,450,000" and insert "$14,300,000."

Mr. LUDLOW. Mr. Speaker, I move that the House recede and concur in the Senate amendment with an amendment.

The Clerk read as follows:

Mr. LUDLOW moves that the House recede from its disagreement to Senate amendment numbered 49, and agree to the same with an amendment as follows: In lieu of the sum proposed to be inserted by said amendment insert "$9,717,500."

The motion was agreed to.

A motion to reconsider the votes by which the conference report and the various motions were agreed to was laid on the table.

PROTECTION OF THE AMERICAN LEGATION IN ADDIS ABABA

Mr. McREYNOLDS. Mr. Speaker, the Committee on Foreign Affairs has directed me to submit a privileged adverse report on House Resolution 504, which I send to the Clerk's desk.

The Clerk read as follows:

Mr. McREYNOLDS, from the Committee on Foreign Affairs, submitted the following adverse report to accompany House Resolution 504:

"The Committee on Foreign Affairs, to whom was referred the resolution (H. Res. 504) requesting the Secretary of State to transmit to the House of Representatives certain information relating to the protection of the American Legation in Addis Ababa, having considered the same, submit the following report thereon, with the recommendation that it do not pass:

"The action of the committee is based upon the letter to the chairman of the committee from the Secretary of State, dated May 11, 1936."

Mr. McREYNOLDS. Mr. Speaker, I move that the House resolution (H. Res. 504) be laid on the table.

The motion was agreed to.

A motion to reconsider was laid on the table.

CAPTURE OF CERTAIN ALLEGED MAIL ROBBERS

Mr. MEAD. Mr. Speaker, I submit a privileged adverse report on House Resolution 507.

The Clerk read as follows:

Mr. MEAD, from the Committee on the Post Office and Post Roads, submitted the following adverse report (to accompany H. Res. 507):

"The Committee on the Post Office and Post Roads, to whom was referred the resolution (H. Res. 507) calling on the Postmaster General for facts concerning allegations that postal inspectors did not cooperate with agents of the Department of Justice in the capture of certain alleged mail robbers, reports it back to the House and recommends that the resolution do not pass.

"The committee now has in its possession the information called for in House Resolution 507."

Mr. MEAD. Mr. Speaker, I move that the resolution be laid on the table.

The motion was agreed to.

A motion to reconsider was laid on the table.

ADJUSTING COMPENSATION FOR POST-OFFICE EMPLOYEES

Mr. MEAD. Mr. Speaker, I call up the conference report on the bill (H. R. 10267) to provide for adjusting the compensation of division superintendents, assistant division superintendents, assistant superintendents at large, assistant superintendent in charge of car construction, chief clerks, assistant chief clerks, and clerks in charge of sections in offices of division superintendents in the Railway Mail Service to correspond to the rates established by the Classification Act of 1923, as amended.

The Clerk read the conference report, as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 10267) to provide for adjusting the compensation of division superintendents, assistant division superintendents, assistant superintendents at large, assistant superintendent in charge of car construction, chief clerks, assistant chief clerks, and clerks in charge of sections in offices of division superintendents in the Railway Mail Service, to correspond to the rates established by the Classification Act of 1923, as amended, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same.

T. G. BURCH,
FRED H. HILDEBRANDT,
A. WILLIS ROBERTSON,
I. H. DOUTRICH,
PHILIP A. GOODWIN,
Managers on the part of the House.

KENNETH McKELLAR,
CARL HAYDEN,
LYNN J. FRAZIER.
Managers on the part of the Senate.

The conference report was agreed to.

ORDER OF BUSINESS

Mr. BANKHEAD. Mr. Speaker, I ask unanimous consent to make a short statement.

The SPEAKER. Is there objection?

There was no objection.

Mr. BANKHEAD. I wish to ask all Members of the House, if they can conveniently do so, to remain here until the remaining business is disposed of. We hope to get through and adjourn over until Monday.

SARAH SHELTON

Mr. SCHAEFER. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 2982) for the relief of Sarah Shelton and agree to the Senate amendment.

The Clerk read the Senate amendment, as follows:

Page 1, line 6, strike out "$6,000" and insert "$5,000."

The SPEAKER. Is there objection?

There was no objection.

The Senate amendment was concurred in.

PENSIONS TO SOLDIERS OF THE CIVIL WAR

Mr. LESINSKI. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 12700) granting pensions to certain soldiers of the Civil War.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Administrator of Veterans' Affairs be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws—

The name of Joseph Thompson, late of Capt. Isaac D. Hon's Company K, Sixty-ninth Regiment Enrolled Missouri Militia, and pay him a pension at the rate of $50 per month.

The name of John C. Camden, late of Capt. James H. Bridgewater's company of State Guards and Capt. John Bridgewater's Company A, Halls Gap Battalion, Kentucky State Troops, and pay him a pension at the rate of $50 per month.

The name of Joshua S. Mullins, late of Capt. J. M. Gooch's Company C, Halls Gap Battalion, Kentucky State Troops, and pay him a pension at the rate of $50 per month.

The name of Milton McNabb, alias Milton McNab, late of Capt. Henry Bucksath's Company G, Thirty-fifth Regiment Enrolled Missouri Militia, and pay him a pension at the rate of $50 per month.

The name of William H. Jones, late of Capt. John R. Curry's Company D, South Cumberland Battalion, Kentucky State Troops, and pay him a pension at the rate of $50 per month.

The name of Andrew J. White, late of Capt. Richard F. Taylor's company, Middle Green Battalion, Kentucky State Troops, and pay him a pension at the rate of $50 per month.

The name of George Brewer, late of Capt. James Eversole's Company H, Three Forks Battalion, Kentucky State Troops, and pay him a pension at the rate of $50 per month.

The name of Silas S. Shepperd, late of Capt. Walter P. Ingram's Company D, Halls Gap Battalion, Kentucky State Troops, and pay him a pension at the rate of $50 per month.

The name of James E. Hamilton, late of Capt. Richard Murphy's company, Pulaski and Texas Counties Enrolled Missouri Militia, and pay him a pension at the rate of $50 per month.

The name of Peter Cuddy, late of Capt. Henry Bucksoth's Company G, Thirty-fifth Regiment Enrolled Missouri Militia, and Capt. Peter R. Dolman's company, Chariton County Volunteer Missouri Militia, and pay him a pension at the rate of $50 per month.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. LESINSKI. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 12701) granting pensions and increase of pensions to certain helpless and dependent children of soldiers of the Civil War.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Administrator of Veterans' Affairs be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws—

The name of Bert Milburn, helpless and dependent son of Jesse S. Milburn, late of Company M, Tenth Regiment Indiana Volunteer Cavalry, and pay him a pension at the rate of $20 per month.

The name of Jessie Myrtle Bennett, helpless and dependent daughter of Jonathan Bennett, late of Company H, Eighth Regiment Indiana Volunteer Cavalry, and pay her a pension at the rate of $20 per month.

The name of Charles Hovermale, helpless and dependent son of John A. Hovermale, late of Company D, One Hundred and Thirty-fifth Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $20 per month.

The name of Myra Struchen, helpless and dependent daughter of Abraham Struchen, late landsman, United States Navy, and pay her a pension at the rate of $20 per month.

The name of Francis A. Sipe, helpless and dependent son of Archibald Sipe, late of Company C, Sixty-fourth Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $20 per month.

The name of Alice R. Smith, helpless and dependent daughter of William Smith, late of Company F, Fifty-first Regiment Ohio Volunteer Infantry, and pay her a pension at the rate of $20 per month.

The name of Josie Siessly, helpless and dependent daughter of John Siessly, late of Company B, Forty-fourth Regiment Indiana Volunteer Infantry, and pay her a pension at the rate of $20 per month.

The name of Sallie Hutchens, helpless and dependent daughter of Arthur Hutchens, late of Company H, Twenty-fourth Regiment Indiana Volunteer Infantry, and pay her a pension at the rate of $20 per month.

The name of Daniel F. Glenn, helpless and dependent son of James Glenn, late of Company E, Fifth Battalion, and Company E, Sixth Regiment Missouri State Militia Cavalry, and pay him a pension at the rate of $20 per month.

The name of Bertha E. Haroff, helpless and dependent daughter of William T. Haroff, late of Company K, One Hundred and Twenty-sixth Regiment Ohio Volunteer Infantry, and pay her a pension at the rate of $20 per month.

The name of Charles W. Ringer, helpless and dependent son of Melancthon Ringer, late of Company C, One Hundred and Twenty-first Regiment, and Company F, Sixty-ninth Regiment, Ohio Volunteer Infantry, and pay him a pension at the rate of $20 per month.

The name of Albert Braun, helpless and dependent son of John Braun, late of First Battery, Indiana Volunteer Light Artillery, and pay him a pension at the rate of $20 per month.

The name of Harry C. B. Frets, helpless and dependent son of George Frets, late of Company E, Eighty-eighth Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $20 per month.

The name of James B. Long, helpless and dependent son of John W. Long, late of Company H, Thirty-first Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $20 per month.

The name of Edward Butler, helpless and dependent son of Tobias D. Butler, late of Company B, First Regiment Indiana Volunteer Heavy Artillery (Twenty-first Regiment Indiana Infantry), and pay him a pension at the rate of $20 per month.

The name of Frank Burcham, helpless and dependent son of James Burcham, late of Company H, Sixth Regiment Indiana Volunteer Cavalry, and pay him a pension at the rate of $20 per month.

The name of Luther Hudson, helpless and dependent son of Jeremiah Hudson, late of Company F, Fifteenth Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $20 per month.

The name of Katie Glenn, helpless and dependent daughter of Thomas Glenn, late of Company E, Eighteenth Regiment Kentucky Volunteer Infantry, and Company B, Twenty-third Regiment Veteran Reserve Corps, and pay her a pension at the rate of $20 per month.

The name of John W. Lutz, Jr., helpless and dependent son of John W. Lutz, late of Company G, Seventy-ninth Regiment Pennsylvania Volunteer Infantry, and pay him a pension at the rate of $20 per month.

The name of Maude Isabel Schuler, helpless and dependent daughter of Taylor L. Schuler, late of Company C, Twenty-first Regiment Pennsylvania Volunteer Cavalry, and pay her a pension at the rate of $20 per month.

The name of George N. Groff, helpless and dependent son of John Groff, late of Company D, One Hundred and Ninety-fifth Regiment Pennsylvania Volunteer Infantry, and pay him a pension at the rate of $20 per month.

The name of Alice M. Stites, helpless and dependent daughter of John J. Stites, late of Company K, Ninth Regiment Ohio Volunteer Cavalry, and pay her a pension at the rate of $20 per month.

The name of Isabel Bennett, helpless and dependent daughter of John Bennett, late of Company G, Seventy-second Regiment Illinois Volunteer Infantry, and pay her a pension at the rate of $20 per month.

The name of James A. Lenhart, helpless and dependent son of Michael Lenhart, late of Company F, Nineteenth Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $20 per month.

Mr. O'MALLEY. Mr. Speaker, I think the House should have some explanation of these bills. We just passed one bill without any explanation.

Mr. LESINSKI. The bill H. R. 12700 was a pension bill for original soldiers of the Civil War.

Mr. O'MALLEY. How old are they?

Mr. LESINSKI. Eighty-nine, on an average.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. LESINSKI. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 12702) granting increase of pensions to certain widows and former widows of soldiers and sailors of the Civil War.

The SPEAKER. Is there objection?

Mr. O'MALLEY. Reserving the right to object, I should like to ask the gentleman how many people are provided for in this bill?

Mr. LESINSKI. In this bill there are 478 widow increases. The average age is 83 years and 4 months.

Mr. O'MALLEY. Are they getting pensions now?

Mr. LESINSKI. They are getting inadequate pensions.

Mr. O'MALLEY. How much pension are they getting?

Mr. LESINSKI. They are getting $20, and we increase it to $30.

Mr. O'MALLEY. They are getting $20; and you are increasing it to $30 for each of the four-hundred-and-some-odd people mentioned in this bill?

Mr. LESINSKI. That is correct.

Mr. O'MALLEY. Does this omnibus bill include 400 separate bills?

Mr. LESINSKI. Four hundred and seventy-eight bills.

Mr. O'MALLEY. How much does that increase the amount to, in money, over what they are getting now?

Mr. LESINSKI. Fifty-seven thousand eight hundred and forty dollars.

Mr. O'MALLEY. An increase in pension of $57,000?

Mr. LESINSKI. Fifty-seven thousand eight hundred and forty dollars.

Mr. MAVERICK. Are those widows of Confederate soldiers or Union soldiers? [Laughter.]

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

Mr. O'MALLEY. Reserving the right to object, I am trying to get a complete explanation. The gentleman from Texas asked whether or not they are Union soldiers' widows.

Mr. LESINSKI. They are widows of soldiers under the law enacted in the year 1905.

Mr. BLANTON. Reserving the right to object, simply to ask a question. The old-age pension which we provided under the Social Security Act provides for a pension of $30 a month. If these widows get a $10 increase, they would then receive $30 per month, but they would not participate in that old-age pension?

Mr. LESINSKI. They will not.

Mr. BLANTON. And this is merely to equalize the pension they are getting, being 82 years of age, with what they would get even if they were not widows of soldiers?

Mr. LESINSKI. That is correct.

Mr. DONDERO. Reserving the right to object, Mr. Speaker, does this list of pensions for widows have the unanimous support of the Committee on Invalid Pensions?

Mr. LESINSKI. Yes; this is reported out by the committee.

Mr. BANKHEAD. Mr. Speaker, the regular order.

The SPEAKER. Is there objection to the consideration of the bill?

There was no objection.

The Clerk read as follows:

Be it enacted, etc., That the Administrator of Veterans' Affairs be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws—

The name of Mary Devine, widow of John Devine, late of Company B, One Hundred and Sixty-ninth Regiment New York Volunteer Infantry, and pay her a pension at the rate of $50 per month in lieu of that she is now receiving.

The name of Jennie Washington, widow of Otho Washington, late of Company B, Fortieth Regiment United States Colored Volunteer Infantry, and pay her a pension at the rate of $30 per month.

The name of Mollie B. Clinkinbeard, widow of James L. Clinkinbeard, late of Capt. James H. Davis' Company K, Twenty-fifth Regiment Enrolled Missouri Militia, and pay her a pension at the rate of $30 per month.

The name of Eudora M. Elkins, widow of Calvin P. Elkins, late of Company F, Third Regiment Tennessee Volunteer Infantry, and pay her a pension at the rate of $30 per month.

The name of Margaret Jane Asberry, widow of Franklin C. Asberry, late of Company D, Seventh Regiment Kentucky Volunteer Cavalry, and pay her a pension at the rate of $30 per month.

The name of Eliza Cupp, widow of Lemon V. Cupp, late of Company I, One Hundred and Twenty-sixth Regiment Ohio Volunteer Infantry, and pay her a pension at the rate of $30 per month.

The name of Julia A. Allen, former widow of Prosper W. Lawrence, late unassigned, Fourteenth Regiment New York Volunteer Heavy Artillery, and Company I, Sixth Regiment New York Volunteer Heavy Artillery, and pay her a pension at the rate of $30 per month.

The name of Mary A. Lynch, widow of Thomas Lynch, late of Company B, Forty-eighth Regiment Wisconsin Volunteer Infantry, and pay her a pension at the rate of $30 per month.

The name of Olive M. Hunt, widow of Robert R. Hunt, late of Company F, One Hundred and Fifty-sixth Regiment Illinois Volunteer Infantry, and pay her a pension at the rate of $30 per month.

The name of Emma Z. Bowden, widow of Edward Bowden, late of Company C, Seventeenth Regiment Kentucky Volunteer Cavalry, and pay her a pension at the rate of $30 per month.

The name of Elizabeth J. Lloyd, widow of William E. Lloyd, late of Company D, Fourth Regiment Pennsylvania Volunteer Infantry, and pay her a pension at the rate of $20 per month and increase the rate to $30 per month from and after the date she shall have attained the age of 60 years, which fact shall be determined by the submission of satisfactory evidence by the beneficiary to the Veterans' Administration.

The name of Mary A. McCullough, widow of George McCullough, late of Company G, Sixteenth Regiment Kansas Volunteer Cavalry, and pay her a pension at the rate of $30 per month.

The name of Kitty Alice Love, widow of George P. Love, late of Company D, Twenty-eighth Regiment Illinois Volunteer Infantry, and pay her a pension at the rate of $30 per month.

The name of Phina McCrary, widow of Ira McCrary, late of Company D, Sixth Regiment Kentucky Volunteer Cavalry, and pay her a pension at the rate of $20 per month and increase the rate to $30 per month from and after the date she shall have attained the age of 60 years, which fact shall be determined by the submission of satisfactory evidence by the beneficiary to the Veterans' Administration.

The name of Frances C. Strickler, widow of William J. Strickler, late of Companies G and C, One Hundred and Ninety-fifth Regiment Pennsylvania Volunteer Infantry, and pay her a pension at the rate of $30 per month.

The name of Edna P. Welsh, widow of Edward A. Welsh, late of Company G, Second Regiment Maryland Volunteer Infantry, and pay her a pension at the rate of $20 per month and increase the rate to $30 per month from and after the date she shall have attained the age of 60 years, which fact shall be determined by the submission of satisfactory evidence by the beneficiary to the Veterans' Administration.

The name of Mary C. Miller, widow of Samuel R. Miller, late of Company C, One Hundredth Regiment Indiana Volunteer Infantry, and pay her a pension at the rate of $30 per month.

The name of Catherine Keyser, widow of Jacob Keyser, late ordinary seaman, United States Navy, and pay her a pension at the rate of $30 per month.

The name of Emma K. Clark, widow of William F. Clark, late of Company I, Fourteenth Regiment Iowa Volunteer Infantry, and pay her a pension at the rate of $30 per month.

The name of Lana Miller, widow of William H. Miller, late of Company A, Twentieth Regiment Pennsylvania Volunteer Cavalry, and pay her a pension at the rate of $30 per month.

The name of Louvisa Brewer, widow of Valentine S. Brewer, late of Company D, Seventh Regiment Kentucky Volunteer Infantry, and pay her a pension at the rate of $30 per month.

The name of Nancy Jane Dyer, widow of King S. Dyer, late of Company C, Fifty-seventh Regiment Indiana Volunteer Infantry, and pay her a pension at the rate of $30 per month.

The name of Emma Hilliker, widow of John Hilliker, late of Company F, Fifty-first Regiment Ohio Volunteer Infantry, and pay her a pension at the rate of $30 per month.

The name of Lenace Marlin, widow of Oliver Marlin, late of Company F, One Hundred and Forty-seventh Regiment Ohio Volunteer Infantry, and pay her a pension at the rate of $20 per month and increase the rate to $30 per month from and after the date she shall have attained the age of 60 years, which fact shall be determined by the submission of satisfactory evidence by the beneficiary to the Veterans' Administration.

The name of Mary J. Goodwin, widow of Eugene B. Goodwin, late landsman, United States Navy, and pay her a pension at the rate of $30 per month.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

TOM ROGERS

Mr. PETERSON of Georgia. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 8262) for the relief of Tom Rogers, with a Senate amendment, and concur in the Senate amendment.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the Senate amendment, as follows:

Amend the title so as to read: "An act for the relief of Tom Rogers, and the heirs of W. A. Bell, Israel Walker, Henry Shaw, Thomas Bailey, and Joseph Watson."

The Senate amendment was agreed to.

A motion to reconsider was laid on the table.

FORT FREDERICA NATIONAL MONUMENT, ST. SIMON ISLAND, GA.

Mr. DEEN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 8431) to provide for the establishment of the Fort Frederica National Monument, at St. Simon Island, Ga., and for other purposes, with a Senate amendment, and concur in the Senate amendment.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The Clerk read the Senate amendment, as follows:

Page 1, line 8, after the word "area", insert "not to exceed 80 acres."

The Senate amendment was agreed to.

A motion to reconsider was laid on the table.

WILLIAM A. DEVINE

Mr. RAMSPECK. Mr. Speaker, I ask unanimous consent that the bill (S. 2806) for the relief of William A. Devine be rereferred from the Committee on Civil Service to the Committee on Claims. It involves an appropriation and I do not think our committee has jurisdiction.

The SPEAKER. Is there objection to the request of the gentleman from Georgia [Mr. RAMSPECK]?

There was no objection.

ASSESSED VALUATION OF REAL PROPERTY TAX IN VIRGIN ISLANDS

Mr. KOCIALKOWSKI. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 8287) to establish an assessed valuation real property tax in the Virgin Islands of the United States, with Senate amendments, and concur in the Senate amendments.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the Senate amendments, as follows:

Page 2, line 8, strike out all after "value", down to and including "President" in line 13, and insert "If the legislative authority of a municipality shall fail to enact laws for the levy, assessment, collection, or enforcement of any tax imposed under authority of this act within 3 months after the date of its enactment, the President shall then prescribe regulations for the levy, assessment, collection, and enforcement of such tax, which shall be in effect until the legislative authority of such municipality shall make regulations for such purposes."

Page 2, line 15, strike out "colonial" and insert "municipal."

Page 2, strike out lines 17 to 24, inclusive, and page 3, lines 1 to 4, inclusive, and insert:

"SEC. 5. The Virgin Islands Company shall pay annually into the municipal treasuries of the Virgin Islands in lieu of taxes an amount equal to the amount of taxes which would be payable on the real property in the Virgin Islands owned by the United States and in the possession of the Virgin Islands Co., if such real property were in private ownership and taxable, but the valuation placed upon such property for taxation purposes by the local taxing authorities shall be reduced to a reasonable amount by the Secretary of the Interior if, after investigation, he finds that such valuation is excessive and unreasonable. The Virgin Islands Co. shall also pay into the municipal treasuries of the Virgin Islands amounts equal to the amounts of any taxes of general application which a private corporation similarly situated would be required to pay into the said treasuries. Similar payments shall be made with respect to any property owned by the United States in the Virgin Islands which is used for ordinary business or commercial purposes, and the income derived from any property so used shall be available for making such payments."

Page 3, line 12, after "real" insert "and personal."

The Senate amendments were agreed to.

A motion to reconsider was laid on the table.

CORRECTION OF THE RECORD

Mr. MARTIN of Colorado. Mr. Speaker, I offer a resolution to correct the RECORD, which I send to the desk.

The SPEAKER. The gentleman from Colorado offers a resolution which the Clerk will report.

The Clerk read as follows:

House Resolution 514

Resolved, That certain matter appearing in the CONGRESSIONAL RECORD of May 8, 1936, on page 7168, in extension of remarks of Hon. JOHN A. MARTIN, of Colorado, beginning with the words "Mr. TABER", in the next to the last line in column 1 and extending to and including the word "situation", at the end of the ninth paragraph in column 2, be stricken from the RECORD as not embraced in the consent to extend remarks, together with the introductory paragraph to said remarks of Mr. TABER, being the paragraph immediately preceding the above language ordered stricken.

The SPEAKER. The question is on the resolution.

Mr. SNELL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 269, answered "present" 1, not voting 157, as follows:

Mr. Clark of Idaho with Mr. Meeks.
Mr. Driscoll with Mr. Johnson of West Virginia.
Mr. Moran with Mr. Goldsborough.
Mr. Buck with Mr. Kopplemann.
Mr. Young with Mr. Berlin.

Mr. ADAIR changed his vote from "nay" to "yea."

The result of the vote was announced as above recorded.

A motion to reconsider the vote by which the resolution was agreed to was laid on the table.

GERMAN PIONEERS ASSISTED GREATLY IN BUILDING TEXAS—DESERVE COMMEMORATIVE MONUMENT

Mr. MAVERICK. Mr. Speaker, I ask unanimous consent—I had intended to ask it on that eulogy on the gentleman from New York [Mr. SNELL]—but I ask unanimous consent to revise and extend my own remarks without reference to the gentleman from New York.

Mr. SNELL. Leave out the eulogy.

Mr. MAVERICK. I will leave out the eulogy.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

GERMANS PROFOUNDLY AFFECT TEXAS HISTORY

Mr. MAVERICK. Mr. Speaker, in the State of Texas there is to be built a monument to the German pioneers of that State. A plan has been suggested by Hon. Leo M. J. Dielmann, one of the leading architects of Texas, and a descendant of one of the early pioneers. The information which I here place in the RECORD concerning the history of these courageous pioneers has been given me by the brother of Mr. Dielmann, the Honorable Henry B. Dielmann, one of the prominent lawyers of the State of Texas. The plan suggested by Architect Dielmann calls for a lofty obelisk superimposed on a base in the form of a lone star. The interior is to be used as a historical monument.

The great commemorative obelisk is to be placed in Landa Park, New Braunfels, Tex., which is only 30 miles from San Antonio, in my congressional district, and New Braunfels is the cradle of German immigration in Texas. It was founded on Good Friday, March 21, 1845, and I am informed by reliable historians of the German migration that it is the logical site for this monument. It was the home of Dr. Ferdinand Jacob Lindheimer, who fought at the Battle of San Jacinto which established Texas as an independent republic and freed it from Mexico. Dr. Lindheimer was a distinguished botanist, the first editor of the New Braunfelser Zeitung, which he founded in 1852 and which is published to this day. New Braunfels is the first city in Texas which taxed itself for the maintenance of a public free school. In public education the German pioneers were among the leaders, and their descendants today are among the strongest supporters of public education.

The settling of a great number of Germans in Texas occurred at a time and under circumstances which profoundly affected the events leading to the independence, the security, and the prosperity of the young Texas Republic and the future Lone Star State.

A glance at the map of Texas in 1836 reveals the fact that most Texans of that day lived in the eastern and southeastern part of the State. The very first Germans who came to Texas settled on the fringes of its civilization. Austin County, where Friedrich Ernst started the first German settlement in Texas in 1831, known ever since by the significant name of "Industry", Fayette County, where Joseph Biegel founded Biegel's Settlement in 1832, were comparatively far from the then existing settlements. So were Cat Spring, founded in 1834, by Robert J. Kleberg, one of the greatest of Texas pioneers; Frelsburg in Colorado County, founded by William Frels in 1837, after he had taken part in the storming of San Antonio in 1835 and in the Battle of San Jacinto in 1836. So were the other settlements in Washington, Fayette, Colorado, and other counties.

LEFT TYRANNY—BROUGHT SPIRIT OF LIBERTY

These settlements brought many Germans to Texas at a time when every man counted for much in the struggle which was imminent. These Germans were all men who had left their native countries because of tyranny and a desire for freedom, and they brought the spirit of liberty with them. Although in Texas but a few years and not yet even well acquainted with their fellow Texans, they immediately entered the slim ranks of the Texans and fought and died at San Antonio, at Goliad, and San Jacinto, for the formation of the new Republic.

The most significant event in the history of German settlements in Texas was the organization of the Society for the Protection of German Immigrants in Texas. Under its auspices shipload upon shipload of the highest type of better citizenship, healthy and desirous of establishing homes, set foot upon Texas soil, changed the red man's hunting grounds into fields and gardens, and founded model cities and towns wherever they settled. These new German settlers did not receive their grants of land in the safe eastern and central portions of the State, but had to occupy the fringe extending from south Texas to west Texas, from the Comal and Guadalupe to the Pedernales, Llano, San Saba, and upper Colorado, the land of the fierce Comanche Tribes.

The protection which these German frontiersmen afforded their fellow Texans is enough to entitle them to a monument. But this protection also assured the German settlers of the opportunity to firmly establish their new home on Texas soil. In the villages and in the hills of the great stretch of virgin Texas lands they occupied they established New Braunfels, Fredericksburg, Sisterdale, Boerne, and Comfort as original German settlements. From them sprang the now flourishing German communities in the counties of Mason, Llano, Gillespie, Kerr, Kendall, Comal, Guadalupe, Medina, Bexar, De Witt, Victoria, Lavaca, Bastrop, Travis, Harris, and others, large areas which for examples of modern farming, orderly government, fine cities, and towns are outstanding in America.

GERMAN SETTLERS OPPOSED TO SLAVERY

Life in the early German settlements in Texas had distinct characteristics which other settlements did not possess. The German settlers did not believe in slavery. There were no Negroes in their communities. All labor was performed by themselves as self-respecting citizens. Consequently many artisans and craftsmen were present wherever Germans settled. Farming was carried on in a scientific manner. Wherever they settled they built permanent homes.

Likewise, their contact with the highest forms of social, scientific, and cultural life in the country of their origin generally was so close that travelers like Frederick Law Olmsted write of the fullness of their social life in terms of highest praise. Having brought to their new homeland the advantages of a higher education and having in their midst physicians, lawyers, university professors, able journalists, and even poets, painters, and musicians, it is not surprising that we find classical literature, scientific lectures, and the finest of music a matter of everyday enjoyment. Robert Kleberg's excellent piano, library, and paintings were lost in the burning of Harrisburg in 1836, but within a decade the music of Mozart, Haydn, and Beethoven was played and sung in many a humble but happy German home in Texas.

The Germans are known the world over for their love of song. Every German immigrant who came to Texas brought with him his love of song. It cheered many a weary frontiersman and brightened the fireside of many a settler. Singing clubs were organized in every settlement. On July 4, 1853, the first Saengerfest was held at New Braunfels. Quite a number of societies organized before the Civil War are still in existence and are still members of either the Texas Gebirgssaengerbund or the Deutsch-Texanischer Staats-Saengerbund (German State Singers' League). To this day annual or biennial song festivals are held.

SONS OF HERMANN AND OTHER SOCIETIES BACK MOVE

The people of Texas owe it to themselves and to the sturdy pioneers of German extraction to build one central monument to their memory, large enough to depict the outstanding services they rendered at San Antonio, at Goliad, at San Jacinto in the fight for liberty, and after independence in the great work they did in the building of the great Lone Star State.

The movement to erect this monument is in the hands of a corporation called Monument Association for the German Pioneers of Texas. Among the board members are Martin Faust, Carl Biebers, Paul J. Hertting, Henry B. Dielmann, C. A. Goeth, G. F. Neuhaeuser, George Haeusler, Robert H. Wagenfuehr, John R. Fuchs, and other prominent men. The Sons of Hermann in Texas, the Catholic State League, the Texas State Saengerbund, the Mountain Singing Societies, the Association of German Societies in Texas, and well-known Texans like the late Gen. Jacob F. Wolters, Charles Nagel, a native Texan, Erhard Guenther, Hermann Ochs, Morris Stern, Ernst Raba, Fred Reutzel, Otto Meerscheidt, Jesse Oppenheimer, Mrs. Otto Koehler, F. C. Weinert, Dr. Biesele, and many others have endorsed the movement.

Mr. Speaker, the German pioneers not alone deserve this monument for their public service in our fight in Texas for liberty but for their plain, hard-working citizenship and orderly building. With their good traits of character, they also paid their taxes for the support of their Government. Their descendants, now numbering several hundred thousand, are proud of their heritage, but are at the same time good, patriotic American citizens. Many of them are the best leaders of Texas and substantially contribute to the welfare of the State and Nation.

HISTORY OF IMPEACHMENT TRIALS

Mr. HOBBS. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include therein a speech I delivered myself.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. HOBBS. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include my speech before the American Judicature Society, at the Mayflower Hotel in Washington, on the evening of May 6, 1936, as follows:

A very serious mistake was made as to this part of the program. You should not have "picked on me", a simple country boy, when my two friends, the other managers on the part of the House, really know something about the subject and were primarily responsible for the success of the prosecution which resulted in the recent purge of the bench. I would not be true to myself nor to your confidence in me if I did not pay my tribute of respect to the Honorable HATTON W. SUMNERS, of Texas, who deserves practically all of the credit for this achievement, who knows more about the law of impeachment, and who has done more to clarify and rectify thought on the subject, than any man I know. I would that he had been invited to speak, instead of the speaker you did select. I am at a loss as to why you have chosen a "green" country boy like me to speak in such august presence, on a subject that has engaged some of the best thought of our profession. I am borne out in my apology by the word of the distinguished man to whom I have just referred. I was in Alabama when the House elected me as one of the managers. When I returned I went to the chairman of the Judiciary Committee, who had influenced the selection, I felt sure, and expressed my appreciation of the honor that had been done me. He said: "Don't be getting the bighead about this appointment—we figured that we needed both feet and heads on this committee, and you are to be the feet!" So you have the feet of the committee before you, and I am bold enough to try to speak to you only because you have wished it on yourselves!

You all know, I am sure, the history of impeachment trials—that they are the gift of Anglo-Saxon civilization. The outgrowth of this particular kind of trial appears in history about the fourteenth century, but we find it in its tribal form much further back than that, through several stages of development, until its emergence about the fourteenth century. For the last 200 years the present form of impeachment trial as we know it has been followed. There has been no change worthy of mention. Therein lies the chance of misapprehension that obtains in the minds of the American people and even of the Senate itself. Originally, and up to the time of the adoption of our Constitution, it was distinctly a criminal proceeding. The punishment ran from mere removal from office, through the confiscation of estate, on up to hanging, drawing, and quartering. With that background we borrowed from England, "lock, stock, and barrel", the parliamentary system of impeachment, but stripped our Senate of all power to punish except by ousting. Therefore it has been here a mere ouster proceeding, with no element of a criminal trial except the form. But that form has been largely responsible for the error in our thinking—the fallacy that this procedure is criminal. The modern trend has been away from that conception, largely by reason of the influence of Judge Sumners.

All through the history of the 12 impeachment trials that have been conducted in this country before the Senate of the United States we see the conflict between these two distinct points of view: (1) That it is strictly criminal in its nature, although without punishment except removal from office; (2) that it is a strictly civil procedure, merely to remove an unfit person from office. I think it is safe to say and remind ourselves that since 1912, with the trial of Robert W. Archbald, that ghost has been pretty well laid. The decision of the Senate in that case, in which no crime nor misdemeanor known to the criminal law was involved in any of the charges, removed that judge from office for misbehavior not amounting to crime or misdemeanor. Since then there may not be again a serious contest regarding the nature and innate character of an impeachment trial. I believe we are all agreed (1) that it is not in any sense of the word a criminal proceeding; (2) that the burden of proof is not on the prosecution to prove guilt "beyond a reasonable doubt", as it is in a criminal trial; (3) that there is no presumption of innocence to be indulged in favor of the respondent, such as attends every defendant in a criminal court; and (4) that judges shall hold their offices only during good behavior. Those four, I believe, we may accept as recognized principles of the modern law of impeachment cases.

In the recent Ritter trial, for the first time in the history of our Government, we saw a conviction on a new article in impeachment procedure. Contrary to what has been said, that article is not a summary, a catch-all, but it is the only article of impeachment that should ever be written. The question is not, as the Constitution itself says, whether or not you will punish a crime, because that is reserved for the courts, irrespective of the outcome of the impeachment trial. We are all interested in the purity of the spring from which justice flows, the judge on the bench. We care little if he be convicted of any criminal offense or no. We are tremendously concerned that one who has brought the bench into scandal and disrepute should be no longer permitted to disgrace it. Therefore there was that thought governing our pens when we wrote the seventh article of impeachment for the trial of Judge Ritter. It simply says that the consequence of his course of conduct has been to bring the bench upon which he sits into disrepute. In support of that charge the other six articles are pointed to as instances of that course of conduct. All the other articles merely point the way to the conclusion. They point to sins, if you please, against various and sundry persons or institutions; but the chief sin and, as I conceive it, the only sin of which the Nation and Senate and the bar need take cognizance is the one against the bench. This is the second contested trial that has gone through all the stages to conviction and removal. While there were two other finished impeachment trials against judges of Federal courts, these two other judges, who have been removed, were not present—their cases were not defended. Of all the nine impeachments of Federal judges, this latest one is the only one in which conviction was upon an article charging this supreme sin of a judge, the sin against the bench. Not only is the conviction of Judge Ritter grounded on the bedrock of justice, but he was adjudged guilty of the gravest judicial sin—disgracing the bench—as charged in the only article which should be used in the impeachment trial of any judge.

The only other consideration to which I challenge you is: What of the future? We all recognize that in this day, with every passing hour, the duties of the Senators become more and more onerous. We should appreciate fully that it is too much to ask of the 96 Senators that they drop their public business, cease to function in any of the multiform ways required of them usually, and postpone legislation, no matter how important, for the time necessary to give full attention to a trial of this kind. It is not in any sense in criticism of the Senate of the United States that a change in the modus operandi is suggested. They lived up to the proud heritage which is theirs, gave us as splendid attention as could be expected, and were, as they always have been, the courteous gentlemen and distinguished statesmen who should occupy the seats of the mighty. They kept the faith. But the thought remains that it is asking too much of them and that there is no necessity for it. Once we cease thinking of impeachment as a criminal trial, we have solved the problem of conducting it as such by the Senate. The constitutional guaranty that every defendant in a criminal case must be confronted with the witnesses against him should not apply to an impeachment trial. If it is not a criminal trial, there is no necessity for bring-'ng all the witnesses to testify in the presence of the whole court and of the accused. I should like to suggest to you as thinking men that no longer in this respect is it necessary to continue that which for 200 years has been the procedure in all impeachment trials. We could, with greater efficiency, entrust the taking of evidence to a committee of the Senate, taking all the evidence that is of vital interest in open court, and the rest by deposition. Time would be conserved. The cost to the Government would be materially lessened. I am perfectly sure the Senators would appreciate the saving of their time and would approach the task with fresher energy and interest. All of the Senators would, of course, read all of the evidence, and their judgment would be just as enlightened and dependable. Such a change in procedure would save nine-tenths of the time of nine-tenths of the Senate.

It is such a pleasure to have been with you, and I hope that your interest will bear fruit in constructive thought and effort which shall make more simple and certain the preservation of the purity, the dignity, the honor of the bench. Pull down the pillars of the temple of justice and we all perish.

ISSUES OF 1936 CAMPAIGN

Mr. TAYLOR of Tennessee. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and to include therein a copy of an address I made before the Republican State convention in Nashville on May 5.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. TAYLOR of Tennessee. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following address, which I delivered before the Republican State convention in Nashville, Tenn., on May 5:

Mr. Chairman and fellow Republicans, it is certainly a very great privilege and pleasure for me to be with you today and behold this fine demonstration of militant Americanism. As I survey this vast audience I fancy I can read in your resolute faces that decree against the so-called New Deal which was pronounced against another regime of unbridled revelry many centuries ago—"mene, mene, teckel upharsin", meaning "thou hast been weighed in the balances and found wanting."

The national campaign which confronts us presents the most vital and important issues to the people of the United States since the old Liberty Bell announced the birth of the American Republic. It is not the customary quadrennial campaign of the past wherein two great political parties, both loyal to the hallowed traditions and institutions of America, vied with each other in patriotic rivalry for mastery. Far from it, my friends! It is a campaign wherein the forces of constitutional government are arrayed in deadly conflict against the forces of a socialistic philosophy, and upon the outcome of that issue depends the very existence and perpetuity of this Republic.

In this campaign the people of this country will decide whether they will remain loyal to the tenets and ideals of liberty and justice handed down to us by an illustrious ancestry or whether they will wander off after the false gods of socialism and ultimate communism and become regimented, blueprinted, and straightjacketed into a system which destroys individual initiative and challenges that sacred philosophy of Holy Writ that man may or shall "eat bread in the sweat of his own face."

Under this system which has been euphoniously denominated the New Deal, there can be no personal independence. The state founded on bureaucratic government dominates everything, person and property alike. It is government by men, in amplified form, instead of government by law, as provided in the Constitution.

With an autocracy in Washington which closely resembles dictatorship, dominating a servile Congress and even daring to threaten the dignity and integrity of the Supreme Court, we wonder what has become of that great instrument promulgated by our fathers, the Constitution of the United States. With this same autocracy entering into competition with and coercing private industry, and undertaking to regulate the daily life of our entire citizenship, we wonder again as to what has become of the Bill of Rights in which we have taken such pride, and about which we have been accustomed to boast as a proud and liberty-loving people. With a so-called government invading the privacy of the mails and the great communication facilities of our land, even to the point of requisitioning correspondence between husband and wife, as has been done recently by two great governmental activities, we wonder what has become of the covenant in the Constitution which guarantees the citizen against "unreasonable search and seizure."

No, my friends, I repeat, this is not a campaign of rivalry between two great political parties such as we have been accustomed to in the past. It is a contest between two conflicting systems, and in this deadly conflict will be found, regardless of past political affiliations, those who believe in the sanctity of private ownership, individual initiative, and personal liberty on the one side, and those who would set up a system similar to that of the Soviets of Russia on the other.

It is already apparent that in this conflict we will find men and women—millions of them—who in the past have followed the precepts of Jefferson, Jackson, and Grover Cleveland with fanatical devotion arrayed with us in our battle for the restoration and preservation of the American system as against this new order that would sabotage the charter of American liberty and erect on its ruins a system which would reduce us to a state of the rankest sort of paternalism, which inevitably leads to stark dictatorship.

My friends, in the present administration we have seen the greatest exhibition of embezzlement of public confidence and misappropriation of public trust that has ever been known since the days of Talleyrand and Machiavelli. We have seen a man elected to the highest office in the gift of the Republic not only boldly repudiate the platform upon which he was elected but advocate and sponsor measures directly in conflict with said platform and his solemn preelection pledges. The question is, Will the people of the United States stand for this betrayal of their confidence? In the light of history, both remote and recent, I do not believe they will thus again be led like sheep to the altar. The American people have always demanded of a public servant a strict accountability of his stewardship. They have always disdained and condemned a breach of faith, and I don't believe they will tolerate it in the present instance.

When the National Democratic Convention met in Baltimore in 1844 the northwestern boundary of the United States was a vital issue. A serious dispute had arisen between Great Britain and the United States as to our northwestern boundary line, England insisting on the forty-ninth parallel of latitude while Uncle Sam said it should be 54.40. The Baltimore convention, by solemn resolution, pledged its nominee, who happened to be a distinguished Tennessean, James K. Polk, to carry out the contention of the United States.

This question was the dominant, the paramount issue of the campaign and the Democrats adopted the famous slogan—"Fifty-four forty or fight." On this issue practically alone Mr. Polk was triumphantly elected. Shortly after his inauguration, however, John C. Calhoun, Secretary of State at the time, negotiated a treaty with Great Britain whereby the United States acceded to the demands of the British Empire, and the 49th parallel was agreed upon and is today our northwestern boundary line. The people of the United States were so outraged and chagrined by this breach of faith that Mr. Polk's name became a byword; and notwithstanding the fact that during his administration the Mexican War was fought and won as a result of which vast and valuable territory was annexed to our national domain, Polk was not even considered for a second term, and the nominee of his party was ignominously defeated in the election which followed. The people of this country simply would not condone this downright betrayal of their confidence, and, in my judgment, the same temper permeates the fiber of our citizenship today.

In 1916 Woodrow Wilson was elected President of the United States on the slogan that he had "kept us out of war." As a result of this false and fraudulent slogan millions of votes were cast for him which would otherwise have been cast for the candidates of the opposite party. On this issue alone millions of conscientious Republicans stultified themselves to vote for Mr. Wilson, and he was elected, but by a very small majority. Yet notwithstanding the solemn assurance that if Wilson were elected the United States would be kept out of the war, within 60 days of his inauguration war was declared and this country was plunged into the greatest vortex of carnage that the world has ever known. But in 1920 the American people, smarting under the betrayal of 4 years before, went to the polls and smote "hip and thigh" the candidates of the party that had deliberately violated their confidence in 1916.

In 1932 Mr. Franklin Delano Roosevelt, as a candidate of the Democratic Party, not only subscribed 100 percent to its platform adopted in Chicago, which he declared was a "sacred covenant with the people", but during the campaign he repeatedly solemnly asseverated his determination to strictly observe and discharge the mandates of that platform. The platform adopted by the Democratic convention in 1932 is a high-class, constructive document, and there is no doubt that it had a strong appeal to the voters of the country. They supported Mr. Roosevelt, confidently expecting him to carry out the provisions of that platform in perfect good faith, as he solemnly obligated himself many times to do.

What does the record show?

The platform adopted at Chicago in 1932 emphatically declared for economy in government, pledged the party to the elimination of bureaus and commissions, and in the most explicit and specific terms committed it to a 25-percent reduction in governmental expenses. In the very teeth of this injunction of his party his administration has created more than 100 bureaus and commissions, to obtain titles for which the English alphabet has been abused and exhausted, adding to the Government pay roll more than 400,000 full-time employees. In March 1933 Secretary Wallace began his administration of the Department of Agriculture with an organization of 26,000 employees. Up to the day that the Supreme Court consigned to the scrap heap the A. A. A., Wallace had increased this number to 66,000 full-time employees. The Civil Service Commission estimates the average salary of these Government employees as $150.50 per month. This means that the New Deal pays out of the taxpayers' money to this one group alone an annual salary of $120,824,916. And, in addition to this army of full-time employees, Mr. Wallace has organized a field force of part-time employees of 115,366, drawing, according to the August report of the Civil Service Commission, an average of $28.83 per person per month. This makes a grand total in this one Department alone of 182,355 employees, or 40,000 more than the entire standing Army of the United States.

The personnel of all other governmental agencies has been augmented to similar proportions, thus further burdening the already exhausted taxpayers of the Nation.

To promote the more abundant life the eminent New Deal magicians prescribed the reduction of crops, the destruction of food products, and the birth control of pigs and calves. They prescribed the lowering of our tariff walls and the negotiation of reciprocal treaties. And, behold, as a result of these nostrums alone, we have not only lost our foreign market, but we have seen the cost of living skyrocketed from 50 to 100 percent. This idiotic policy has not only robbed the American farmer of his foreign markets, but it has irreparably damaged his domestic market as well. Last year, 1935, under Roosevelt and the New Deal imports to the United States increased 24 percent, while our exports increased only 7 percent.

My friends, ponder these astounding figures for a moment: In 1932 this country sold 54,879,000 bushels of wheat to foreign countries, valued at $32,684,000. In 1935 this country sold to foreign countries only 232,965 bushels of wheat valued at $212,231. In 1932 the United States sold 7,886,000 bushels of corn to foreign countries, valued at $2,815,000; whereas in 1935 we sold to foreign countries only 117,382 bushels of corn, valued at only $66,157. In 1932 this country purchased from foreign countries 13,856 tons of hay valued at $96,000. In 1935 we purchased from foreign countries 67,171 tons of hay valued at $664,667. The increase of imports from Canada to the United States is a concrete example of the baneful effects of these trade agreements on American agriculture. Permit me to give you the figures for the month of January 1935, as compared with January 1936:

Product	Imports	
	January 1935	January 1936
Fresh pork	$4,386	$76,010
Cattle	54,483	457,962
Cheese	7,863	96,727
Horses	15,315	98,500
Turnips	45,124	118,757
Potatoes	2,414	27,853
Milk powder	9,387	28,348
Fresh beef	4,097	23,713
Bacon and hams	8,223	21,623
Wool	7,110	159,398
Poultry	698	7,359

And yet, in the face of this dismal and alarming picture, the New Dealers continue to carry on this stupid policy, which, in its final analysis can only spell doom to the American farmer.

This deluge of foreign importations is by no means confined to agricultural products. The increase in industrial importations is even more ominous. For instance, in 1932, we imported from Japan 58,000 square yards of bleached-cotton cloth. In 1933 we imported from Japan 30,000,000 square yards of this same material, an increase of more than 500 percent.

When you consider that a cotton weaver in Japan is paid a daily wage of only 21 cents, it is easy to understand the wherefore. And what is true of Japan likewise applies to Germany, Italy, Czechoslovakia, and other European and Asiatic countries where low standards of living and pauper wages prevail.

The factories and farms and the laboring classes of America can only be saved from this flood of cheap merchandise by an old-fashioned, William McKinley protective tariff.

When Mr. Roosevelt entered upon his administration, as a Representative in Congress I felt obligated to support his program so long as it did not run counter to my conscience and my conception of my patriotic duty. With considerable reluctance I supported the N. R. A. in the hope that it might contribute to the solution of the depression and promote recovery. At that time I did not have the remotest dream that the administration, through this agency, would attempt to regiment and dominate the entire business structure of the Nation. At that time it never once occurred to me that through this instrumentality the Federal Government would set up a bureaucratic dictatorship in Washington and undertake to suspend the constitutional rights of individuals and prescribe what industry could or could not do to the remotest detail.

The American Bar Association has recently reported that "the N. R. A. agency alone issued more than 10,000 pages of pronouncements intended to have the force and effect of law; that in 1 year of time they issued regulations and alleged laws exceeding the volumes of all the Federal statutes passed during the life of the Republic."

As a result of the drastic provisions of the codes thus set up and the threat of prosecution and imprisonment thereunder, tens of thousands of industries and hundreds of thousands of citizens submitted to the imperious dictates imposed upon them by the agents of our paternalistic government, and Government spies swarmed throughout the United States even as did the locusts and frogs in Egypt during the reign of Pharaoh. Many of the things done during this reign of terror were even more ruthless and destructive of liberty than anything done by Stalin, Hitler, or Mussolini. This high-handed tyranny was carried on in the name of "necessity." One hundred and fifty years ago that great statesman and patriot William Pitt said:

"Necessity is the plea for every infringement of human freedom. It is the argument of tyrants. It is the creed of slaves."

In the name of "necessity" an honest man was arrested and sent to jail for having hired men at a price satisfactory to them, to assist in repairing automobile batteries; a poor woman engaged in her own house in decorating tin cans to be used as flower pots was threatened with prosecution and forced to discontinue these endeavors whereby she was supporting herself and five fatherless children; citizens were arrested and fined for shipping the products of their own toil; a poor New Jersey tailor was arrested and thrown in prison for pressing a pair of pants for 5 cents less than the price fixed by the Code Napoleon of Roosevelt; men were threatened with fine and imprisonment for selling milk to starving babies at a price less than that fixed by a group of milk-dealing autocrats; an American citizen was arrested, fined, and threatened with imprisonment for refusing to buy a sick chicken in violation of a code regulation set up by a group of arrogant chicken-dealer czars.

In an attempt to go along with the administration on emergency measures I voted for the Triple A, which was recently "thrown out of the window" by the Supreme Court of the United States; but when I voted for it I never dreamed that it would be used as an engine of tyranny and oppression. When I voted for this measure it never occurred to me that under its authority an autocratic Cabinet officer would undertake to satisfy the hunger of the land by the cruel and inhuman slaughter of 6,000,000 suckling pigs and undertake to inaugurate a system of birth control among the sisterhood of sows of the Nation.

When I voted for the Triple A I certainly did not realize that the Treasury of the United States would be exploited and prostituted in rewarding people for indolence by paying them for not raising anything. It certainly never entered my mind that two sugar planters would be paid over $2,000,000 for not raising sugarcane; that a cotton farmer in Texas would be paid over $200,000 for not raising cotton; and a single hog farmer would be paid $220,000 for not raising hogs. I never dreamed that a citizen of Kentucky who owned a vast farm consisting of 4½ acres and who fed his hogs the garbage he gathered from hotels and restaurants would be paid the sum of $113,000 to curtail his hog production.

More than $1,100,000,000 of the taxpayers' money was worse than wasted on this scandalous crop- and stock-reduction insanity.

Is it any wonder that Mr. Wallace declines to give publicity to the names and the amounts paid out of the Peoples' Treasury to the recipients of this woeful and wanton extravagance? His explanation that such publicity might subject the daughters of the farmers receiving these fat Government checks to kidnapers shows the feeble state of the mentality of this prince of boondogglers.

But as a crowning act of stupidity, a supine and complacent Congress, at the behest of the "brain trusters", passed the late-lamented potato-control bill, better known as the "spud" bill. I must say, my friends, that while I sincerely desired to go along with the administration in its so-called recovery program, I simply could not swallow this piece of absurd and assinine legislation, and I accordingly voted against it. When it came to supporting a bill which would send a man to jail for raising potatoes in his own back yard, and which would fine and imprison an American mother for buying potatoes not wrapped in cellophane and not stamped and certified by the Secretary of Agriculture, I thought it was high time to call a halt.

But, alas, my friends, the potato turned out to be entirely "too hot" for the administration, and the law to regulate its production and distribution is now no more. Under the withering ridicule and indignation of an outraged people, and especially under the threat of the vengeance of the Supreme Court, at the earnest request of the White House, a pliant and submissive Congress a short time ago ruthlessly cut down this youthful and promising New Deal agency, along with its triple sisters, the cotton and tobacco enactments, and now they lie alongside the three A's and the blue eagle on the pitiless "cooling board", and "none are so poor as will do them reverence."

You can imagine the chagrin and humiliation of those Congressmen who, under the Executive whip, voted for these un-American measures only a few months later, under the same lash, to be compelled to vote for their repeal. I said imagine the "chagrin and humiliation." As a matter of fact, these administration Congressmen have become so calloused by the Executive saddle that their withers are so galled that they have perhaps lost their sense of chagrin and humiliation.

I have supported every measure that has been proposed by the administration to relieve unemployment and human suffering in the United States, but these vast billions have been so dissipated in boondoggling practices that the problem has been aggravated rather than reduced.

In his annual message to the Congress on January 4, 1935, the President said:

"The Federal Government must and shall quit its business of relief. I am not willing", said the President, "that the vitality of our people be further sapped by the giving of cash or market baskets, or a few hours of weekly work cutting grass, raking leaves, or picking up papers in the public parks."

Mark you, these are the words of the President of the United States—Franklin Delano Roosevelt!

This clarion declaration was received by the joint session of the Congress with tremendous applause. Mark you, this announcement was made after the Congress, at the President's request, had voted him the colossal sum of $3,300,000,000, which had been squandered with no appreciable results.

However, since that heartening declaration was made, upon his urgent demand, the Congress voted him an additional $4,800,000,000, most of which has already been "poured into a rat hole" and now he comes back asking for $1,500,000,000 more.

Has human misery in the United States been assuaged? Only temporarily. True, we have had a succession of "shots in the arm", but when the exhilaration following these hypodermics died away, another shot had to be immediately administered; and the poor old pump has been worn out completely by successive and excessive priming.

Has unemployment been banished? Far from it. Notwithstanding his solemn promise during the campaign to provide a job for every idle man in the United States, we have practically as many unemployed in the United States today as we had when this smiling Lochinvar "came out of the East" and was inaugurated. According to a recent statement of the American Federation of Labor, there are 12,625,000 people in the United States out of work now, and the number is increasing daily.

My friends, I doubt if my words will penetrate beyond the confines of this convention chamber; however, I want to say that if we continue this orgy of waste, this accumulation of public debt, we are not only headed for early inflation, but it will be a question of a very short time until repudiation will follow, just as it did in Germany.

When Woodrow Wilson was inaugurated as President of the United States on March 4, 1913, our entire public debt was only $1,193,645,042. When Mr. Wilson retired from the Presidency on March 4, 1921, our public debt had mounted to $24,045,136,549. Due to the economic and businesslike methods of the Harding and Coolidge administrations, in 8 years this staggering public debt was reduced to $17,344,872,799. When Mr. Hoover left office on March 4, 1933, our public debt had been increased to $20,937,350,964, but this difference represents the financing of the Reconstruction Finance Corporation and the Farm Board, two Federal agencies of sound economic merit. On April 15, 1936, due to the wild extravagance of the Roosevelt administration, our public debt aggregated $31,453,296,162, and, according to an estimate of Budget Director Bell, on June 30, 1936, our national indebtedness will be $34,500,000,000.

Just how long our financial structure can stand this strain, with a net deficit of $10,659,171,911 as of April 15 of this year, no one can predict.

The cost of government—and I refer to Federal Government alone—has almost doubled during the past 3½ years. In 1933 the per-capita cost of Federal expenses was $40.91, the Federal per-capita tax was $179.32, and the number of persons on relief was 20,500,000. At the present time the per capita of Federal expense is $75, the Federal per-capita debt $250, and the number on relief is 24,200,000.

The Federal Government today is spending $20,000 every minute and is going in debt $10,000 every minute. We are building up a terrible Frankenstein of public deficit, which sooner or later, if continued, will overwhelm us.

In a speech before the Congress in March 1933 President Roosevelt said:

"Too often in recent history liberal government has been wrecked on loose fiscal policy. We must avoid this danger."

Recently one of the outstanding economists of the country sounded this emphatic warning:

"So far the Government has been able to borrow the $10,000 a minute that it is spending beyond its income—to borrow from wealthy investors, from insurance companies, from colleges, hospitals, and from the banks. These institutions already own over 60 percent of the outstanding Federal Government bonds. But to whom does the money of these institutions belong? To 47,000,000

bank depositors and to 65,000,000 insurance policyholders. When the Government can no longer borrow to pay its current bills, then real inflation will begin, financial chaos will follow, and the life savings and family protection of a great cross-section of the American people will be wiped out."

In frenzied accents Mr. Roosevelt calls upon private industry to come to his succor. Private industry, after being browbeaten and bulldozed for 3 years; private industry, that has been subjected to the rack and the thumbscrew of governmental coercion, intimidation, and competition; private industry, that has been cowed to a point that it has lost its morale, and with confidence gone, is now expected to "turn the other cheek" and shoulder the burden of unemployment and recovery. I sincerely hope it responds, but with business demoralized and with markets completely sacrificed or on crutches; threatened with a tax bill which, if enacted, will seriously penalize their thrift and capital structure, and with no bona-fide assurance of Government sympathy and cooperation, the prospects are, indeed, desolate and gloomy.

When I supported these gigantic appropriations for relief and recovery it never occurred to me that the proceeds would be wasted in chasing rainbows and in boondoggling tomfoolery. It never entered my mind that the New Dealers would essay to emulate the example of the celebrated King Kanute by squandering millions in a futile effort to harness the Atlantic Ocean by means of the now famous Passamaquoddy hoax. In the face of the findings of the Army Engineers that such a project is not only fantastic but impossible, these boondoggiers have already spent five millions on Quoddy, and would go through with their iridescent scheme but for the avalanche of ridicule that has come up from all parts of the country. The hundred-and-sixty-million Florida canal is just as visionary, just as futile, and just as lousy. The "red house" settlement in West Virginia belongs in the same category, together with the weird and desolate homesteading of farmers in sight of the aurora borealis in frozen Alaska. This adventure has already proved to be a dismal failure, as have many others too numerous to mention.

But in reciting some of these boondoggling experiments we would feel remiss if we did not call attention to the magnificent $25,000 bathhouse for the use and benefit of wayward dogs at Memphis, Tenn. This elaborate facility, with its porcelain compartments and tessellated floors, is certain deserving of special notice, for it is there that the truant Pekinese, the poodle, the fox terrier, the great Dane, and the just plain dog are taken in, given a bath, a permanent wave, has his toenails manicured, and fed hot tamales and other delicacies while men, women, and children, poorly clad, walk the streets without food or shelter. "O ye of little faith!" How can you have the temerity to challenge either the wisdom or the righteousness of this utopian pipe dream.

But, my friends, probably the most scandalous and reprehensible feature of this entire performance is the stark and repulsive fact that this administration is actually playing politics with human distress and human misery. In the administration of this so-called relief it is an established fact that no job of any importance may be held by anyone who does not subscribe 100 percent to the New Deal fallacy, and before one can obtain employment even as a common laborer he must submit to a searching catechism testing his political faith; and if he does not answer the questions satisfactorily, "woe be unto him, for his name is Dennis."

The major part of these huge appropriations has been consumed in extravagant overhead, red-tape administration, fat salaries to the faithful, and the construction and maintenance of political fences at the shameless expense to those victims of the depression for whom it was intended.

Political corruption in the past has been confined to local political subdivisions. For the first time in our history we have beheld the sad and disgraceful spectacle of a national organization penetrating all parts of our country in a deliberate effort to debase the morale and debauch the people as a whole. The maladministration of relief has perhaps not been quite as flagrant and vulgar in Tennessee as elsewhere, but it has been bad enough here. The whole Nation has been shocked by the scandalous revelations recently brought to light in Pennsylvania, New York, Michigan, West Virginia, the State of Washington, and elsewhere throughout the country. Rottenness and corruption of the most putrid and venal sort have been shown to permeate and characterize the system from Maine to California. The entire set-up is honeycombed with partisan politics and favoritism such as would have amazed Boss Tweed and bring a blush even to the cheeks of the Tammany Tiger.

Listen to this:

PHILADELPHIA, PA., *March 14, 1936.*

DEAR COMMITTEEMAN: Contact all houses in your division and get the names of all men on relief, also all those holding W. P. A. jobs. Urge them to register Democrat on March 25 or lose position.

(Signed) CHAS. MCDONALD,
Democratic Leader, Fourteenth Ward.

Listen to this from the State of Massachusetts:

"I have sent your name through for highway work. If you are not a registered Democrat, kindly visit the town clerk before 5 p. m. March 18 and have your designation changed to Democrat."

On the floor of the United States Senate 10 days ago Senator HOLT, Democrat, of West Virginia, delivered a ringing speech in which he read scores of letters, telegrams, and affidavits revealing the sordid, wholesale abuse, and misappropriation of Federal funds intended for relief in his State. A letter written by a prominent Democratic mayor, which was typical of the rest, was read by the Senator, and is as follows:

"It is my opinion that there is not a man or woman in this county, regardless of party affiliation, who is of ordinary common sense and who has made any observation whatever, that does not realize fully that this relief measure as it is being administered is deeply steeped in politics and almost void of results actually intended. Of course, there are many who will not openly express themselves, because they are fearful to do so."

This loathsome practice has been shown to be general throughout the United States, and plainly shows the depths of degradation to which those "hell bent" on the continuation of the New Deal orgy will descend. In some of the States it has been the practice to demand 4 percent of their pay checks from W. P. A. workers as a political contribution. Just recently my attention was called to an editorial in a country newspaper in East Tennessee, in which it was asserted that such a practice was being enforced in the county in which the newspaper is published.

My friends, I could go on for hours reciting the crimes that have been committed by the present administration in Washington subversive of the rights, liberties, and welfare of the American people, but I must not further impose upon your patience.

In conclusion, let me remind you again that this is not the customary bout between Democrats and Republicans. This is a battle to vindicate and preserve constitutional government. In Russia they sing the Internationale. If they like it, that is their misfortune. In France the welkin rings to the inspiring strains of the Marseillaise. That's their privilege. In Germany it's "Deutschland über Alles." So mote it be. In Italy it's "Viva Mussolini", and that's their affair. In England it's "Long live the King", and I have no objection to that. But here in America, for the sake of ourselves and for the sake of our posterity, let's continue to sing the Star-Spangled Banner: let's continue our allegiance to the Constitution and never falter in our faith in the inspired wisdom of our fathers, who set up here on these shores this Nation, which has survived five wars and their attendant upheavals and resultant dislocation—this government of the people, by the people, and for the people.

THE RIGHT TO KNOW

Mr. MAPES. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and to include therein a radio address made by my colleague the gentleman from Michigan [Mr. MCLEOD] last Tuesday evening.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. MAPES. Mr. Speaker, under the leave to extend my remarks in the RECORD I include the following speech of Congressman CLARENCE J. MCLEOD, of Michigan, on the Right to Know, over network of the National Broadcasting Co. from Washington, D. C., May 12, 1936:

Just as education is the keystone to civilization, enlightened public opinion is the bedrock upon which the foundation of good government must rest, otherwise it cannot endure as an efficient, responsive tool in the carving of their own destiny by a people.

The germs of oppression and dictatorship can never thrive in the bright light of a well-informed public. They may sometimes gain a temporary foothold but will always wither and fade under the scorching rays of intelligent public opinion.

The self-governing genius of the American people is found in our national capacity for news. Newspapers with more than 38,000,000 circulation are printed daily in every corner of the land. Day and night the press agencies operate to bring latest news flashes to millions of homes.

These news services are the very foundation pillars that link an enlightened public opinion to the structure of our Government. They constitute the surest safeguard for every fundamental right of citizenship.

When we find someone chipping at these pillars of information, trying to color, to distort, or to suppress facts, we find someone who does not believe in the right of the people to possess the knowledge upon which self-government is built.

In foreign lands public knowledge is a limited privilege. In our country it still remains an inalienable right, guaranteed by the basic law of the land.

In spite of this sacred guaranty, we have had 3 years which have been made conspicuous by the destructive activities of those in official life who do not believe the people have a right to know what is being done by their Government.

An outstanding news commentator recently exposed efforts by the President to influence newspaper owners and publishers to discontinue articles criticizing waste and mistakes of the New Deal. As we know, the President failed in those attempts. He did not stop there, however; and to use that writer's own words as they appeared in a recent newspaper, I quote:

"The President has set in motion a campaign to discredit, if possible, the effectiveness of those Washington correspondents who write articles critical of his administration."

This astounding revelation is one of the most recent developments in the New Deal campaign to void the people's right to know what is being done by their public servants.

Some time ago a resolution was adopted by the Board of Investigation in the Department of Commerce, exposing the shortcomings of the Department and censuring its officials for opposing legislation to prevent repetition of the *Morro Castle* and *Mohawk* disasters, in which hundreds of lives were sacrificed.

The officials responsible for the release of this resolution to the press were summarily dismissed from office without even a hearing, in spite of their civil-service status.

It will be recalled that 2 years ago Mr. Roosevelt tried to take business leaders into camp by the creation of a Business Advisory Council for the Department of Commerce. This Council was to meet periodically, study conditions, and put its conclusions into printed form. It has done so; but have any of those reports been made public by the administration? No; they have not. One found its way out of the secret archives of the Department of Commerce, but, I repeat, it did not reach the newspapers with the consent of the Roosevelt administration.

Most of us will remember that only a few months ago Mr. Roosevelt was announcing over the radio, at press conferences, and everywhere else, that the Treasury deficits were growing smaller. But what have we learned since? Only a week ago Secretary Morgenthau appeared before the Senate Finance Committee to testify concerning the pending tax legislation which Mr. Roosevelt had previously declared would not be necessary. Mr. Morgenthau could not well discuss the need for revenue without answering questions concerning the Treasury's condition. Quite unwillingly, I believe, Mr. Morgenthau let the fact be known that the prospects of the Treasury in this fiscal year include a probable deficit of $5,966,000,000, the largest deficit in peacetime history.

Because of his first-hand knowledge, Gen. Johnson Hagood a short time ago was requested by a congressional committee to give his opinion on Federal-relief spending. He gave the committee his honest views on the administration's policy of waste, which policy made it almost impossible for him to secure funds for essential repairs while the supply of money was plentiful for needless garden walks and other frills. His subsequent persecution by Mr. Roosevelt for merely telling the truth will remain as one of the dark stains on the record of this New Deal venture.

Last September the Department of Agriculture compiled a thorough study intended for public consumption entitled "Cotton Production in the United States." Because various sections of this study contained devastating disclosures showing the harmful results of the A. A. A. with respect to cotton and agricultural labor, the original document was quickly suppressed, even though it had been signed by the Secretary of Agriculture himself.

It is hardly necessary to add that the carefully revised report which was finally made public contained none of the facts which exposed the blunders of the New Deal agricultural program. The facts surrounding the suppression of this document would still be one of the many dark secrets of the present administration were it not for a resolution introduced in the Senate last February calling for a copy of the true and original, uncensored and unexpurgated document.

The Washington bureaucrats are fast assuming the airs of absolute autocrats. What is being done by the people's Government with the people's money is becoming more and more of a mystery.

All through the 32 months since Mr. Roosevelt took office we, the public, have been told just as little as possible about the inner and experimental workings of our Government, unless—and I want to emphasize this—that the facts which were turned over to the propaganda machine for distribution showed information which could be used by the New Dealers in their incessant policy of deception and gross exaggeration.

The public today would not know of the huge sums of money paid to a few of the friendly and wealthy individuals and corporations out of the funds appropriated for the farmers, if it had not been for the stubborn and determined fight recently waged in the Senate. This fight forced the Secretary of Agriculture to disclose what was being done with this money, the people's money, presumably appropriated only and exclusively for needed farm relief.

The whole mantle of secrecy and suspicious aversion to legitimate requests for information, which hangs like a pall over Washington today, is so utterly alien to every American principle that it is difficult for us to realize that it exists, even when we are confronted with the undeniable proofs.

Who is there today, however, except a select little clique of New Deal leaders, who can tell what is being done with the $2,000,000,000 of the people's money which was turned over to the Secretary of the Treasury to manipulate as he sees fit for stabilization purposes?

Who is there, outside of the New Deal high command, who can tell what information of vital interest to the people is contained in the countless suppressed reports on Government activities?

Every few days we in Washington hear of some new instance where still another Government report has been suppressed. These frequent rumors create suspicion. The reason for the suspicion is found in the fact that every time one of these suppressed reports leaks into the newspapers, information exposing more New Deal fiction and blunders is invariably found.

Instances of suppression, where facts have been deliberately withheld that should be known to the people, are too numerous to describe in detail.

Even requests by representatives of the people in Congress for essential information to help in formulating new legislation run up against the stone wall of New Deal arrogance and suppression.

The Congress has been considering another huge appropriation bill to provide relief for those in distress. Last summer, the President requested his close personal friend, Gen. Hugh Johnson, one of the originators of the New Deal, to administer Federal relief in New York City. Upon completion of his term of service, General Johnson submitted a report on Federal relief spending which was promptly suppressed. It was suppressed because it contained many derogatory facts about waste and relief spending that did not provide relief, and, further, because these facts of corrupt waste, if known to the people, would further arouse righteous indignation.

So that the Congress might institute corrective measures for the truly important problem of greater relief for the needy, I introduced a resolution of inquiry, requesting that the House of Representatives be furnished with a copy of this report. The resolution was promptly rejected by the subservient New Deal majority.

During the present Congress there have been 23 requests for information made under the "resolution of inquiry" rule of the House of Representatives. All but three of these requests have been promptly suppressed by the present Roosevelt-controlled Congress.

There is no real difference in the type of suppression that tries to keep information from the press and the censorship that keeps facts from the people's representatives in Congress. Both keep the people ignorant of the facts which they are entitled to know.

To those who may still feel inclined to doubt that their security and the security of those near and dear to them is being threatened by the New Deal's long succession of blunders, I would like to suggest that the present week is a most opportune time for reflection. This week, having been dedicated to social security in its truest sense, it is most fitting that a careful inventory be taken at this time of those actions of the administration which have a bearing on the security of the people.

This week, above all other weeks of the year, has been set aside as life-insurance week, a week of meditation on not only our own social security but the social security of our dependents.

You, Mr. Citizen, who labor for a living, what is your life-insurance policy worth, the policy that you have been buying for the past number of years, buying with hard-earned dollars worth 100 cents, buying with the thought of the social security you were hoping to bequeath your closest kin, your aged wife, your dependent children; what is that policy going to be actually worth in real value when it is finally surrendered? We know today that the 100-cent dollar that you were investing in, and investing with, is only worth 59 cents.

Insurance week is, indeed, the time to meditate, and meditate well, while we still have time to pick up the threads of real security before the insane antics of the Roosevelt administration entangles them to the point where social security will become only a vague myth of tradition.

I know that it is only human to make honest mistakes. Mistakes cannot remain honest, however, when they are repeated time and time again under the deceptive cloak of secrecy. We must remember that the security of an entire nation of nearly 130,000,000 people is at stake, and we must not forget that that security depends in a large degree upon the ability of the people to exercise their inherent right of suffrage, to correct mistakes in matters of government. That ability and that inherent right to correct is shattered when the people lose their right to know about their Government and their public servants.

I am not one of those alarmists who believe that we have already lost that right.

Neither am I one of those who, blind to the unmistakable trend of events, refuses to see the ultimate danger that lies in the ever-growing campaign being waged by the New Dealers to hide their blunders and allow the people to see only the favorable side of the policies and actions of their public servants.

In this address I am not going into the numerous costly mistakes Mr. Roosevelt's New Deal administration is making—I am pointing out briefly something far more serious than administrative blunders—something now only in its infancy, but something, my friends, that if permitted to mature, will prove fatal to our right to know; and, of course, if that happens, freedom of the press, freedom of speech, and every other form of freedom guaranteed by the Constitution will become a hollow mockery.

The situation calls for a vigorous and continuous counterattack on official threats against the people's right to know. If the long struggle for this basic right teaches one thing more than another, it is that constant vigilance is the price we must pay if we wish to retain those cherished heritages that are the birthright of every American.

EXTENSION OF REMARKS

Mr. BANKHEAD. Mr. Speaker, I wonder now that we have declared at least a temporary armistice if we could not blanket these requests?

Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to extend their own remarks in the RECORD.

Mr. BACON. Mr. Speaker, reserving the right to object, would that include one's own remarks made over the radio?

Mr. BANKHEAD. I think not.

The SPEAKER. The Chair thinks not.

The gentleman from Alabama asks unanimous consent that all Members may have 5 legislative days within which to extend their own remarks in the RECORD. Is there objection?

There was no objection.

THE LATE BRIG. GEN. ROBERT H. DUNLAP

Mr. MAAS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 7110) to authorize the President to bestow the Congressional Medal of Honor upon Brig. Gen. Robert H. Dunlap with a Senate amendment, and concur in the Senate amendment. I may say by way of explanation that this merely amends the title.

The Clerk read the title of the bill.

Mr. WADSWORTH. Mr. Speaker, reserving the right to object, may I ask if this is the bill which passed the House authorizing the conferring of the Navy Cross instead of the Congressional Medal of Honor?

The SPEAKER. The Clerk will report the Senate amendment.

The Clerk read the Senate amendment, as follows:

Amend the title so as to read: "An act to authorize the President to bestow the Navy Cross upon Brig. Gen. Robert H. Dunlap, United States Marine Corps, deceased."

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The Senate amendment was agreed to.

A motion to reconsider was laid on the table.

PERMISSION TO ADDRESS THE HOUSE

Mr. CASTELLOW. Mr. Speaker, I ask unanimous consent that on next Monday, after the reading of the Journal and the disposition of business on the Speaker's table, I may be permitted to address the House for 15 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. TREADWAY. Mr. Speaker, I ask unanimous consent that on Monday next, at the conclusion of the address of the gentleman from Georgia [Mr. CASTELLOW], I may address the House for 20 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

WORKS PROGRESS ADMINISTRATION IN MISSOURI

Mr. COCHRAN. Mr. Speaker, on the day the deficiency bill was passed Mr. SHORT, of Missouri, in the course of his remarks was permitted to place in the RECORD a letter he received from R. Newton McDowell, a general contractor, whose headquarters are at Kansas City, in which he criticized the Works Progress Administration in my State. Mr. Speaker, I am one Member of Congress who has faithfully tried to keep politics out of relief work. I feel that no matter who applies for a job, if the applicant comes within the policy of W. P. A., then every effort should be made to place the applicant regardless of politics. In every letter I have written to those applying for such work I have told the writer a letter from a Congressman is not and should not be sufficient to secure an applicant work. I take the position we appropriated the money for people in distress and I want to see it spent for people who are in need.

When I received the same letter from Mr. McDowell I sent it to the Administrator of W. P. A. in Missouri, asking for an explanation, and I have received his reply. I have talked with Mr. SHORT, and he agrees that I should place the letter in the RECORD.

Mr. Speaker, I ask unanimous consent to insert the letter in the RECORD at this point.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

The letter referred to follows:

FEDERAL WORKS PROGRESS ADMINISTRATION,
Jefferson City, Mo., April 1, 1936.

Hon. JOHN J. COCHRAN, M. C.,
House Office Building, Washington, D. C.

DEAR CONGRESSMAN COCHRAN: I wish to acknowledge receipt of your letter of March 30 enclosing file you received from R. Newton McDowell regarding W. P. A. set-up in Missouri.

I have read enclosures carefully and want to state that McDowell is very careless about the way he handles facts of the case. We have been trying to get McDowell to take W. P. A. employees off our pay rolls and put them to work on his contract jobs, but this he seems adverse toward doing; having made some wild promises at the time certain county-bond elections were being voted.

Mr. McDowell would rather criticize than be helpful. As far as criticism is concerned, I think constructive criticism is good for any program, but, knowing McDowell as I do, I am always looking for McDowell's angle, and after this is once located you can generally put your finger on the trouble.

Mr. McDowell fell out with the Works Progress Administration program when I said "no" on a proposition that was set up in the following manner:

I am quoting from a letter that Mr. McDowell wrote to Mr. P. H. Daniells, division engineer of the State highway department, July 1, 1935:

"As you probably understand, the relief program is worked out on a basis of $1,150 per year per man, which includes his pay of $32 per month, with a balance left to pay for supplies, etc. In our case, we would be furnishing a plant, switch tracks, stock-pile sites, steamboat, barges, and all necessary equipment to handle this tonnage. The State would pay $9,200 in freight on the stone moving to Weldon Springs, with no freight to be paid for sand. In short, by using Mr. Murray's organization and our facilities, which will be paid for by the Government, you will be furnished with 78,000 tons of sand and stone in stock piles at point of use for the very ridiculous price of about 11 cents per ton.

"It strikes others, as well as myself, that Mr. Murray will be hard put to find worth-while projects, and I believe this one fills the bill. None of us yet are certain as to how these projects are to be initiated, but if this one appeals to you, it seems to me that the logical method would be for you to put this project up to Mr. Murray's organization in St. Louis."

Also, quoting from statement attached to McDowell's letter of July 1, 1935:

"Total of 400 men employed for 3 months in producing and hauling to stock-pile sites at Weldon Springs of 78,000 tons of material for bridge and 40 TR—46,000 tons of stone and 32,000 tons of sand. The relief program permits an allowance of $1,150 per year per man to cover wages and materials. On this basis, 400 men for 3 months' work would afford an allowance of $114,000, of which each man for this period would receive $96, or a total labor bill of $38,400, leaving a balance available to pay us for our facilities about $76,000.

"The State will pay freight rate of 20 cents per ton on 46,000 tons, or $9,200—no freight on sand. We will be paid $76,000 for services rendered to the Government."

I could not see my way clear to paying McDowell $76,000 for alleged "services rendered to the Government."

In the case of the Glasgow Special Road District in Howard County, in which county McDowell says he has a contract, I have a statement from the three commissioners of the Glasgow Special Road District, L. S. Jackson, F. L. Ferguson, and Rice A. Maupin, that McDowell made threats to them that if they did not vote a bond issue and spend the bond issue through P. W. A., he would see that no roads were built in the Glasgow Special Road District. Work in this district is being performed by the W. P. A. at this time, and the other day Mr. McDowell decided that the W. P. A. workers on quarry project of this special road district were just the type of men that he wanted on his job and offered to take these men off W. P. A. rolls, when we have plenty more on the rolls exactly the same as those he selected.

We now have in operation in the State of Missouri over 1,100 projects, some of which are working in the immediate vicinity where McDowell has contracts; and while I have not personally gone over the projects in that locality, my reports from this territory indicate that the work we are doing with W. P. A. labor is better than the work being done under contract by McDowell.

I wish to thank you for your inquiry in this matter, and am returning herewith papers forwarded with your letter.

Very truly yours,

MATTHEW S. MURRAY,
State Administrator.

THE LATE HARRY C. STEVENS

Mr. CHRISTIANSON. Mr. Speaker, I ask unanimous consent to proceed for 3 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. CHRISTIANSON. Mr. Speaker, I feel that it is appropriate that we should take note of the passing of Harry C. Stevens, the dean of Washington newspaper correspondents,

who, for 42 years, represented the Minneapolis Journal at the Nation's Capital. He died last Sunday and on yesterday was carried to his rest by Members of this House and former associates in the press gallery.

For two generations Mr. Stevens saw and recorded history in the making. He was the friend and confidant of every man who has served as a Representative or a Senator from Minnesota and its neighboring States since 1892, when he joined the staff of the Journal—the only newspaper on which he ever worked.

Among his old cronies were such men as Senator Knute Nelson, whose memory my State reveres; "Uncle Joe" Cannon, who once held tight the reins of this House; and Herschel V. Jones, the late publisher of the Journal, to whom he was more than an able and trusted employee.

He knew Elihu Root, William A. Day, and many other Cabinet members intimately, and as a journalist saw the procession of Presidents from Benjamin Harrison to Franklin D. Roosevelt.

He wrote the day-by-day history of Washington during two wars and noted the steps by which a half-grown nation marched to empire. He witnessed also the steady development of the Federal Government from its once modest proportions into the present labyrinth of departments and bureaus; and because he had watched the growth he knew and understood, as few others, its structure and functions. He "covered" President Coolidge during the latter's vacation in the Black Hills and was one of the newspapermen who stood in line and received the little slips of paper on which was typed the wise, though cryptic, announcement, "I do not choose to run in 1928."

As a newspaperman Mr. Stevens was always alert and vigilant. He was also dependable; he was never known to have violated a confidence. He was never harsh in his criticisms. He was generous with his time and means. A coworker of many years, who knew him well, pronounced the finest possible eulogy on Harry C. Stevens when he said, "He came as near to living the Golden Rule as any person I have ever known."

MOBILIZING THE RELIEF VOTE

Mr. BACON. Mr. Speaker, I ask unanimous consent to extend my own remarks in the RECORD, and to include a radio address I made the other night.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BACON. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include an address that I made over the Columbia Broadcasting System on Monday, May 11, as follows:

The still increasing relief burden of the cities and States is today our most pressing national problem.

What shall we do to bring this terrific expense within the limits of our national ability to pay?

Relief is the central factor in our urgent budget problem.

And our grievously unbalanced Federal Budget is the very core of our continued economic stagnation in the heavy industries.

Thus the New Deal's relief squandering is a principal obstacle to sound and sustained business recovery.

As a member of the Appropriations Committee of the House of Representatives I have had occasion recently to survey the whole picture of Federal relief administration anew.

It is apparent to all that Roosevelt economic policies assure a heavy Federal relief load for a long time to come. But I am convinced that this burden might be reduced by half by the single act of purging the Federal relief machinery of political patronage.

The evidence adduced in our committee hearings establishes beyond all question that, as now administered, the relief agencies are shot through with corroding and paralyzing political spoils. No State, no city, no county has escaped this blight. Political patronage, both in jobs and material contracts, has reduced the W. P. A. program and the Resettlement Administration to purely political organizations for the duration of the campaign. Our evidence discloses further that the C. C. C. camps are heavily loaded with political appointees.

This survey of the situation indicates clearly to my mind that adequate relief, if efficiently administered through nonpolitical agencies, could be managed with about half of the amount now being spent from the Federal Treasury. Let the relief dollar go for relief—not for politics.

The way out is to return the administration of relief to State boards wholly nonpartisan in character, responsible directly to the respective Governors. All administrative matters then would be handled within the States and counties. The Federal spoilsmen would have no appointive power in any State relief organization.

A Republican amendment to the new relief bill, designed to accomplish this objective, was promptly rejected by the Democratic majority of the House last Friday.

But only by this method can the present deplorable waste, corruption, and inefficiency be eliminated, and the administrative overhead reduced to a reasonable percentage of the relief outlay.

There is no question in the mind of anyone familiar with present conditions, but that at least one-third of the current Federal relief allocations are dissipated in the baldest political activity, aimed at the perpetuation of New Dealism.

Here is a letter from a Democratic ward leader in Philadelphia to his precinct lieutenants. It is dated March 14, 1936, just 10 days before the Pennsylvania primary registrations. I read from a photostatic copy of the letter:

"DEAR COMMITTEEMAN: Contact all houses in your division and get the names of all men on relief, also all those holding W. P. A. jobs. Urge them to register Democrat on March 25 or else lose their jobs.

"Sincererly yours."

That letter is signed by a recognized Democratic leader of the fourteenth ward in Philadelphia.

And here is another letter dated April 13, 1936. It is addressed to a citizen in Philadelphia who had applied for a W. P. A. job. He had sent his application to a Democratic Member of the United States Senate in Washington. The letter I have before me is signed by the Senator's secretary. Here are the last two paragraphs, on the official stationery of the United States Senate:

"This matter is handled entirely by Hon. Edward N. Jones, State administrator, Works Progress Administration, Harrisburg, Pa.

"I would, therefore, suggest that you contact your local Democratic leaders with a view to having them recommend your appointment to Mr. Jones who will, I feel sure, give your application and their recommendation every possible consideration."

Here is a frank confession that the way to a W. P. A. job is to "contact your local Democratic leaders with a view to having them recommend your appointment."

Now this is not a partisan document. Every time the New Deal is exposed the jobmaster general cries "propaganda." But the letter I have just quoted is written on the official stationery of the United States Senate. It offers prima-facie evidence that today the administration of relief is a part of the Democratic political preparation for the Presidential campaign.

One letter from Philadelphia demands that every W. P. A. worker register Democratic. The other tells how to get on the relief rolls through political appointment of "your local Democratic leaders."

Nor is this sort of political corruption in the relief machinery confined to Pennsylvania. Here is a case from New Jersey.

A young man applied for a position in the C. C. C. organization. He wanted to be an instructor in physical education. So far as the record reveals he was admirably qualified by training and experience. Omitting all names, I now read the letter the applicant received from the Federal officer in charge:

"In reply to your letter of April 22; as stated in my letter of April 8, this office is unable under binding Federal instructions to consider any nontechnical man for appointment to the supervisory work in the C. C. C. camps unless his name is certified to us on the so-called advisers' list from Washington.

"This is the list of names submitted by Senator ——— and Democratic Representatives in Congress from New Jersey to the Federal administration for employment in this C. C. C. activity. The only way in which you can put yourself in a position to secure employment, therefore, is by making arrangements to have Senator ——— or one of the Democratic Congressmen request that your name be put on this advisors' list."

There you have an epitome of the high humanitarian purposes which guide the day-to-day administration of this gigantic relief program.

If there were no other evidence in the entire United States, these three letters would fully substantiate the charge that Federal relief has been disgracefully warped and distorted for political purposes. But the record is literally brimming with other evidence to the same point.

On April 16, for example, the administrator for the State of Washington was removed from office following revelation that he had gathered from relief workers under his jurisdiction a campaign fund of more than $3,000 in cash.

Charges of the same nature have been aired on the floor of the Senate or House of Representatives in relation to relief work in West Virginia, Colorado, Illinois, Ohio, California, Maine, Indiana, Nevada, and Oregon.

The shocking situation in West Virginia several weeks ago became a focal point of national attention. Following a personal investigation on the scene, Senator HOLT, a New Deal Democrat, once described W. P. A. in his own State in these words on the floor of the United States Senate:

"There is only one way to identify the W. P. A. in West Virginia and that is to say it is a horrible mess. * * * I charge the W. P. A. in West Virginia with being full of politics, with being extravagant and wasteful and with a thorough censorship and spy system to prevent any complaint."

At another point in the debate Senator HOLT read this letter, which had been sent out from the State administrator's office to one of the county supervisors:

"I hand you herewith a list of doctors in Ohio County. Kindly separate the Democrats from the Republicans and list them in order of priority, so we may notify our safety foremen and compensation men as to who is eligible to participate in case of injury."

In due course one of these lists of doctors came back to State headquarters with this heading: "List of county doctors—Democratic doctors are listed on the left-hand side and Republicans on the right."

Now, this was a list of local doctors subject to call in emergencies on any of the West Virginia W. P. A. jobs—a part of the Federal responsibility under the Workmen's Compensation Statutes. "The Democratic doctors are listed on the left"!

It must be understood, of course, that if on some stormy night no Democratic doctor were available a Republican physician probably would be eligible for call. But the relief spoilsmen have taken every possible precaution against that dreadful crisis.

"The Democratic doctors are listed on the left."

Two weeks ago the American Institute of Public Opinion polled the Nation on this question: "In your opinion, does politics play a part in the handling of relief in your locality?"

Tens of thousands of ballots were distributed. They went to every State in the Union. They were returned by men and women in every walk of life. Democrats and Republicans were polled in exactly the proportion of their voting strength in the several States. The composite answer presents a reliable cross-section of national opinion on the question. And here are some of the returns:

The vote in Arkansas was 83 percent yes. In New Jersey the vote was 78 percent in the affirmative; in West Virginia it was 77 percent; Louisiana, 76 percent; Rhode Island, 76 percent; Mississippi, 75 percent; Washington, 73 percent; Massachusetts, 72 percent; Oklahoma, 71 percent.

So the figures run through every State. Not one State returned a majority vote in the negative. In every one of the 48 States, the majority opinion prevails that the relief agencies are operating as a part of the Democratic national campaign—a campaign kept going largely by these fabulous grants of relief money from the Federal Treasury.

A more flagrant trafficking in human need is not to be found in all the pages of American history.

A more wanton corruption of a noble humanitarian principle is not to be found in all the annals of the American people.

Even the men and women on relief are convinced that politics dominates these relief agencies. The national poll I have just cited was further analyzed according to the controlling economic interest of the voters. Ballots cast by persons on relief showed that 49 percent voted "yes" on the question of political administration; and farmers voted 70 percent "yes." These are the groups which actually have had personal contact with the relief machinery. No groups are in a better position to know the truth concerning political influences at work in the relief pork barrel.

The inevitable result of all of this political pay-roll padding in the relief agencies, of course, is a terrific burden of waste.

Incompetence knows no rule of action save to squander through.

Turned loose to fatten in the lush pastures of pork, political bureaucrats have but one rule of conduct—to spend $2 where $1 would do the work.

In his testimony, 2 weeks ago, before the Appropriations Committee of the House of Representatives, W. P. A. Administrator Harry Hopkins presented detailed figures showing that for every $972 spent on work relief last year, only $600 actually was paid into the hands of the W. P. A. workers. The balance of $372 went for supervision, administrative expenses, materials, equipment, and other overhead.

In some States the administrative expenses ran as high as 18 percent of the total relief outlay.

Compare this with the experience of the American Red Cross, which computes 3 percent as an adequate administrative overhead in relief work.

In W. P. A. the difference of 15 percent must be charged to the cruel political bureaucracy which is diverting relief funds to the partisan purposes of the Roosevelt campaign.

And there is another very disturbing consideration in this picture today, namely, that the more business recovery we have, the greater grows our relief bill.

Of course, it does not make sense; but the figures are from Mr. Hopkins' latest report. Total relief expenditures from all sources for the calendar year 1933 were $792,910,000.

For the calendar year 1934 they were $1,476,372,000—almost double.

And in 1935 they were $1,756,375,000.

At this moment these expenditures (from all sources) are running at the rate of a little more than $2,000,000,000 for the calendar year 1936.

When Mr. Hopkins made his first national survey in July 1933 he found 3,908,068 relief cases—each case representing a family or unattached person. That was the beginning of the gigantic New Deal venture in plain and fancy boondoggling.

But by January 1935, after 18 months of Roosevelt recovery, Mr. Hopkins' rolls carried 5,272,472 cases!

These figures present the whole lamentable story of political relief. The greater the recovery, the greater the relief load.

Can this scheme of management be explained in any terms save the terms of incompetence, prodigious squandering of the public funds, and gross political corruption?

In these terms alone can New Deal relief be explained—but in no terms known to the heart of humanity can this political diversion of relief funds be justified or defended.

Relief according to the needs of the political precinct is shocking to the American tradition of faithful public service and offensive to every instinct of public morals.

I, for one, do not believe that the American Nation can ratify this sorry record.

PERMISSION TO ADDRESS THE HOUSE

Mr. DONDERO. Mr. Speaker, I ask unanimous consent that on Monday next, after the reading of the Journal and disposition of business on the Speaker's desk and following the address of the gentleman from Georgia [Mr. CASTELLOW] and the gentleman from Massachusetts [Mr. TREADWAY], I may be permitted to address the House for 20 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

Mr. BANKHEAD. Mr. Speaker, reserving the right to object, and I shall not object in this instance, but we are getting along toward the close of the session. There are a great many Members who have bills pending on the Consent Calendar, and they are anxious to have these bills acted upon. I hope no further request will be made to address the House on Monday next, so that ample time may be provided to dispose of bills on the Consent Calendar.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

PROTECTING OUR FOREIGN SERVICE ABROAD

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to address the House for one-half minute.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts.

There was no objection.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to revise and extend my remarks with reference to Addis Ababa and to also include a letter from the Secretary of State which has been made public.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

Mr. BANKHEAD. Mr. Speaker, reserving the right to object, has not that letter of the Secretary of State been incorporated in the CONGRESSIONAL RECORD heretofore?

Mrs. ROGERS of Massachusetts. No; but it has been made public.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

Mrs. ROGERS. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following letter from the Secretary of State to the chairman of the Committee on Foreign Affairs of the House of Representatives:

DEPARTMENT OF STATE,
May 11, 1936.

The Honorable SAM D. MCREYNOLDS,
House of Representatives.

MY DEAR MR. MCREYNOLDS: I have received Mr. Byrnes' letter of May 7, 1936, transmitting a copy of House Resolution 504 requesting (1) information regarding the steps taken to protect the American Legation at Addis Ababa and American citizens in that capital and (2) copies of all communications exchanged between the Department and the Legation at Addis Ababa regarding the recent looting and action taken or proposed to be taken in connection therewith.

In reply, I submit the following:

(1) According to an official report from the American Legation at Addis Ababa dated February 25, 1935, the following American nationals were resident in Ethiopia on that date. These figures include men, women, and children:

In employ of United States Government	3
Missionaries	108
Others	[1] 16
Total	127

[1] Virtually all of the persons listed under this heading were colored citizens. Practically all of them were indigent and unable to leave the country. As it was considered that they would be

Approximately one-half of these missionaries resided in the capital, while the other half were scattered through mission stations in the provinces. Many of these stations were from 2 to 3 weeks' travel by caravan from the capital.

The question of the protection of American citizens in Ethiopia first arose early in May 1935, when the Department took up the matter with the American Embassy at London and suggested that the Embassy endeavor informally to ascertain what steps were being taken by the British Government for the possible protection of its nationals. The Foreign Office expressed the view that foreigners in Ethiopia would be protected as long as the Emperor remained in power, but that difficulties would be likely to arise in case of his overthrow. The Foreign Office stated at the same time that in case it became necessary to evacuate foreigners from Ethiopia it would be glad to instruct its Legation at Addis Ababa to do everything it could to assist in the evacuation of American nationals there.

Upon receipt of this information the Department instructed the American Chargé d'Affairs at Addis Ababa by telegram to consult in strict confidence with the missionary leaders and report the earliest date on which American nationals could evacuate the capital. Bearing in mind the above-mentioned offer of the British Foreign Office and in view of the fact that the personnel of the American Legation consisted at that time of only three unmarried American nationals, the Department advised the Chargé d'Affaires that it assumed arrangements could be made with the British Minister for the evacuation in case of necessity of those three officials.

On June 29 the Chargé reported that those missionaries who were prepared to leave could do so at once and that he had recommended an immediate evacuation of outlying mission stations.

On July 2, 1935, the Department instructed the Chargé d'Affaires confidentially but urgently to advise all American missionaries in the capital to leave immediately and to give similar advice regarding missionaries in the provinces unless there was sound reason for believing they were not in danger. He was instructed to stress the fact that the continued presence of American nationals in Ethiopia was likely to prove embarrassing to this Government. At the same time the Department addressed letters to the home mission boards in the United States urging them to withdraw their personnel from Ethiopia.

On July 6, 1935, the Chargé d'Affaires reported that all missionaries had been advised as instructed, but that the chief difficulty in their departing was lack of funds and absence of instructions from the home boards. The Department immediately advised the home mission boards of this situation and urged them to supply their personnel with funds to withdraw from Ethiopia. The Chargé stated that he had again urged the closing of all mission stations. He also reported that he had discussed the situation with the Emperor who had promised all possible protection to American nationals and had agreed to inform the Chargé frankly if a crisis should arise.

Late in July it learned that the German Government had requested that the British Legation in Addis Ababa extend protection to German nationals in case of necessity. It was also learned at this time that the British Government had requested permission of the Ethiopian Government to increase its usual guard of 10 men and 1 officer by something over 100 additional men and officers. This permission was refused, but nevertheless 148 officers and men of an Indian regiment were dispatched to Ethiopia and arrived in Addis Ababa on September 7, 1935. They brought with them extensive arms, ammunition, and supplies.

The French and British Ministers at Addis Adaba had meanwhile come to an understanding that the extra British troops would be stationed at the capital, while French troops would be stationed at Diré Dawa where the shops of the largely French-owned railway were located. Eventually French troops arrived at Diré Dawa on October 6, 1935.

At this point it should be stated that except for the British, French, and Italian Legations, which for some years had maintained in Addis Adaba small guards of their native colonial troops, all other legations relied upon the employment of native guards. Thus, prior to the outbreak of hostilities, the American Legation had available the following personnel for guard purposes:

Guards	6
Messengers	4
Overseer	1
Total	11

Upon the arrival of four American naval radio operators on October 14, 1935, the defensive strength of the Legation was of course increased by these trained naval men. The three unmarried officials of the Legation at that time stationed in Addis Ababa were naturally also prepared to defend themselves in case of necessity.

The following arms and ammunition, furnished by the War Department, had for some years been available to the Legation:

Rifles	4
Revolvers	4
Rifle cartridges	400
Revolver cartridges	900
Bayonets	4

On January 20, 1936, the Chargé d'Affaires at Addis Ababa, presumably after a careful survey of his needs, requested the following additional arms and ammunition. This request was immediately transmitted to the War Department, which made the shipment from one of its arsenals.

Rifles	6
Automatic pistols	6
Rifle cartridges	600
Pistol cartridges	600

Even if further equipment, such as machine guns, had been requested, it is open to serious doubt whether the Ethiopian authorities would have permitted the importation of such equipment since it was well known that other governments experienced difficulties and long delays in importing shipments of such a nature into Ethiopia.

In this connection it should be pointed out that troops are stationed in foreign countries as legation guards only in those cases where such a right has been acquired by treaty or long-standing usage or suffrance. The United States had acquired no such right in Ethiopia, and like all other legations there, except the British, French, and Italian missions, it relied on native guards.

On August 10, 1935, the Department instructed the Chargé d'Affaires at Addis Ababa urgently to renew his advice to all missionaries remaining in the country to depart. Again the home mission boards were urged by the Department to take steps looking to the immediate departure of their personnel. The Chargé d'Affaires on August 14, 1935, reported that his instructions had been carried out.

On this same date the Chargé also reported that it was his opinion that as long as the Emperor remained alive the Ethiopian authorities would make every possible effort to protect foreigners. In this connection it should be recorded that on December 19, 1935, the Chargé reported the receipt of information that the last of the Italian missionaries had departed early in December (i. e., 2 months after the beginning of hostilities) and that not a single instance of ill treatment of such missionaries had been reported. On the contrary, he stated, they had been shown courtesy and kindness by the Ethiopian authorities and people. This fact, he added, had made a most favorable impression on foreigners. On February 3, 1936, in reporting that he was bringing his wife and family to Addis Ababa from Egypt, the Chargé stated that his colleagues did not anticipate that Addis Ababa would be bombed or that police protection would fail, but in any case they were better prepared for either eventuality than they had been in the fall of 1935.

On March 24, 1936, the minister resident reported the issuance of an official Ethiopian notice calling on all the population to maintain their reputation for hospitality by showing no hostility to foreigners "who live among us as friends." He added that this was apparently merely a precautionary measure, since no foreigners had been molested.

Late in August 1935 careful consideration was given to the possibility of dispatching an American war vessel to the Red Sea area to assure radio communications between Washington and Addis Ababa and for possible use in protecting American nationals. However, since that area was well within the troubled zone and in view of the tension existing there at the time this plan was abandoned. The facts on which this decision was based cannot be discussed in a public document, but I shall be glad to have the data furnished for the confidential information of the committee if it is so desired.

Other steps taken to protect American nationals who insisted on remaining in Ethiopia despite repeated warnings to leave may be summarized as follows:

1. Construction of bombproof shelter at American Legation, authorization for which was granted on September 24, 1935.

2. Establishment of naval radio station at the Legation. This naval detail consisted of four men who naturally were available for defense purposes in case of necessity. In connection with the establishment of the radio station it is of interest to note that because of the opposition of the Ethiopian Government to the establishment of such stations the Chargé was obliged to bring in the material for the station as "electrical equipment" and the naval radio operators as "clerks." Such being the case and bearing in mind the protests of the Emperor against the increase in the British Legation guard, it is obvious that any attempt to introduce an American military guard into Ethiopia would have been staunchly opposed by the Ethiopian authorities.

3. On September 14, 1935, the Chargé reported that he had advised American institutions in Addis Ababa to paint or stretch large American flags on the roofs of their buildings as a precaution against air raids. The Ambassador at Rome was instructed to furnish this information to the Italian Government, with the request that it be transmitted to the Italian military authorities in East Africa. The Italian Government promptly conveyed this information to its military authorities.

4. Early in October the Chargé d'Affaires at Addis Ababa reported that the members of the Diplomatic Corps there had

---

particularly helpless in case of trouble, they were repatriated during the summer and autumn of 1935 through funds obtained from a private source. It was necessary to obtain such funds privately since no appropriation is available for repatriating indigent American nationals.

decided to ask their respective governments to bring to the attention of the Italian Government the fact that Addis Ababa and Diré Dawa were open and undefended towns. Upon receipt of this information the Department instructed the American Ambassador at Rome to bring the matter to the attention of the Italian Government, which promptly issued a statement to the effect that these towns would not be bombed as long as they were not used for troop concentration.

5. On April 7, 1936, the American Ambassador at Rome was directed to express to the Italian Government the hope that Italian military authorities in East Africa might be advised of the location of American institutions in the provinces of Ethiopia. Such action was duly taken by the Italian Government.

On the outbreak of war on October 3, 1935, the Chargé d'Affaires at Addis Ababa reported that he had insisted that certain missionary women and children leave at once. He continued as follows:

"For all Americans remaining I have arranged with the British Legation to be afforded such protection as may be possible. British Minister has kindly consented to distribute gas masks to any Americans who desire them and to allow them to set up tents in his compound in the event that police protection fails. I have been repeatedly assured by the Emperor and local authorities that everything possible will be done to protect American lives and property."

On April 18, 1936, the Minister Resident at Addis Ababa reported that in connection with the possible departure of the Ethiopian Government from the city the Diplomatic Corps was making every effort to arrange for adequate police protection during the interval between the departure of the Government and the arrival of Italian forces.

On May 1, 1936, the Diplomatic Corps at Addis Ababa agreed individually to endeavor informally to dissuade the Ethiopian Government from taking steps which might lead to fighting near the city, basing their efforts on humanitarian motives and with a view to protecting their nationals. Later on May 1 the Minister reported that, as he had learned that the Ethiopian Government had decided to try to defend the capital, he was advising American women and children to prepare, in accordance with previous arrangement, for concentration at the British Legation.

(2) With respect to the request for copies of all communications between the Department of State and the American minister resident at Addis Ababa regarding the recent looting and action taken or proposed in respect thereto, I attach copies of all pertinent telegrams. I invite particular attention to my telegrams, no. 179 of May 3 and no. 190 of May 4, to the Minister at Addis Ababa, stressing the fact that considerations of safety should at all times be controlling and that no one at the Legation should jeopardize his life merely for the purpose of remaining there.

I should make it clear that our arrangement for protection of our nationals in the well-defended British Legation was not at all unusual. It is the frequent practice of one government to seek assistance for its nationals from another government which, because of the large number of its nationals and the importance of its interests in a given area, may be better prepared to render such assistance. On many occasions diplomatic and consular officers of the United States, in accordance with the universal practice of all nations, have used their good offices in protecting foreign nationals in those parts of the world where this country has outstanding interests and where it is well equipped for such services. As a matter of fact, some 40 foreign nationals sought and received protection in the American Legation during the recent crisis in Addis Ababa.

The following facts must also be borne in mind. It was confidently expected that American nationals in Ethiopia would follow the advice urgently given them in July 1935, and repeated in August, to withdraw from the country. If these urgent warnings had made no impression, it was expected that the President's statement of October 5, 1935, that any of our people who engaged in transactions with the belligerents did so at their own risk, might at least have had some effect. If these warnings and admonitions had been given the consideration which was due them by unofficial American citizens in Ethiopia there would have remained in that country only the personnel of the American Legation, whose protection offered no difficulty. Obviously, to protect those American citizens who remained and who were widely scattered throughout Ethiopia would have required the dispatch of a large military force.

In connection with the suggestion that American armed forces might have been sent to Ethiopia for the protection of the American Legation, it seems unnecessary to recall the state of public opinion in this country during the summer of 1935, which resulted in the passage in August of that year of the neutrality resolution, specifically designed to prevent this country's being dragged into any foreign conflict. The dispatch of an American war vessel carrying American troops to a distant, troubled zone at such a time and for such a limited purpose would have subjected this Government to a charge of flagrantly violating the spirit of the neutrality act and would undoubtedly and rightfully have met with vigorous protest from the American people.

Sincerely yours,

CORDELL HULL.

Mr. Speaker, when I introduced House Resolution 504 I did so because I felt that the Members of Congress should know all of the facts in connection with the protection of the American Legation at Addis Ababa, Ethiopia, during the recent looting. I am sorry the committee did not see fit to report favorably on the resolution, for there are parts of Secretary Hull's letter that will stand discussion.

The United States Government has an exceedingly unenviable reputation throughout the world for the lack of interest observed in the protection of its embassies, legations, and personnel. Since the Addis Ababa events occurred I have received many letters from American citizens who have lived abroad. These letters invariably call attention to the humiliating spectacle of a country the size of ours appealing to the British Government for the protection of its Legation. Some of the writers of these letters go so far as to advise any American in foreign lands to get acquainted with the British Legation in anticipation of trouble, because of the respect Great Britain has from all nations.

This, too, is borne out in Secretary Hull's letter, quoted below. It will be noted in his fourth paragraph that in May 1935—1 year ago—the Department of State asked the American Embassy in London "to ascertain what steps were being taken by the British Government for the possible protection of its nationals." Great Britain's Foreign Office stated that "in case it became necessary to evacuate foreigners from Ethiopia it would be glad to instruct its Legation at Addis Ababa to do everything it could to assist in the evacuation of American nationals there." In other words, our Government intended to rely on a foreign power to protect our citizens, and apparently planned to do nothing itself. It is a confession of weakness.

Our Government warned its citizens to leave Ethopia, and many of them did so, those remaining electing to do so on their own responsibilities. Many did not leave because they did not have the money to do so. But what of the plight of the employees of our Government who had no choice but were obliged to remain at their posts unless orders to the contrary were received?

The Department of State admits that it used subterfuge in bringing into Ethiopia radio equipment and radio operators as "electrical material" and "clerks." While the State Department was willing to use subterfuge in this respect, it was unwilling, apparently, to do so to protect our Legation. It was not too proud to do some smuggling, but too proud to do other smuggling. What a ridiculous position! Too much dependence was placed on Great Britain, not only for supplies and shelter in time of trouble but for men and arms for defense against the looters.

The question of involvement in the war or the violation of the spirit of the Neutrality Act does not enter into the matter at all. The defense of the Legation was not against the organized soldiery of Ethiopia or any other nation but against unlawful looters and bandits who were not subject to any regulation or command. That was the danger. Had our Minister or his wife or the other employees been killed, it is quite probable that neither Ethiopia nor Italy would have been held to blame. Situated in the most dangerous part of Addis Ababa, our Legation was defended by Minister Engert and the other employees with what few rifles, shotguns, and pistols they had at hand. The most effective weapon of defense was an Italian submachine gun, procured late, by chance, through the good offices of an Abyssinian policeman, who had fled to the American Legation. All because our Department of State was unwilling to risk the refusal of permission to import machine guns. Secretary Hull's statement on this point is pitifully weak:

> Even if further equipment, such as machine guns, had been requested, it is open to serious doubt whether the Ethiopian authorities would have permitted the importation of such equipment since it was well known that other governments experienced difficulties and long delays in importing shipments of such a nature into Ethiopia.

It is not wild conjecture to presume that Great Britian had a sufficiency of arms. We know they had the men, despite the refusal of the Ethiopian Government to permit them to have them.

Secretary Hull admits that our interests are protected in countries where we have outstanding interests, but in small and often dangerous posts the employees and citizens are left to shift for themselves or are placed under the protection of a foreign government. This is wrong, and makes our policy a matter of dollars and cents.

In the next to the last paragraph of his letter the Secretary states that the problem of protecting the personnel of the American Legation offered no difficulty. That this is not so is borne out by the fact that two persons were injured in the fighting in the Legation.

I feel that it is most important for the morale of the Foreign Service that our State Department should hereafter make provisions for the defense of American Legations in exposed areas. We have an excellent corps of trained men, capable of coping with every diplomatic emergency, but when they are exposed to attack by looters and tribesmen running amuck, as was the case in Ethiopia, they should be afforded protection, or at least the means to protect themselves.

RAILROADS ARE THE PRINCIPAL BENEFICIARIES OF RIVER AND HARBOR DEVELOPMENT

Mr. CULKIN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and to include therein a radio address which I made.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. CULKIN. Mr. Speaker, under leave to extend my remarks, I insert the following radio address which I delivered on Monday, April 27, 1936:

Fellow citizens of New York State, I wish to discuss with you tonight the Stokes resolution, now pending in the New York State Senate, submitting a constitutional amendment to permit the Legislature of the State of New York to impose tolls on the barge canals. I am glad to present the matter to the people of the State from the national viewpoint.

The imposition of tolls on our canals will, I firmly believe, impair the prestige and development of our State. It will also result in grave loss to our bankers, to our industrialists, and to the consuming public. To all of them now go the savings which come from the operation of our canals. I have served on the Rivers and Harbors Committee of the House for 8 years and have come to be familiar with the national picture on transportation. The prime necessity of America today is adequate low-cost freight charges. In some sections of our country we have great surpluses of products of the farm and factories for which there is no market. In other sections there is distress because of the need of these commodities which cannot be transported to the area where they are needed by reason of the prohibitive and, may I say, excessive freight rates. It is my honestly considered opinion that the development of our internal waterways and of our coastal harbors is now beginning to solve this acute and distressing problem. Another feature in the solution is the 3,000,000 miles of roads and public highways which the Nation has improved. Over these the development of transportation by truck is already furnishing some relief to the suffering farmer and businessman. We have 15,000 miles of canalized rivers suited to navigation within these United States. We have about 250,000 miles of railroads. As at present constituted these various methods of transportation are not meeting the problems of the people, and I am convinced from my examination of the subject that the present rate structure of the railroads is a definite and complete handicap to the farmer or industrialist who wishes to get his goods to market. As time has gone on, these railroad rates have become more and more oppressive. The management of the railroads have since the creation of the Interstate Commerce Commission remained quiescent and have until now been content to make an annual pilgrimage to the Interstate Commerce Commission where they asked for and usually received an increase in freight rates. These charges finally became so excessive that the public has been driven to water and truck transportation, where they were available.

May I say that I have no grievance against the railroad; and while I wish to give them due credit for the part they are playing in American economics, I desire to emphasize that their growth in America has gone hand in hand with the development of waterways. This fact has been ignored by the ardent advocates of the railroads who are now seeking to get a monopoly of transportation in America. The Congress has disbursed more than $800,000,000 upon seacoast, lake harbors, and channels in a period of 125 years. Sixty-seven percent of this total was upon coastal harbors. These harbors were the connecting links between the ships and the railroads and equally beneficial to both. Take, for example, New York Harbor; over 10 branches of New York Harbor improved by the Government, ferryboats operated by the railroads carried freight in 1932 valued at over 14 billion dollars. If such harbor improvement constitutes subsidy to the ships, it also constitutes an equal subsidy to the railroads.

On the Great Lakes we handle an average of 100,000,000 tons of freight per year. This tonnage, consisting mostly of ore, coal, and wheat, is handled by rail at both ends of the line. The railroads receive about 10 mills per ton-mile on these freights and the boats 1 mill per ton-mile. Thus the railroads enjoy the major benefits.

The classic example of railroad development due to water transportation is the area around Pittsburgh. During the 25-year period between 1900 and 1925 the waterway traffic at Pittsburgh increased 31,000,000 tons; the rail traffic increased 116,000,000 tons. This growth and development was entirely due to the low-cost water transportation which carried the iron ore from the Mesaba Range in Minnesota to the Lake Erie ports, from where it was a short haul by rail. Except for the low-cost transportation by the Lakes the production of steel in and around Pittsburgh would have been impossible and the railroads would not have enjoyed the tremendous development incident to the establishment of the steel mills adjacent to the coal mines.

The growth of our large cities on the coast and on the Great Lakes has been due to the existence of water transportation. Chicago, Cleveland, and Buffalo on the Great Lakes; Galveston, Houston, and New Orleans on the Gulf; the great cities on the Pacific and Atlantic coasts, have had their development and growth by reason of water transportation provided in part by nature and improved by the Federal Government. Around these centers of population the railroads have had their greatest and most profitable development so that the continuing flow of propaganda against waterways comes with poor grace and without justification from the railroads and their spokesmen. They have been the beneficiaries of all these developments and are now biting the hand that fed them. I definitely charge that the railroads of today are seeking a monopoly of transportation and have entered upon a campaign of misrepresentation of the waterways and trucks which reaches to every nook and corner of the land. If a monopoly of transportation comes—and it will come unless industry and agriculture are aroused to the dangers of the situation—the costs of living will go up by leaps and bounds and we shall have to fight again the battle which the people won in 1886, when the Interstate Commerce Commission was established.

Just now the firing line is here in New York State where a preliminary attempt is being made to destroy the usefulness to the people of the New York State barge canals. The railroads have assumed their ancient role and propose to wreck these canals by the imposition of tolls. If they succeed in this, they will then demand that the highways be operated under a similar system. These canals connect the Great Lakes area with the seacoast. They run from Lake Ontario and Lake Erie to Albany and have at present a navigable depth of 9 feet. From Albany to New York via the Hudson River we have a 27-foot channel. The canals are increasing in usefulness each year, and the tonnage is gradually mounting as better transportation facilities are afforded. They furnish an essential link to all transportation from the Lake States and Middle West to the Atlantic seaboard. These canals last year carried approximately 4,000,000 tons of freight. It is estimated it will reach 6,000,000 tons in 1938. Over this canal passes at low transportation cost fertilizers, feeds, gasoline, flour, canned goods, building material, kerosene, fuel oil, and a host of other raw and manufactured products. Low-cost canal charges bring a saving to the farmers and urban consumers on these items of at least $8,000,000 per year. Then there is the item of savings to the farmers and urban consumers in lower freight rates in other forms of transportation as a result of barge-canal competition. We may estimate this additional saving at $5,000,000 per year.

Employment in New York State industries is stimulated and made possible by the low transportation cost of raw materials by barge canal. This is a concrete and definite benefit which would pass to other States in the event that tolls were imposed on the canal. These industries employ many thousands of men and pay large sums in taxes. Commerce on these canals at their terminal points give employment to marine, warehouse, and port workers. There are no exact figures available on this, but it may be conservatively estimated at a total of $5,000,000 per year.

These canals have a sanitary and drainage value that cannot be measured in dollars. Over them pass each year, going from the seaboard to the lakes, thousands of recreational craft which give health and recreation to the people. As a result of the construction of the canals great water powers have been created which result in the employment of thousands of people. This canal is not operated for the benefit of the transportation companies using it.

The fact is that their savings in transportation costs are passed on to the consumer, farmer, and the industrialist. Within the zone of the canal in the State of New York a freight differential is established by the railroads which illustrates the potential effect of the canal upon the freight rates. I have heard it stated by excellent authority on transportation that if the barge canals of New York State did not transport a ton of freight the mere existence or presence of the canal would result in a saving to the people of the State of New York of $50,000,000 per year in freight rates. That was the reasoning of our forebears on this proposition, so they wrote into the constitution of this State two provisions. One, that the canals could not be sold or leased, and the other, that the canals should be toll-free forever. They did this because they realized how vital the continuance of the canal system was to the protection of the economic life of the State. The reasons that applied when these provisions were put into the constitution

apply with greater force now when the railroads are seeking and are actually making progress toward a monopoly of transportation.

The United States Engineers, who are the greatest economists on water transportation in the world, recommended in 1929 that the Government take title to the canals. The engineers found that the New York State barge canal was a sound navigational project and that the economics resulting from its operation justified not only its continuance but its being taken over by the Government. I wish that every citizen of the State who is listening in on this discussion might read the engineers' illuminating and commendatory report on the New York State canals. Pursuant to said report Congress passed an act in 1930 which provided for Government operation. The act carried an appropriation of $2,500,000 annually for the operation of the canal. I had a hand in writing that statute.

I regret that the State did not take advantage of this opportunity to nationalize the barge canals. It has always been my belief that the New York State Barge Canal, which is a vital link in our national system of waterways, should be operated by the Government as are the Atlantic, the coastal, the Illinois, and other waterways of this type.

The constitutional provision against the sale or lease of the canals more or less stood in the way, and in 1932 my colleague, Mr. GAVAGAN, of New York City, introduced a bill for the deepening of the canal to 12 feet navigable depth without taking title. Subsequent to that the United States Engineers recommended an appropriation of $27,000,000 for the purpose of deepening the canal to 12 feet navigable depth, giving greater clearances under the bridges and straightening out some of the bends. We spent many weary months getting this measure through Congress. The representatives of the railroads trained their heaviest guns on this project, but without success. Last year $5,000,000 was spent on this deepening by the Federal Government. This year there will be an additional $5,000,000 available for this purpose, and an equal sum each year till the work is done. It makes the canal 50 percent more efficient, and it will result in corresponding savings in transportation costs when this improvement is completed. It, of course, materially helps the unemployment situation in New York State and at the same time is a worth-while and thoroughly constructive navigational project.

I think I know the situation at Washington. It is my judgment that on the completion of the canal deepening the Federal Government will take over and operate the canal provided the State is then willing. The passing of the pending resolution in the senate, no. 163, by Senator Stokes, providing that the Legislature of the State of New York may levy State canal tolls as it sees fit, will stop the expenditure of this $27,000,000. It will also defeat probably for all time our purpose in Congress, provided the State consents, to take over and operate this canal.

Congress is vigorously opposed to any form of toll upon a public utility, whether it is a highway, a bridge, or waterway. America passed that stage many decades ago. It remained for the railroads to attempt to turn back the clock and restore this relic of the Dark Ages. Members of Congress, both East and West, North and South, are of one mind on this subject of tolls. The Congress will not vote money to any public utility that collects tolls. If tolls are made probable by the action of the Legislature of New York State at this session, then New York State must remain on its own because so far as the Federal Government is concerned, it will not aid or contribute by taking this canal over, operating it, and continue its deepening. The people of our State will then have to take refuge in the cold bosom of the railroads, where they will find scant comfort with a certain loss of State prestige and development and transportation costs that will be ruinous to agriculture and industry.

I want to call your attention to a letter written by General Markham, Chief of Engineers, to the New York State Authority on this question. It is as follows:

Mr. BILLINGS WILSON,
Assistant General Manager, the Port of New York Authority,
111 Eighth Avenue, New York, N. Y.

DEAR SIR: I am in receipt of your letter of January 29, 1936, in which you refer to a proposal removing the prohibition against the levying of tolls on the Great Lakes-Hudson River Waterway, introduced in the New York State Legislature, and ask to be advised if the authorization contained in the recent river and habor act, approved August 30, 1935, would not prohibit the allotment of Federal funds to this project in the event such legislation were established.

It is the view of this office that the authorization contained in the river and harbor bill based on the report of this department, is specific in that Federal funds may not be made available for the improvement in the event legislation is enacted for the establishment of tolls. It is my further view that in such event it would be necessary for me to recommend the revocation of any unexpended balances from the fund provided from the Emergency Relief appropriation for the work now under way, and that no further Federal funds could be allotted to the improvement of the canal under the present authorization.

Very truly yours,

E. M. MARKHAM,
Major General, Chief of Engineers.

With characteristic audacity the railroads say that the passage of the Stokes Resolution No. 163 will make no difference with the disbursement of Federal money. The letter of the distinguished chief engineer throws that contention out of the window.

I have become familiar with the national transportation problems of the farmer by reason of my service at Washington. I have been in contact with the national officers and representatives of the Grange and the Farm Bureau Federation. These bodies realize the damage which threatens their people by reason of the present activities of the railroad. Both the National Grange and the Farm Bureau feel that the railroads are seeking a national monopoly of transportation in America. I have fought shoulder to shoulder with the Grange and Farm Bureau leaders on this proposition. So, I appeal to you listeners who are members of farm organizations to write or telegraph your Senator in the New York State Legislature requesting him to oppose this Stokes Resolution No. 163. I likewise appeal to the industrialists and to all citizens who are concerned with the welfare and development of our State to take similar action. I make no war on the railroads. I am for giving them their place in the sun. I will vote to give them Federal aid in every reasonable, proper way.

In conclusion I wish to emphasize with all earnestness and sincerity that the passage of the Stokes resolution in the senate will be a body blow to the people of our State in that it will hamper its development, increase the present burdens of the farmer, add to the high cost of living, and will surely discontinue necessary and proper Federal aid to our barge-canal system.

Thank you and good night.

PERMISSION TO ADDRESS THE HOUSE

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to address the House for 2 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, my purpose in addressing the House at this time is to call attention to the fact that in the passage of the deficiency bill several days ago, and in relation to the Works Progress Administration, on page 23, from line 4 to line 9, appears language which, in my opinion, would preclude veterans who will otherwise be eligible in accordance with existing regulations from being employed unless the language is changed by the Senate. The House bill states:

In the employment of persons on Works Progress Administration projects applicants in actual need of such employment whose names have not heretofore been placed on relief rolls shall be given the same eligibility for employment as applicants whose names have heretofore appeared on such rolls.

The words "actual need", in my opinion, will preclude veterans from receiving work in the Works Progress Administration unless the words "actual need" are supplemented by appropriate language inserted by the Senate not to exclude veterans who are in need, but who might be denied such employment because of receipt of the bonus.

Mr. Speaker, I know the Works Progress Administrator is in sympathy with the employment of veterans who are in need and does not feel that the receipt of the bonus should interfere with such employment.

It was not the intention of the Members of the House, and I know it was not my intention, and I do not think the intention of either the Democratic or Republican Members, to state that veterans, just because they may receive the bonus, shall be denied employment in the Works Progress Administration. I also know that the distinguished gentleman that proposed the amendment eliminating the dead line would feel the same way. I hope the Senate will incorporate an appropriate amendment, and when it comes back for our consideration that the House will concur.

[Here the gavel fell.]

THE CONSTITUTION OF THE UNITED STATES

Mr. LAMBETH. Mr. Speaker, by direction of the Committee on Printing, I send to the Clerk's desk a privileged report on Senate Concurrent Resolution 35 (Rept. No. 2666) and ask for its immediate consideration.

The Clerk read as follows:

Senate Concurrent Resolution 35

Resolved by the Senate (the House of Representatives concurring), That the Constitution of the United States of America (annotated), including all amendments thereto, and with citations of the cases of the Supreme Court of the United States construing its several provisions, collated under each separate provision, be compiled and revised up to date, and that the same shall be printed and bound; and that 3,000 copies shall be printed, of which 2,200 copies shall be for the use of the House of Representatives and 800 copies for the use of the Senate.

The Senate concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

FISCAL RELATIONS OF THE DISTRICT OF COLUMBIA

Mr. BLANTON. Mr. Speaker, I ask unanimous consent to proceed for 2 minutes to make an announcement regarding the conference on the District of Columbia appropriation bill.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. BLANTON. Mr. Speaker, the Washington newspapers have reported that a Mr. L. H. Parker is a great expert on civic tax matters and that he has given a special report on fiscal relations here in Washington which would show that the District of Columbia is the third highest taxed city in the United States.

This statement is so ridiculous that it is absurd on its face. All of us who have been giving close study to local tax matters here for 20 years know he is a fake when he makes that assertion. Our subcommittee had this man Parker before us and questioned him in a hearing, and he showed that when he worked for the city of New York he had been drawing a salary of $230 to $240 a month, and that he is drawing now an annual salary of $9,600 from a joint committee of Congress, and yet last October he hired himself out to this Washington Board of Trade, on the side, for $5,500, which they paid him to make this ridiculous report about Washington being overtaxed, when the people here are the least taxed of any city in the whole world.

We showed that he does not know anything worthy of belief about the civic tax rate in this and comparable cities, or about the fiscal or tax relations of Washington and the United States Government. We showed that he was not an expert on civic taxes, and that he had not been to any one of these cities that was given by the President in his report last year as paying much larger taxes than Washington, and that he knew nothing about their tax matters, and his whole evidence before our subcommittee showed he had sold himself last October to the board of trade for $5,500 to give this report that is against the interest of the Government, which is paying him an annual salary of $9,600.

We are going to have this evidence, taken before our subcommittee, printed and it will be accessible to you Monday morning. I am going to mail every one of you and every Senator a copy of his testimony and I hope every Member of this House and every Member of the Senate will read this man's testimony. It is ridiculous. It is absurd. He was bought by Washington for $5,400 and testified he knew what they expected him to do for this handsome fee. It just shows how far Washington will go to try to escape just taxation. [Applause.]

Mr. Speaker, I am grateful to my colleagues for allowing me to present further facts about what occurred at our hearing. This Mr. L. H. Parker admitted that when he came to Washington the tax rate here was $1.82 per $100, that in 1926 the tax rate was $1.70 on the $100, that in 1927 they raised it back to $1.80 on the $100, that in 1928 they lowered it back to $1.70 on the $100, and that from 1928 to 1933, inclusive, the tax rate in Washington was $1.70 on the $100 or $17 on the $1,000.

TAX RATE $1.50 ON THE $100

Mr. L. H. Parker likewise admitted that since 1934 the tax rate in Washington, D. C., has been only $1.50 on the $100, or $15 on the $1,000, which is the total tax paid here on tangible personal property and upon real estate, which is assessed at a valuation far below its real value.

NO SPECIAL TAXES IN WASHINGTON

Mr. L. H. Parker admitted that on property in the District of Columbia there is no State tax, and no county tax, and no school tax, and no special water tax, and no special school tax, and no special courthouse-, jail-, or bridge-bond tax, such as are paid by people living in some cities, additional to the city taxes they pay.

WASHINGTON TAX LOWEST IN UNITED STATES

Mr. L. H. Parker admitted that he could not name another city in the whole United States where the total tax on tangible personal property and real estate was as low as $1.50 on the $100, paid by the people of Washington.

FREE OF BURDENS OTHERS PAY

Mr. L. H. Parker admitted that Washington people paid no estate tax, no inheritance tax, no gift tax, no income tax, and no sales tax (additional to the Federal tax which all people alike pay), such as the people in some of the other cities of the United States have to pay.

ONE THOUSAND DOLLARS EXEMPTION ON HOUSEHOLD FURNITURE

Mr. L. H. Parker admitted that he could not name another city in the United States besides Washington where each family is given an exemption from taxes on $1,000 of household furniture, which $1,000 exemption Washington people enjoy.

LIBRARIES EXEMPT WHETHER $5 OR $500,000

Mr. L. H. Parker admitted that he could not name another city in the United States besides Washington where each person has exempt from all taxes his private library, regardless of value, whether it is worth $5 or $500,000, which exemption Washington people enjoy.

TWO-CENT GASOLINE TAX

Mr. L. H. Parker testified that he could not name another city in the United States besides Washington where the tax on gasoline is as low as 2 cents per gallon, which low rate of 2 cents per gallon on gasoline Washington people enjoy. Across the Memorial Bridge, 2 miles from the Capitol, over in Virginia, the tax is 5 cents per gallon on gasoline, and over beyond Chevy Chase in Maryland, 5 miles north from the Capitol the tax is 4 cents per gallon on gasoline, plus the sales tax that prevails in Maryland, which Baltimore people have to pay, while Washington people enjoy their 2 cents per-gallon tax on gasoline.

FAMILY WEARING APPAREL EXEMPT, REGARDLESS OF VALUE

Mr. L. H. Parker testified that he could not name another city in the United States besides Washington where each person has exempt from taxes all wearing apparel, regardless of value, whether worth $5 or $500,000, which exemption Washington people enjoy.

LOW RATE OF $6.60 PER YEAR FOR WATER

Mr. L. H. Parker testified that he could not name another city in the United States besides Washington where the charge for water is only $6.60 per year for the average family, which low rate the Washington people enjoy.

ONE-DOLLAR REGISTRATION FEE FOR $12,000 ROLLS-ROYCE

Mr. L. H. Parker testified that he could not name another city in the United States besides Washington where the annual registration fee on automobiles covering license number plates is only $1 per year, whether the car is a Ford or a $12,000 Rolls-Royce, which low nominal fee the Washington people for years have enjoyed.

NO CHARGE FOR REPAIRING AND REPLACING SIDEWALKS AND STREET PAVING

Mr. L. H. Parker could not name another city in the United States besides Washington where the people are not charged for repairing or replacing sidewalks and street paving in front of their residences, which privilege Washington people have enjoyed for years.

NO ANNUAL CHARGE FOR SEWER SERVICE

Mr. L. H. Parker could not name another city in the United States besides Washington where, after a residence is once connected with the sewer system, there is never thereafter any charge made against the owner for sewer service, which privilege Washington people have always enjoyed, while people in some cities have to pay a monthly charge.

ONE-HALF OF 1 PERCENT ON INTANGIBLES

Mr. L. H. Parker testified that he could not name another city in the United States besides Washington where the tax on intangible property (or the tax that compares with it) is as low as the Washington tax rate of only one-half of 1 percent on intangibles, which low rate Washington people have enjoyed, with no law here that forces them to render their intangibles, millions of dollars of which are hidden away in lock boxes in banks and not rendered for taxes, and it is only when people die and their estates go through probate that the full amount of their intangibles become known.

ASHES, TRASH, AND GARBAGE GATHERED FREE FROM RESIDENCES

Mr. L. H. Parker could not name another city in the United States besides Washington where the people have their ashes gathered free from their homes, their trash gathered free from their homes, and their garbage gathered free from their homes, which privilege Washington people have always enjoyed.

TREES FURNISHED, PLANTED, PROTECTED, SPRAYED, PRUNED, AND REPLACED WITHOUT CHARGE

Mr. L. H. Parker testified that he could not name another city in the United States besides Washington where in front of and around their residences the trees are furnished to the owners without charge, are planted without charge, are protected with lumber inclosures without charge, are watched and cared for free, are sprayed free, are pruned free, and are replaced without charge when they die, which privilege Washington people have enjoyed for many years.

ASSESSED VALUE LESS THAN HALF OF REAL VALUE

Mr. L. H. Parker had his attention called to numerous pieces of property, with figures and facts furnished by Tax Assessor Richards showing that in 1933 Washington experts on property values testified that the value of numerous lots was double and even treble the assessed value, and that the Government was forced to pay double and even in instances treble the assessed value for many pieces of property, including the numerous lots it bought for sites of the New House Office and the United States Supreme Court.

ASSESSED VALUES REDUCED $80,000,000 IN 1934 AND $50,000,000 IN 1935

Mr. L. H. Parker had his attention called to the fact that Commissioner Melvin C. Hazen, chairman of the Board, testified that in 1934 the Commissioners arbitrarily reduced the assessed value of real estate in Washington $80,000,000, and that in 1935 they arbitrarily reduced the assessed values of real estate $50,000,000, so that during the past 2 years the assessed values of real estate in Washington has been lowered $130,000,000, which has meant a great saving in taxes to Washington people.

WASHINGTON PEOPLE LEAST TAXED AND BEST TREATED

Mr. L. H. Parker had his attention called to the fact that Commissioner Melvin C. Hazen testified, as shown by the printed hearings, that the people of Washington were the least taxed, enjoyed more privileges, and were better treated, than the people of any other city in the United States.

PAID NOTHING ON THE $14,750,000 MEMORIAL BRIDGE

Mr. L. H. Parker testified that Washington people paid no part of the $14,750,000 spent on the Memorial Bridge, all of same being paid by the United States.

PAID NOTHING ON BEAUTIFUL HIGHWAY TO MOUNT VERNON

Mr. L. H. Parker testified that Washington people paid nothing on the beautiful highway to Mount Vernon, which is constantly enjoyed by all Washington people, all of such expense being paid by the United States.

WASHINGTONIANS BENEFIT FROM ALL DEPARTMENT APPROPRIATION BILLS

Mr. L. H. Parker admitted that the people of Washington have funds furnished for projects of local interest and benefit to them in large sums from the Interior appropriation bill, and from all of the annual appropriation bills for the different departments of government.

HOWARD UNIVERSITY FINANCED BY UNITED STATES

Mr. L. H. Parker admitted that Washington people paid nothing for Howard University here, but that the United States finances and maintains it.

WONDERFUL CONGRESSIONAL LIBRARY COSTS WASHINGTON PEOPLE NOTHING

Mr. L. H. Parker admitted that Washington people have paid nothing either for the construction or annual maintenance of the fine Congressional Library here, daily used by Washington people.

UNITED STATES INSTITUTIONS HERE ATTRACT TO WASHINGTON HUNDREDS OF THOUSANDS OF TOURISTS WHO SPEND MILLIONS IN WASHINGTON

Mr. L. H. Parker admitted that because of the Government institutions here, hundreds of thousands of tourists are attracted to Washington, and that the enormous amount of money they spend here annually is a bonanza to Washington people.

ALTHOUGH EMPLOYED BY HOUSE AND SENATE AT SALARY OF $9,600 ANNUALLY, NEITHER REQUESTED HIM TO REPORT ON LOCAL TAXES

Mr. L. H. Parker admitted that although he was employed by a joint committee of Congress, of which Senator PAT HARRISON is chairman and Congressman BOB DOUGHTON is vice chairman, that neither Senator HARRISON nor Congressman DOUGHTON had ever requested him to make any report on local taxes, and that neither knew anything about his hiring himself out to the Washington Board of Trade last October for a $5,500 fee to help the board of trade.

HIGH TAX RATE IN COMPARABLE CITIES

Mr. L. H. Parker had his attention called to the list of comparable cities which President Franklin D. Roosevelt submitted to Congress last year, which he had had investigated by the Treasury Department, showing that in all of them the tax rate far exceeded that paid in Washington, and that the tax rate in Washington was the lowest of them all, and Mr. Parker admitted that he had never been in any of these cities to check up their tax rate, and he showed our subcommittee that he did not know anything whatever about the tax rate of comparable cities.

PARKER'S OWN RESIDENCE ASSESSED FAR BELOW VALUE

The property at no. 1317 Iris Street NW., being lot 12 in block 2774, was a vacant lot in 1929 and was then assessed at $2,310, and a new residence was built on it, and on August 15, 1931, was sold to Mr. L. H. Parker for $17,950, of which Mr. Parker paid $500 cash, and assumed a first trust of $10,000, and a second trust of $7,450, and while he owned it, and from 1930 to 1934 this property was rendered for taxes at an assessed valuation of only $11,010, and for 1935 and 1936 it is assessed at only $10,110, which at the tax rate of $1.59 pays the lowest taxes of similar property in any other city of the entire United States.

WANT COLLEAGUES TO READ PRINTED HEARINGS

These hearings will be printed and available by next Monday, and I want my colleagues, both in the House and Senate, to read same. They will find in same some very interesting information.

HOUSE SUBCOMMITTEE HAS BEEN DILIGENT AND FAITHFUL

Our House subcommittee has worked hard, has been diligent and faithful, and I know that it will have the hearty support of the House in not allowing an amendment that will force the taxpayers of the United States to make a gratuitous contribution of $5,700,000 out of the Public Treasury, to pay on the local fiscal expenses of Washington people, who, as Commissioner Hazen says, are the best treated, the least taxed, and enjoy more privileges than any other people in the United States.

I know that the people of Missouri, Iowa, West Virginia, Pennsylvania, and Texas do not want us to tax them to make a $5,700,000 annual gift to Washington people each year, and I believe the people of Oklahoma, New York, Virginia, New Hampshire, and South Dakota are of like mind, and would resent being made to pay taxes to raise $5,700,000 to give to Washington people each year.

FIGHTING FOR WHAT IS RIGHT IS EXPENSIVE

In addition to the time and labor spent on these matters, it has cost me a lot of money. I have paid to the Government Printing Office quite a sum of money for reprints, just to let the people know about this situation. Just to show how much the Government Printing Office has charged me for printing matter relating to the fight I am making to keep communism out of public schools I have gotten permission to print the following certificate:

GOVERNMENT PRINTING OFFICE,
CONGRESSIONAL RECORD CLERK,
Washington, D. C., May 8, 1936.

AS CONGRESSIONAL RECORD clerk, who handles all orders for reprints of public documents, I do hereby certify that the reprints of hearings and excerpts from the CONGRESSIONAL RECORD ordered by Congressman THOMAS L. BLANTON relating to his efforts to keep communism out of schools, were not printed at Government expense, but that Congressman BLANTON was charged regular prices

for same by the Government Printing Office, and such reprinting cost Congressman BLANTON the following amounts, to wit:

Order No. 54760. Extracts from hearings, Committee on Appropriations, on eliminating subversive matter from public schools	$309.60
Order No. 12573. Excerpts of speeches from CONGRESSIONAL Record on communism	668.86
Total on above	978.46

The above shows the total charges made by the Government Printing Office against Mr. BLANTON for printing the above.

W. A. SMITH,
Congressional Record Clerk.

APPLE BLOSSOM FESTIVAL AT WESTFORD, MASS.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to address the House to make an announcement and extend an invitation to the Members of the House.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

Mrs. ROGERS of Massachusetts. Mr. Speaker, on Saturday and Sunday of this week the inhabitants of the beautiful little town of Westford, Mass., are to have an apple-blossom festival, and I want you to know how anxious we are to have every one of my colleagues come there to see our beautiful apple blossoms and also accept the hospitality of the Fifth District and Westford in particular. We want you all very much, and I may say to the people from the South who have not been there before that we will give you a welcome as warm as the sunny South; and I may say to the people who have left our section to go to the central West and far West we want to welcome you back; and I will say to the gentleman from North Dakota, who, perhaps, has forgotten us in New England a little, we have the same affectionate feeling for the people who have left us, and we want them at least to come back and see us.

Mr. McFARLANE. Mr. Speaker, will the gentlewoman yield?

Mrs. ROGERS of Massachusetts. I yield.

Mr. McFARLANE. Is the gentlewoman from Massachusetts by any chance referring to the remarks of the gentleman from North Dakota yesterday when he referred to the gentleman from New Hampshire, Mr. Moses?

Mrs. ROGERS of Massachusetts. Does the gentleman realize that apparently the heavens resented those remarks, and hailstones, like thunder, descended on this roof? [Applause.]

FRAZIER-LEMKE BILL

Mr. FULMER. Mr. Speaker, I ask unanimous consent to extend my remarks and to include a few excerpts on the Lemke bill.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. FULMER. Mr. Speaker, under leave granted me to extend my remarks and insert therein a few excerpts on the Frazier-Lemke farm debt refinancing bill, I am inserting herewith a letter just received from one of my constituents. The contents of this letter is very much in line with my argument made yesterday on the floor of the House in connection with the consideration of the Frazier-Lemke bill.

COLUMBIA, S. C., *May 12, 1936.*

Hon. H. P. FULMER, M. C.,
Washington, D. C.

DEAR CONGRESSMAN FULMER: I notice that the Frazier-Lemke farm debt refinancing bill is being considered by Congress. From the account in the today's paper it appears that you are in favor of the passage of this bill. I am glad that you are on the right side.

I am unable to see how the issue of currency to pay debts already contracted could bring about inflation, and if it did, would that evil be any greater than that which now exists as a result of the high rate of interest landowners are paying to stave off foreclosures and loss of their homes?

I am enclosing herewith notice to me of installment due the Federal land bank on a loan which the bank made me about 1924. I have no criticism of the bank. As a matter of fact, it has always treated me with the greatest consideration and courtesy, but my purpose in enclosing this notice is to impress upon you and other Members of Congress who may come into possession of this information the enormous interest charges which mortgagees are paying. You will observe that the semiannual payments on this loan amount to $130.23, of which $86.04 is for interest and only $44.19 is applied to the principal. In other words, the interest is approximately double the principal. I may say in this connection that the interest charges on this loan prior to a couple of years ago, when the Government arranged to have interest rates reduced, were considerably in excess of the figure given here. The total payment of principal and interest then being something over $320 per year in the place of approximately $260 which I am now required to pay. After making payments at the rates mentioned above since the money was borrowed in 1924, the principal has been reduced to about $4,400 on a $5,000 loan. The principal has been approximately paid in interest. With the high taxes and the high cost of living it is almost impossible for farmers who owe a mortgage indebtedness to save their homes. I personally know of a number of cases—and you probably do—where foreclosures have been made and the home owners, after years of struggle, have been thrown out either to become tenant farmers or drift to town and pick up whatever odd jobs chance might give them.

From my own experience and observation I do not feel that the Congress could do anything that would go further to relieve a most distressing situation and improve conditions as a whole than to pass this bill. I trust that the delegation from this State will give it solid support.

I would like to know what the Bankhead "sound dollar" is worth to the poor devil who does not have one to spend.

With kindest regards I am,

Yours very truly,

J. IVEY HUMPHREY.

ADJOURNMENT OVER

Mr. BANKHEAD. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

There was no objection.

ORDER OF BUSINESS

Mr. SNELL. Mr. Speaker, will the gentleman from Alabama yield for a question?

Mr. BANKHEAD. I yield, Mr. Speaker.

Mr. SNELL. What does the gentleman expect the program to be for Monday, Tuesday, and Wednesday of next week?

Mr. BANKHEAD. So far as we can tell now, I may state to the minority leader, Monday, as the gentleman knows, is Consent Calendar day. I do not know whether the Speaker has any suspensions in mind or not. I have not conferred with him.

On Tuesday we will have private claims bills; and if we dispense with Calendar Wednesday, we will take up the conference report on the Interior Department appropriation bill.

EXTENSION OF REMARKS

Mr. BLANTON. Mr. Speaker, I ask unanimous consent to put in the RECORD a certificate from the RECORD clerk of the amount of money I have paid recently to the Government Printing Office in my fight against communism.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

THE FARMER AND HIS MORTGAGE

Mr. COLMER. Mr. Speaker, I ask unanimous consent to revise and extend my remarks.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. COLMER. Mr. Speaker, I seriously doubt that anything that might be said or done by me with reference to the pending legislation and the friends of this bill—Frazier-Lemke—which so many of us think will be of great benefit to the farmers of this country, will have any substantial effect. We are told that the powers that be on this hill are opposed to this particular legislation. I dislike very much being put in the attitude of opposing the leadership of this body who have in charge the administration's policies, for I realize that this administration has done possibly more for agriculture than any previous administration. If I am incorrect in this, then I know that I am on sound ground when I state that the Roosevelt administration has attempted to do more to assist agriculture than any previous administration. And I might add that there has been more reason and justification, possibly, for assistance to the

farmer in the past 3 years than at any time. For certainly there has never been a time in the history of the country when agriculture needed the sympathetic cooperation of its National Legislature more than it did at the period when this administration came into power.

Moreover, I am not unmindful of the fact that there is a desire today on the part of the agricultural interests of the country to cooperate insofar as possible with an administration that is trying to help them. But, Mr. Speaker, this is a most important matter, as I view it. It goes to the very foundation of the troubles which beset the American farmer today. I should be the last Member of this House to challenge the sincerity of many of those who oppose this legislation. I do not question their desire to constructively help the farmer. But I have a right to my own opinion, and I hope that as long as I am a Member of this body I shall always have the courage to exercise the right to follow that opinion when I have once reached it after careful study and thought. Therefore, I shall vote for this measure.

A brief analysis of the bill would be in order, but I shall content myself with merely pointing out some of the salient features of the bill which, I think, would be beneficial.

INTERST OF FARM MORTGAGES TOO HIGH

The whole purpose of this bill is to refinance existing farm mortgages at a rate of interest that the farmer can pay. There are today, and, for that matter, every day, mortgages being foreclosed on the farms of this country by the Federal Land Bank and by private mortgages. These mortgages are being foreclosed because of the fact that the farmer is not earning sufficient income from his farm to pay the rate of interest which he today has to pay. If the business interest of this country had to pay the same rate of interest on its mortgages and other indebtedness the foreclosures in the business world would be just as substantial as they are in the field of agriculture. Business could not stand it; neither can agriculture.

When this administration came into power in 1933 the whole economic structure of the country was tottering. People were hungry. Banks were toppling like toy houses before the anger of a spoiled child. In fact, the country was facing a revolution. The present administration, under the leadership of our great President, proceeded to bring order out of chaos. Much is yet to be done.

SAME TREATMENT FOR AGRICULTURE AS FOR INDUSTRY

One of the first things that was done was to grant generous loans through the Reconstruction Finance Corporation at a low rate of interest to industry. The industrial wheels were about to stop. They were threatened with foreclosure—they were being foreclosed in thousands of instances daily. The Reconstruction Finance Corporation came to their aid. Today, in spite of the assistance that has been rendered to agriculture by this administration, finds agriculture in very much the same position that industry was then. In fact, agriculture was in the same condition 3 years ago as industry. We are asking today that the same privilege be granted to agriculture that was granted to industry then—refinance the farm mortgages on a lower rate of interest. Need I remind you that millions upon top of millions of dollars went to the relief, through the medium of loans through the Reconstruction Finance Corporation, of industry. Happily, they were able to refinance their obligations at a lower rate of interest, and today industry is fairly comfortable. Give the farmer the same opportunity to refinance his mortgage indebtedness and you will find him in a few years fairly happy and content.

FARMERS TRYING TO REPAY WITH HIGH MONEY INDEBTEDNESS INCURRED WITH CHEAP MONEY

Mr. Speaker, the condition of the farmer today, in spite of all the attempts that have been made to assist him, is not an enviable one. The chief trouble with the farmers of this country today is that they are trying to repay obligations incurred when cotton was selling at 20 cents and wheat at $1.50 with money earned on 10-cent cotton and 90-cent wheat. I doubt if it can be done. Thousands of farmers in this country are faced with the loss of their farms—their homes, if you please—because back in prosperous times when money was cheap they incurred obligations at a low rate of interest (which is always incidental to cheap money) and are now forced into the unfortunate position of trying to repay these obligations with tight money, which must be obtained at a high rate of interest; this, too, when they are now receiving approximately half for the commodities which they produce as compared with the price received for their commodities when the obligation was incurred. But it is argued that the farmer should not have incurred these obligations in prosperous times. The farmer is not to be indicted for this any more than the city dweller, the laborer, or any other class of people. Even the master minds in the industrial world would be subject to the same indictment. All classes of people made the same mistake, if a mistake it was. We have realized that and attempted to correct it in this Congress. We have granted relief to the home owners through the Home Owners' Loan Corporation. We have extended the helping hand to industry. We have saved the banks of the country through the guaranty deposit law. We have undertaken to grant security for the aged through the old-age pension. Financial assistance to the crippled and unfortunate children of our country has been given. And, frankness compels the admission that we have attempted to help the farmers of the country.

All of these undertakings were worthy and received my steadfast and enthusiastic support. But here, as I see it, we have an opportunity through this piece of legislation to go to the taproot of the farmer's trouble by liquidating his farm mortgage through a process of refinancing at a rate of interest at 1½ percent, plus the carrying charges, which should, at the most, not exceed over another 1½ percent. In other words, under the terms of this legislation if enacted into law, the farmer would be able to swap his mortgage upon which he is now paying anywhere from 6 to 8 percent for another mortgage on a long-term retirement plan at a rate of interest at 3 percent. It would give him security. If this bill were enacted into law there are thousands, yea, hundreds of thousands, of farmers in this country who could rest at night with the assurance that they had reasonable security for their farms and their homes from this ghostly spectre of the advent of the farm auctioneer. Three percent interest with the liquidation of the mortgage over a period of 40 years—what comfort, what a sense of security the mortgage-ridden farmers of this country would have!

INFLATIONARY

But we are told that this bill is inflationary and that that is one of the chief objections to its enactment into law. As one who has given considerable time to the study of our monetary system I disagree with this charge. Inflation is a question. Few people agree upon what constitutes inflation. Time will not permit a discussion of the monetary question involved. Suffice it to say that these bonds which are proposed to be issued and sold under the provision of this bill would have behind them every safeguard, as the bill is now amended, that any other existing obligation of the Government has.

They would have behind them the gold and silver in the Treasury of the United States. Moreover, they would have behind them the real value of this country—the real estate and the homes of the country. After all, what constitutes value? Certainly it is not money. The true wealth of this Nation is not in the stocks and bonds owned by the financial interests of this country. Our real wealth is based upon the value of the property of the country's citizenship. The bonds which are proposed to be issued under this act will be secured by that value.

I fear that, if the present conditions with reference to the farm mortgages of this country continue as they have for the past 7 years, the morale of the farming class of this Nation will be undermined and destroyed. And when the morale of the agricultural class of this country, constituting as it does the fundamental wealth of the Nation, is destroyed, this country will cease to exist on its present basis with its present institutions. Recent statistics tend to prove that farm tenancy is on the increase. I fear that it will continue to

grow until some substantial remedy, such as the pending legislation, is granted.

FEDERAL RESERVE BANK VERSUS FEDERAL LAND BANK

One of the chief objections advanced against this legislation is that it is not orthodox and that it proposes to give the Federal Land Bank the power to issue Federal Land-Bank bonds. This is exactly what is done under the orthodox monetary system we have. In other words, we are merely asking here for the same privilege that the Federal Reserve Bank enjoys. How can it be said that it is perfectly orthodox for the Federal Reserve Bank to do one thing and that it is unorthodox for the Federal Land Bank to do the same thing? The truth about the matter is that those who advance this argument advocate the political thought or philosophy that teaches, in the final analysis, that the monetary policies of this Government should be dictated by the financiers, the big banking interests of the country.

There is more misinformation and more ignorance on the question of the monetary policies of this country than on any other subject. When the people of this country awaken to the real truth about our monetary policy in this country, there is going to be a change. There is no sound reason why the taxpayers of this country should pay in excess of a billion dollars a year for the privilege of issuing its own money. When the masses of the people of this country are educated on this important question, Congress will exercise its constitutional right and duty to coin and issue its own money and save this billion dollars annual interest charge that the Government now pays for that privilege. We are wedded to the old policy through years of practice; and when we attempt here in this body to exercise our right and perform our duty as Members of Congress, we are immediately told that we are unorthodox.

LET US BE SINCERE

Mr. Speaker, this is not a moratorium, and I am glad that the bill has been amended to strike out the bankruptcy provision. Let us be fair and sincere about this matter. The farmers of this country do not want a moratorium, and they do not want bankruptcy. They want two things: First, they want a fair price for their commodities; and second, they want a rate of interest on their farm indebtedness that it is possible for them to pay and, at the same time, make payments upon the principal. In other words, they want an opportunity to retire their outstanding obligations. And they want such an opportunity as has been given the industries of this country.

I realize that $3,000,000,000 in bonds, or in money, or in credit, is a sizeable amount. I realize that it is no light thing to provide for the issuance of $3,000,000,000 worth of farm-mortgage bonds. I am equally cognizant of the fact that it is not a trifling matter to further utilize the credit of this country, as great as its resources are, for an additional $3,000,000,000. But we have provided for in excess of $10,000,000,000 for relief of the unemployed, the aged and maimed, the home owners, the railroads, banks, and industry. Are we to say to the farmer that he is the forgotten man? I may be in error about this. My interest in the farmers and the agricultural class of my district and the country as a whole may cause me to become too enthusiastic. Ordinarily, I try to stay within the bounds of reason. I think I am conservative by nature. But I think we have a real opportunity in this legislation to render a real service to the mortgage-ridden farmers of the land—another opportunity to place agriculture upon a parity with industry.

And so long as I remain in this House it will be my purpose to try to improve the lot of the agricultural class of this country. Whenever a question arises affecting their interest as has been raised here today, I shall resolve that doubt in favor of the farmers of this country.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. KELLER, for 1 week from May 15, on account of sickness in family and business necessity. His first absence in three terms.

To Mr. MEEKS, for 1 week, on account of official business.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 32. An act to provide for the creation of the Saratoga National Historical Park, in the State of New York, and for other purposes; to the Committee on the Public Lands.

S. 3992. An act for the relief of Capt. Laurence V. Houston, retired; to the Committee on Military Affairs.

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

Mr. PARSONS, from the Committee on Enrolled Bills, reported that that committee had examined and found truly enrolled bills and joint resolutions of the House of the following titles, which were thereupon signed by the Speaker:

H. R. 1398. An act to provide for the establishment of a Coast Guard station at or near Crescent City, Calif.;

H. R. 2119. An act for the relief of Mrs. E. L. Babcock, mother and guardian of Nelson Babcock, a minor;

H. R. 2467. An act for the relief of Holy Cross Mission Hospital;

H. R. 3340. An act for the relief of Jesse S. Post;

H. R. 5058. An act to convey certain lands to Clackamas County, Oreg., for public-park purposes;

H. R. 8089. An act for the relief of Joseph J. Baylin;

H. R. 8370. An act to provide for the establishment of a Coast Guard station at Port Washington, Wis.;

H. R. 8506. An act for the relief of Oliver Faulkner;

H. R. 9042. An act to provide for the sale of the Port Newark Army Supply Base to the city of Newark, N. J.;

H. R. 9370. An act for the relief of Frank Cordova;

H. R. 9373. An act for the relief of H. L. and J. B. McQueen, Inc., and John L. Summers, former disbursing clerk, Treasury Department;

H. R. 9455. An act for the relief of Robert J. Mann;

H. R. 10308. An act to amend article 3 of the "Rules Concerning Lights, etc.", contained in the act entitled "An act to adopt regulations for preventing collisions upon certain harbors, rivers, and inland waters of the United States", approved June 7, 1897;

H. R. 10321. An act to amend section 4 of Public Act No. 286, Seventy-fourth Congress, approved August 19, 1935, as amended;

H. R. 10589. An act to amend section 32 of the act entitled "An act to authorize the construction of certain bridges and to extend the times for commencing and/or completing the construction of other bridges over the navigable waters of the United States, and for other purposes", approved August 30, 1935;

H. R. 10847. An act to authorize the acquisition of land for cemeterial purposes in the vicinity of New York City, N. Y.;

H. R. 11036. An act to amend section 4321, Revised Statutes (U. S. C., title 46, sec. 263), and for other purposes;

H. R. 11302. An act to authorize the Secretary of War to lend to the reunion committee of the United Confederate Veterans 3,000 blankets, olive drab, no. 4; 1,500 canvas cots, to be used at their annual encampment to be held at Shreveport, La., in June 1936;

H. R. 11346. An act for the relief of H. R. Heinicke, Inc.;

H. R. 12162. An act to create an additional division of the United States District Court for the Southern District of Mississippi to be known as the Hattiesburg division;

H. R. 12183. An act for the relief of Gladys Hinckley Werlich;

H. J. Res. 538. Joint resolution to provide for participation by the United States in the Ninth International Congress of Military Medicine and Pharmacy in Rumania in 1937; and to authorize and request the President of the United States to invite the International Congress of Military Medicine and

Pharmacy to hold its tenth Congress in the United States in 1939, and to invite foreign countries to participate in that Congress;

H. J. Res. 547. Joint resolution providing for the importation of articles free from tariff or customs duty for the purpose of exhibition at Great Lakes Exposition to be held at Cleveland, Ohio, beginning in June 1936, and for other purposes; and

H. J. Res. 569. Joint resolution to authorize an appropriation for the expenses of participation by the United States in a conference at Brussels to revise the Convention for the Protection of Literary and Artistic Works, concluded at Bern, September 9, 1886, and revised at Rome, June 2, 1928.

BILL PRESENTED TO THE PRESIDENT

Mr. PARSONS, from the Committee on Enrolled Bills, reported that that committee did on this day present to the President, for his approval, a bill of the House of the following title:

H. R. 10544. An act authorizing the erection of a memorial to those who met their death in the wreck of the dirigible *Shenandoah*.

EXTENSION OF REMARKS

MY REPORT TO THE PEOPLE OF THE THIRD CONGRESSIONAL DISTRICT OF WASHINGTON OF MY 4 YEARS' SERVICE AS THEIR REPRESENTATIVE IN CONGRESS

Mr. SMITH of Washington. Mr. Speaker, in conformity with my practice in former sessions, I now desire to render to the people of southwest Washington a brief account of my stewardship as their Representative in Congress during the past 4 years, as I feel that this is information which they are entitled to have.

PERIOD FROM 1933 TO 1936

During the two terms I have served in Congress, during the Seventy-third and Seventy-fourth Congresses, I have diligently and faithfully represented the people of the Third Congressional District of the State of Washington, to whom I have the honor of submitting this report. It has been my privilege to actively participate in the enactment of the legislation and formulation of the policies which have materially improved the condition of our people, as contrasted with the distress and despair of the dark, terrible months of early 1933, when business, industry, and agriculture were prostrate. In southwest Washington we have gone a long way from the never-to-be-forgotten conditions of 1929–33 and evidences of improvement are everywhere apparent, in retail business, farm prices, industrial pay rolls, building construction, and business generally. However, our task is far from completed. We have made substantial progress, it is true, but we must continue to completion the program and efforts which we have started to bring about better and happier living conditions for all our people.

MY PROGRESSIVE VOTING RECORD

In my reports of previous sessions I have set forth in detail the measures which I have actively supported and voted for and those which I have opposed and voted against. In this last session I voted for the following major measures:

First. Adjusted Compensation Payment Act, 1936—bonus—and to pass it over veto.

Second. Neutrality Act, extending and amending, to keep the United States out of war.

Third. Conservation of soil resources, to benefit the farmers.

Fourth. Impeachment of Federal Judge Ritter, of Florida, for having been involved in financial transactions unbecoming a member of the judiciary.

Fifth. H. R. 8458 and conference report, Federal Government employees' leave bill; and H. R. 8459 and conference report, Federal Government employees' sick leave bill.

Sixth. An act to continue Electric Home and Farm Authority until February 1937 to finance installment sales of electrical fixtures for homes in rural and country districts.

Seventh. An act to amend title I of the National Housing Act and to extend same to April 1, 1937, providing insurance of loans and advances for the purpose of financing alterations, repairs, and improvements of homes and other real property, including churches.

Eighth. The act to enable the Commodity Credit Corporation to better serve the farmers in orderly marketing and to provide credit and facilities for carrying surpluses from season to season.

Ninth. The rural electrification bill—S. 3483—to provide a 10-year program to furnish the farmers of America with the conveniences, economies, and comforts which are a part of the modern, electrified home.

Tenth. A bill to extend to July 1, 1938, the power of the Federal Deposit Insurance Corporation to make loans, purchases of assets, or guaranties to reduce or avert threatened insurance losses, for the protection of depositors in banks.

Eleventh. H. R. 11687, to authorize Federal aid for highways and road construction, for the fiscal years 1938 and 1939, and to establish in the Bureau of Public Roads a section of rural roads, as favored by the National Grange in the interests of better roads for farmers, as passed by the House.

Twelfth. The corporate tax bill to tax incomes, capital stock, and excess profits of large corporations.

Thirteenth. Work relief bill, to provide funds for continuance of program.

Fourteenth. The Frazier-Lemke bill to refinance farm mortgages; also voted for discharge of committee and was twenty-second out of 218 Members who signed petition to bring bill before House for debate and vote.

THE TOWNSEND PLAN

My stand in favor of the Townsend plan is well known, not only to the people of my district and State but also to the entire Nation. I became an advocate of the Townsend plan over 2 years ago, at a time when there was not a single Townsend Club in my district, and I have taken an active, prominent part in the campaign waged in its behalf in and outside of Congress, and was the only Member of Congress who addressed the Chicago convention in October 1935.

I placed in the CONGRESSIONAL RECORD on April 4, 1934, the first statement and explanation of the Townsend plan which was made in the Congress of the United States and the first official notice which it received in the National Capital. I have studied it continuously since then, and was one of a small group of House Members who drafted the first and second bills embodying the plan, the latter receiving 56 votes—of which mine was one—in the first session of the Seventy-fourth Congress, and have again served on the steering committee in this past session.

I appeared in behalf of Dr. Townsend and Mr. Clements when the hearing was held before the Rules Committee on the Bell resolution for an investigation, and also spoke twice on the floor of the House on that subject, my remarks on these occasions having been broadcast by the March of Time. We have made more rapid progress in furthering the Townsend plan than has ever been made in regard to any other important legislative proposal, and I feel confident of our eventual success. I intend to continue to support it vigorously in the future as I have in the past.

VETERANS' LEGISLATION

I have been one of the most active Members of the veterans' bloc in Congress who have consistently fought for a greater measure of justice for the veterans of our wars. I have had the honor and pleasure during the past 2 years to serve as one of the 22 members of the steering committee headed by Congressman WRIGHT ("Bonus") PATMAN, of Texas, who have carried on the fight for immediate cash payment of the adjusted-service certificates, which resulted in final victory in this session of Congress.

I led the contest for the passage of my bill (H. R. 6995) to restore the pensions to the veterans of the Spanish-American War, including the Boxer Rebellion and the Philippine Insurrection, their widows and dependents, in the Committee on Pensions, of which I am a member, wrote the favorable committee report, secured its passage on the floor of the House, aided in its passage through the Senate, and in securing the approval of the President, which was the most important single piece of pension legislation enacted by Congress in many years, and has been the subject of Nation-wide comment.

LABOR AND FARM LEGISLATION

I have actively supported in this session, as I have in all former sessions, the legislation favored by the American Federation of Labor and the Railroad Brotherhood of Locomotive Firemen and Enginemen, providing for more just working conditions for employees. I actively supported the Retirement Pension System Act for railroad employees both times when it was enacted, and will do so again if such action becomes necessary by decision of the Supreme Court. I have favored all measures in the interests of higher wages, shorter hours, and better working conditions for the men who labor and by their labor make possible the comfort and happiness of mankind. This policy on my part has been pursued in a realization of the fact that the prosperity of business and industry depends upon the purchasing power of the wage earners and producers.

For these very reasons I have also continued to go on record in favor of all social-welfare legislation sought by the postal employees, rural and substitute carriers, and all employees of the Federal Government who are faithful and efficient public servants and deserving of just treatment at the hands of Uncle Sam.

I have likewise supported all farm legislation sponsored by the National Grange, the Washington State Grange, and by the Pomona and local Grange units within my district, as I am convinced that on account of their practical experience and knowledge of the problems of agriculture they know what is best for the farmer. It is my firm conviction and sincere belief that we can have no permanent or lasting business prosperity unless it rests upon the well-being of agriculture, and it is therefore absolutely essential that our dairy, poultry, grain, and fruit farmers be treated, in all our legislation, on a parity with industry. We have made real progress in our efforts to restore agriculture, as evidenced by increased prices of all farm products, but our main objective will not have been achieved until the farmer receives a reasonable profit for his product, whether it be milk, butterfat, eggs, vegetables, fruit, berries, or grain, above his cost of production.

RIVER AND HARBOR PROJECTS

During the first session of the Seventy-fourth Congress an omnibus rivers and harbors bill, the first in 5 years, was reported out by the Committee on Rivers and Harbors, on which I hold membership, and was passed by the House and Senate and signed by the President. It carried nine projects for southwest Washington and four surveys for new projects, the largest number of southwest Washington projects ever included in a rivers and harbors bill.

First. Grays Harbor jetties: This project to reconstruct the north and south jetties to an elevation of 16 feet, at a cost of $4,565,000, the biggest single project west of the Mississippi River, after having been repeatedly rejected by United States Army Engineers for many years, has been approved and is in progress of construction. Dredging the inner channel of Grays Harbor, at an annual cost of $58,000, which local taxpayers have paid since 1919, has been assumed by the Federal Government, commencing in 1934.

Second. Port of Vancouver: This is a project to provide a channel 300 feet wide and 30 feet deep from the mouth of the Willamette River to the Interstate Highway Bridge at Vancouver, Wash., with two turning basins, each generally 2,000 feet long, 800 feet wide, and 30 feet deep, at a cost of $140,000 for new work and annual maintenance of $35,000, for which P. W. A. funds were obtained, and the project has been constructed. It follows closely the allocation of $58,000 P. W. A. funds secured the previous year to dredge the channel and basins to a depth of 28 feet. Another new project to extend the lower turning basin downstream for a distance of 1,000 feet and to a depth of 30 feet at low water was initiated by me in a resolution adopted by the House Committee on Rivers and Harbors on June 20, 1935, and finally approved by the United States Army Engineers at Washington, D. C., on January 2, 1936, and is in line for inclusion in the next rivers and harbors bill. In the meantime efforts have been made by me to have an exception made in regard to this project and have the necessary funds allocated out of other sums available for rivers and harbors work. We have also secured a Federal P. W. A. grant in the sum of $136,653 toward the cost of constructing a new dock terminal for Vancouver.

Third. Willapa Harbor and Narrows: This is a project for the further improvement of Willapa Harbor and River by straightening the "narrows", consisting of a sharp S bend about a mile downstream from Raymond, at a cost of $207,000, and P. W. A. funds were secured and the project has been constructed. Previous to that an allocation of $80,000 P. W. A. funds was secured to dredge and deepen the main channel.

Fourth. Olympia Harbor: Two revised and modified projects to dredge and deepen the channel to 30 feet and provide certain turning basins have been approved, at a total cost of $105,467 for new work, which has been secured from P. W. A., and the project completed, and a third modified project has recently been approved to widen the outer reach to 500 feet and enlarge the turning basin, at the present depth of 30 feet, to cost $98,000, which is in line for inclusion in the next rivers and harbors bill.

Fifth. Bakers Bay: This project to provide a channel 200 feet wide and 10 feet deep, extending through the easterly passage at Sand Island to the port of Ilwaco, which has been advocated for many years, has been approved, and altogether $80,000 P. W. A. funds were secured, and the project has been completed. We recently succeeded in defeating the attempt to close the west channel, and a project to improve the same is now pending.

Sixth. Surveys for new projects: The omnibus rivers and harbors bill also carried items for preliminary examinations and surveys of Shelton Harbor in Mason County, a highly important lumber, pulp, and forest-products manufacturing community; Vancouver Lake and Columbia River, to furnish a fresh-water harbor ideal for industrial sites and purposes of national defense; Elokomin (Cathlamet) Slough, to serve important lumber and manufacturing interests; and the Chehalis River from the mouth of the Skookumchuck River to the Grays Harbor County line, Washington.

BONNEVILLE PROJECT

I have continued my efforts to further this worthy project which is important to Skamania, Clark, and Cowlitz Counties in my district. Approval of the United States Army Engineers has been secured for a ship channel 300 feet wide and 27 feet deep at low water from Vancouver to North Bonneville in the Columbia River, at a cost of $2,380,000. The dredging of this channel and providing of suitable turning basins and dockage facilities to accommodate ocean-going vessels will insure the industrial development of the Hamilton Island industrial area at North Bonneville and vicinity. I also will continue to favor the construction of the main trunk transmission line down the north bank of the Columbia River, on the Washington side, to Camas, with an extension to Vancouver and Longview, as recommended by the United States Army Engineers.

FLOOD CONTROL

The United States Army Engineers are proceeding pursuant to my bills passed by Congress, Public Laws Nos. 336, 337, 338, and 339, affecting the Cowlitz, Chehalis, Lewis, and Columbia Rivers and all their tributaries, with a view to the control of their floods, which was the first legislation of this character affecting the rivers of southwest Washington which has ever been enacted. The recommendations and plans of the Federal Engineers constituted a basis for obtaining Federal funds in order that, after a delay of 30 years without any action being taken, the property and lives of our citizens are to be protected. I have actively cooperated with municipal, county, and State officials in formulating a practical cooperative flood-control program for our section of the State, and by our continued joint efforts we are attaining our objective.

OLYMPIA-GRAYS HARBOR—WILLAPA HARBOR CANAL

Further progress on this project, which has been successfully revived after having been dormant for nearly 40 years, has been made. The United States Army Engineers have

recommended the Puget Sound-Grays Harbor unit of the canals to the National Resources Board to provide a 13-foot navigation canal at a cost of $25,213,000. At the thirtieth and thirty-first annual conventions of the National Rivers and Harbors Congress, held in Washington, D. C., the projects committee of that powerful waterways organization approved the entire project.

It is intended in the next session of Congress to include this project in an omnibus canal bill which will include meritorious canal projects in various sections of the Nation for which strong support has been enlisted.

The route of the Willapa Harbor and Grays Harbor units would not, according to the Engineers, be permitted to damage the cranberry bogs or oyster beds of Pacific and Grays Harbor Counties, and at the public hearing held at Aberdeen 3 years ago I insisted upon this precaution being taken.

GAME AND FISH RESOURCES

One of the most important enterprises which can be encouraged by the Federal Government is the developing, propagating, and conserving of our game and fish resources. I have therefore at all times cooperated with the House Special Committee on Conservation of Wild Life and Resources, as well as with the Willapa Harbor Sportsmen's Association, Grays Harbor County Game Protective Association, and the Poggie Club of Washington, Aberdeen Chapter, and other sportsmen's organizations in my district. According to their recommendations, I have introduced in this last session of Congress a bill for the establishment of a fish-cultural station on the west fork of the Humptulips River, in Grays Harbor County, Wash., for the propagation of trout and steelhead, in support of which I am assured the cooperation of Hon. Frank T. Bell, Commissioner, United States Bureau of Fisheries. Request has also been made for additional W. P. A. funds for improvements at the Quinault Hatchery to increase the pond system for the purpose of rearing a larger number of fish to the fingerling stages before releasing them. I have given prompt attention to the requests received from the holders of fish and game licenses in southwest Washington for information regarding the Federal laws and pending legislation relating to the subject of wildlife, and have secured for them such Government pamphlets and circulars as are available for distribution.

DEPARTMENTAL AND COMMITTEE HEARINGS

I have made frequent appearances before the bureaus and departments of the Federal Government whenever the interests of southwest Washington have been involved. During the pendency of the negotiations and hearings in regard to the reciprocal-trade agreement with Canada, at every stage of the proceedings I vigorously presented the case and viewpoint of the lumber and shingle industries, and have received many letters from prominent shingle and lumber operators commending and praising me for my efforts and activity, which were contributory to the satisfactory results obtained, compared with the scant consideration our forest-products industries have received during former national administrations.

PUBLICITY FOR SOUTHWEST WASHINGTON

During my service in Congress I have obtained desirable publicity for southwest Washington without neglecting my official duties while doing so. I have been a guest speaker before the Women's National Democratic Club, American Legion, Grange, United Spanish War Veterans, Temple Baptist Church, Chevy Chase Presbyterian Church, Kiwanis Club, Order of Vasa, Washington State Society, and other civic and fraternal organizations in Washington, D. C.; and during the past 4 years have addressed five important national conventions in various parts of the United States, namely, National Rivers and Harbors Congress, national encampment of the United Spanish War Veterans, national convention of the Townsend Clubs of America, national convention of third- and fourth-class postmasters, national convention of the Railway Mail Association. My activities in Congress have received honorable mention in Harper's Magazine, Time, Literary Digest, National Tribune (Stars and Stripes), Plain Talk Magazine, Townsend Weekly, the United States News, Eagles Magazine, Real America, Foreign Service (Veterans of Foreign Wars), the Postmasters' Advocate, the National Rural Letter Carrier, the Progressive (La Follette's magazine), to mention just a few of the more important national publications, and generous news and pictorial mention in the newspapers of Washington, New York, and other eastern cities. This publicity has not only been beneficial to my district but it has served to make me known in Washington, D. C., and throughout the country.

ROAD AND HIGHWAY CONSTRUCTION

I have taken a keen interest in the Federal road-building program and in securing appropriations for same. The Third Congressional District has received more Federal aid than ever before, and as a result there has been more road construction in the counties of southwest Washington than during any previous period. I have particularly cooperated in furthering road building in the rural districts, as I appreciate fully the value and importance to our farming population of farm-to-market roads. I have kept close contact with the United States Bureau of Public Roads and have received very friendly and sympathetic consideration from that agency at all times. I am heartily in favor of a national rural free-delivery mail road building program apart from the Federal and State highway systems and to be apportioned to the respective States without any matching of funds by the States. These roads should be built according to specifications satisfactory to the commissioners of the county in which located and the Secretary of Agriculture in determining the portions of the road to be improved and the specifications therefore to consult with the Postmaster General and such county commissioners.

Such a program will improve the rural free-delivery mail service and also relieve unemployment throughout the country and prove of decided benefit and advantage to my district.

FEDERAL PROJECTS IN THIRD DISTRICT

In every community in our nine counties useful Federal projects have already been constructed or are under construction. Numerous public-works projects, C. C. C. camps, the Longview Subsistence Homesteads, the Kelso, Centralia, and Montesano post offices, new roads, dikes, and flood-control works, rivers, harbors, and jetty projects are evidence of the progress which has been made in the past 4 years in building a greater southwest Washington.

OUR PUBLIC SCHOOLS

I have actively favored providing in public works and relief appropriation bills adequate funds to pay the salaries of school teachers and maintain our public schools as well as institutions of higher learning, as I consider the cause of public education to be paramount and favor the following program:

First. Adequate free public education to the children of the United States.

Second. Adequate pay for public-school teachers as a matter of justice and as a means of retaining in and attracting to the teaching profession the most competent, devoted, and best equipped men and women.

Third. An annual minimum of at least 8 months' teaching in the public schools of all the States.

Fourth. An adequate number of safe, commodious, and well-equipped school buildings.

Fifth. Free textbooks for all public-school pupils.

Sixth. Adequate assistance by the Federal Government, through appropriations and otherwise, in accomplishing the above-named objects.

Eighth. Such other allied purposes as may serve the best interests of the teachers and pupils and shall make the public schools a more effective, liberal, and far-reaching force in local, State, and national life.

I also favor the creation of a Federal Department of Education, to be headed by a Secretary of Education to sit in the President's Cabinet, with all the facilities and resources of the Federal Government enlisted in behalf of the cause of education. We are now the only civilized nation in the world which has failed to grant to education a national

department and a cabinet officer. No less than 72 of the leading nations of the earth have included a minister of education among their cabinet officers.

CONSTRUCTIVE LEGISLATION

I consider the following to be the most constructive legislative achievements of the present administration:

First. The unemployed, their wives and children, have been fed and a relief and public-works program has been carried out. In this connection I have favored modifying the regulations as to employment on relief projects to provide jobs to those worthy citizens, who, although they never have applied for relief benefits, are yet in need of employment.

Second. A million city families have been saved from eviction by the Home Owners' Loan Corporation and a number of private mortgage and lending companies made solvent, whose investors are citizens of small means.

Third. Farmers' cash income last year was two and one-half billions larger than in 1932. Farm Credit Administration loans have stopped foreclosures. Bankruptcy prices have given way to profitable prices. Despite a serious court setback, a national program of planned production and soil conservation is again moving ahead.

Fourth. A prostrate banking system has been reconstructed and the Federal bank deposit insurance law has restored confidence and rendered the deposits of the people safe and secure.

Fifth. Investors, for the first time, have their investments safeguarded, through the securities registration, stock market, and holding company acts.

Sixth. Labor has gained recognition of the right to bargain collectively, and means of enforcing that right have been provided.

Seventh. The Federal Housing Act has proved beneficial and with reduced interest rates, and more liberal lending terms will prove a further stimulus to the construction and repair of homes and give employment to members of the building trades and those employed in manufacturing building materials, which applies particularly to the lumber, shingle, plywood, and veneer industries of our own section of the country.

Eighth. A start has been made to provide social security for our people, including the blind, crippled children, underprivileged mothers, and the aged. This program is, in my opinion, inadequate and will be supplanted by the Townsend plan, which will render unnecessary all pension systems, public and private, and also redistribute purchasing power among the masses in such a manner as to bring about permanent good times and insure social security for our unemployed young people as well as aged citizens.

Ninth. We have enacted the first real neutrality legislation in our history to prevent our being dragged into the vortex of another world war, with its consequent loss of life and treasure.

The foregoing are the main achievements of the past 4 years, and can lead to but one answer to the question, "Would we go back to the conditions from which we emerged as a direct result of this legislation?" That answer is, "No; we do not want to go back; we want to go forward to achieve still greater benefits and safeguards and security for the average man, for the so-called lower and middle classes, who are the backbone, the brawn, and the brains of our beloved country."

MY RECORD IS ONE OF SERVICE

Since I first came to Congress 4 years ago I have striven to respond promptly to every reasonable request made of me by my constituents, making it a rule to promptly answer all letters and inquiries, and whenever possible to carry out their wishes. This has necessarily increased my work, but I have always felt that my first duty was to my district. The good citizens of southwest Washington have been very kind to me, and as the people whom I have sought to serve, they are the best and only judges as to whether my services as their representative in Congress have been satisfactory. While I have felt that my primary and first duty was to the people of southwest Washington, I have tried faithfully and diligently to serve the State of Washington and the Nation, and to measure up to the high ideal of a national Representative.

RECONSTRUCTION NOT RELIEF—OUR ECONOMIC DEVELOPMENT HAS MADE INEVITABLE OUR PRESENT DILEMMA—COOPERATION CAN CURE

Mr. SCOTT. Mr. Speaker, while few intelligent people question the necessity for continuing relief until a better way is found, it is becoming more and more obvious that merely voting more billions for relief will not solve the problem. The cure of any disease involves dealing with underlying causes. Treating symptoms is not enough. Salve, even a billion dollars' worth, does not get at the causes.

Business improvement appears to be definitely under way, with indications that it may go a long way. But the relief load is not dropping in proportion to business improvement. There is a vast reservoir of marginal cases, those who are just on the verge of relief. As these come to an end of their resources and savings, and relatives and friends, they have no choice but to join the ranks of those on relief. The addition to relief rolls from this marginal reservoir is almost keeping pace with the removal of cases from relief by reemployment.

PERMANENT RELIEF PROBLEM

Some estimate that the marginal cases exceed those actually on relief and that together they constitute about 40 percent of our total population. Continued improvement in business should take up some of this 40 percent, but because of other factors at work, because of basic, world-wide economic changes this improvement will not completely take up the slack. It will not solve the relief problem.

END OF AN ECONOMIC ERA

Unemployment in America grows out of economic causes far more basic than the old concept of the business cycle. We are not merely in a depression. We are historically at the end of an economic era. We are faced with making basic adjustments to a condition that is new, not only to America but in the history of the race.

For 300 years America has participated in the world-wide operation of an economic mechanism, variously called the price system, or capitalistic, or profit system. That system has notoriously served the master races at the expense of the subject peoples. In spite of its ups and downs and in spite of inequalities, and the ever-present and fluctuating margin of poverty, that system has served the majority of people in America reasonably well. Ignoring, for the moment, all questions of justice or of social righteousness, and considering only the mechanical or mathematical workability of the system, it is plain that that workability depends upon constantly getting rid of accumulated profits.

THE MARGIN OF PROFIT

This necessity may be illustrated with a simple example. Suppose a manufacturer, producing 10,000 chairs, makes 10-percent profit. His profit is 1,000 chairs. Now suppose there is not sufficient redistributed buying power to provide for the consumption of that profit margin of a thousand chairs. They remain on display in the stores. To that extent they reduce orders to the factory for more chairs. As orders are cut down, the factory cuts down its hours or days of operation, cutting down employment and reducing pay rolls, or redistributed buying power. As this redistributed buying power is cut down, the sale of chairs falls off still further, cutting down operations, employment, and pay rolls. It is a vicious circle that is not only a circle but a spiral that goes constantly downward. It is the unconsumed margin of profit that wrecks the mechanics of the profit system. The obvious crux of the problem is to get rid of the chairs. Again emphasizing that we are here considering solely the mechanics of economics, and ignoring for the moment all questions of social values, it is of no consequence how the profit margin is consumed, so long as the chairs are disposed of so they cannot stand in the way of new orders to the factory. They may be invested in stocks and bonds, which eventually find their way into expansion of production plant,

new buildings and equipment, larger sales and promotion expenses, increased operating costs, rents, interest, insurance, and dividends so widely distributed that they increase consumption. Or the profit margin of chairs may be burned up, or sunk in the ocean, or blown up in a war. Purely from the standpoint of economics, the particular method, or the particular moment of time of disposing of the profit margin is of little consequence. But that profit margin must be consumed if the system is to keep working.

CONSUMPTION MUST EQUAL PRODUCTION

The first axiom in the successful working of any economic system is that consumption must equal production. The consumption side of this equation includes saving and all the elements and factors connected with it. Saving for the rainy day, for insurance to replace losses, for investment, for reserves for obsolescence, replacement, and expansion; all of these merely inject the time element into consumption. They affect the particular time and method of consumption without in any degree affecting the basic economic law that in the long run consumption must equal production. The method of profit disposing that we have come to think of as normal, the method on which America has principally depended for 300 years, is the constantly expanding market. But that market was based on three foundation stones, each of which is now either passing or already gone. These three foundation stones are:

First. A frontier.

Second. A rapidly growing population.

Third. An apparently unlimited foreign market, based on the mechanical supremacy of the western races.

The frontier has practically gone.

The curve of population growth is leveling off. It is estimated that our population will be practically stationary by 1950.

The mechanical supremacy of western races is true today—a matter of history. We have sent our mass-production machinery to the far corners of the earth. We have sent our engineers to show these backward people, not only how to operate the machinery but even how to make it.

OUR FOREIGN TRADE

On the same identical machinery these backward people are putting labor at rates far below our own. Japan, with identical mass-production equipment, manned with labor at from 7 to 14 cents a day, is sending beer to Germany, and laying down manufactured cotton goods in Manchester, England, cheaper than the Manchester mills can turn it out. The western, or so-called advanced, races have turned their former customers into competitors, and competitors with a tremendous advantage over themselves. Our foreign trade, based on that mechanical supremacy, is definitely a thing of the past. We shall probably continue to wrangle such slight margins as we can. We shall continue to hear much of trade agreements, of favored-nation positions, of unilateral, bilateral, and reciprocal arrangements. We shall try to get the most possible out of the constantly shrinking margin of foreign trade. But the big reservoir of foreign market, which we have so long thought of as practically without limit, is gone forever.

With these three foundation stones of constant expansion either gone or on the way out, the profit system, based on that constant expansion, is facing a basic change.

OTHER FRONTIERS OF EXPANSION

There are, of course, other frontiers of expansion, or ways of bringing about increased consumption to dispose of the profit margin. Notable among these are:

First. New industries, with the new desires and possibilities of consumption that they create, and their increased expenditures for new plant and equipment.

Second. Expansion of private credit or debt. Inflation that increases consumption temporarily but postpones facing the issue.

Third. War; mass destruction of the profit margin, both past and future.

Fourth. Government-directed redistribution of buying power.

These frontiers, or methods of disposing of the clogging profit, are usually present in varying degrees and exercise their influences in varying combinations. In about 1890 the last large land frontier was opened to settlement. The intensive expansion and development of the West continued for some time to provide an outlet for accumulated profit margins. But about the beginning of the present century that expansion was beginning to slow up, and we were beginning to feel the pressure of an inadequate expansion market. But new industries, particularly the automobile, stepped in and temporarily solved the problem.

WAR

By 1912 to 1914 the slack was fairly well taken up and again we were feeling the pinch of inadequate disposal of the profit margin. Along came the World War with its unprecedented destruction of material goods. It served to physic the accumulated profits out of the economic system. But it went further than that. It levied heavily on future profits. Credit was expanded. Debts were accepted in place of payments. Destruction continued. We had tremendous activity. The system was ravenous for material goods. There was demand. And we went zooming into unprecedented prosperity.

Of course, this prosperity has never been paid for. Neither the war additions to our own national debt nor the war debts owed to us by the other nations have been liquidated. It was obviously only an illusion of prosperity. But the illusion served those who either did not want to think or were incapable of thinking or did not want others to think. In any event, consciously and unconsciously, it did help to salve the conscience of the Nation on the crime of going into the war, and it postponed meeting the real issue of the profit system.

After the war, with tremendously expanded production facilities, we were again in a pinch for disposition of profits, or for consumption of goods. Again the system was getting badly clogged. This time we saved our skin by resorting to the wildest orgy of credit expansion we had ever known. This expansion was in three principal channels:

First. Bank credit for business expansion, investment, and speculation.

Second. Time-payment buying to increase purchases of consumption goods.

Third. Government debt.

When this vast bubble of credit expansion burst in 1929, the profit system was in the toughest spot yet. The normal method of disposing of the profit margin, the constantly expanding market based on frontier, rapidly growing population, and a foreign market founded on mechanical supremacy, was gone. In the first 29 years of the century we had been through a major industrial expansion, a major war, and a major credit expansion. We had either to face the issue and pay the piper or resort to the only remaining device for postponement, expansion of Government-directed redistribution of buying power. We chose to continue on the road of evasion and postponement and expanded this last remaining device, not that this device was new.

THE GOVERNMENT TAKES A HAND

Many methods of Government redistribution of buying power have been with us so long that we have taken them for granted. Such are the Army and Navy expenditures, Post Office deficits, public roads and buildings, reclamation work, forestry, pest control, health work, and improvement of rivers and harbors. When we consider these activities at all, we are apt to think only of their social implications and values, forgetting that they are also definitely a part of our economic procedure for redistributing buying power to increase consumption and dispose of the clogging profit margin.

While this method had long been used and had been materially expanded following the war, it had always been used in conjunction with some other of the major devices of profit disposal. But after the break of 1929 it had to be used almost alone.

The Republicans under Mr. Hoover increased many Government activities, notably reclamation work, and instituted new

agencies, such as farm-credit organizations, and the Reconstruction Finance Corporation for public financing of private enterprise. Taxes were increased and the national debt inflated before the Democrats came into power in 1932.

The Democrats under Mr. Roosevelt have merely been expanding the older parts of this method of Government direction of redistribution of buying power, such as Army and Navy expenditures, reclamation work, and so forth, increasing the scope of the more recent devices added by the Republicans and adding new ones. Within this general method they have added such devices as the land banks, home-loan banks, Federal Housing Administration, seed loans, stock loans, C. W. A., F. E. R. A., and W. P. A., with the whole relief program, both direct dole and the thinly disguised dole, or manufactured work relief. They established the C. C. C. to furnish subsistence employment to a particular group; the N. R. A. to increase distribution of buying power among labor; the A. A. A. with its cotton program, its corn and hog program, its tobacco and potato programs, and its soil-conservation programs, all in an attempt to bring about parity for the farmers, to increase their buying power. They have been working on old-age pensions and various social-security proposals. With all their infinite variety in detail, all of these activities and proposals obviously come within this fourth general method for getting rid of the obstructing profit margin, "Government-directed redistribution of buying power." In expanding this method we have added nothing new in principle. We have merely added to the variety and size of the operations.

The cost of this method has perennially been met by some combination of taxes for immediate payment and public debt for postponed payment.

On the cost side we have added to both the variety and size of taxes and increased the public debt. We have also added that thing relatively infrequent in American history—inflation of the currency or depreciation of the dollar. But since this move was made principally to meet a condition in international exchange, it has relatively slight bearing on the particular domestic problem we are considering here.

As taxes get heavier it is becoming plain to more and more people that every consumer pays taxes, whether or not he is technically a taxpayer. The living standard of each individual is lowered by taxes exactly to the extent that taxes are eventually collected for the support of others on the goods, services, and conveniences that he uses or consumes.

The inflation of the public debt is spread through practically all political subdivisions. Material increases have been accumulated in the national debt, and in most, if not all, of the State, county, and city debts.

In this connection a clear distinction should be made between the purely economic function of this device of Government-controlled stepping-up of consumption to dispose of the profit margin and the many questions of social value and political expediency involved. Every detail of such a program, and of each new proposal, presents problems of relative social values, of the possibilities and the expediency of different methods of taxation, and of the wisdom and safety limits of public-debt expansion.

INFLATION

To make any attempt to judge how far the public debt can be inflated with safety, when and to what extent we shall resort to further currency inflation, when and to what extent other methods of profit disposing, such as new industries or a new war, may again get under way and once more be major factors would be dealing in the realm of prophecy and is beyond the scope of this analysis.

The present Government has merely developed this Government-directed redistribution further than ever before in our history; and to this old process Mr. Roosevelt has applied the new and hopeful name of "pump priming", on the theory that, if carried far enough, it would start the old economic processes to function more normally. To the extent that these processes depend on the psychological factors of confidence and belief, it is a well-founded hope, and doubtless has already had good results. But to the extent that the old normal processes depend on more basic factors than have passed off the stage, it cannot provide a basic answer. In that sense it can function only to the extent that the buying power so redistributed is able to take up, or provide consumption for, the otherwise unconsumed profit margin of production.

It could succeed completely only if carried to the extent of taking, through taxation and inflation of the public debt, from those who have more than they can consume, all of that surplus and redistributing it to those who have less buying power than their consumption possibilities. It is now, as it always has been, merely an equalizing device to alleviate to some extent the peak pressures produced by our economic system.

ROBBING PETER TO PAY PAUL

In other words, it can only succeed to the extent that it robs Peter to pay Paul. It may distribute buying power to all the Joneses in order that they may buy more from all the Smiths. On this buying the Smiths may make some profit. As long as this distribution is based largely on the futures, or increasing the public debt, the Smiths will probably not worry much and will be pleased with the profit they are making. But when the day of reckoning comes the Smiths will wake up to the fact that, whether through taxes or through inflation or repudiation, they are paying not only the 10- or 20-percent profit they have made but the rest of the bill as well—the hundred percent.

NEW INDUSTRIES

One of the principal hopes during this period of dallying and postponing the real issue is that new industries will be developed to save the situation. It is said that scientists have enough tricks up their sleeves, enough inventions that are intentionally held back to protect older industries, to bring about a tremendous increase in employment. Nor has the inventive genius of the human race come to an end. New industries do make their appearance from time to time. A major new industry or a sizeable group of new smaller industries may come on the scene any time. Such a development would absorb some of the slack, possibly a considerable part of it.

But such absorption would, at best, be only temporary. While new industries create new desires, expand the possibilities of satisfying desires, induce increased consumption, and create new kinds of work, it is not all net gain. While the automobile and the tractor have absorbed vast amounts of labor in their own manufacture and distribution, in tires and all manner of accessories, in the building of roads, and in increased business for all kinds of travel and tourist services, they have also displaced much of the wagon-making industry, buggy manufacture, harness business, and that portion of agriculture that went into the raising and maintaining of horses. The truck has materially affected the railroad industry. The radio has largely displaced the phonograph, has thrown thousands of musicians out of work, and made the lecture tour almost a passé industry. The electric refrigerator has made inroads on the manufacture and distribution of ice, and so forth.

On the whole, new industries tend to shift the channels of unemployment rather than to increase the sum total of employment. In fact, under the profit system, with its pyramiding control and labor-saving machinery, the net result has been actually to reduce the total employment. It is obvious to anyone that when hand labor was the only means of satisfying those human needs which were not supplied by nature in the raw state there was no such major problem of unemployment as we now have.

Not that we ever will or ever should go back to hand methods. But as production is increased by modern science, it is plain that consumption must be increased to equal the production.

The problem resolves itself into one of consumption.

And since a high percentage of our people are consuming far less than their needs or desires would dictate, it is

obvious that the problem is further resolved into one of distribution of buying power.

Whatever tends to widen the distribution of buying power is a help. Whatever tends to concentrate buying power, or to funnel it into the hands of relatively few consumers, thereby reducing total consumption, is a liability.

The principal modern factors of concentration of buying power are the machine, with the question of its ownership and the pyramiding of ownership and control through the legal devices of the corporation and the holding company.

A COMMON FALLACY

An argument commonly put forward is that machines actually create more labor, since labor is required to make the machine, which is a new activity with the introduction of each new machine.

This argument is a fallacy. When a new machine first comes on the market, it does create new labor for the time being. But the machine lasts longer than the time required for its creation. And it displaces more man-hours than are required for its creation. Before long the curve of labor displaced by the machine crosses and exceeds the curve of labor employed in its manufacture.

In the first stage of mass production, when machines still required human labor for their operation, hundreds of thousands of hand laborers were displaced. But we are now well into the second, or the automatic stage, where machines are operated by machines. Human labor is being displaced at geometric rates of progression.

Under our system of private ownership of machines, "labor saving" simply means reduction in redistributed buying power. Another name for it is reduction of consumption or market. Each business strives to reduce costs. The inescapable result is that collectively they reduce the possible market.

THE PROFIT SYSTEM

The "profit system" is, by definition, a system in which each industry and each undertaking aims to make a profit. A profit is obviously the margin of income over expense. Expense is, of course, another name for "redistributed buying power." Each business undertakes to take in more buying power than it redistributes. In other words, the very aim of industry, under the profit system, is to destroy that necessary equation between production and redistributed buying power—consumption.

As long as the profits remain small enough to be consumed by those making them, no damage is done to the economic working of the system. The small businessman, the professional man, or the small contractor, whose profits are simply the equivalent of wages or salary, and within the limits of what he and his dependents consume, is no economic liability. But when big business accumulates profits beyond the consumption of those engaged in it, profits that need to be reinvested, but can find no economically sound channel for such reinvestment, it is then that the sterile pools of idle profit accumulate, upset the equation, and block the mechanics of the system.

No new industry would achieve major significance in the profit system that did not become both successful and large. Being successful, it would take in more buying power than it redistributed, upsetting the equation. And being large, it would carry that lack of balance to the point of adding to the sterile pools of accumulated profit. So new industries, on which some are pinning hopes, will, in the profit system, as soon as they become successful enough and large enough to have major significance, simply add to our troubles by further destroying the necessary balance between production and consumption.

There are only three possibilities for correction. One is absorption of the surplus production in the constantly expanding market, outlined above. Another is the group of artificial devices for forcing redistribution, also listed above—war, credit inflation, and Government-directed redistribution. The third is a fundamental reorganization of our economic system to some basis of community or cooperative ownership and control of our natural resources and the machines.

INCREASING PRESSURES

The only points I want to emphasize here are that, historically, the profit system has already been artificially maintained, by war and credit inflation, for many years beyond the period of its normal existence; that we are merely continuing to maintain it artificially by further credit inflation, which must some day be balanced, either by the sweat of future generations or by repudiation, with all the chaos and suffering that that entails; that it now appears to be entirely probable that we shall again be called upon to maintain this dying system still further by participation in another major war, that most heinous and inexcusable of all national crimes, mass murder; that as long as we try to hang on to and to drag along with us this rotting corpse, we are progressing irrevocably into the vortex of increasing pressures; that the pressures of the human suffering of the dispossessed portion of our people have already passed the safety zone and reached the point of imminent threat to social order and the continuance of our democratic processes; that the spectacle of starvation and increasing disease, crime, and suicide in the face of potential abundance is a blot on American intelligence and morality; that some day, willy-nilly, we shall have to meet the issue of the profit system squarely; and that we should face that issue now instead of further dallying with it.

COOPERATIVE ECONOMY

There are two major alternatives to the profit system: One, state socialism, with the dangers of fascism and communism at its opposite extremes, and the other, long proven, practical, and working out with happy results in many countries, cooperative economy.

Socialism is already in actual operation in our own country in our vast systems of roads, Postal Service, rivers and harbors, many of our public works and activities. It should certainly be allowed to grow in a natural way and with reasonable care.

Cooperative economy, in spite of the outstanding success of partial cooperative undertakings, such as cooperative marketing associations, and in spite of some minor experiments and a good deal of public discussion and agitation, is still almost new to us.

A major part of our governmental program should be the furthering of scientific laboratory experiments and the development of practical working models in a cooperative economy.

THE ROBINSON-PATMAN BILL INSURES EQUAL OPPORTUNITY AND FAIR PLAY IN BUSINESS—PROTECTION FOR INDEPENDENT MERCHANTS

Mr. SADOWSKI. Mr. Speaker, one of the most important bills to come before the House in this session is the Robinson-Patman bill. I was highly pleased when the House Judiciary Committee reported the bill out favorably and more than pleased when the Senate passed the bill last week. I know that this bill will have the overwhelming support of the Members of the House of Representatives when it comes before us for a vote.

We can remember when not so long ago our home merchants were the leading substantial citizens in our cities and villages. They were actively identified with local civic associations, clubs, fraternal orders, lodges, and churches. All of their employees were local citizens who were well known in the community and had the best interest of the city at heart.

Later, however, the monopolies began to operate. The retail business became organized and controlled by the officials of high finance with offices in New York, Chicago, and other cities. They had unlimited means. They could afford to sell certain articles far below the cost to the local merchant, and it was only a matter of time when the home merchant was forced out of business. Their business was taken away by strangers. They lost their investments and were forced to quit. By the passage of this bill Congress will grant the independent merchant lawful protection. Then we may again see our young men who are frugal and industrious enter on a business career in their own name.

WILL INCREASE PURCHASING POWER

It is our sincere desire and also that of our great President, Franklin D. Roosevelt, to increase the purchasing power of the people. The present discriminatory practices in merchandising does more than merely create competitive conditions unfair to the independent merchant. The unequal concessions exacted from manufacturers and processors, through which the favored few benefit, press backward on costs and tend to keep down and reduce the wages of workers in those industries. In addition they become a powerful factor in depressing and holding down the prices paid to farmers for their agricultural products.

The reduction in purchasing power that results from the depressing of wages and agricultural income amounts to a great deal more than any price reduction which may reach the consumer. It is a well established fact that when wages are reduced in the plants of these manufacturers who grant concessions to the monopolies, the other industries likewise follow suit and reduce wages. These wage reductions are reflected in the wages of all industries.

This is also true of the farmers and the producers. The unfair and unequal competitive conditions that result from the various price and service concessions which a few privileged monopolies can now exact has practically ruined our whole merchandising system. It sets up an endless chain of chiseling operations that undermines wages, destroys farm incomes, and weakens our entire business and economic structure.

This unfair system of competition must be eliminated before we can hope to achieve that greater purchasing power which all of us are striving for.

FAIR COMPETITION IS ALL RIGHT

The opponents of this bill continually raise the objection that this legislation will stifle competition. Competition in business is a good thing when it is fair competition. Unfair competition, the kind that has destroyed small business in this Nation, must not be tolerated further.

The monopolies insist on concessions, allowances, and rebates to enable them to compete with independent merchants. This, I say, is unfair competition. Why are they afraid or unable to compete with the independent merchant on equal terms? Why are they afraid to start with goods at equal costs? The monopolies claim to have superior efficiency. Let us have an honest test.

This bill does not demand any special privileges for the independent or small merchant. It merely demands that unfair, unequal, and unethical business practices, including unfair price discrimination, be prohibited by law. I cannot see anything wrong in this. I am sure that under these rules the independent merchants can and will hold their own with the big monopolies and chain stores.

AMERICAN FAIR PLAY

This is truly an American bill. It is based on the principles of American ideals, which demand equal opportunity and fair play. It is based on the unalienable rights of life, liberty, and the pursuit of happiness which the founders of American democracy wrote in the Declaration of Independence.

The opponents raise the old cry of laissez faire. They believe that this gives them the inherent right to destroy all other business. They say that we have no right to impose governmental restraints upon the conduct of private business, even though it be to protect those rights defined in the Declaration of Independence in the interest of the great majority of American citizens.

Congress has, at various times, passed laws for the regulation of business. The Interstate Commerce Act of 1887 required the railroads to refrain from discrimination in rates and services. The Sherman Act of 1890 freed individual enterprise from the burden of oppressive agreements among competitives. The Federal Trade Commission Act of 1914 authorized the suppression of certain unfair practices.

The Robinson-Patman bill merely carries these principles another step forward to protect the independent merchants who have been able to withstand the onslaughts of the chain stores and monopolies. Seventy-five percent of the retail business done in America is done by the independent retailers. So 75 percent of the wholesalers, brokers, and manufacturers are dependent upon the success of the independent retailer for the successful sale of their products.

The large burden of overhead costs of manufacturers and wholesalers are charged against the merchandise bought by these numerous merchants all over the country. The large mass buyers know this. A manufacturer running under capacity can afford to take on a large block of new business at a price below his net cost so long as it will yield him something additional. He will take an order from the chain stores or the monopolies at prices sometimes 20 percent or more below that which he charges the independents. He will do this to prevent his competitor from getting the business. The chain stores will point out to him that his overhead costs remain the same whether he gets the additional business or not and that it is to his advantage to take a small profit and to charge his entire overhead expense against the business that he gets from the independent merchant.

The Federal Trade Commission in its findings of fact on the famous Goodyear-Sears, Roebuck & Co. case, involving price discrimination, found among other things that the gross discrimination in favor of Sears, Roebuck & Co. ranged from 32 to 53 percent. This agreement was guarded in the closest secrecy. It was concealed from its own sales force and when their own Goodyear dealers complained that they could not possibly compete against such an arbitrary price advantage, they denied first that they were even selling tires to the Sears, Roebuck Co. I merely cite this as an example.

There are numerous other like cases which have come before the Federal Trade Commission.

Monopoly is the result of unwholesome competitive methods. It cannot result where the method of competition is fair. Hence, to prohibit price discrimination—unfair method of competition—is to prohibit the methods which foster monopoly. Monopoly on the whole is an unnatural product. It has no place in America. The price discrimination to Sears, Roebuck & Co. was not justified on account of differences in the grade, quality, or quantity of the commodity sold or by difference in the cost of selling or transportation or good faith to meet competition. It had the effect of destroying independent dealers and creating a monopoly.

Now, the same practices prevail in practically every other business. This is particularly true of the grocery and drug-store business. I cannot at this moment think of any young man attempting to go into the grocery or drug-store business on his own initiative. It would be the greatest folly. He would be ruined in a few months' time. The best that he can hope for is to obtain a job working as a clerk for one of the chain-store companies. To him "life, liberty, and the pursuit of happiness" is a myth.

The chain-store monopolies talk about the Robinson-Patman bill destroying equality of opportunity for young people. No agency in the American system of distribution has been any more destructive of opportunity for youth than the chain banks and chain enterprises, who seek to regiment and standardize clerkships, counter salesmen, auditors, and store managers into a vast army of mediocre wage slaves living on starvation wages, devoid of every iota of originality or independence.

The American youth believes that competition is the life of trade. He believes in the policy of live and let live, and further he believes that it is the duty of government to protect the weak against the cheating and bribing of the strong.

PROTECT AMERICAN BUSINESS

The Robinson-Patman bill is a protective measure. It is a plug for the loophole of crooked merchandising; a loophole that only time and experience and our changed social and economic order has shown to exist in our present antitrust laws. It prevents discrimination in prices where such discrimination tends to create monopoly. A manufacturer

can manufacture all the goods he wants to and sell them at a loss if he wants to, provided he takes the same loss on sales to the independent distributor that he takes in his sales to the chain stores and mail-order distributors.

The bill does not in any way attempt to change the business methods or practices within the chain-store systems whether those practices be good or bad. It does not put any penalty on efficiency either in manufacturing or distribution. It does not prevent the distributor or retailer, whether he be chain store or independent, from passing along to the consumer every saving that efficiency can devise.

This bill will prohibit practices that destroy competition and bring about monopoly. It will not injure any legitimate business or legitimate practice.

Mr. Speaker, the enactment of this bill into law will redound to the everlasting glory of this Democratic administration.

AMERICAN AIRSHIPS SHOULD BE DESIGNED BY AMERICAN ENGINEERS

Mr. O'CONNELL. Mr. Speaker, during the past week we have had a demonstration of the large airship in trans-Atlantic commercial service. The tremendous acclaim of the press and the public should be convicing evidence that America is airship conscious.

It is not my purpose to make any statement that may reflect on the German engineers who constructed the *Hindenburg* or of those in charge of the airship during its successful flight, but as an American citizen and Member of Congress, I feel it my duty to comment on certain statements published in the press.

The Sunday Star, Washington, D. C., May 10, states:

Eckener reveals purpose of trips. United States financial backing is sought. Dr. Hugo Eckener, commodore of the Zeppelin fleet, said in an interview tonight the primary purpose of the *Hindenburg's* cruises to the United States this year was to win financial backing for a German-American trans-Atlantic transport service.

Such an arrangement between the two countries was planned in 1928, he pointed out, but was frustrated by the depression.

Loss of the Navy dirigibles *Macon* and *Akron* has since soured the American public against dirigibles, he said, and lighter-than-air enthusiasts hope to remove that feeling by week-to-week demonstrations of the *Hindenburg's* capabilities.

It is of interest to know where this financial backing is expected to come from. I have a letter signed by a vice president of the Goodyear Tire & Rubber Co., dated April 28, 1936, stating the following:

We are interested in the subject of airships but are not presently considering the erection of a ship. This has to go through the process of authorization by Congress.

The Washington Herald, Sunday, May 10, states:

United States dirigible sought to match *Hindenburg*. Naval experts' hopes rise as officials prepare to greet Eckener. Successful trans-Atlantic flight of the German Zeppelin *Hindenburg* yesterday buoyed hopes of naval and congressional lighter-than-air enthusiasts that the Federal Government would sponsor construction of a twin ship, perhaps to complement the German air liner's North Atlantic schedule.

Senator BULKLEY, Democrat, of Ohio, has introduced a bill authorizing Federal construction of such a ship.

Navy experts have already planned for construction of a giant sky cruiser exceeding the *Hindenburg* dimensions, to replace the U. S. S. *Akron*, lost at sea 2 years ago.

The Navy's scientific advisory committee, following investigation of the *Akron* and *Macon* disasters, in a preliminary report has recommended continuance of the Navy policy of developing the science of lighter-than-air flights and has urged construction of a new superdirigible. The ship would be operated experimentally apart from the fleet.

The Goodyear-Zeppelin Corporation, at Akron, Ohio, staffed with German Zeppelin engineers, has assured the Navy such a ship could be built for about $3,000,000.

The Navy high command maintains such a dirigible would be the equivalent of a $10,000,000 light cruiser in fleet scouting, her higher speed compensating for her greater vulnerability.

The Navy plans calls for "belly hangars", housing up to 10 airplanes. Planes would be launched and retrieved by a patented trapeze. An observer could watch enemy fleet operations from a "sub cloud car" suspended from a thousand-foot cable while the dirigible remained hidden from detection above the clouds.

The statement that "Naval experts already have planned for construction of a giant sky cruiser, exceeding the *Hindenburg* dimensions, to replace the U. S. S. *Akron*, lost at sea 2 years ago", recalls my remarks printed in the CONGRESSIONAL RECORD of April 14, 1936, in which I said:

The Zeppelin frame is classified as an indeterminate structure and may be calculated only upon what is termed an "empirical formula" and may not be calculated upon normal engineering formulas. It is interesting to know that the empirical formula is established only through experience of actual construction and use of what is classed as an indeterminate structure.

Prior to the construction of the *Akron* and *Macon*, the Zeppelin engineering organization was supplied with data for an airship only as large as the *Los Angeles* or the *Graf Zeppelin*. They may have desired to construct an airship the size of the new *Von Hindenburg*, but perhaps had no data to then warrant such construction. What would they do about it?

If the German Zeppelin engineers wanted definite information that would warrant them to build the *Von Hindenburg*, which is larger than the *Akron* or *Macon*, and to advance their empirical formulas with construction and operations data, they would need to build larger airships or get someone else to pay for the experiment. My opinion is the United States was again chosen to be "the goat." The construction and destruction of the *Akron* and *Macon* undoubtedly supplied valuable data to the German Zeppelin organization for the construction of the *Von Hindenburg*.

In reference to the paragraph "the Goodyear-Zeppelin Corporation, of Akron, Ohio, staffed with German Zeppelin engineers, has assured the Navy such a ship could be built for about $3,000,000," I am wondering if a Zeppelin-type airship or the American suspension-bridge frame airship is referred to.

On October 29, 1934, the Honorable Ewing Y. Mitchell, then Assistant Secretary of Commerce, presented to the Federal Aviation Commission an airship-construction program endorsed by the Department of Commerce, and which Mr. Mitchell stated was prepared by the National Advisory Committee for Aeronautics. This program called for the construction of two Goodyear-Zeppelin airships, of 7,000,000 cubic feet capacity, which is the size of the *Hindenburg*, the first costing $6,500,000 and the second costing $4,250,000.

Now, according to press reports, the Goodyear-Zeppelin Corporation has assured the Navy a much larger airship "could be built for about $3,000,000." It seems that the past 20 months have reduced the cost of American airship construction very materially.

The demonstration made by the *Hindenburg* is worthy in that it shows the capabilities of large airships in trans-oceanic commercial service. If American engineers duplicated the *Hindenburg*, except in its frame, what could prevent such airship performing as well as the *Hindenburg*?

If the American airship frame was stronger the airship would be safer; if American nonexplosive helium gas were used, instead of explosive hydrogen gas, the American airship would be much safer; if the American frame were of less weight a more profitable pay load could be carried; and were the total engine power increased, the American airship would be faster.

I have introduced the bill, H. R. 12682, May 12, 1936, authorizing the construction and operation of two American trans-Atlantic airships, through a loan by the Secretary of the Treasury.

The effect of this bill is that Congress provides means for an organization of American engineers and business executives to solve the American-airship problem, and to design, construct, equip, and operate American airships in overseas commercial service. This bill is as follows:

That for the purpose of fostering the American airship industry and to promote American overseas trade with use of commercial airships, to be available in time of war, to encourage American design, construction, and operation of airships, to demonstrate the value and profit of overseas airship service thus to promote its extension with private capital, and to provide immediate employment in American airship construction, the Secretary of the Treasury is hereby authorized and directed to lend the sum of $12,000,000 to the Respess Aeronautical Engineering Corporation for the purposes of constructing an American airships plant, an Atlantic operating terminal, and two airships employing the self-anchored suspension bridge type frame, each airship having not less than 7,000,000 cubic feet of helium-gas capacity, and for operating such airships in commercial service between the United States and England or other European countries.

SEC. 2. The Secretary of the Treasury shall investigate the personnel and engineering organization of the Respess Aeronautical Engineering Corporation and he may require such changes in the present organization as he shall deem to be advisable before such

loan is made, and he shall require that full insurance be carried to cover replacement in event of fire, damage, or loss of the airships or other property purchased or constructed with the proceeds of the loan until the full amount of the loan is repaid.

SEC. 3. Such loan shall carry interest charges at the rate of 3½ percent per annum, which shall cumulate for a 2-year period, and shall remain a lien on the patents, the patent rights, and all present and subsequently acquired assets of the corporation until paid. The loan, plus accumulated interest, shall be paid in 10 annual payments, the first payment to be made 3 years after the date of the enactment of this act, and any payments on account of the loan shall be deposited in the Treasury of the United States to be credited to miscellaneous receipts.

SEC. 4. There is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $12,000,000 to carry out the provisions of this act.

This bill is for the purpose of providing a loan through which the development and operations of airships will be delegated by Congress to American engineers. It is a business proposition in which the Government extends its aid in forwarding an activity that is of extraordinary value to our Nation, an activity that has already been delayed too long.

The loan may provide the following:

(1) Approximately 80 percent of the loan may be used in direct and indirect employment of labor.

(2) It may give employment to great numbers of engineers and highly skilled men for whom it is now difficult to provide work in their respective lines.

(3) It may construct two great airports, one being in the South and one on the Atlantic seaboard. These airports should be of great military value in event of war.

(4) Within 2 weeks after the money is made available for this work several hundred men may be employed, and within a few months approximately 2,000 men may be employed in direct labor, with perhaps several thousand employed in indirect labor.

(5) Many types of established industries would be benefited through orders placed for this activity. Approximately 25 percent of the loan may be expended for orders placed with major industries.

(6) It may be the start of a great new American industry and be the first step toward establishing a major form of overseas transportation through which our commerce with foreign nations may be expedited and increased.

(7) With the evidence of Government support, as demonstrated by this loan, it is proposed within the year to arrange private financing for the continued construction of airships.

(8) It is proposed, through the employment of three and in some cases four shifts of workers, the construction program may be completed in a period of about 12 months.

(9) After a thorough test of the airships it is expected trans-Atlantic service may be established, with each airship making a round trip weekly between our Atlantic coast and England. If the loan is approved by this Congress, these airships may be in regular service before the fall of 1937.

(10) Such service may expedite our mails and commerce to other nations of the world, to Europe, and to countries which are now best served by transportation from England or European countries.

(11) It may in time establish the United States in a dominating commercial position, through fast and economical transportation direct to overseas commercial centers, including those within the interior of continents where rapid transportation is now unknown.

(12) It may provide twice a week transportation across the Atlantic in less than 40 hours, which with later improvement may be reduced to 30 hours.

(13) This may be America's answer in the race for faster ocean vessels, that in other countries are built with large government construction loans and are supported by annual operating subsidies of considerable size.

(14) It will demonstrate to American inventive genius and skilled engineers the confidence of our Government in their ability to design and construct American airships. It will also demonstrate the superiority of American design and construction of airships.

In view of the fact the borrower must depend upon commercial operations for its profit, the construction would be at the lowest cost and of the best quality. No profit may be added nor any royalty be paid under the patents.

Considering the conditions for this loan, we should also consider estimates submitted on October 29, 1934, by the Honorable Ewing Y. Mitchell to the Federal Aviation Commission in the airship-construction program endorsed by the Department of Commerce. The two Goodyear-Zeppelin airships would cost $10,750,000 and an Atlantic operating terminal to cost $3,000,000, making a total of $13,750,000.

With the loan of only $12,000,000 the Government would have for security two better, stronger, and safer airships of approximately the same size or larger than the Goodyear-Zeppelins, and an Atlantic operating terminal; also an airship-construction plant costing approximately $4,000,000, making a total of $17,500,000, with the valuation based on the cost of two airships and a commercial airship terminal, being $13,750,000 in the Department of Commerce proposal. Further, $1,000,000 of the loan is either applied for additional construction or operating capital; also the patents and patent rights and all present and subsequently acquired assets of the borrower would be pledged as security until the full amount of the loan is paid.

The borrower is required to carry full insurance to cover replacement in event of fire, damage, or loss of the airships or other property purchased or constructed with the proceeds of the loan, until full payment is made. Insurance for these airships was taken up with a Lloyds' American representative, and at first 20 percent of the airships' value was required for annual payment. However, when further consideration was given to the suspension bridge type of frame to be employed, the insurance charge was reduced to 15 percent and it was stated might be reduced to 10 percent.

The cost of insurance aptly illustrated the difference in the proposal submitted by the Department of Commerce and the present proposal for private construction and operation. Twenty percent annual insurance on $10,750,000 for two airships of the Zeppelin type would amount to $2,150,000, while 15 percent annually on the $5,000,000 cost of the two American designed airships would be only $750,000. Quite a difference, and similar differences would be shown by the sums required for depreciation, maintenance, interest, and so forth.

Another comparison is interesting. Mr. Mitchell, in presenting the Commerce Department airship-construction plan, told the Federal Aviation Commission that "Mr. Harpman, representative of the Goodyear-Zeppelin Corporation of Akron, Ohio, stated at our conference on the subject of airships that his company would enter into a contract for operation of the two airships and maintenance for 5 years on the basis of a dollar per year, if the Government desired them to submit a bid." This would seem to establish the value placed by the builders of the two airships, for which the Government would be required to pay $10,750,000.

Going back 4 years, when bill H. R. 8681 was before the House Commerce Committee, the Goodyear-Zeppelin Corporation offered to build airships and operate them in trans-Atlantic service to Germany if the Government would pay $32 per mile—in both directions but carrying mail in only one direction—for a reservation of 10,000 pounds of mail. This charge of $32 per mile for 8,000 miles, round trip to Germany, would have cost the Government $256,000 for transporting 10,000 pounds of mail across the Atlantic to Germany, or for only 1 pound of mail if only that amount were forwarded.

The Commerce Committee did, however, recommend a payment of $20 per mile and the bill H. R. 8681 was approved on the floor of the House on June 15, 1932, thus a mail charge of $16 per pound was approved.

With the loan of only $12,000,000 the Respess Aeronautical Engineering Corporation proposes to establish twice-a-week airship service in both directions, carrying passengers, mail,

and freight at only $1.50 per pound. They do not require that the Government send any mail on its airships; but if the Post Office Department wishes to use its service the charge per pound is the same as reservation for passengers, $1.50 per pound.

Further, instead of the Government buying airships at a high figure, possibly including a large profit, and leasing them back to the builders at $1-per-year rental, the Respess Aeronautical Engineering Corporation will repay the full amount of the loan plus interest, will maintain the airships in first-class operating condition, set aside funds to replace the airships when it is deemed necessary to retire same, and will carry full insurance to cover replacement if an airship is damaged or destroyed, as well as liability insurance for passengers, mail, and merchandise.

That airships can do this is because the Respess airships will be safer, stronger, have a much longer useful life, be capable of carrying a larger pay load, and because of their simplicity and ease of construction these airships can be built in America at lower cost than Zeppelin airships can be built, with cheaper labor, in Germany.

The superiority of the Respess airship is substantiated by the report of Messrs. Robinson & Steinman, eminent American engineers, 117 Liberty Street, New York City, in which are the following statements:

Whatever may be said of the performance of the Zeppelin airship will apply equally to the Respess airship, but the Respess airship would have in addition the following advantages:
Greater strength and safety.
Greater inherent strength.
Increased length of life.
Decreased maintenance costs.
More efficient use of material.
Reduction in cost of construction.
Reduction in time of construction.
Ease of construction.
Simplicity, accuracy, and definiteness of calculation.

The stresses in this airship never reverse, thereby removing all fear of failure in the hull through fatigue and crystallization.

The net pay load will be unusually high, facilitating economical commercial operation.

That Respess airships may be operated at an attractive profit is indicated by an estimate of the probable annual receipts and expenditures for such service, as contemplated for the construction and operation of two 7,000,000-cubic-foot airships, each making a round trip weekly between our Atlantic coast and England or Europe.

Operating charges

Administration and communications	$300,000
Fuel and oil	850,000
Helium gas	300,000
Crew	300,000
Engine maintenance and replacement	500,000
Terminal charges	300,000
Contingencies	400,000
Insurance	750,000
Airship maintenance	500,000
Airship depreciation	500,000
Liquidation of construction loan	500,000
Interest at 3½ percent annually	175,000
Traffic solicitation and handling	660,000
	6,035,000

Estimated income

	Pounds
Total pay load available each trip	48,000
Total load 208 trips	9,984,000
Average 75 percent full loads	7,488,000
Average 80 percent of schedule trips	5,958,400
Income with $1.50 pound charge	$8,937,600
Deduct operating charges	6,035,000
Net profit	2,902,600

These estimates were submitted with realization that no service of this character has ever been operated, and consequently the figures must be taken as approximate. A sincere effort was made to estimate the operating charges high and the prospective income low. It is fair to state also the pay load is believed will be much more than 48,000 pounds.

The terms of the bill provide a condition that the Secretary of the Treasury shall approve the personnel and engineering organization of the Respess Aeronautical Engineering Corporation. Such organization will be competent to design, construct, equip, and operate the airships in transAtlantic service and to conduct the affairs of the corporation in accord with the purposes of this act.

The Secretary of the Treasury is not required to consider the technical details of the construction of these airships. The United States has as competent engineers, builders, and operating personnel for large enterprises as any other nation. If the standing of the engineers and executives who are selected for this work meet the approval of the Secretary of the Treasury we can be assured the design and construction will be sound, the operations will be conducted with efficiency, and a satisfactory demonstration will be made of the value and profit of overseas airship service so that private capital may be forthcoming to build scores of other great airships for establishing American commercial airship service to all parts of the world.

I am convinced that private capital will become available when a demonstration of these airships has been made, because I have recently received numerous letters from large banking and trust companies, as well as from security underwriters, which state they are interested in this development and request that they be kept informed.

I now desire to say a few words concerning the prospective value of large airships for addition to our naval and military forces employed in the defense of our Nation in the event of war.

It cannot be said that large airships have had sufficient trial to establish their full naval or military value. Unfortunately, the airships we have previously constructed lasted such a short time that real service trial was very limited.

The *Akron* and the *Macon*, however, demonstrated some features of exceptional value. They proved, beyond any question, that airships may transport and service fighting airplanes, thus becoming in effect movable airfields, or they may serve the same purpose as naval airplane carriers.

They demonstrated by their water-condensing systems that helium gas can be employed and it is not necessary to "valve out" the gas in order to control the airship, as is now resorted to by the *Graf Zeppelin* and the *Hindenburg*. They demonstrated the practicability of military operations of large airships over sea or land. Their destruction demonstrated a weakness in the type of frame then employed and should tell us to now call upon our American engineers to provide an improved structure that is strong, safe, and not subject to reversal of stress, fatigue, and crystallization of the metal employed.

I feel we cannot learn the true future value of airships for use in the defense of our country without we make further tests with American-designed airships. Congress provided funds and two naval airships were constructed upon German design. These airships we lost. Will our Navy admit defeat? Must our Navy continue to follow German leadership when we have far better structural engineers in America?

Proper personnel and the most modern wartime equipment should be provided for both our Navy and Army. Not so long ago cavalry was an important division in our land forces, and naval airplane carriers were unknown. Instead of warfare being confined to land and sea, future wars may be decided in the air, from which both our naval and land forces are vulnerable.

The nations of the world are spending hundreds of millions of dollars annually for the construction of new heavier-than-air craft. During the World War lighter-than-air dirigibles, even in their then undeveloped state, were a valuable aid to German arms. The naval battle of Jutland may have had an entirely different end had Admiral Jellicoe been supplied with information which the German airships conveyed to the Imperial German Staff. Germany continues to build airships.

Nature has given the United States the only large supply of nonexplosive helium gas, which would provide greatly increased safety for both commercial and military airships. Congress has voted and there has been expended more than $11,000,000 for the development and conservation of this valuable gas for American airships, with provision no helium

may be shipped to foreign countries except with Presidential approval.

A former Congress recognized the future importance of airships and of helium gas for the use of our airships. We expended about $10,000,000, appropriated by Congress, for the construction of two airships upon the advice of Zeppelin engineers by an American corporation in which the German Zeppelin interests own 25 percent of the stock. We lost these two airships, and are we through? If the Germans discovered during the World War that airships with further improvements would be of military value, would they encourage other nations to build airships of the kind they seem to be able to build in Germany and we fail, under their advice, to build in the United States?

In my judgment the airship will become in time a major form of commercial transportation, in which the United States should have a dominant place. Further, great airships may in time replace the expensive naval airplane carriers and become a valuable arm for the defense of our cities and vital transportation systems in event of war.

The United States has the greatest bridges, buildings, and other evidences of the high qualities of the American engineer and the initiative of private industrialists. In time of need we turn to them for aid in the defense of our Nation. Why do we not now enlist these forces in the preparation of our defense, by having private industry solve the airship problem for us.

In conclusion, I desire to present a few pertinent extracts from numerous letters I have recently received from American engineers:

It can be said without boasting that the American engineers stand preeminent in resourcefulness and ingenuity.

I heartily concur in your movement to place further design and construction of American lighter-than-air craft under the sole direction of eminently responsible American engineers. Such men in the past have demonstrated peerless ingenuity in other lines of endeavor, and should receive consideration in any future aeronautical program. When responsible authorities continue to be inhibited by the foreign influence, after experiencing the fruits of past disasters, I believe a change of command is indicated if American commercial supremacy is to remain secure. I shall be pleased to enlist support of your movement to stop foreign experimentation with American funds, and substitute therefor the certified results obtainable through American engineers.

Concerning the ability of American engineers to design and construct airships, this society wishes to express its gratitude to you for the action you have taken and sincerely hopes that Congress will place these problems in able hands; and when they do, the American engineer will be respected in this field as he is in all others.

I have never been convinced that it is necessary for the American Government to depend on foreign engineering talent for the design of its airships, for I feel we have in this country men who are fully competent to do this work. Costly experiences have indicated that following the principles of German designs has been unsuccessful, and I believe this work, if it had been done by American engineers, would probably have been much more satisfactory, and we certainly would have learned a great deal that would be of use in the future.

While I am not personally familiar with the project of the Respess Aeronautic Engineering Corporation, I am very much in favor of the program for lighter-than-air development in general. I believe it is vital for this country to maintain an interest in lighter-than-air craft as well as the heavier-than-air variety and that all possible Government aid should be given to this important item of our national defense. I was particularly interested to note that Dr. D. B. Steinman, the eminent engineer of New York, is interested in the project and has made a study of the design. Dr. Steinman is preeminent in his field, and I am sure that if his assistance can be gained in connection with this project that its success and adequacy is assured.

I am particularly impressed with what you say relative to the efficiency of the engineers of the United States. It is a profession concerning which so many of the public are little informed and which, after all, is the profession on which the life, health, and prosperity, and the advancement of those things which go to make the Nation prosperous, are so dependent.

I abhor war. The Ethiopians had no desire for war. Still war comes and must be considered. This country needs, and must have, airships of this type for national safety. I am strongly of the opinion that many American professional engineers have structural knowledge and experience equal to, if not superior to, that of any other country in the world. To me it seems lamentable that the leading engineering and mechanical Nation of the world should be confined to some one design just because it has been operative in some other country. Such procedure prohibits consideration of possible improvements which are based upon scientific engineering knowledge and principles. This restriction automatically puts this Nation in a second-rate position. American engineers built Boulder Dam without assistance except good American ability. They did a wonderful job of it. It happens that I have the honor to know Dr. Steinman personally. I have such confidence in his integrity and judgment concerning structures of this class that if Dr. Steinman favors the suspension type of frame for airships I am convinced it will prove the superior type of structure.

As to the construction used in the Zeppelin, the criticism has often been heard in the past, even in authoritative German quarters, that it is not the most satisfactory solution and that it becomes less so with increase in size of the airship. The rigidity is all built in the hull, consisting of transverse polygonal frames braced by longitudinal open-frame beam members. Professor Eberhardt, of the Technische Hochschule Darmstadt, came to the conclusion years ago that this method of obtaining rigidity can be improved upon by anchoring the hull to a longitudinal central member, such as provided in the Unger design. Little has been heard about this design, not because of its lack of merit but "because of the hopelessness of the task of contesting the Zeppelin design", which I quote from a letter of a prominent German engineer. The name "Zeppelin" enjoys such popularity and is so strongly associated with airship construction in the minds of people that, not alone in Germany, it is thought to be the only one that will do for an airship.

THE NATIONAL FEDERATION OF TEXTILES SUPPORTS THE ELLENBOGEN TEXTILE BILL

Mr. ELLENBOGEN. Mr. Speaker, the national textile bill in its revised form, H. R. 12285, has received the unanimous and enthusiastic backing of the National Federation of Textiles.

At a recent meeting in the city of New York Mr. Peter Van Horn, president of the National Federation of Textiles, called attention to the deplorable plight of the rayon and silk industry. Mr. Van Horn said that—

The country's 120,000 rayon and silk looms, operated at capacity, could produce twice as much cloth as the market could take up.

Since the Supreme Court killed the N. R. A. textile codes, along with the rest of the codes, textile production has increased 30 percent, billings have increased 9 percent, and third-shift operation has gone up 12 percent; but textile prices have declined, wages have dropped 5 percent, and employment in the textile industry has dropped 13 percent. This means a drop of $10,000,000 in purchasing power of workers in the textile industry; and that means the textile industry and all other consumers' goods industries can sell proportionately less goods.

The bill has been reported favorably by the Committee on Labor and a rule for its consideration is now pending before the Committee on Rules.

SOME ASPECTS OF BRITISH METHODS IN HANDLING UNEMPLOYMENT

Mr. SHANLEY. Mr. Speaker, one of the most intelligent of the many able foreign correspondents who make our press gallery and fourth estate in the Capitol the outstanding group of newspapermen in the world, Sir Arthur Willert is quoted as saying totidem verbis that our delay in attacking the social-justice program has placed us far in the rear of the efforts of his own country. I have pointed out before that David Lawrence admitted the truth of this assertion. It is now my purpose, Mr. Speaker, to give in a humble way some of the outstanding efforts of the British methods of attack.

I am unusually anxious to do this because I noticed in yesterday's paper that the leading nominee for opposition candidate to our modern-minded and alert Chief Executive in the fall of this year has just complained about the lack of definite knowledge of the facts underlying the relief of the unemployed. He seems exercised about waste and politics. Parenthetically he is Governor of one of the sovereign States of this Union and as such he should be in a far better position to detect such wastage and graft than any man in his commonweal. If he had given us the facts of the Kansan situation in all its entirety, pointed out its defects, and made sincere comments, at least that State would be free from alleged political thievery and Treasury sabotage or we would be to blame. I submit that since he has not done this we might well say that Kansas has an excellent administration and the Federal Government has done an excellent job in that State. If this is not so and he has remained silent, well, then, he has failed in the most personal and Jeffersonian of all duties, that of State pride and keeping one's own house in order.

This is a gigantic problem in all its phases when we honestly realize that this administration inherited the faults of

over half a century of Republican do-nothingism and acceptance of the free play of the blind forces of a profit-motive system. Suddenly—yes, overnight—President Roosevelt was asked to effect remedies for situations that might have well had some prior anticipation and planning.

I cannot call this task of the President herculean, for that masterly son of Zeus and Alcmene could not have performed it himself even if it was set out by cousin Eurystheus as an additional or thirteenth labor. Cleansing the Augean stables with its stabled herd of 3,000 oxen was a mere physical task compared to the mental, spiritual, and physical labors of the Chief Executive of this country as he faced in 1933 the most startling, threatening cataclysm in all our history.

Nothing but a stubborn and benighted toryism can ever stand up and criticize his efforts and his present endeavors to permanently solve this Gordian knot of twentieth-century democracies.

Like the words of the of the Duke of Wellington:

> I find many very ready to say what I ought to have done when a battle is over; but I wish some of these persons would have come to me and told me what to do before the battle.

The President might well propound the same question.

The outstanding conclusion from the most thorough of the studies of the English system brings us to the realization that there is no short cut to a workable system, even after close to three decades of effort, in which all the great contributory factors of England's great power—labor, the Crown, Parliament, with the House of Lords—all put their most serious attention to the solution. In a complicated economic order there, which was turned topsy-turvy all over the world, the way back must be slow and prolonged, made doubly so by the quickening interest of millions of voters enjoying suffrage and audible voice for the first time. The ravages of unemployment have left fears of titanic proportions, and the often-found petulent attitude toward the setting up of the new machinery in this country must be realized and thoroughly appraised if a real understanding is to be had.

Through the ages Great Britain has had her system of poor relief administered by local officials compelled by law to relieve destitution and want wherever it existed, but today that system has been for the most part relegated to the memories of the past, and England has health insurance, granting maintenance and medical attention; workmen compensation acts for industrial accidents; pensions; and various types of other assistance. The British method was to employ every type of assistance available, including contributory unemployment insurance, noncontributory relief to representatives of the insurance scheme, relief works, and extended assistance of employment exchanges, very modified poor relief, restraining of the unemployed movement of the unemployed from areas of scarcity to areas of need, and stimulating emigration.

It must be remembered, however, that England attacked this problem as far back as 1911, when over 2,000,000 people were compelled to join a compulsory insurance scheme managed by the National Government. Nine years later it attempted to extend this insurance over all its industrial wage earners, but the extension was a distinct failure. It is using every expedient today to still effect a solution. Thus, it may be said that for 25 years the English have exerted every effort to eliminate the problems of industrial maladjustment. It must be remembered, moreover, that the President of the United States, heir to the apparent burden of 25 and more years of neglect in this field, has been compelled to solve these problems within a space of 4 years.

The censure of the carping criticasters who are raising their heads out of their storm cellars is forgetful of all this, and in most cases is bitterly partisan, which means that it has no respect for whatever the administration is doing. This one-sided stricture becomes all the more political when it is realized that the opponents on the other side of the aisle imply that a solution should have been reached by this time, thus betraying their ignorance of the Sisyphean labors involved.

The change in the treatment of the British worker from the historic consideration as a criminal and a pauper to a highly privileged position today in English political consideration is the outstanding phase of the British policy.

Seemingly the British system of local poor relief and its greatest auxiliary charity assistance are today incapable of solving this age-old problem. This is strikingly true in England, where the Royal Commission, organized to study the relief problems, has again and again stressed the need for national assistance. Perhaps the most famous of these was the Royal Commission on the Poor Laws for Relief and Distress, organized in 1905, which came back with these three points: (1) That existing methods for handling unemployment should be radically changed; (2) that a national system of labor exchanges should be established; (3) that state-subsidized unemployment insurance should be instituted. That was the start and the opening wedge in the 25 years of handling this problem.

In the first place, it is settled now in English policy that destitution must be solved by an agency in Government circles, and that unemployment itself is due to faulty economic structure and is not blameable on the employee himself. Finally, this solution is not the burden of the local communities but of the National Government or the Crown. She has, however, insisted that there is a common cooperative responsibility for everyone for the entire problem.

To cope with this problem, which for continuity has even outlived the time of Thirty Years War, outstripped the expenditure in money and efforts of her greatest generals and admirals, caused more suffering and bitterness relatively than all the catclysms of her history, England has tried everything; and in that laboratory of attempted success and failure we may well look for a background and a sympathetic back-drop for our own efforts.

One word, of course, should be inserted at this point—that the English people are content to pay as you go and accept the tremendous taxation burden that is unknown here in America. No American can adequately study the British system and not realize that the average Englishman pays infinitely more in taxes and suffers the loss of practically all of the luxuries that the average man in America enjoys daily. The English attitude is that it is the problem of his generation, and he is going to pay it today. Further, too, a more enlightened viewpoint on taxation governs the entire country, and a better system of handling taxpayers oils the wheels of administrative machinery. Further, too, the average English citizen is content to accept a lesser amount for relief than is true in America. These facts must be remembered before we attempt to appraise the English unduly or attempt to use it as a basis of our American plans.

We must therefore admit a very open-minded willingness on the part of the English Parliament to discuss the problems of maladjustment in its entirety and an even greater desire to modify and even eradicate all past methods if necessary. It must be remembered that the English type of government is a true parliamentary one in which the Executive, Crown, or King, as you will, is absolutely responsible to the legislative branch, or Parliament. What the Parliament says or does is law without review by Crown or court.

The year 1911 marks the first effort of the British to cope with the problem of unemployment and the recurring cycles of depression. Two and a half million people were compelled to join a compulsory-insurance scheme operated by the National Government. This was the first step in removing the ever-recurring perplexity from the agencies of old; the poor-relief law and charitable agencies.

For a decade this scheme worked with marvelous encouraging prospects, so much so that in 1920 the attempt was made to extend the privileges to the entire group of industrial wage earners. But the depression of 1921 riddled the scheme full of holes. From an actuarial point of view the base could not take care of the demands of a group that numbered three times the estimated recipients. The entire scheme was stranded on the rocks of a depression the like of which had no parallel in modern annals.

The Deserted Village of Oliver Goldsmith presents no more pathetic picture than was unfolded as one key industry after

another succumbed to this economic plague. Steel, coal, iron, wool, cotton, worsteds, shipping, all fell by the wayside, blighted and stripped of energy and life.

Parliament acted, of course, with the swiftness that is so indelibly associated with that cabinet type of government. Additaments of complicated changes to the first and second insurance schemes were offered, permitting longer benefits for longer periods and liberalizing the requirements for benefit reception. The financial changes needed were made up by doubling premiums and obtaining funds from the national treasury in the shape of subsidies.

Local authorities, too, attempted to plug the holes of this terror again supplemented in many instances by trade-union benefits and occasional aid from large enterprises that had their own insurance systems, along with the conventional charitable aids.

This characteristic cooperation of both the national and local bodies has been in vogue since the first unemployment workmen act of 1905, when unemployment got its baptismal recognition as a byproduct of industrial maladjustment. This acceptance of the blamelessness of the workingman, himself, gave a dignity to the tasks' future handling that forced public responsibility for the maintenance of the laborers affected and withdrew them from the reproach of fault or blame.

In a brilliant unfolding of the formation and character of the National Insurance Act of 1911, Sir William Beveridge, in his book, paints the picture of the scheme that provided for the mandatory insurance of 2,000,000 manual workers in seven of the most fitful of English industries—shipbuilding, mechanical, public works, iron founding, building, vehicular construction, and saw milling. A million and a half munition and kindred war workers were added during the war.

The initial insurance premiums were made up by weekly contributions in adult brackets of 2½d. by worker and employer each, with the state adding 1⅔d. Weekly benefits were 7s. Various provisions to curtail the inroads that bad risks would cause were put into organic law. As we said above this proved splendidly adequate and the future seemed roseate at that time.

But in 1920 too precipitate a view of ultimate success veiled caution and enthusiasm was unduly responsible for the extention to cover over eleven million more. The subsequent break-down is history, but a study of the system is still worth while if only to prove the need for caution and consideration for the efforts of the President to utilize the mistakes of that campaign across the water.

There are close to 13,000,000 compulsorily insured against unemployment, including the obligatory enrollment of all persons employed under a contract of service of apprenticeship. Over 6,000,000 workers are therefore outside of this scheme. These exempted or excused classes include workers under 16 and over 65, agricultural workers, domestic servants, railroad, utility, governmental, and kindred groups, outworkers, banks, and others.

There is a waiting period of 3 or 6 days, all types of regulations, and designated officers for reports, appeals, and so forth; sometimes elaborately set out, but all made and changed with the cooperation of all parties, including labor unions, whose services have been most helpful.

Obviously the originally short-period plans were changed to meet the inroads of the worse depression in history. Even benefits were paid in advance of contributions. But even greater liberalization was necessary; so much so that the entire insurance structure was creaking under the strain. It was a short cut to the employment of the scheme to give money to those whose contributions did not entitle them to benefit under the original plan.

At times these payments were often also given in advance. In the famous Blanesburgh, or 1925 report, however, it was that committee's opinion that the question of unemployment insurance should be permanently broadened. It tackled the problem of the work-shy who preferred benefit to work. They first attempted to work out a definition of those who "genuinely were seeking work", but the tremendous disadvantages of attempting to get behind the worker's mind and his attitude made this impossible. Labor itself was distinctly opposed to this method of attack. As a substitute the Morris committee of 1929 recommended that a claimant should be denied benefit if he refused an offer of suitable work or if he failed to prove that he had made reasonable efforts to obtain suitable work had it been available. The burden of proof therefore was changed from the claimant to the insurance officer. The latter was now compelled to prove that the claimant had refused the job or was so indifferent that he failed to obtain one when available.

We know that the totally unpredictable demands upon the unemployment insurance in 1931 not only caused consternation for the existence of the system itself but it came dangerously near being of alarming peril to the finance system of the Empire. The result was that the benefits from insurance were strictly reduced and other aid was closely tied to poor relief. Various changes were made. This resulted in the establishment of the "means test", which in so many words means that those persons who had already drawn 26 weeks of benefits in a year, or who had sufficient contributions to entitle them to benefit, were required to prove their need for assistance to the poor-law officials.

Now, it is not necessary to point out the elaborate machinery set up to help this change in overhead policy. It is sufficient to say that the actual change as indicative of the constant necessity for revamping the entire policy. No one has found the touchstone to turn these problems into a formula or common denominator which will effectuate a solution.

It might be added also that the constant changes in the requisites for unemployment benefits has been the cause of the threatening insolvency in the fund itself. Obviously funds from the Crown were the only salvation.

It is significant that all of these reports are predicated upon the admittedly sound belief that "an unemployment insurance scheme must now be regarded as a permanent feature of the code of social legislation." All believe that the obtainable solution must eventually be along the lines of insurance features. The system has taken some terrific blows, but the English method of refusing to go off half cocked has been the salvation of the present existing methods. Definitely, certainly, and enthusiastically this spearhead of attack in the form of insurance constitutes England's answer.

Of course, the sustaining force in those dark days was the British Treasury. From those unexpected drains came various additional helps and subsequent studies on the problem. Recourse to the treasury was allowed, we have seen, by those who had even exhausted their legitimate insurance claims. This really precipitated the national budgetary crisis in 1931 with practically close to a half a billion dollars going to this insurance propping.

What about the future? An effort to include all of the hitherto exempted lists for the most part will bring into the fund all of those whose contributions will be steady and, by and large, will result in little or no benefit but will, in short, bulwark the drains of the others. The exclusion of these good risks in the past has prevented the spread of the scheme over those whose aid and assistance has been most needed for a Nation-wide coverage. The only safeguard is insurance. Of course, these people are being taxed to subsidize their fellow men in groups less fortunate in tenure of office and large pay rolls. When it is realized, however, that the safety of all depend upon the care of all the charge on these prior exempted secure groups seems justifiable, at least, in the English system.

What other auxiliaries was the British system establishing in the fight on the effects of economic maladjustment?

Brilliant efforts in the field of unemployment-exchange systems dominate these outside handmaid efforts. Provisions for work and the removal of potential workers from glutted areas to others with scarcity of workers were the salient features of the branch. Employment directories, national and divisional webs with exchange information, publicity chan-

nels, local committees of assistance, all linked with employer and employee, dot the map of the economic battlefields.

Training areas for women, girls, and juveniles were set up with success. The effort to get rid of surplus laborers by oversea immigration proved a pitiful fiasco and it is sufficient to say that it forms a sorrowful chapter in the entire story. Briefly, however, it was the Empire Settlement Act of 1922 which projected the 15-year plan to settle British subjects in the Dominion with the National Government to pay a half of the costs. Transplanted men, with habits and training unresponsive to new surroundings, found discouragement and tribulation, and the failure was due principally to this absence of prior agricultural training.

In the public-works projects the central government supported some directly, while the treasury guaranties of credit aided others. Subsidies to the local authorities also helped. Practically all men in these projects were registered on the employment-exchange records. As time went on efforts were made to place projects in areas termed "prosperous", so as to relieve other areas of the stigma of stagnation and cause mobility of labor. Projects calling for unskilled labor, with as few machines as possible, were utilized. Placement of men for every-other-day work periods increased the numbers aided, with added favorable consideration to ex-service men whose cases and reasons for maladjustment long antedated the depression.

A billion dollars worth of projects, however, never materialized. An unemployment grants committee dealt in wage grants, loan grants, transference grants, all of which served to cushion the load, but eventually the futility of public works was recognized and a gradually tapering off was noticeable. This does not mean that there were relatively no funds spent on public works. On the contrary, close to a billion was spent by both national and local authorities over 10 years in road work, sewers, sewer disposal, water supplies, electricity, docks, parks, municipal buildings, sea defense, baths and bathhouses, public health, and other types. It would serve no purpose to go into the details of this avenue of attack. In the British scheme of things it was helpful, but not capable of very permanent extension under existing conditions.

Any résumé of the efforts of other countries to handle this problem of unemployment or economic maladjustment shows primarily that its ravages can only be handled on a long-time, permanent basis. Temporary measures and expedients are not enough. The most sane, intelligent, and open-minded group in our Nation must handle this vexing problem with all its intricacies, and the machinery set up must be carefully planned and continually subject to inspection and revision. No one of the foreign methods can, of course, be taken or adopted in toto, but there is not one of them that cannot be studied for helpful suggestions.

Obviously, the time is not far distant when this Congress must pass upon the permanence of this problem. True, indeed, is it that we have hitherto delegated to the executive department powers broad in their blanketing features in the emergency handling of the entire matter. But truer still is the growing realization that it will soon be our problem to amass the facts, study the experiences, and formulate a permanent set-up. At that time the entire history of the Presidential efforts—and they were heroic endeavors—will be subject to our scrutiny. I wish to say now that it is my personal opinion that those efforts of the White House will reflect great glory on the honesty and brilliant handling of a tremendous problem under terrific pressure.

No one in this administration, Mr. Speaker, can deny that errors have been made in the extension of our relief program. But can anyone seriously gainsay the fact that Mr. Hopkins has been willing to listen to all complaints and suggestions and attempt a reasonable solution? We hear much from the other side of the aisle about substitutes and earmarking funds, bitter condemnation of W. P. A., graft and boondoggling, decentralization, home rule, and such talk, but we wonder if a single estimable gentleman on the minority side has realized that any abrupt face about in our handling of the problem would entail confusion, fear, and maybe chaos. Something has been done, and its results are patent. Whether we like the formula or the policy we can appraise the resultant product. Is it fair to say that a consequence which has been secured only after 3 years of intensive study, with its early efforts at times blindly emergent yet sincere, should be scrapped overnight? Is it fair for those who charge politics in its present administration to hold themselves out as nonpartisans now when they must or should know that changes now would be calamitous. I have tried to show in a feeble way within what I believe should be the limits of a revision and extension of this type that the entire problem is one of trial and error, and there is no panacea. As a matter of fact, if we had a Federal commission of inquiry composed of the biggest men in this country able and all willing to leave their own work to study this problem in its entirety, it is difficult for me to believe that such an inquiry would not take 6 months of the most painstaking study, yet we are asked to accept the conclusions of men whose bent is primarily political and overturn an entire system which at the worse cannot be totally wrong.

Let us not accept or prefer the report to the bullet or the echo to the report in this momentous question. These criticizers would take a leap forward if the Achilles of modern liberalism were not in the White House, but they dare not emerge with anything but the most glittering generalities. They do not dare to go into details, or at least they will not while this House is in session, for it would be treated to the most searching analysis in the world. It would be well for the country, however, if the Republican minority would present some tangible detailed plan with a worked-out philosophy to this House through one of its leaders and let us see what 3 years of external aloofness has fashioned, or are they too far down the inclined plane of political misfeasance which is nothing more or less than the path of fatuous censure and overreaching condemnation?

Let us not forget that the Republican Party is judged by its membership in Congress, and it cannot hope to whitewash their sins of omission by a sugar-coated platform. The voters want more than party planks to lift a candidate or a party above the rest of us. They demand results, and if party timber sincerely applied cannot produce results, it is well to discard that useless lumber. When one hears the platform talk, one is reminded of the vigorous statement of Justice Holmes in *Missouri* v. *Holland* (252 U. S. 416):

> We see nothing in the Constitution that compels the Government to sit by while a food supply is cut off and the protectors of our forest and our crops are destroyed. It is not sufficient to rely upon the States. * * * The reliance is in vain.

THE SCRIPPS-HOWARD CHAIN OF NEWSPAPERS CONTINUES ITS VIGOROUS SUPPORT OF THE WAGNER-ELLENBOGEN HOUSING BILL

Mr. ELLENBOGEN. Mr. Speaker, I have already commented on the widespread interest and active support which the Wagner-Ellenbogen housing bill has aroused in the newspapers of this country since the bill's introduction a few weeks ago. Among those journals which hailed the bill immediately on its appearance, and which have given it full editorial support, the liberal Scripps-Howard chain of newspapers has taken a leading part.

In an editorial which appeared in the Pittsburgh Press and other papers of the Scripps-Howard chain on May 3, 1936, an excellent analysis is made of the importance of the bill, both as an economic and social measure.

Commenting on the fact that surprisingly little opposition developed at the hearings on the Wagner-Ellenbogen bill, the editorial credits this to "a general approval of its social aims and economic needs."

The editorial then addresses itself to such criticisms as have arisen and analyzes and answers each.

First, to the claim that there is no housing shortage, it replies that a preponderance of authority disputes this.

> To cite one of standing—the Public Administration Clearing House of Chicago—estimates on a basis of census figures a need for 7,700,000 additional dwelling units during the next 10 years.

Next the editorial takes up the assertion that a scarcity of purchasing power, and not a housing shortage, causes these conditions.

In refutation of this charge it points out, very wisely, that—

One of the chief causes for scarcity of purchasing power in this country is the lag which has characterized the so-called heavy industries during the whole depression. Other industries have picked up. But the "heavies", generally speaking, are still in the doldrums. And to more than any other single cause this lag is due to lack of building. Nothing would more sharply stimulate employment and its consequent purchasing power in the heavy industries than just such a program as that contemplated in the slum-abatement bill.

We can learn from the experience of others. England's vast public housing program resulted in a private home-building boom as well as in greatly increased factory production.

It has also been contended, the editorial notes, that publicly financed housing kills thrift and discourages initiative. A look at the record of England is suggested, where the result was exactly the opposite.

Between 1919 and 1933 total assets of British building societies (institutions like our private building and loan associations) increased from 77,000,000 to 501,000,000 pounds, a 600-percent improvement.

The editorial dismisses, properly, the claim that the Government should not compete with private industry, because there is no competition.

All authorities agree that really low-rent housing does not and will not attract private capital.

It is asserted—

Remarks the Pittsburgh Press—

that such financing as called for in the bill is not a proper governmental function.

Why not?—

Asks the press.

We spend tax money to put down fires, crime, disease, and disorder. Those things are bred in the slums. Tax money spent to do away with the breeding is even better spent, and is more than returned in decreased health department, fire and police expenses. Tuberculosis, for example, is 30 times more prevalent in slum areas than elsewhere, baby deaths 300 percent higher, juvenile delinquency 300 times more frequent. In terms of broad economics as well as social improvement this strikes us as the most powerful of all the arguments for slum abatement. Prevention is cheaper than cure.

In conclusion, the editorial commends the emphasis which the Wagner-Ellenbogen bill places on local rather than Federal participation in its program.

The very essence of the plan is to emphasize not the Federal but the local aspect through limited loans and grants to local housing authorities over a 4-year period.

In its moderate aims, its long-term viewpoint, and its decentralization features, it marks a decided advance over all our previous rehousing plans.

The Scripps-Howard papers say of the Wagner-Ellenbogen bill.

This consistent and able support which the Wagner-Ellenbogen bill is receiving is a testimonial to the sound purposes and aims inherent in the bill, and the practical manner in which they are resolved.

The continuance of this support will aid in enlightening the people of this country to the merits of the measure, and a consequent Nation-wide demand for its passage.

DEFICIENCY BILL OF 1936 AND RELIEF

Mr. GRISWOLD. Mr. Speaker, the title of this bill is a misnomer. It is so much more than the title designates. The bill appropriates a little more than $2,364,000,000. According to the committee $1,425,000,000, or half of this amount, is allocated to the Works Progress Administration. This cannot be construed as a deficiency. It is an outright new grant to the Works Progress Administration for alleged relief purposes.

Involved in the other half of the funds appropriated by the bill are the necessary funds to make effective the Social Security Act and the Railroad Retirement Act, as well as the operation of the Post Office Department under the 40-hour-week system. To vote against the bill would require me to vote against the grants to States for old-age pensions, grants to States for aid to dependent children, and aid to the blind. These are humane measures, necessary and meritorious. These laws are already enacted, and require this money to make them operative. A man cannot strike at the aged, nor at the defenseless destitute blind, nor at crippled children and keep his self-respect. It is only a little less obnoxious to me to strike at the postal employees by refusing to appropriate the money for their salaries or to be so unjust as to refuse to grant the Railroad Retirement Board the money provided by this bill after requiring the railroads to pay their contribution to that fund and the railroad employees to stand the deductions from their meager salaries.

I resent having a bill brought in this Chamber to be voted on which so hopelessly commingles these vital things with the unnecessary grant of money to the Works Progress Administration. I say unnecessary advisedly. Even though I believed in the efficiency of the W. P. A., I would still say this grant of a billion and a half is unnecessary. It is unnecessary because that agency now has, and will have on the 1st day of next July, an unexpended balance of more than a billion two hundred million dollars. An unexpended balance only two hundred million short of the sum you are giving them in this deficiency bill in which there is no deficiency except in the funds for the purposes I have enumerated.

I voted against the three billion three hundred million relief measure. I voted against the four billion eight hundred million relief measure. I stated at the time my reasons. Those reasons are as good to me today as at the time of those votes. I objected to requiring the taxpayer to pay in taxes double the amount of the relief, which we do through our system of paying for relief by the issuance of interest-bearing tax-exempt bonds. I do not believe that the people of this Nation should be required to pay a bonus for the privilege of taking care of its destitute citizens. When this bill has passed we will have appropriated for relief $9,600,000,000. That is what we will have expended. That is what the people on relief and those employed in its distribution will receive, but it will cost the taxpayer $20,000,000,000 to dispense the nine and one-half billions.

I protest the price is too high for what the citizen gets. He is expending $2 to get back one. He is like the man who went into the match business, bought matches for 5 cents a box and sold them for 4 cents, expecting to sell 20,000,000 boxes and make his profit on the volume of business done.

This relief appropriation is like all the others. It gives all the power to one man. Under this bill you must go, hat in hand, to Mr. Hopkins, bow before the idol, and await his will. Relief under this system is governed by remote control. And we have been under Mr. Hopkins' inventive genius, progressing constantly in this form of relief administration. Mr. Hopkins' maxim is the more remote the control the better, and the further the idol in charge is removed from the recipient of his bounty the more honor to the idol and the more cost to the taxpayer.

These are not idle words to draw an indictment. Let me give the figures. I give you figures obtained from the county auditors in seven counties in my district and the figures obtained from the district offices of the W. P. A. In seven counties for the 9-month period immediately following August 1, 1935, the date on which the remote-control system of relief administration under the W. P. A. was instituted the total cost for the seven counties was $1,337,163.87 or an average cost of $148,573.76 per month for the 9-month period.

Prior to August 1, 1935, relief was administered for 26 months by local control. The Government granted the money to the States and the States distributed it by and with the advice of local authorities in the communities. Under that system the cost for 26 months was $1,352,563.44, or an average monthly cost for the 26 months or $57,021.67 per month.

In these seven counties in Indiana under Mr. Hopkins' system the cost per month is almost three times that of the relief before the W. P. A. came into control. Under Mr. Hopkins' system we have the security wage for labor and

the prevailing profit for the material man. I am opposed to such discrimination. If the material man is entitled to the prevailing profit on his investment, then labor is entitled to the prevailing wage on its investment. Under the system before Hopkins, the system of local control, the F. E. R. A. and the C. W. A., the prevailing wage as well as the prevailing profit was paid. Relief, while not administered without errors, was better administered than now and, according to the figures I have given you, at one-third of the cost. This bill is being amended to provide for the prevailing rate for labor. I concur in that amendment. It is a step forward but is not the prevailing wage. Under this amendment you will increase the rate and not the wage. You require labor because it receives the prevailing rate of pay to shorten its hours so as to continue to be under a starvation wage.

The Nation cannot attain to a proper economic recovery under a starvation wage that permits only a mere existence to a number of the citizens. Neither the farmer nor the merchant can eventually profit when the purchasing power of labor is kept at merely enough to keep body and soul together.

Mr. Hoover's theory of relief was to spread existing employment among more people by shortening hours. Put two men on one job and divide the wage. His theory was, let all starve together. Mr. Hopkins' theory is the same, with only a slight variation. Mr. Hopkins believes all should be kept alive, but with as little life as possible.

I think the time has come to inject a new serum into the lifeblood of relief administration and relief thought. The time has come to throw off the old worn-out cloaks of both Hoover and Hopkins, the theories of recovery based on starvation and accept as a national relief system a theory based on American standards of living.

The expenditure of relief money in lasting public works of a permanent nature would employ people in the heavy industries—in the manufacture of materials. It would be a great indirect aid to recovery. Many now on the public-relief work would find employment in private industry. The Government cannot continue indefinitely as the employer of 6,000,000 people. The problem can be solved only when the transfer is made from the public pay roll to a private pay roll. Without private business to be taxed there can be no funds for public relief.

Our present system on relief, whether we name it a dole or a security wage, saps the pride and crucifies the high soul of the individual who is forced to accept it. We are creating a Nation of governmental suppliants to replace a Nation of working men and women proud of their ability to maintain themselves.

Never before has a relief appropriation bill been brought before the House attached to a deficiency bill so that the two could not be separated. There must have been a reason for preventing a separate vote on the relief appropriation. I have my opinion as to that reason. This I do know, that there are other Members, like myself, who would not vote for it if it were not so tied up with other appropriations that to vote against it would be to crucify the helpless, destitute aged, curse the blind, deny the joy of life to helpless crippled children, and abrogate already existing law by failing to make provision for the necessary money for the operation of those laws.

Mr. Speaker, I am forced to vote for the bill to keep faith with the helpless, but in so doing I am not commending or supporting an appropriation for relief by remote control and tax-exempt interest-bearing bonds.

OMNIBUS CLAIMS BILLS

Mr. COCHRAN. Mr. Speaker, few of our constituents realize the vast amount of work that it is necessary for a Member of Congress to perform which is in no way reflected in our districts. We are expected by some to have a personal knowledge of all pending legislation, but if those who expect this of us stopped to realize that when this Congress adjourns in a few weeks the RECORD will show over 20,000 bills and resolutions have been introduced since January 1935, they would better understand the situation that confronts us.

Our tasks are diversified and many. Because the hour of meeting is noon, many feel that a Congressman's life is a round of pleasure. If those people would be at our office early in the morning and see dozens of letters in the first of six mails that come to our desk during a day, then watch us run to a committee meeting or around to various Government Departments scattered over a great city, they would have a more intelligent understanding of what their Representatives do other than to sit and listen to speeches and vote. The standing committees of the House, where all legislation and matters that affect the conduct of the Government are considered, is the place where all well-informed people know a vast amount of work is done. Take as an example the hearings on the deficiency bill. That bill contained about two and one-half billion dollars in appropriations for various Government agencies. Several thousand pages of testimony is found in the hearings. A complete analysis of the activities of the Works Progress Administration is found in one volume. How many of our citizens know that members of the committee sat morning and afternoon, not for weeks, but for months, while Chairman BUCHANAN, of Texas, and his 38 associates secured information relative to expenditures in the past and made Government officials justify their request for additional money before placing their stamp of approval on the Budget recommendation by placing the item in the bill. When the statement is made, "the amount is below the Budget estimate", it means the official could not justify the demand for the full amount. You will see by that hearing, pages of testimony, even regarding such expenditures as for telephone, telegraph, automobiles, typewriters, and stationery, not speaking of the more important activities. Everything, however, is covered. How many people read Mr. Hopkins' explanation of boondoggling projects, so called? Mr. Hopkins not only read the criticism of the partisan press but then submitted a statement of facts and in each instance justified the project. The criticism did not jibe with the facts.

It was at night that the members of this committee, along with many others, were required to remain in their offices looking after the mail from their constituents.

It so happens the Committee on Expenditures in the Executive Departments is charged with certain duties, and as chairman of that committee I feel it is only proper that some attention be given to claims bills. It is not a pleasant undertaking for one to disagree with his colleagues on private bills. The Government departments naturally watch the action of Congress in handling claims growing out of Government contracts, and so forth. My contention has been Congress should give more than ordinary attention to the principle involved in some of these claims, no matter how small the amount. I know my attitude has been criticized. In fact, one Member has gone so far as to say, because I opposed a bill providing for the payment of insurance of $10,000 in a veteran's case, I have no sympathy for the disabled ex-service men. The principle involved in that case was whether Congress desired to adopt a policy of setting aside a decision of the Veterans' Bureau. I contended to do so would open the door for the introduction of thousands of similar bills. The author of the bill fully understood my position, as we did not discuss the merits of the case. That criticism does not bother me in the least. It is better to try to do something for the taxpayers now and then, even if wrong at times, than to do nothing.

There is absolutely nothing personal in my opposition to certain private-claims bills. The work in presenting a synopsis of some of the bills for the benefit of Members who do not have the time to examine the reports due to other duties is arduous, especially when one wants to be perfectly fair. I found a month ago I was doing too much for my own good, and the House physician so advised me. I will be unable to take the floor, as I have in the past, on Tuesday, May 19, when the omnibus bills are called, but I am now submitting a brief statement regarding some of the claims that are on the calendar, just as I have done every time the bills have been considered at this session.

As a result of my efforts many bills have been defeated, and some that I opposed, which passed, have been vetoed by the President.

There are seven omnibus claims bills on the calendar—five from the Committee on Claims, one from the Committee on War Claims, and one from the Committee on Public Lands. There are many meritorious bills included, but it is my opinion that there are a number that should not pass or at least should receive more than ordinary attention, and it is the latter I refer to.

My statement follows:

H. R. 9045 (OMNIBUS)

This bill is from the Committee on Claims. There are several measures included in this bill to which I call the attention of Members of the House.

TITLE II—H. R. 3559—JOHN L. ALCOCK

Under this bill the Court of Claims would be given jurisdiction to adjudicate a claim for anticipated profits under executory contracts between claimant and foreign buyers covering spruce lumber, which the United States commandeered for war purposes. Claimant has heretofore recovered damages for the loss on lumber in his possession at the time the Government took over all spruce timber.

Does Congress wish to obligate the Government to pay anticipated and speculative profits? The War Department says in part:

If the relief be granted, it is believed such action would constitute a precedent too dangerous to even contemplate, as it would open up untold tens of thousands of claims of a like nature, for the reasons that during the war the Government not only requisitioned ships which were under contract and charter at the time of their requisition but undertook the control of wheat, sugar, coal, and other commodities of almost every nature, thereby rendering impossible the execution of previous contracts, respecting these commodities, and took over steel mills, railroads, shipyards, telephone and telegraph lines, the capacity output of factories and other producing activities. If this bill should be enacted into law, it is the opinion of this Department that it will inevitably result in a stampede and gold rush in the nature of claims upon the Government in comparison with which the Klondike gold rush would appear as a solo affair. If this should be passed, it is difficult to understand why, in principle, every soldier who was drafted into the military service would not have an equally meritorious claim against the Government for a special act of Congress for relief to compensate him for the difference between his meager Army pay and the pay, salary, or earnings he was receiving in civil life.

In view of such a statement from the present Secretary of War, Congress should give more than ordinary consideration to this proposed legislation and defeat the bill.

TITLE IV—H. R. 3729—HENRY W. BIBUS AND OTHERS

The claim of Henry W. Bibus and others grows out of the purchase of land for use by the Government during the war, for which the claimants were paid $472,250.30. There are 11 claimants, and all but 2 received the option price. In one instance the compromise was $5,000 less, and in the other the same amount. In four cases the Government paid more than the option price. The report shows the Government spent millions for improvements. It converted the land into highly desirable industrial property by reason of the expenditure in excess of $6,000,000. Now the former owners want the Congress to pass a bill that might result in their securing the amount between the purchase price and the sale price—over a million dollars. The War Department is opposed to the bill, and the Congress should defeat it.

TITLE VI—H. R. 4841—RELIEF OF CERTAIN ARMY DISBURSING OFFICERS AND OTHERS

A similar bill, S. 556, became Private Act No. 214, Seventy-fourth Congress, approved August 14, 1935, after this title was included in the omnibus bill, H. R. 9054.

TITLE IX—S. 1360—TERESA DE PREVOST

The bill has been pending for many years and grows out of the so-called Alsop award of July 4, 1911, made by the King of Great Britain as arbitrator.

Mrs. de Prevost maintains this money should be paid to her by the Government because of alleged irregularities in the distribution through the State Department to claimants under the Alsop award. The United States Government held the Government of Chile was liable to the United States, acting for certain named persons and their heirs. The King of Great Britain was named as arbitrator, and he decided in favor of the United States. The contentions of the claimant indicate a former Assistant Solicitor of the State Department resigned after the award had been made and within a few years entered the case as an attorney. If the allegations of Mrs. de Prevost are true, then the Assistant Solicitor of the State Department was guilty of unethical conduct, to say the least. This lady has spent many years around the Capitol in an effort to secure the passage of an act to reimburse her.

Mrs. de Prevost died several weeks ago, and, so far as I can ascertain, she did not leave any relatives in this country.

The Committee on War Claims reported the next bill and, of course, has to do with claims growing out of the war. Some even go back to the War of the Rebellion.

H. R. 9112 (OMNIBUS)

TITLE I—H. R. 237—ROWESVILLE OIL CO.

The bill is to remove the statute of limitations so far as it applies to the linters claim of the Rowesville Oil Co., arising out of a contract it had with the Government in 1919. The Judge Advocate General of the War Department indicates that at this time, with incomplete records, the Government would be at a great disadvantage in defending this suit if the bill was passed. Further, while the plaintiff made a plea at the time of cancelation of contract that it feared bankruptcy, the Judge Advocate General says:

As a matter of fact, the plaintiff did not fail. Like all industries connected with the manufacture of munitions, the plaintiff made great profits as a result of the war.

The company did not protest the cancelation clause at the time the contract was made.

TITLE II—H. R. 254—FARMERS STORAGE & FERTILIZER CO.

The second bill is for the Farmers Storage & Fertilizer Co., and is similar to the Rowesville Oil Co. bill.

TITLE III—H. R. 3790—WALTER W. JOHNSON

This bill proposes to pay a balance alleged to be due claimant for services rendered in behalf of the United States Shipping Board Emergency Fleet Corporation during the years 1918 and 1919 in launching ships built for the Government at various shipbuilding yards.

In decision of April 30, 1930, no. E-455, the Court of Claims found the value of the claimant's services in launching the ships to be $20,000, and that $5,495 of that amount had been paid by the shipbuilding corporations, the amount of the judgment being $14,505. Does the Congress wish to authorize this payment notwithstanding the claimant has already been paid in full, in the view of the Court of Claims?

The net judgment was paid by the Government. It amounted to $14,505 and was paid September 6, 1930. This certainly should dispose of the claim. The bill seeking further reimbursement should be defeated.

TITLE V—H. R. 4059—ELLA B. KIMBALL

The bill to pay Ella B. Kimball, daughter and heir of Jeremiah Simonson, is a Civil War claim. It provides for payment of $16,441.81 for furnishing supplies and labor in the construction of the U. S. S. *Chenango*. The findings of the court were submitted in 1907, but all efforts to collect the money by an act of Congress have failed, as have hundreds if not thousands of other Civil War claims.

TITLE VI—H. R. 6356—JOSEPH G. GRISSOM

The claim of Joseph G. Grissom of $1,153.43 is another Civil War claim. This was to cover a period between the time he was commissioned by a Governor and actual date of muster in. One hundred and sixty-three such claims passed the House but were rejected by the Senate. This is the first time since 1914 this claim has been reported by a House committee.

TITLE VII—H. R. 7727—GEORGE B. MARX

The claim of George B. Marx grows out of an informal contract to make 200 wire carts for the Signal Corps in 1918. The War Department canceled the order on November 9, 1918, later considered the claim and paid Marx $139,876.86. Marx claims $76,574.12. The committee, despite the objec-

tions of the War Department in the Seventy-first Congress, recommended Marx be paid $58,259.02. The bill was defeated. Now it is proposed to refer the case to the Court of Claims. The Government should not be required to defend such a suit.

TITLE VIII—S. 2520—T. D. RANDALL & CO.

This bill proposes to authorize the Court of Claims to readjudicate a claim for losses and damages arising out of contracts for furnishing hay to the War Department in the year 1918. The claim was referred to said court by Private Act No. 507, Seventieth Congress, approved March 2, 1929, and denied by the court for the reason there was no agreement or understanding whereby the Government was to provide cars for shipping the hay, and, there being no breach of contract by the United States, no liability resulted for the alleged losses and damages (71 Ct. Cls. 152).

Does the Congress wish in effect to amend the contracts at this late date by changing the rights and obligations of the parties thereunder so as to make the Government liable for risks which the contractor voluntarily assumed in its undertakings?

This company wants $20 and $25 a ton for 3,600 tons of hay it contracted to furnish the Government for $14 per ton. The Government paid the contract price.

The next two omnibus bills are from the Committee on Claims, H. R. 11214 and 11215.

H. R. 11214 (OMNIBUS)

TITLE II.—H. R. 2479—CHARLES G. JOHNSON

The bill is for the relief of Charles G. Johnson, State treasurer of the State of California.

I have no objections to this bill, as the coupons have not been presented to the Treasury Department, but the bill should read, a bill for the relief of the Maryland Casualty Co., as that company has actually paid the loss, and in the end, Mr. Johnson will reimburse the surety company.

TITLE XI—S. 925—TO CARRY INTO EFFECT THE FINDINGS OF THE COURT OF CLAIMS IN THE CASE OF WILLIAM W. DANENHOWER

This is an ancient claim, over 15 years old.

Section 9 of the act of February 12, 1901, according to the Court of Claims shows, provided among other things for the payment, 50 percent by the United States and 50 percent by the District of Columbia for all damages to property owners resulting from, incidental to, or connected with all relocations and changes of alinements and grades of the tracks of said railroad or the streets of the city.

The act of June 29, 1906 (34 Stat. 624, 625), repealed section 9 of the act of February 12, 1901, and provided for the ascertainment of the actual damages resulting to property owners from changes made in streets and railroad tracks under the act of 1901.

No suit was ever brought under section 9 of the act of February 12, 1901, or claim filed as provided by the act of June 23, 1906, by the claimant.

It seems to me if the Congress is to further reimburse this owner, the District of Columbia should be required to pay 50 percent of the damages, but this bill calls for the payment of the entire amount from the Treasury of the United States.

It further appears that this owner slept on his rights and did not take advantage of the acts referred to.

TITLE XII—S. 952—ZELMA HALVERSON

The decedent in this case lost his life while fighting a forest fire in Montana during August 1933 as an employee of the Sieben Livestock Co., of Helena, Mont. It seems to be admitted by everyone except a representative of the company that at the time of his death as a result of the fire Harry Halverson continued to be employed with the company. He was not employed in the Forest Service of the United States at any time up to and including the time of his death, August 21, 1933. In other words, if employed by the company and not by the Government, there is neither moral, equitable, nor legal obligation upon the Government, such obligation resting squarely upon the company. There appears to be no sound reason why the United States should assume the liability if in fact that liability is rightfully upon another.

TITLE XIV—S. 1328—SNARE & TRIEST CO., NOW FREDERICK SNARE CORPORATION

The contractors in this case are asking the Congress to grant them the sum of $83,978.05 in full settlement of all claims against the Government for damages incident to delays (alleged to have been caused by the Government) in connection with work performed by them under a contract for furnishing labor and materials necessary in the improvement of the water front at the submarine base, Key West, Fla. The contractors have had their day in court on two different occasions.

The Congress has already made available $800,000 more than the contract price which was paid.

In the Seventy-third Congress, S. 1760 authorized the Court of Claims again to hear and adjudicate the case without regard to the statute of limitations.

This bill, however, does not return the case to the Court of Claims, where it has been on two previous occasions, but directs the Secretary of the Treasury to pay the money direct, by providing that the Secretary of the Treasury shall pay the $83,978.05.

If any action is to be taken by the Congress on this bill, it certainly should be to return the claim to the Court of Claims, and not pay the claim from the Treasury, as the bill provides.

TITLE XV. S. 1431—COLLIER MANUFACTURING CO. OF BARNESVILLE, GA.

The contracts under which the claim of the Collier Manufacturing Co. was predicated were entered into by the firm of Clift & Goodrich, and the Court of Claims has found that settlements with the latter company were made by the Government. The Government dealt with Clift & Goodrich, not with the Collier Co. Why should it be necessary to pay this company the sum of $48,719.70 in full settlement of all claims when they have in fact no claim against the Government? The case has been decided adversely to the Collier Co. by the War Department Board of Contract Adjustment and by the Court of Claims—certiorari denied by the Supreme Court of the United States.

H. R. 11215 (OMNIBUS)

TITLE I—H. R. 653—GEORGE R. BROWN

This is a bill to authorize payment of pay and allowances to George R. Brown, a former second lieutenant in the National Guard, to cover a period during which it is claimed he was illegally placed in a discharge status from the service of the United States. A fact that was apparently overlooked when the War Department acted to restore claimant to an active status was that when his National Guard organization was transferred into the Federal service on August 4, 1917, he was not an officer of the National Guard, having been discharged therefrom by the Governor July 28, 1917, which order was received August 1, 1917, and therefore he was not an officer in the service of the United States when the alleged illegal discharge order was issued or at any time during the period for which pay and allowances are claimed.

It is a further fact that Lieutenant Brown rendered no services during the period in question, never reported to a military post or station, and was not ordered to do so. The accounting officers of the Government in 1918 and the Court of Claims in 1924 found no merit in the claim and the War Department in agreement therewith has reported adversely. Amount claimed, $689.90.

TITLE IV—H. R. 2115—FIRST LT. R. G. CUNO

This bill would reimburse First Lt. R. G. Cuno for damages to his personal property which were sustained by reason of a storm which flooded a warehouse at Langley Field, Va., August 23, 1933, where the Government had stored the property during the officer's absence as a patient at Walter Reed General Hospital. The property was stored free of charge, and, at most, the Government was merely a gratuitous

bailee, requiring the exercise of only ordinary care and certainly not liable for damages resulting from unforeseeable causes. The damages to the property may be considered as the result of an act of God, any consequent losses necessarily resting on the owner of the property.

Since as early as 1885 (23 Stat. 350) the Government has accepted only a limited liability for loss, destruction, or damage of the property of personnel of the military services (see act of Mar. 4, 1921, 41 Stat. 1436), but it has never gone so far as to insure personal property of an Army officer against loss, damage, and destruction when the custody by the Government was for convenience of the owner of the property.

Hundreds of enlisted men and officers at Langley Field, Fort Monroe, and the navy yard and hospital at Langley Field lost their personal belongings in the flood of 1933.

Is Congress to reimburse this man to the extend of $851.61 and not recognize the others?

TITLE VIII—H. R. 3179—JESSE ASHBY

The claim of Jesse Ashby arose out of work required to be performed under contract dated April 28, 1931, for painting plaster walls in the new Department of Commerce Building, Washington, D. C., and the provisions of this title VIII have for their purpose a reference of his claim to the United States Court of Claims with jurisdiction to hear the same notwithstanding the failure of any Government officer to give proper written orders for additional work with instructions to adjudicate the same upon the basis set forth in the bill. Article 3 of the contract requires that any claim resulting in an increase in the contract price must be asserted within 10 days after the change is ordered and supervisory officers of the Government have stated that the claim of the contractor is more in the nature of an afterthought subsequent to completion of the work, based upon his personal opinion that the profits should have amounted to more than were actually realized on the job. This merely shows the value which flows to the Government under section 3709, Revised Statutes, in requiring competition from contractors. Common experience teaches that oftentimes profits are small, and in some instances losses are incurred as a result of competitive bidding on close estimates. This is a chance that all contractors take in entering into competitive bidding, and in this particular case claimant stands on no different footing than other contractors similarly situated. In any event, if the claimant thinks he has a legal claim against the Government under the contract he is not precluded from pursuing whatever remedy he believes himself entitled in the Court of Claims, the statute of limitations not having run at this time. If the Government is going to guarantee a realization of the profit estimated by a contractor, then the protection accorded the Government by the provisions of section 3709, Revised Statutes, will be practically nullified. No amount is estimated.

TITLE XIII—H. R. 6105—FOR THE RELIEF OF THE NEW AMSTERDAM CASUALTY CO.

This bill is for the relief of the New Amsterdam Casualty Co. This company furnished the bond for one Zangwell Engelsher, who had been indicted on six counts for counterfeiting. You have hundreds of similar cases where forfeited bail bonds will be demanded when bills of this character pass. Then, again, it would be interesting to know who guaranteed this bond when it was written by the company. In many cases I have heard of surety companies demanding security before they will furnish such bonds. Was the company reimbursed; and if so, will it return this money to those who furnished the guaranty?

TITLE XVII—S. 895—TO CARRY OUT THE FINDINGS OF THE COURT OF CLAIMS IN THE CASE OF THE ATLANTIC WORKS, OF BOSTON, MASS.

The claim of the Atlantic Works, of Boston, Mass., is a more or less ancient one, the basis thereof being predicated upon construction of the revenue cutter *Daniel Manning*, under the terms of a contract with the United States dated June 27, 1895. The vessel was completed October 7, 1897, was delivered to and accepted by the United States, and the full contract price, plus the cost of extra work, was paid and received by the contractor as payment in full.

It appears clear from an examination of the findings of fact by the Court of Claims, to whom was referred the case under the Tucker Act of March 3, 1887, that the error in estimates for the job was due in large part to the inexperience and lack of facilities for handling the same.

The nature of the claim was summarized in the Court's conclusion of law as follows:

> If the Court have jurisdiction under any of the provisions of the Tucker Act to render judgment, its conclusion is that there is no liability upon the United States under the terms of the contract to pay said claim, and that the claim is neither a legal nor an equitable one. The claimant insists that the claim is one for "a grant, gift, or bounty" by the Government and the payment of such a claim rests in the judgment and discretion of Congress.

This claim thus appears to be merely another case where the Government is asked to donate or give to a contractor moneys of the taxpayer to partly reimburse such contractor for losses due to errors in estimating its costs and profits on Government work. The amount involved is $22,170.30.

TITLE XVIII—S. 2119—FOR THE RELIEF OF AMOS D. CARVER, S. E. TURNER, CLIFFORD N. CARVER, SCOTT BLANCHARD, P. B. BLANCHARD, JAMES B. PARSE, A. N. BLANCHARD, AND W. A. BLANCHARD AND/OR THE WIDOWS OF SUCH OF THEM AS MAY BE DECEASED

The claim of Amos D. Carver et al., in the sum of $35,916.68, is stated to represent losses incurred by the owners of the schooner *Betsy Ross* by reason of interference with, delays to, and forced cancelation of a private charter of and the appropriation of the use of said vessel by the United States Shipping Board on or about April 5, 1918. The basis for the claim appears to be that the loss was incurred in handling a shipment of wheat for the United States Food Administration from Australia to New York instead of a shipment of chrome ore to the west coast of the United States under a private charter. The United States Shipping Board has denied appropriation of the use of the vessel and the Supreme Court of the United States has confirmed the contention of the Government on the merits to the effect that no liability attached to the United States, this action being on writ of certiorari after judgment by the Court of Claims against the United States.

As before stated, the Supreme Court of the United States has found that no legal liability existed, and if the Congress sees fit to pass the bill in behalf of the claimants as a grant or gift there would appear to be for ascertainment what, if any, expenses were incurred by the owners incident to the shipment of wheat from Australia to New York over and above the expenses which would have been incurred in the shipment of chrome ore, taking into consideration the respective freight charges which would have accrued to the owners on each shipment. From all that appears the shipment of chrome ore under the original charter may have resulted in a greater loss than the shipment of wheat, incident to which it apparently is contended the loss was incurred.

H. R. 12322 (OMNIBUS)

TITLE I—H. R. 1369—R. L. TANKERSLEY

This bill would grant to the beneficiary $5,000 from the United States Treasury as damages for personal injuries alleged to have been sustained in an encounter with one Capt. John C. Luikhart, commanding officer of Service Troop, One Hundred and Eleventh Cavalry, New Mexico National Guard, while the organization was in attendance at an encampment at Fort Bliss, Tex. The trouble appears to have been the result of an argument between Mr. Tankersley and the captain regarding the taking of watermelons from the former's patch by certain undisclosed enlisted members of the New Mexico National Guard. Aside from the fact that the tort feasor has never been heard in defense of the alleged assault, the report of the Secretary of War indicates, at least tacitly, an accepted or admitted liability by the State of New Mexico by its willingness to pay all hospital bills and remunerate Mr. Tankersley for his loss of time, but this offer by the State appears to have been refused, the plaintiff insisting upon a large money settlement and criminal prosecution, thus indicating either that the injuries were of a minor

nature and the loss of time negligible or that the victim of the affray can be satisfied only by the granting of a substantial sum of unproved injuries. The law is clear that members of the National Guard in time of peace are administered, uniformed, equipped, and trained in their status as National Guards of the several States, Territories, and the District of Columbia, and the fact that the Federal Government appropriates money for allotment to the States in assisting them in the training of their troops does not shift the liability either legally, equitably, or morally upon the Federal Government for damages which may have been caused by these State troops.

TITLE II—H. R. 1868—MARY E. RONEY

The person who would benefit under this title is the widow of one George H. Roney, who died October 16, 1931, as a result of injuries sustained when struck by an automobile being operated by a member of the District of Columbia police department while responding to an emergency call, and the payment would be made from funds of the Federal Government, no part thereof being contemplated from funds of the District of Columbia in proportion to the contributions legally made by the Congress for the support of the District of Columbia. It appears that this claimant has already been paid the sum of $5,000, the maximum amount authorized by the Congress in such cases by the act of February 11, 1929, as amended by the act of June 5, 1930 (46 Stat. 500), and the passage of this bill would amount to a special exception to the general law made and provided for just such cases, not only by increasing the amount beyond the $5,000 limitation, but also by authorizing the entire payment above $5,000 from the Federal Treasury rather than from funds of the District of Columbia.

TITLE III.—H. R. 2148—TO CONFER JURISDICTION ON THE COURT OF CLAIMS TO HEAR, DETERMINE, AND RENDER JUDGMENT UPON THE CLAIMS OF THE ITALIAN STAR LINE, INC., AGAINST THE UNITED STATES

This bill would provide another legal avenue through which the corporation can again bring suit against the United States for recovery of approximately a half a million dollars of the taxpayers' money for the admitted purpose of paying dividends to the Italian-American stockholders in the corporation. This corporation has already tried numerous times to impress several Federal courts with the merits of its claim, but its claims have uniformly been turned down. The memorandum from the Director, Shipping Board Bureau, included in the committee's report, indicates that most of the Government's important witnesses have since died and that the expense of summoning the remaining witnesses in behalf of the Government would entail a tremendous cost. It is stated further that the Government already has suffered a loss of approximately $1,500,000 out of the transaction. It is also indicated that the corporation from practically the beginning found it extremely difficult to operate, partly because of internal dissension in the board of directors and partly because of a tremendous drop in the shipping business. It is submitted that to require the Government to defend another suit at this time, after the death of so many of its principal witnessses; after the statute of limitations has long since run against the claimant, would place the Government at a decided disadvantage and entail an unnecessary and burdensome cost.

This corporation, once indicted for conspiracy to defraud the United States, should not be placed in a position superior to that of an individual litigant who has sued and lost to another private litigant instead of to the Government. In such a case the plaintiff having exhausted his legal remedies unsuccessfully may not by vexatious litigation perpetuate his lawsuits, and the Government should be protected to the same extent, which the Congress can do by not consenting to the bringing of another suit of this nature in the Court of Claims.

TITLE IV—H. R. 2644—KRIKOR HAROUTUNIAN

There appears to be absolutely no reason, legal, equitable, or moral why this claimant should be paid $1,000. Haroutunian posted a bond conditioned upon the voluntary departure from the United States of two Turkish nationals temporarily admitted to this country, who by a series of delays, hindrances, and obstacles have to all intents and purposes flouted the immigration laws and still remain in this country. The facts as reported by the Second Assistant Secretary of Labor are more or less of a travesty and insofar as the two aliens received permission to remain in the United States, the following excerpts from the said report appears pertinent:

> As you will have seen from the foregoing facts, neither Mrs. Zakarian nor her daughter, Vehanush, was permitted to remain in the United States. The former, as stated above, voluntarily departed from this country, going to Canada, and was, on the same day, lawfully admitted to the United States after she had complied with all requirements of the immigration laws. Vehanush, as further shown above, is still in this country, but she is not here lawfully under the immigration laws and is here only because of the indulgence and forbearance of this Department. Therefore the statement in bill H. R. 2515 that these aliens subsequently received permission to remain in the United States is incorrect.
>
> The propriety of the Department's action in forfeiting the collateral security deposited with the immigration bond can hardly be questioned. That action was in accordance with the plain provisions of the bond and also the authority conferred upon the Secretary by the power of attorney which Mr. Haroutunian executed. The bond was exacted from the aliens in accordance with the authority contained in section 15 of the act of 1924 (U. S. C., title 8, sec. 215). The obligation voluntarily assumed by Mr. Haroutunian was that the aliens would depart from the United States voluntarily before the expiration of the period of time fixed by the Department for their temporary stay, and that they would do so without causing any expense to the United States. That they failed to do either is obvious from the facts stated above. Instead, they persisted in remaining in this country in obstinate regard of the Department's orders respecting them. * * *

Why should the United States return a forfeiture exacted under the bond under these more or less vicious circumstances? A subterfuge undoubtedly was perpetrated in solving and surmounting the immigration hurdles erected by the Congress and the surety certainly should not be rewarded for the success of the enterprise. This title undoubtedly should be stricken from the bill.

TITLE V—H. R. 4500—FRANK LEE BORNEY

The wording of this title would lead to the inference that injuries were sustained by the claimant as a result of innocently coming into contact with a dynamite cap used by the Civil Works Administration contractors. Actually, however, it appears that the Negro youth stole the cap from the cache where they had been placed by the dynamite workers for safety and subsequently in experimenting therewith caused the explosion which resulted in the loss of two fingers. The situation is the same as though he had stolen a loaded revolver and accidently shot himself and then made claim upon the owner of the gun for damages for his injury. There is absolutely no liability on the part of the Government, and it is not believed that Congress should ratify or approve his larceny by rewarding him for his illegal act which accidently resulted in the injury.

TITLE VI—H. R. 4695—STERLING BRONZE CO.

See report of the Comptroller General of the United States, dated April 26, 1934, on pages 34, 35, and 36 of Report No. 2416 of the Committee on Claims, accompanying this omnibus claims bill, H. R. 12322. This bill has to do with the New House Office Building. The report is lengthy and not favorable.

TITLE VIII—H. R. 5826—MISSISSIPPI BARGE CORPORATION

This is a claim by the disputed owner of the steamboat *Dandelion* claimed to have been sunk by a Government vessel in February 1929, over 7 years ago. The amount of the claim is now $20,000. It appears that this old ship was built in 1893 and was sold by the United States Lighthouse Service to the alleged vendee of the claimant for $2,500. The committee report, while admitting that the purchaser of the vessel from the Lighthouse Service paid only a small sum for the ship, states "There is nothing to show that he did not make repairs before he sold it." It may also be stated that there is nothing to show that he did make any repairs. There seems to be much confusion as to ownership and

value of this old crate at the time it was sunk and it is significant to note that the alleged owners have never pursued their remedies, if any they had, in a court of competent jurisdiction capable of hearing both sides, of viewing the witnesses, and of submitting them to cross examination by the opposing counsel. Neither is it shown that any attempt was ever made to minimize the damages by salvage operations. In this connection attention is invited to that part of the memorandum of the general counsel, Inland Waterways Corporation, dated April 20, 1934, as follows:

Our claim department, shortly after the sinking, advised the Mississippi Barge Corporation that we denied any liability.

Liability on the part of either the Government or the Inland Waterways Corporation, whichever may be considered to have been the owner of the towboat *Natchez*, is by no means certain under the law.

Even if liability exists it would be manifestly unjust to pay the Mississippi Barge Corporation and disregard the rights of the other claimants of interest.

It should be noted that the owners made no attempts to minimize their damage by salvaging the boat. On the contrary, they abandoned it as a wreck.

The Suits in Admiralty Act would apply to this case. Under its terms the owners were afforded abundant time in which to ascertain their damage, make claim against the Inland Waterways Corporation, and sue either the Corporation or the towboat *Natchez*. This time has now expired, and it is doubtful if any court would now entertain jurisdiction of such a claim either against the United States or Corporation or the towboat *Natchez*.

TITLE IX—H. R. 6273—J. H. KNOTT

The only report of the facts in this case is that of the Navy Department quoted from a report of the driver of the Navy automobile, from which it may be concluded that the victim of the accident negligently walked into the path of the moving machine. The Government's driver appears to have voluntarily paid from his personal funds the medical expense incurred, and the undisputed evidence shows that the truck was moving slowly, the chauffeur sounding his horn, and that, due to the pedestrian shielding his face from the rain and wind, he walked into its path.

There appearing no negligence attributable to the driver, authorization of payment of this claim by the Congress must be on the theory that the Government is an insurer against injury to those who walk the streets where its vehicles are driven.

TITLE X—S. 427—AUTHORIZING THE REIMBURSEMENT OF EDWARD B. WHEELER AND THE STATE INVESTMENT CO. FOR THE LOSS OF CERTAIN LANDS IN THE MORA GRANT, NEW MEXICO

S. 427 passed the House May 5, 1936.

H. R. 12323 (OMNIBUS)

TITLE I—H. R. 2415—FOR THE RELIEF OF STANDARD OIL CO. FOR LOSSES SUSTAINED BY PAYMENT OF DISCRIMINATORY EXCESS TONNAGE TAXES AND LIGHT MONEYS

This bill involves $60,283. In going over the report I found the Court of Claims held that the taxes imposed were legally assessed and collected. Despite this decision I found a letter from the Secretary of Commerce in the committee report directly in contrast to that of the Attorney General. I immediately wrote the Secretary of Commerce requesting an explanation. I also talked to the Solicitor of the Department, who said the matter had never been called to his attention.

For the information of Members I submit a letter received from the Secretary of Commerce.

DEPARTMENT OF COMMERCE,
OFFICE OF THE SECRETARY,
Washington, April 22, 1936.

Hon. JOHN J. COCHRAN,
Chairman, Committee on Expenditures in Executive Departments, House of Representatives, Washington, D. C.

MY DEAR MR. CHAIRMAN: I have your letter of the 18th instant, calling my attention to a conflict between my letter of June 10, 1935, with reference to H. R. 2415, a bill for the relief of the Standard Oil Co., and a communication of the Attorney General dated July 1, 1935, on the same subject.

In my letter of June 10, 1935, it was said in part:

"Immediately after the closing of the World War hostilities, there were collected by collectors of customs, acting under orders of this Department, from the vessels of the Standard Oil Co. penal taxes under sections 4219 and 4225 of the Revised Statutes, inasmuch as it was considered that the commercial treaty between Germany and the United States had been suspended or abrogated by the war, in which case the said penal taxes would be incurred.

"The Standard Oil. Co., however, brought action against the Government on the ground that the collection of these penal taxes was not in accordance with the law. The Government defended the case and the decision of the court was against the Government.

"Inasmuch as under the decision of the court the above collection was erroneous, it appears to the Bureau of Navigation and Steamboat Inspection that the Department should not object to the payment of the sum found due the Standard Oil Co."

These statements are incorrect and are based upon a misconception of the decision of the Court of Claims dated May 13, 1933 (77 Ct. Cls. 206), formed by officials of the Bureau of Navigation and Steamboat Inspection who made the preparatory study for the letter of June 10, 1935.

As is stated in the letter of the Attorney General above referred to, the Standard Oil Co. of New Jersey brought suit in the Court of Claims for refund of tonnage duties and light money collected on certain vessels under the provisions of sections 4219 and 4225, Revised Statutes, respectively (U. S. C., title 46, secs. 121, 128). The Court of Claims decided that the moneys collected from the Standard Oil Co. under the provisions had been lawfully collected and that, therefore, the claim of the Standard Oil Co. had no merit. It is therefore felt that, since the Standard Oil Co. has had its day in court and the determination of its claim on the merits, there is no reason for extending legislative relief which would in effect be a refund of the aforementioned collections.

I regret the error and the resultant confusion arising in this matter. I am addressing a letter under the same date to the chairman of the Committee on Claims, House of Representatives, calling his attention to this matter and requesting his approval for the withdrawal of my letter of June 10, 1935.

Sincerely yours,

DANIEL C. ROPER,
Secretary of Commerce.

In view of the letter of the Secretary of Commerce as well as the report of the Attorney General, I feel the committee should ask that the title be stricken from the bill.

There can be no doubt but that the favorable letter from the Secretary of Commerce resulted in the favorable report on the bill.

Further, let me say it seems only proper that the legal division and not the officials of a bureau should prepare a statement of facts in cases of this character. This, I feel confident, will be done by the Department of Commerce in the future.

TITLE II—H. R. 4789—COAST FIR AND CEDAR PRODUCTS CO., INC.

This title covers a case where the contractor asserts a claim for payment for cross ties claimed to have been shipped under a contract dated April 18, 1928, with the Bureau of Reclamation, Department of the Interior. The cross ties—five carloads—as a matter of fact, were in excess of the amount required to be furnished; the Government had no use for them; they were placed upon a railroad siding for disposition by the contractor; the contractor was promptly notified, and subsequently he sold some of this excess to other parties. Both the Department of the Interior and the Comptroller General of the United States have reported adversely on the merits, and the claimant has tacitly admitted the correctness of these reports by never having pursued his remedy in the Court of Claims, where a judicial determination of his rights could have been obtained. The excess shipment of cross ties, for which payment is now sought from the Government, appears to have resulted primarily from erroneous calculations or estimates by the contractor and his subcontractors for which the Government was in no way responsible.

TITLE VIII—S. 373—CONFERRING JURISDICTION UPON THE COURT OF CLAIMS TO HEAR, DETERMINE, AND RENDER JUDGMENT ON THE CLAIM OF ROBERT A. WATSON

This claimant was dealing in the sugar market for the primary purpose of realizing a profit from the transactions and his chief concern appears to have revolved around the possible effect of the Lever Act, upon the profit believed to be necessary in order to meet the risks involved and the necessary financing. Due to an unforeseen break in the price of sugar, the contemplated profits of the claimant apparently were not realized, and it is the purpose of the title to permit suit to be instituted in the Court of Claims for the damage or loss sustained. The financial institutions with which credit apparently was established by Mr. Watson to purchase the sugar took the same chances as any other person in buying with the object of selling their commodities at a profit, and when unforeseeable losses are incurred, such losses properly should fall upon them and not upon the taxpayers of the country.

TITLE IX—S. 1960—FOR THE RELIEF OF THE FLORIDA NATIONAL BANK & TRUST CO., A NATIONAL BANKING CORPORATION, AS SUCCESSOR TRUSTEE FOR THE ESTATE OF PHILIP ULLENDORF, DECEASED

This bill sets aside the statute of limitations and delegates the Commissioner of Internal Revenue to consider a claim for refund of inheritance taxes. The President has time and again vetoed such bills. Why send him another that will meet a similar fate. The Treasury Department strongly opposes passage of the bill.

WILL THE PEOPLE, WITHOUT MONEY, MAKE THIS GOVERNMENT RESPOND TO THE GREATEST GOOD TO THE GREATEST NUMBER?

Mr. BURDICK. Mr. Speaker, poor people, without money, and in some form of distress, have quite given up hope of ever seeing an administration that will respond to the greatest good to the greatest number. I desire to register a protest against this belief. Under our form of Government the people can, every 2 years, get control of their Government. No new national party need be organized. Everything is set, as it is, to gain control of the Government. Every 2 years every Congressman in Washington must be elected. Every 2 years, therefore, the way is open to the people of this country to elect a new Congress. Forty-eight different methods can be employed, or as many methods as there are States.

It would not be possible to elect a President, because that is not a part of our machinery of elections. A President is not elected by popular vote, although he should be. It takes a national party—or, rather, a Nation-wide party—to elect a President. But the President can do nothing, except hand out jobs, without the backing of Congress. If we had a Congress with backbone that would lay down the law to the President, he would have to follow the law. Unfortunately, in this country the custom has grown up that the President directs Congress. Today that is really so, but there is absolutely no need for it. Congress could write the laws, and the President would have to execute them or be subject to impeachment.

In the election of Congressmen, each State can do that job without a national party. All that is necessary is that the people demand that these men stand for a principle above party ties. When they have candidates of this type, elect them. Elect them in every State, or as many States as possible. When Congress convenes it would then be composed of men and women who were elected to office on principle rather than party. That Congress would then be independent—the President would count in his own department, but only in that department. Congress would write the laws. They would write the laws which the people demanded. Under this kind of operation, it would not make a great deal of difference, outside of jobs, who was President. No matter who it was, he could not override the wishes of the people, for the Congress would actually be the representative of the people.

The chance to control legislation is within reach of the people. Party banners are not what is needed—it is education on the part of the people to understand and appreciate, and grasp the opportunities of government which they have always had. This will take place some day—maybe in the coming election; maybe not. But if this Government is to endure, that very thing must happen. When it does, the whole Nation will not be prostrated because there is a Presidential election. Things will be normal and the Presidents under this exercise of government will be servants of the people and not the masters of Congress.

On the roll call to discharge the Rules Committee on the Frazier-Lemke farm refinance bill there were 220 votes for it and 153 against. To this must be added the paired votes. On pairs for there were 10 votes and 10 votes against. This would make the actual vote as follows: 230 for and 163 against. Of this vote of 230 for, they came from the following sources: Seven Progressives of Wisconsin, or 100 percent of that membership; 3 Farmer-Laborites from Minnesota, or 100 percent of that membership; 2 nonpartisan Republicans from North Dakota, or 100 percent of that membership; 169 Democrats, or 53 percent of that membership; 49 Republicans, or 49 percent of the membership.

On the roll call on the final passage of the bill the vote stood: For the bill, 142; against the bill, 235. To this vote must be added the following pairs: 10 for and 10 against, making the actual vote 152 for and 245 against. These votes for the bill came from the following sources: 7 Progressives (Wisconsin) or 100 percent of that membership; 3 Farmer-Laborites (Minnesota) or 100 percent of that membership; 2 nonpartisan Republicans (North Dakota) or 100 percent of that membership; 28 Republicans, or 28 percent of that membership; 113 Democrats, or 35 percent of that membership.

Those entitled to the most credit for this courageous vote are the Democrats. With the administration and the leaders of the House appealing to everything known in politics, yet 35 percent of them stuck to their principles.

The Wisconsin Progressives, the Farmer-Laborites, and the nonpartisan Republicans do not deserve so much credit, because they always vote for the people—always. They were elected to do that and they never fail. There is no administration to browbeat them; no Jim Farley to threaten their defeat at home; there are no political appointments at stake.

The 28 Republicans deserve great credit for their independence. The leaders were against the measure—the Republican press was against the measure—the measure itself was a blow at "special privilege", which the national Republican Party has supported, and will support again if the reactionary element controls the Cleveland convention.

Of those who voted to give the bill a hearing, the following deserted the cause on the final roll call: None of the Progressives (Wisconsin); none of the Farmer-Laborites (Minnesota); none of the nonpartisan Republicans (North Dakota); 56 Democrats, or 33 percent of those who voted to give the bill a hearing; 27 Republicans, or 49 percent of those who voted to give the bill a hearing.

From these figures the percentage of progressiveism among the Democrats is still higher than the percentage of progressiveism among the Republicans—merely a 7-percent difference in favor of the Democrats.

Another thing definitely established is this: That on the vital question before Congress, that of the people on one side and the organized money power on the other, that both the Democratic and Republican Parties can be thoroughly trusted. Sixty-five percent of the Democratic membership voted against the people and in favor of continuing the reign of organized wealth, while the Republicans went them one better, and 75 percent of the membership voted against the people.

Here is what the question was before the House on this bill as told by Thomas Jefferson, Abraham Lincoln, and Salmon P. Chase:

Capital primarily did not exist except as natural resources and when labor was applied to natural resources it brought capital. Hence labor was previous to capital and entitled to first consideration.—(Lincoln.)

BANKS MORE DANGEROUS THAN STANDING ARMIES

I believe that banking institutions are more dangerous to our liberties than standing armies. Already they have raised a money aristocracy that has set the Government at defiance. The issuing power should be taken from the banks and restored to the Government and the people to whom it properly belongs.—(Thomas Jefferson.)

My agency in procuring the passage of the National Bank Act was the greatest financial mistake of my life. It has built up a monopoly that offsets every interest in the country. It should be repealed. But before this can be accomplished the people will be arrayed on one side and the banks on the other in a contest such as we have never seen before in this country.—(Salmon P. Chase, Secretary of the Treasury under President Lincoln.)

I see in the near future a crisis arising which unnerves me and causes me to tremble for the safety of my country. The money power of the country will endeavor to prolong its reign by working upon the prejudices of the people until the wealth is aggregated in a few hands and the Republic is destroyed. I feel at this time more anxious for my country than even in the midst of war.—(Lincoln.)

On this basis and as between the Democratic and the Republican Party, the people have little to choose between. The fight on this bill demonstrates one thing definitely and finally, and that is: If the people ever win their fight against the power of the Banking Trust, they must break the shackels that bind them to a party name and vote for Members of Congress who stand for principle. That is the way the following Members reached Congress: Seven Progressives from Wisconsin found their way into Congress; three Farmer-Laborites from Minnesota found their way into Congress; two nonpartisan Republicans of North Dakota found their way into Congress.

Once in Congress these 12 Members were united on every major matter before Congress. That is the way some hundred Democrats got into Congress. Their people sent them here on a question of principle. When in Congress those 113 Democrats never fail to support the people on all major issues. Twenty-eight Republicans in Congress stand with the people always; they cannot be subdued by the party lash.

If the 12 Progressives had waited until there was organized a National Progressive Party, they would not be in Congress today.

While each State is engaged in the process of electing its Congressmen, there is nothing in the way to prevent those States from supporting a Nation-wide liberal movement, which eventually could name the President of the United States. In this way the plain people of the United States could secure complete control of their Government. It is now up to the people of the United States to keep in Congress the 142 Members who are now here and ready to carry on the fight for the people; it is up to the people in every State to make sure at the coming November election that those who have voted against the people be left at home and replace them by men and women who will stand up and be counted for the people.

It will take some time to make New York, Massachusetts, Connecticut, Virginia, and the rest of the original Southern States Progressive, but that day will surely come. It cannot be that the people in all of these States are set against Progressive principles. The gospel must be spread, and it will be up to these 142 Members of Congress to carry the brunt of this work into every State in the Union. Old reliable Pennsylvania is already breaking away from party rule. New Jersey, Mississippi, Louisiana, Texas, Oklahoma, Missouri, Kansas, Nebraska, Colorado, and the Pacific Slope States, the old Southwest, Ohio, Maryland, all show signs of independence. The majority of the voters in the United States are ready for independent voting. All the people need is to know the record made by their enemies in both the Democratic and the Republican Parties.

A TRIBUTE TO THE GREAT ARMY OF POST-OFFICE EMPLOYEES—THEIR LABOR EXEMPLIFIES LOYAL PUBLIC SERVICE—REMARKABLE EFFICIENCY OF THIS DEPARTMENT IS ATTRIBUTABLE TO THE QUALITY OF THEIR WORK AND THEIR EXCELLENT RELATIONS WITH THEIR SUPERIORS

Mr. CITRON. Mr. Speaker, the Post Office Service is more than a remarkable business; it is a great public institution. All of us know its success in the dispatch of the mails. We accept its value to the Nation but very few of us take particular note of the importance of the personnel in the orderly functioning of this Department.

These men and women employees do not need any praise from me. Their work and accomplishments speak for themselves. However, when I recently had occasion to see how efficiently they performed their duties in the flooded areas of my State during an emergency and overcame obstacles caused by swollen rivers, I realized to a greater degree the value of such service to the country. My observations inspired me to look further into the matter and to make these remarks.

Their loyalty and devotion to their work, their undeniable efficiency, and their spirit of helpfulness in relation to the people they serve and to their superiors, is highly commendable. It has made the Post Office Department the greatest business organization in this country.

Postal employees are not automatons. They receive a thorough training, and display that skill necessary to accomplish their work with maximum speed and accuracy. Only human beings can read and write, and no machinery could substitute for them.

Whether it be the substitute or the special carrier, the clerk working in the office or on the railway, whether it be the carrier in the city or village, or the rural- or star-route carrier, all perform their allotted duties ably and unobstrusively.

They are organized, and by means of their organizations have improved themselves and the Service. I believe the example they set in their relations with each other and with their superiors might well be studied by other industries and emulated, to the improvement of the economic and industrial life of our Nation, in order to effect better relations between labor and employers.

Of course, Mr. Speaker, such a remarkable state of affairs was not produced overnight. It is founded on traditions, and an enterprise such as this, which has grown with the country since the beginning of our Republic, necessarily becomes imbued with fine traditions.

Much of the successful operation of the Postal Service by its employees can be attributed to the civil service. In my opinion, the civil service should be extended in the most reasonable manner and wherever feasible. It strengthens the loyalty, sense of responsibility, and morale of the men and women who come under its jurisdiction.

Last year I voted for the restoration of the pay cuts of these men and women. I also voted for the institution of the 40-hour week in place of the 44-hour week, and I am glad I was afforded an opportunity to do this. Congress was justified in passing this legislation.

I am informed that 95 percent of the efficiency and success of the Postal Service is due to the human element. The work of postal employees combines both physical and mental ability, and in no business is the human factor so important as this one, where machinery cannot replace men.

I am also informed that the studies of experts disclose that the average postal worker produces three times as much revenue now as he did in 1913. In enacting legislation for the restoration of pay cuts and the establishment of a 40-hour week, Congress showed its recognition of the contribution of postal employees, and furthermore improved their morale, a matter of importance and benefit to the entire country. In this connection, private industry might also benefit from the example of the Government in recognizing the right of these workers to share in the profits resulting from their improved efficiency. We hear much of the need of increased purchasing power. This always follows where we effect a more just distribution of the benefits resulting from improved efficiency and productivity. And whenever we recognize this principle of fundamental justice, we find production and the number of producers increased and unemployment due to improved machinery and increased skill of operators, decreased.

Show me a person in our whole country who does not trust his message to the mails. In the heat and sandstorms of the South, and in the cold and snow of the North, men are daily treading streets and routes, delivering letters and packages to their destination. The sight is commonplace, and therefore we rarely think of the many coordinated units which go to make up this smoothly running public institution. Only when we particularly look into it do we recognize the true worth of the thousands of Post Office employees and the valuable service they are rendering our country.

THE CAUSE AND CURE OF WAR AND POVERTY

Mr. ECKERT. Mr. Speaker, in the confused and bewildered world of today there are two outstanding problems about which many Americans are deeply concerned. One is the problem of war, the other economic security. War has disturbed the happiness of the human race from time immemorial, and economic security has been a delusion and a snare. Those of our generation thought these two problems were settled and solved. At the turn of the century it was freely predicted that there would be no more war, and

as late as 1929 economists and statesmen gave assurance that prosperity was permanent; that we were living in a new era; that poverty was all but banished from the earth. Since these pleasant prophecies of peace and plenty, we have witnessed the greatest war of all time and experienced the most widespread and devastating depression of all the years of our national existence. The prophets were in error. Neither the problem of war nor the problem of poverty is settled or solved.

Inasmuch as the problem of war remains unsettled, even after our participation in a war to end war, the Congress of the United States is confronted with the task of providing a military establishment adequate for the defense of the Nation. There is a wide difference of opinion as to the necessary strength of the land and sea forces for adequate defense, while others question the good faith of the Government's professions in regard to her military preparedness, charging that the United States, in common with many of the leading Nations of the earth, is thinking in terms of aggression as well as defense.

Be that as it may, the fact remains that the world is still war minded, and as long as this mental condition obtains, there can be no peace and cessation of preparation for war. This is a fact accepted by all practical men and women, whether they be militarists or pacifists. As long as the world psychology is what it is today, no nation on earth will adopt the policy of unpreparedness. Whether we like it or not, the leading nations of the earth will continue to place upon the backs of the people the ugly and heavy burdens incident to preparation for war. The only question upon which there is a difference of opinion is as to how and to what extent war preparation shall be prosecuted.

The prevailing thought demands extensive preparation, and so we find that, in spite of the many woes of the average citizen, he still cries out for a large Navy and an adequate Army. This, of course, means a tremendous draft on the Treasury of the United States, as is amply testified by the Navy appropriation bill and the accompanying Army bill. Although the distress and tax burdens of the people are rapidly becoming unbearable, predictions are common that another major war is imminent and that such a war would plunge the world into an era of darkness and destruction. The distress and burdens of the people, the misery and demoralization of war, together with the suggestion of a return to semibarbarism in the event of another major war, are impelling earnest men and women in all walks of life to search for a solution not only for the age-old problem of war but of poverty as well.

The two problems, war and poverty, persist in their onward march and stubbornly refuse to yield to any of the nostrums and remedies proposed. Why this persistency? Can there be no solution? Are the problems too difficult for the human mind to fathom? In many lines of human endeavor man has demonstrated a high order of mental genius—so much so that in our modern world of invention many achievements seem weird and uncanny. In the light of man's progress in the various spheres of science, why such abject failure and defeat in social science?

There can be only one answer. In the physical sciences man seeks to discover and follow natural law. Not so in the social sciences. Here, with an abandon that is disconcerting, he flounders and fumbles and makes confusion worse confounded. In the light of our past experience, why not follow the example of the true scientist and seek the root cause of war and poverty? It is only by doing this that we may hope to find the true answer.

WHAT IS THE CAUSE OF WAR?

Wars are not waged for pleasure. There is a real, definite reason why war persists.

Why are men ready to fly at each other's throats and defy and violate every instinct of civilized behavior?

The war in Africa, the recent war in China, the fear of war that is disturbing the foreign offices of the leading nations of the world are due to reasons that are not far to seek. Charles O'Connor Hennessy, of New York, in a recent address, said:

> Men may cry "Peace! Peace!" but there can be no lasting peace until the root causes of war are recognized and removed; until the peoples may be led to accept a new and simple philosophy of human relationships—that of equal rights for all, freedom for all, justice for all. Political peace and economic war are irreconcilable. There can be no political peace at home or abroad unless it is founded upon cooperation in freedom and mutual friendship and respect.
>
> We propose to end the curse of war, with all its barbarities and brutalities and its grievous burdens upon the backs of the workers of the world, by leading nations to recognize and remove the true causes of international contention and strife. These have their roots not alone in hostile tariffs and the struggle for markets but in the economic imperialism which exploits the natural resources of distant and undeveloped lands for the enrichment of favored groups of capitalists at home.

Since the World War many laudable efforts have been put forth and machinery was set up in the hope of arresting the war madness of the world. There is the League of Nations, the World Court, the Kellogg treaties outlawing war, and many other measures designed to prevent war; yet, in spite of it all, the war spirit is still acute, and all attempts to stem the onward tide of aggressive armies in the Orient and the far-off regions of Africa have been in vain, while rumors of wars more devastating and terrible than any yet recorded fill the ears of men everywhere. There can be no political peace so long as great and valuable economic prizes can be obtained by the arts of corrupt, selfish, or ignorant governments. The true basis of both political and economic peace can only spring from a condition of social justice—a condition that abhors any and every form of privilege, which implies, of course, an economic order based upon the doctrine of equal rights for all, freedom for all, justice for all.

War and rumors of war still continue, and so with the problem of poverty. It, too, persists and remains unsolved. As with the problem of war, there are those who are seeking remedies for its solution. But all in vain. There seem to be insurmountable difficulties. So far both the problem of war and the problem of poverty have eluded the wit and genius of man. Wherever we chance to look, there is confusion and bewilderment. Is there any doubt about the facts pointed out by Mr. Hennessy? The way to peace, this thinker and economist declares, is for the people to accept a new and simple philosophy of human relationships—that of equal rights for all, special privileges for none. And how nicely this matches the doctrine proclaimed by the founders of the American Republic. Our great charter of liberty, the Declaration of Independence, breathes the very soul of this simple philosophy. Those who long for peace, those who would labor for peace, will find their hope for peace not in large armies and formidable navies, but in the deep philosophy of Him who bade men to love one another and the truths contained in the Declaration of Independence. Man's thoughts must be turned away from the doctrine of force and conflict to the doctrine of good will, natural rights, and social justice. It is only in this way that war may be outlawed and peace achieved. The problem of war must first be resolved and settled in the minds of men before any lasting peace can be established. Until this is achieved, the mad race for armaments will continue, and tremendous sums of the taxpayers' money will be spent annually for war and preparation for war.

And why poverty? It likewise has its roots in the absurdities of our economic order. Mr. Theunis, president of the Economic Conference of the League of Nations, called together a few years ago and attended by representatives of 51 countries to find the cause of war and industrial depressions, said:

> The main trouble now is neither in any natural shortage of the resources of nature nor any inadequacy in man's power to exploit them. It is all in one form or another a maladjustment, not in an insufficient productive capacity, but a series of impediments to the full utilization of that capacity.

Since both war and poverty have a common cause—a cause inherent in our economic structure, perhaps by answering the question, "Why poverty?" we will kill two birds

with one stone. A brief survey of the fruits of our disordered economic system reveals the extent to which the people have been reduced in the scale of poverty. The Brookings Institution of Washington, D. C., reports that 71 percent of the American people in 1929—at a time when incomes were at the highest point in the years of our so-called prosperity—received only enough of the products of their toil that enabled them barely to exist. The discovery of the Brookings Institution is not surprising. It is a fact known to everyone who stops to think. The question naturally arises, "Why this condition in a land of plenty?" The answer is found in Mr. Theunis's statement, that it is all in one form or another a maladjustment of our economic order.

And wherein lies this maladjustment? Many are of the belief that our money structure is at fault. Others contend that the machine is the culprit; while still others maintain that our productive process is too abundant; and so ad infinitum.

In the midst of this confusion of thought, let us call for counsel and light, Thomas Jefferson, the author of the Declaration of Independence, founder of the Democratic Party, and one of the world's great politico-social philosophers. Mr. Jefferson, in 1785, was stationed in France as Minister Plenipotentiary of the United States. This was Jefferson's first visit abroad. Before reaching foreign shores, Jefferson, in common with the great body of his countrymen, knew little or nothing about poverty. In the new America, every able-bodied and willing worker was employed. Here economic opportunities were open to all on equal terms, and none were so rich as to invite envy, and none so poor as to demand charity. Everyone was prosperous in proportion to his thrift, ability, and application. Not so in France. There Jefferson found the problem of unemployment and poverty in all its ugliness and despair—and this before the advent of the so-called machine age or the rise of the House of Morgan or the doctrine of economic abundance. Why then the problem of unemployment and poverty in all its horridness and magnitude similar to the problem now confronting the American Nation? Let the story be told in Jefferson's own words. In 1782, a few years before his first trip abroad, Jefferson, in answer to a letter from a friend in France inquiring about economic conditions in America, wrote:

> From Savannah to Portsmouth you will seldom meet a beggar. In the largest towns indeed they sometimes present themselves. They are usually foreigners who have never attained a settlement in any parish. I never yet saw a native American begging in the streets or highways.

As late as 1814 Jefferson wrote Thomas Cooper:

> The old and crippled among us who possess nothing and have no families to take care of them being too few to merit notice as a separate section of society.

As soon, however, as Jefferson set foot in France he saw the real thing in poverty. After a year's residence he wrote to an American correspondent, saying:

> Of 20 millions of people supposed to be in France, I am of the opinion there are 19 million more wretched, more accursed in every circumstance of human existence than the most conspicuously wretched individual of the whole United States.

And observed that the land of France was concentrated in a very few hands, and that the people had been expropriated from the land and huddled in cities and towns. The streets and highways were filled with beggars, which to Jefferson was a new and distressing aspect in human society. This impelled Jefferson to ask:

> What could be the reason that so many should be permitted to beg who are willing to work, in a country where there is a very considerable proportion of uncultivated lands?

and answered by saying:

> Whenever there is in any country uncultivated lands and unemployed poor, it is clear that the laws of property have been so far extended as to violate natural rights. The earth is given as a common stock for man to labor and live on.

The distress and poverty of the French people were so amazing that he, in a letter to Monroe, exclaimed:

> My God! How little do my countrymen know what precious blessings they are in possession of and which no other people on earth enjoy! I confess I had no idea of it myself.

The testimony of Jefferson, depicting in dramatic fashion the economic condition of the people of France as compared with the people of his own country, emphasizes the fact that the people of France were expropriated from the land, while in America there was no end of accessible land on equal terms to all. The conditions in France filled the land with beggars and mendicants and untold millions of wretched men and women, while in America there was neither poverty nor mendicancy.

The account of France's misery and woe and America's blessings and good fortune in the days of Jefferson points the way for the answer to the enigma of our time. Today the economic conditions in America are not unlike the conditions prevailing in France immediately preceding the French Revolution. In France property had been concentrated in a few hands. The major portion of the land of the country was in the possession of the nobility and the church, while the masses of the people were economically dependent upon the few who controlled the economic resources of the Nation. In America today the wealth is in the hands of the few. The natural resources—the wide open spaces of our western domain—are no longer free, and the masses of our people, as in France 150 years ago, are economically dependent upon the few who control the economic resources of America. We today have our beggars and mendicants, and millions of poor and wretched men and women. France had her social eruptions. We today are menaced with dire forebodings, and no one can tell whether or not America will escape her share of the world's civil commotions and eruptions.

A century and a half ago the economic condition of the two countries was vastly different, the one struggling with the problem of poverty and social insecurity; the other enjoyed plenty and social stability. Today the picture is different. The story of Jefferson is quite illuminating and suggests the answer to the question why a free, independent, and self-reliant people have been reduced to a condition of social insecurity and economic servitude.

Mr. Theunis calls attention to the fact that maladjustments in our economic order are the cause of war and industrial depressions. Wherein lies the maladjustment?

Jefferson observed that the earth is given as a common stock for man to labor and live on, and it might not be amiss to remind ourselves that here in America, as in France a century and a half ago, the laws of property have been so far extended as to violate natural rights. And again let us be reminded that in France during the hectic days of the Revolution, the National Assembly of France declared that ignorance, neglect, or contempt of human rights are the sole causes of public misfortunes and corruption of government. France, as a result of her delinquency, had her Revolution. America, like her sister Republic, has been blind and neglectful of the first duty of government.

We prate about natural rights, about the right to life, liberty, and the pursuit of happiness, and yet we have so far forgotten the primary function of government—which is to secure the people in the enjoyment of their natural rights—that millions of our fellow citizens, for all intents and purposes, are disinherited and strangers in the land of their birth. Herein lies the fundamental maladjustment, and thus our economic structure is set for the few to exploit the many, resulting, of course, in the few being inordinately rich and the many abjectly poor.

Those who seek to prevent war and abolish involuntary poverty have but one course to pursue if they wish to achieve their ends. War and poverty have their root causes in the maladjustment of our economic order. The impediments that stand in the way to the full utilization of the earth on which we live must be removed so that labor and industry may have unrestricted access to the resources of Nature and unimpeded exchange among all the peoples of the world. When this happy condition shall come to pass, then

and not until then, may we hope to enjoy the blessings of abundance and peace.

AGRICULTURE IN HAWAII

Mr. KING. Mr. Speaker, under the leave to extend my remarks in the RECORD I submit the following information about the agricultural industries of the Territory of Hawaii, pertinent to the discussion of H. R. 2066, the so-called Frazier-Lemke bill.

The Territory of Hawaii is predominantly an agricultural community, dependent upon the products of its soil for the livelihood of its people and for the maintenance of its position as an important element in the domestic economy of the United States.

The United States census of 1930 shows that 58 percent of the Territory's total population of 368,336 live in rural districts and that 40 percent of all persons gainfully employed are directly engaged in the agricultural work of its 5,955 farms.

The islands which comprise the Territory of Hawaii are of volcanic origin and are devoid of minerals, metals, and fuels suitable for industrial use. Hence, except for the commercial activity made possible by its strategic location in the lines of ocean transportation in the Pacific, its farm products are the sole basis of its economic life.

The agriculture of the Territory covers the range from small farms operated in part for the subsistence of the farmer and his family and in part for the local supply of foodstuffs through the scale of the larger farming units for the commercial production of rice, bananas, coffee, pineapples, and sugar.

Ranching and the production of meat and dairy products supply a considerable part of the local consumption of these commodities and are related to agriculture in importance to Hawaii.

The production of foodstuffs locally in sufficient amount and diversity to supply the needs of the civilian population and military forces in the Territory in the event of an emergency is an important factor in the national defense. For example, during the World War the Territory of Hawaii was asked by the Federal Government to grow, as far as possible, its own foodstuffs, thus avoiding the diversion of food products from other parts of the country and also to maintain maximum production of sugar in order to supply as much as possible of this essential commodity for the national purposes.

Agricultural enterprises in Hawaii and agencies of the Territorial and Federal Government carry on numerous activities, both individually and cooperatively, designed to promote diversified farming, especially in the production of foods for local consumption, in those sections which are suitable for such farming. The United States Department of Agriculture in cooperation with the University of Hawaii, through the Extension Service, the Hawaii Agricultural Experiment Station, and in the field of education, carry on work which is of great benefit to agriculture in general in the Territory, and especially to small farmers. The Hawaiian Sugar Planters' Association, an agricultural cooperative composed of those engaged in the production of sugar, the major farm crop of the Territory, takes part in this work through its own experiment station and otherwise. The Agricultural Adjustment Administration, under the provisions of the Jones-Costigan Act and the Agricultural Adjustment Act, has sponsored a number of projects for the benefit of agriculture generally.

The Territory of Hawaii, aside from its natural beauties of sea, plains, valleys, and mountains, the beneficence of its climate, and the hospitality of its people, is best known for its production of sugar and pineapples, which are the basis of its commerce in the interchange of goods with other parts of the United States. However, I have dwelt at some length on other types of farming in order to acquaint those not familiar with our local situation with these phases of our agricultural life.

The important commercial crops of sugarcane and pineapples are produced by larger-scale farming because of essential features inherent in the agricultural work of growing these crops under the conditions of terrain and natural environment in the parts of the Territory where these crops can successfully be produced. There is no conflict of interest between these larger farming enterprises and the other types of farming previously described, because the localities for which each is suited overlap to only a very slight extent.

The commercial farming of sugarcane and manufacture of sugar began in Hawaii on a small scale a little over a century ago. There has been a gradual and sound development from that small beginning to the present-day status of productive capacity. Two-thirds of the sugar produced annually in Hawaii is manufactured from sugarcane grown under irrigation in arid sections. The green, fertile cane fields which, on each of these farming enterprises, now stretch out for miles around its sugar mill, were before the development and application of irrigation water arid wastes or low-grade cattle range. In their original state these lands supported no agriculture, provided a source of livelihood for very few people, produced little of value, and were the source of small revenues through taxation for the support of government. With the application of irrigation water these lands produce large quantities of essential food, namely, sugar, provide a good livelihood for thousands of persons engaged in the production of sugar and its related activities, and are the source of large taxes for the support of the government. Water development under these conditions and on the required scale entails the expenditure of large amounts of money. It has been done entirely by the private farming enterprises of the sugar industry. Not only has the Government not been asked to spend any money for these developments, but the Territorial government receives a considerable amount of money annually as rents for water rights which it owns.

The producers who grow sugarcane in regions where the rainfall is sufficient had other difficulties of no less magnitude to overcome in developing their farming enterprises.

Of the total of 250,000 acres of land on which sugarcane is grown in Hawaii, about one-half is owned directly by the sugar producers, about one-seventh is under lease from the Territorial government, and the remainder is leased from private owners, most of whom are families of Hawaiian blood.

The sugarcane growers of Hawaii employ in year-round work on their farms and in their sugar mills almost 50,000 persons, whose earnings are considerably above the average for farm workers in other parts of the United States as reported by the Bureau of Agricultural Economics, United States Department of Agriculture.

Sugarcane in Hawaii requires almost 2 years to grow to maturity. The compensation is found in the high yields obtainable in this natural sugarcane-growing section, provided the best farming methods are followed and the soils and other natural resources are conserved. However, this 2-year crop cycle is a dominant factor in the farm economics of sugarcane growers.

A little over 30 years ago pineapples grown in the Territory of Hawaii were shipped to other parts of the United States only as fresh fruit, and were there thought of as a luxury. At the present time millions of cases of delicious and healthful Hawaiian canned pineapple are sold annually. The growing of pineapples is next in size and importance to sugar in the farm crops of the Territory of Hawaii.

Pineapple plants thrive on the higher plains and plateaus in regions of low rainfall. They do not require irrigation. Sugarcane or other farms crops could not be grown successfully on the great majority of the lands devoted to pineapples, and, vice versa, pineapples would do well on only a small part of the lands devoted to other crops. Again, as in the case of sugar, without conflict with the interests of other farm crops, the growing of pineapples by large-scale farming enterprises has transformed unproductive areas into productive farm lands. Those conducting the farming enterprises, their employees, and the community generally have all benefited thereby, and consumers in all parts of the United States have available an excellent food product.

Coffee of fine quality is grown in the Territory of Hawaii, but the sections suitable for its production are limited in area. About 20,000,000 pounds of coffee are produced annually.

The United States Census of 1930 gives the total area of the Territory of Hawaii as 4,100,480 acres, the total number of farms as 5,955, the area under cultivation as 440,579 acres, the area of woodland included in farms as 747,636 acres, and the total area of land of all sorts in farms as 2,815,026 acres.

Approximately 300,000 acres are under cultivation by corporate enterprises which are adequately financed and in a position to obtain additional finances as required. Approximately 140,000 acres comprise small farms operated by homesteaders or others engaged in the production of small crops, foodstuffs, and dairying. There are over 5,000 small farmers in the Territory the average size of whose farms is about 25 acres. Hawaii has been working steadily toward diversifying its agricultural industries and is doing everything within its power to encourage small farming and the raising of food crops. The first necessity is long-time financing at rates of interest that the farmer can pay. There is no Territorial agency to serve this purpose. The Farm Credit Administration has but recently been extended to include Hawaii. So far it has limited itself to short-time chattel mortgages for feed and crop loans. The other facilities of the Farm Credit Administration should be extended to the Territory as soon as possible, so that Hawaii's farmers may have the same opportunity to procure proper financing as the farmer of the mainland. Any legislation designed to lessen the burden of the farmer is needed to the same extent in Hawaii as on the mainland.

The total amount of the farm-mortgage debt in Hawaii is $1,123,570, and the ratio of debt to value of the farms under mortgage is 52.3 percent. The farms under mortgage comprise 30.8 percent of all farms, but almost the whole of this mortgage debt is against the small farmer and is at a rate of interest from 6 percent up. Proper agricultural financing will have more influence than any other single factor in establishing the small farmer on a sound, economic basis.

The islands which form the Territory are mountainous. Much of their land is in rough mountain areas, in most cases covered by forests. It is of the utmost importance to our agriculture and to the general life of the Territory that these mountain forests should be preserved and improved, because of their effects upon conservation of rainfall and upon climate. In the past forests have suffered from dying out of trees, intrusion of cattle, pigs, and goats, and from erosion. For many years the Territorial government has done excellent work in setting aside and fencing forest reserves, reforestation, and the prevention of erosion. The members of the Hawaiian Sugar Planters' Association have contributed both money and work to reforestation. The Federal Government, since the establishment of the Civilian Conservation Corps, has done much good work in our forests. However, much remains to be done, and the importance of preserving and improving our forests and checking the ravages of erosion in our forest areas must always be borne in mind.

The area of farm land in the Territory of Hawaii is limited, due to natural conditions. Agriculture is the economic backbone of Hawaii. The fertility and productivity of our soils is our most valuable natural resource. Our arable lands must be protected against any further diminution in either area or productivity due to erosion. The fertility and productivity of our farm soils must be conserved and improved by proper farming methods. The economic status of our farmers should be maintained at such a level that they are able to practice soil conservation in all of its long-term implications. It is only in this way that the Territory of Hawaii, dependent upon its agricultural resources, can continue to progress in the future as it has in the past.

It is the agriculture of the Territory of Hawaii which enables it to sell annually in other sections of our country, namely, the several States, about $100,000,000 of commodities, and to buy in the continental United States goods and services in the amount of about $90,000,000 a year.

Hawaii became a part of the United States by voluntary action of both countries in 1898, and was incorporated into the United States as a Territory. Since that time it has shared with all the States in every national obligation and burden, pays substantial amounts of taxes into the Federal Treasury upon the same basis as do all the States, asks for no exemptions not equally applicable to all the States of the Union, and asks only that all legislation designed to benefit the people of the States shall be so drawn that it includes on the same basis the Territory of Hawaii as an integral part of our great Nation.

WORK OF THE COMMITTEE ON WAYS AND MEANS

Mr. BUCK. Mr. Speaker, many inquiries have come in to me since my election in January 1935 to membership on the Ways and Means Committee as to the duties of that committee, so I desire to take up these few minutes allotted me in a very brief explanation of the interesting and valuable work that that committee performs.

News writers invariably refer to it as the "powerful" Ways and Means Committee. If that adjective is deserved it is because of the manner in which its members are selected, the continuity of their service—which is not interrupted save by retirement or death—and to the thoroughness with which they consider bills referred to it. Service on this committee is an education as well as an honor. From its ranks have come Speakers of the House, Governors of States, Supreme Court Justices, Vice Presidents and Presidents.

As constituted at the present time it consists of 25 members—18 Democrats and 7 Republicans—being divided in proportion to the party membership of the House. On the Democratic side members of the committee are elected by their Democratic colleagues in caucus, and it is therefore safe to say that every man who is placed on the committee by his fellow Democrats has received the approval of more than half of his colleagues. This approval not only honors him but places upon him a severe responsibility. Under the seniority traditions of the House, once elected to the Ways and Means Committee, a Member will retain his position thereon as long as he is reelected to Congress. Of course, his value there to his constituents becomes increasingly greater with each term of office that he may serve.

The work of the committee concerns the lifeblood of the Federal Government—its revenue. All bills that purport to raise revenue or which affect the bonded debt of the United States are referred to the Ways and Means Committee. It is the oldest committee of the House, having been established at the first session of Congress in 1789. It was made a standing committee in 1802. Originally both the raising and spending of money were considered by it, but since 1865 appropriation bills have been given to the Committee on Appropriations. Certain other legislation involving Government credit, such as that creating the Reconstruction Finance Corporation and other similar organizations, has been given to the Committee on Banking and Currency. Yet the financial support of the United States Government depends on the Ways and Means Committee. Without the measures which it considers and acts upon the Government could not live for 5 minutes.

Its revenue jurisdiction includes not only internal-revenue taxation, such as the income tax, stamp taxes, beer, wine, and liquor taxes, and other excise taxes, but customs duties of all kinds. This tax jurisdiction brings with it collaterally the consideration of many bills which broaden the jurisdiction of the committee materially. For instance, all bills affecting the administrative regulations of the beer, wine, and alcohol industries come before the committee; also, such subjects as transportation of dutiable goods, collection districts, ports of entry, customs unions, antismuggling legislation, and other similar matters fall within the jurisdiction of the committee. California is vitally concerned with all of these questions. As the only Californian on this committee, I have been in a specially advantageous position to safeguard her interests.

The revenue relationships of the United States with the Philippines and Puerto Rico come before it. All subjects relating to the Treasury of the United States and the deposit of the public moneys are within its jurisdiction. Its assent is necessary to laws regulating the classes and amount of the bonded debt of the Government. Legislation affecting the seal

herds of Alaska and other revenue-producing animals of that Territory is under the jurisdiction of this committee. Legislation on narcotics and firearms is also under its jurisdiction.

Because taxation or revenue is involved, often subjects of legislation come before the committee which might at first sight be thought to belong elsewhere. As an example, it was this committee that considered and reported out the Adjusted Compensation Act affecting World War veterans which became law in 1936. The bill setting up planned control of the bituminous-coal industry, commonly called the Guffey coal bill, was referred to and reported from the Ways and Means Committee because it was based on a tax feature. The Social Security Act, one of the greatest and most forward-looking pieces of legislation ever enacted by Congress, was the subject of 4 weeks of open hearings and 7 weeks of executive sessions and study thereafter before it was reported and passed. This act has not had an opportunity to go fully into effect, and many who are now urging other social remedies will be surprised to find just how far this act does go in aiding all classes of the helpless, destitute, and aged. It is by no means a finality—it can be, and probably will be, amended from time to time, but it has gone as far as it is possible to go at the present in setting up social-security standards.

These examples which I have cited will serve to give you some idea of the very broad scope of the committee's activities, and will, perhaps, enable those of you who hear me or read this in print to understand why the committee is referred to as "powerful." The legislation which it considers and controls affects the very heart of the Nation, not merely by controlling the lifeblood of revenue but in all the various correlated activities which spring from association with revenue problems.

Of necessity its members are hard workers, meeting almost daily in sessions to consider bills pending before it. During the Seventy-fourth Congress some 401 House bills, 47 House resolutions, and 9 Senate bills have been referred to this committee. Frequently in the consideration of important legislation it is necessary to hold night sessions as well as to meet during the day.

Democratic members of the Ways and Means Committee have one duty not shared by their Republican colleagues. They act as a committee on committees, and it is their duty to fill any vacancies in the Democratic membership of the other standing committees of the House which may occur. This requires them to exercise to the full the discretion and judgment which their colleagues felt they had when they voted them membership on the Ways and Means Committee.

It has been my privilege as a member of the Ways and Means Committee for the last 2 years to serve under the very able leadership of Hon. ROBERT L. DOUGHTON, of North Carolina, due to whose tact and generalship it has not been necessary since he has been chairman to ask for any special rule for the consideration of a bill reported by the committee. What is even more remarkable is the fact that during this entire period the confidence of the House in Chairman DOUGHTON and the committee has been so great that no amendment to any bill reported by it, other than corrections which the committee itself has made, has been voted by the House.

This legislation has included, since I have been on the committee, besides the bills above referred to, the act establishing the Federal Alcohol Administration, the Antismuggling Act, the railway retirement pension legislation, amendment of the Second Liberty Bond Act, the Liquor Tax Administration Act—which I had the honor of piloting through the House and which contains legislation of great value to California's wine industry—the Revenue Act of 1935, the Treasury Service Reorganization Act, and the Revenue Act of 1936, as well as numerous minor measures.

I am proud of my service on this committee; I am proud of the legislation which I have helped to prepare, and particularly of the Social Security Act. I hope that those who thoughtfully consider the great work that this committee is doing will be equally proud of the part that their Representatives in Congress on this committee are contributing to it.

WHAT IS BEHIND THE PROSECUTION OF CONGRESSMAN JOHN H. HOEPPEL, OF CALIFORNIA?

Mr. BURDICK. Mr. Speaker, it is not an easy role for a Member of this body to stand convicted of a crime while still serving the people who sent that Member to this Congress. That is the present situation in which Congressman JOHN H. HOEPPEL, of California, finds himself today.

No one has presented to the House any of the surrounding facts and circumstances with reference to this conviction, and from all that appears on the surface, this Member of Congress, in the estimation of his political enemies, is unworthy of a seat here; in the estimation of his friends, who do not know the facts, there is expressed sympathy for him; but friends and enemies alike acknowledge the conviction and let the matter rest at that.

If Congressman JOHN H. HOEPPEL did in fact sell an appointment to West Point for the consideration of $1,000, or any amount, I would be the last Member to condone it. At the outset let me say that he has not been convicted of any law violation so far. A jury has found against him, the trial court has denied a motion for a new trial, and the Court of Appeals of the District of Columbia has found against him. Be that as it may, there is no conviction in law until there is a final conviction. Not until this case has been reached by the Supreme Court of the United States and decided adversely to him can there be said to be a conviction. A verdict of guilty is not a conviction.

Until the time there is a final conviction the Congressman, as a matter of right, can participate in the proceedings of the House, but doing so with the facts and circumstances unexplained the situation is embarrassing to the Congressman and to the House itself. For these reasons, and in the interest of fairness, I desire to make the following statements:

Congressman HOEPPEL was elected as a Democrat from the Twelfth California District. I have served with him since my election to the Seventy-fourth Congress. Congressman HOEPPEL was a staunch friend of the Townsend old-age-pension plan, soldier's bonus, the Frazier-Lemke bill, and other progressive measures, and fought the National Economy Act. He clashed with the administration and often took the floor against the plans of his party. He was independent and fearless. Before the first session of the Seventy-fourth Congress had been completed it was apparent that HOEPPEL was not in the good graces of the administration or the leaders in Congress. The first thing that happened to indicate that his independence was not approved was the taking away of his political patronage in the State of California. This was handed over to the junior Senator from that State.

This act of punishment did not deter this Congressman from taking decided issue with the administration leaders.

The next thing that happened was the indictment of Congressman HOEPPEL and his son, charged with conspiracy to violate section 150, title 18, of the United States Code, which reads:

> It shall be unlawful to solicit or receive from anyone whatsoever, either as a political contribution, or for personal emolument, any sum of money or thing of value, whatsoever, in consideration of the promise of support, or use of influence, or for the support or influence of the payee, in behalf of the person paying the money, or any other person, in obtaining an appointive office under the Government of the United States.

It is obvious that a cadet in training at the Military Academy at West Point is not an officer under the Government of the United States. For this reason, no final judgment can be based on a conviction for conspiracy under this section, under the facts in this case. The Government knows that as well as anyone else.

In addition to that, what was the evidence adduced at the trial against this Congressman? The only witness was the intended cadet, who testified that he made all of his arrangements with Charles H. Hoeppel, the son of the Congressman. He had no conversation of any kind with the

Congressman until after the note was given and until after the intended cadet refused to go through with the agreement to pay $1,000 for the appointment. The only testimony in the whole record which, even by insinuation, implicates the Congressman is found on page 51 of the transcript.

CADET. We then had a conversation [with the Congressman]. He said he knew what I was there for. Then he sat down and typed a letter which I read and then realized it was my resignation. It was then we had a conversation. When I read the letter I asked Congressman HOEPPEL, if I couldn't receive the appointment legally. He said, "Well, as long as you don't wish to carry out the agreement, you cannot have the appointment."

This is the only evidence in the whole case that by inference might implicate the Congressman. The evidence of a confederate in the violation of law is the only evidence against the Congressman. No evidence of his demanding a note; no talk between him and the cadet about a note; nothing in the whole record.

Remember, too, that this portion of the cadet's story was denied by the Congressman and by his other son, who was present on the occasion. No other evidence in the case whatever. There is nothing in the whole record indicating the Congressman ever knew anything about the conversation between Charles Hoeppel and the cadet. Not one word.

The law seems well settled that no one can be convicted upon the testimony of an accomplice, unless that testimony is supported by other credible evidence in the case. The record is silent on any corroboration of the cadet's story.

Yet the Congressman was convicted of a conspiracy—an agreement to violate this section of the code.

I have been a public prosecutor for many years, serving both as State's attorney in North Dakota and as assistant United States district attorney for North Dakota. I was also interested in the Congressman, as he was an independent actor in Congress. I read the record of that trial. I know what it contains and I submit here what that record discloses in reference to any connection the Congressman had with the case.

I am absolutely convinced that no final judgment of conviction ever will be entered against Congressman HOEPPEL for the simple reason that there is no competent evidence upon which a final conviction can be based.

In addition to the fact that there is no evidence in the record implicating Congressman HOEPPEL in the actual conspiracy there remains the further fact that this conspiracy must be proved. In Federal court it cannot be guessed at—it cannot be based on conjecture. The agreement must be proved. In this entire record there is absolutely no evidence of any agreement between Congressman HOEPPEL and his son. That evidence is not there. If they had been charged with receiving a bribe, the proof would have to be made. It could not be made for the reason there was no such proof. This particular case will be dismissed, so I am advised, and the "conspiracy case" will stand. The gist of that case is the agreement to violate the law, and nowhere in the whole transcript is there any evidence at all proving any such agreement.

I do not know whether the administration in some roundabout way influenced the proceedings thus far or not, but it does seem peculiar that one who was openly opposed to the administration should be the one who was proceeded against.

In all our history no administration had had such recourse to that special type of criminal prosecution known as indictment for conspiracy as the present one. The administration employed this process in North Dakota, in Louisiana, and was about to use it in Ohio. Ohio has a Governor named Davey, and Harry L. Hopkins was about to ask for one of these "handy indictments" against this Governor because he did not suit Hopkins. The Governor beat him to it and had a warrant issued for Hopkins, so that fight ended in a draw. Harry L. Hopkins, W. P. A. Director, seems to have used the "conspiracy indictment route" as his chief weapon of defense.

I do not know who in the administration was responsible for the Hoeppel indictment, or if anyone was, but the same charge was used against HOEPPEL as was used against the other disturbers.

Hopkins in his frequent calls for indictments "for conspiracy" indicated the perfect earmarks of a dictator. That is what all dictators do. They hush up criticism. He did not go as far as a Hitler or a Stalin, but he went, apparently, toward a course that would destroy his enemies, yet not "summarily purge" society of their presence.

The Supreme Court of the United States exists to protect the liberties of the people. Sometimes their decisions do not suit my fancy, but I will swallow it all before I shall be willing to turn a dictator loose in this country. As our history is now being written, the Supreme Court of the United States is the greatest bulwark for the protection of the liberties of the people of all our institutions of government. Where is the real American citizen who would not prefer the judgment of the Supreme Court to the ignominious intrigues of Harry L. Hopkins?

Mr. Speaker, under our form of government the one thing that distinguishes it from all other forms of government today is its constitutional guaranty of free speech. This one thing—free speech—is not found in Fascist forms nor in the Soviet of Russia. In respect to free speech the one is as bad as the other. In those countries where free speech is attempted, the aftermath is sure to be death to the one who attempts free speech. In this Government the Constitution guarantees free speech. While the original Constitution was silent on the subject, the very first amendment to the Constitution provides:

AMENDMENT NO. 1

Congress shall make no law respecting the establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peacefully to assemble, and to petition the Government for a redress of grievances.

Speaking on the subject of free speech, Thomas Jefferson said:

I have sworn on the altar of God eternal hostility against any form of tyranny over the mind of man. I am for freedom of speech and freedom of the press. I am opposed to silence by force instead of reason, any complaint or criticism, just or unjust, by our people against the Government.

If this case was in fact engineered to put HOEPPEL out of the way and stop his free speech, then I say a great crime has been committed. Just as soon as the American people learn that there is no more free speech, then the days of this Republic can be numbered. If this Hoeppel case is another one of the administration's political purge cases, then we can thank God that there is still a Supreme Court.

VETERANS AND THEIR DEPENDENTS SHOULD CONSIDER THEIR OWN INTERESTS ABOVE PARTY

Mr. HOEPPEL. Mr. Speaker, as a veteran of the Spanish-American War and also the World War, and as a publisher of a national periodical devoted to the interests of veterans and their dependents, I feel competent to present to the Members of Congress and the American people many discriminations which our veterans suffer under the so-called Economy Act.

It is supposed to be an unwritten law of the Congress that a new Member is to remain in the background and permit the old timers to carry on until such time as the new Member has earned his spurs, so to speak. My record in Congress will show that I am not this type of Representative, and no one can keep me silent when the interests of the American people are involved or the welfare of my comrades is at stake.

MEMBER OF PENSION AND WORLD WAR VETERANS' COMMITTEES

I am a member of the Pensions Committee of the House and the second man from the chairmanship. This committee considers all legislation pertaining to veterans and their dependents, except that affecting World War veterans and their dependents. I am also a member of the Committee on World War Veterans' Legislation and thus have been called upon in the past to consider questions pertaining to all of our veterans. I have always evidenced the fullest sympathy for our veterans in their problems and have transmitted such sympathy into action. During my service in

Congress nothing has pleased me more than the opportunity afforded me to assist in securing the restoration of pensions to our Spanish War veterans. When this legislation was under consideration I took the floor on at least eight different occasions to speak in support of this restoration and organized a movement to override, if necessary, the President's anticipated veto of that measure. Fortunately, the veto was not forthcoming and on August 13, 1935, the anniversary of the capture of Manila, I was more than elated to find that the President affixed his signature to H. R. 6995, restoring to my comrades of the Spanish-American War and their dependents the pensions which were so ruthlessly taken from them in the Economy Act of 1933.

It is self-evident that, with my experience as a veteran, my membership on the Pension and World War Veterans' Committees, and my prestige as chairman of an important committee of the Congress, I will be in a position to serve my comrades and their dependents better than would any new Member, inexperienced in congressional affairs, and without my veteran committee assignments. I will be a candidate for renomination on August 25, and I am satisfied that my comrades of the Spanish-American War and World War, and all other veterans and their dependents, whose interests I have vigorously championed in the Congress, will remember the service I have given them when they cast their votes.

THE NEW DEAL CONGRESS

Two days after I was sworn in as a Member of the New-Deal Congress, I was on the floor, fighting against the economy bill and espousing the interest of my comrades of the Spanish-American and World Wars. I was one of the 11 Members of Congress, headed by the Honorable WILLIAM P. CONNERY, of Massachusetts, who voted throughout in the interest of the veterans and in opposition to the Economy Act. The average veteran today knows how unfair was the first Economy Act, and it was only by the determined stand which the friends of the veterans took in Congress, under the leadership of Congressman CONNERY, that we were able finally to bring about repeal of many of the obnoxious features of the Economy Act.

Thousands of our aged veterans and their dependents were bereft of pension entirely under the terms of the Economy Act; others received drastic reductions to only $6 per month, and there was utter chaos in veteranism. Hundreds, if not thousands, of veterans and their dependents died because of want or worry due to the financial strain which they were forced to undergo under the guise of economy. I personally know that many individuals are with us no more, and their last days were made, in a sense, a horrible nightmare because of the injustice perpetrated against them in the so-called Economy Act. Had it not been for the Honorable WILLIAM P. CONNERY and others in the Congress who knew the veteran question and who had such a heartfelt interest in their welfare, I fear the tragedy would have been more pronounced. Much of it still exists, especially in the case of the peacetime veterans, whose predicament I will discuss presently.

OPPOSED ONE-MAN CONTROL OF VETERAN WELFARE

Most disturbing to me in connection with the Economy Act was the fact that authority was vested in one man—the Chief Executive—to stipulate pension benefits and decide other questions pertaining to the veteran issue. Regardless of how well disposed the Chief Executive may be, the facts stand out clearly and positively that he was ill advised in the Economy Act, and as a result many veterans lost their homes and their closing days were indeed dark and gloomy.

I have it authentically from a Member of Congress that he advised the President as to the regulations pertaining to Spanish War veterans, and as a result of his advice all Spanish War veterans under the age of 55 years were taken from the pension lists. This was under the mistaken assumption on the part of one Member of Congress that few, if any, Spanish War veterans were under 55 years of age. Imagine the utter chaos, terror, and suffering which must have invaded the homes of 9,657 Spanish War veterans over 50 years of age and under the age of 55, some of them receiving as much as $50 per month, who were peremptorily taken from the pension lists. The President issued this order causing acute distress within this group of our veterans, but to his credit it may be stated that after I called upon him personally in January 1934 and laid before him the desperate plight of these 9,657 Spanish War veterans, and after I took the question up with General Hines, an Executive order was issued granting to Spanish War veterans under 55 years of age the same rights and benefits as Spanish War veterans over 55 years of age received under the Economy Act. In my presence the President figured out the cost of restoring these men to the pension lists and I am satisfied that those of this group of 9,657 who today survive are thankful to him for their restoration to the pension lists.

PEACETIME VETERANS

As I served 20 years as an enlisted man in the Army, I know the condition of the peacetime disabled, and it was largely through my efforts that the pensions which they heretofore received of $30 per month for total disability were increased by the President to $45 per month. This increase of 50 percent, however, was more than wiped out by subsequent Executive orders and regulations, so that, instead of receiving 50-percent increases in pensions, the peacetime veterans actually suffered a loss in monthly pension payments because of the manner of rating disabilities.

The Regular Veterans' Association, with headquarters here in Washington, D. C., has furnished me with a voluminous list of individuals who lost a leg or a hand or both, and also blind men who lost their sight in the service, who are suffering reductions in pensions as high as 92 percent. These maimed veterans are now suffering an average reduction of 62 percent in their pensions on a basis of the pensions they received for their service-connected disabilities before the New Deal Congress. In this instance we Democrats are more than living up to our platform declaration, wherein we proposed 25-percent savings in Federal expenditures. We are taking an average of 62 percent from maimed and blind veterans, disabled in service!

Others known to me, suffering from tuberculosis, now arrested, are suffering pension deduction periodically so that some of them who were at one time rated totally disabled because of tuberculosis, when they attain the age of 55 to 70 years, will receive only $6 per month. Under the Security Act we provided $15 per month from the Federal Government for nonveterans. Maimed veterans will thus be in a position where it will be to their advantage to surrender the pensions they receive for their disabilities incurred in service in order to receive the greater pension provided for them as civilians in their old age. This certainly is not dealing fairly with our service-connected disabled veterans.

SPANISH WAR VETERANS

Many Spanish War veterans are receiving inadequate pensions for their disabilities. It is impossible for them to prove service-connection for their disabilities 35 years after the Spanish-American War. One of the President's Executive orders appeared to be liberal in this respect but in application it was the exact opposite, and thousands of our Spanish War veterans, with disabilities incurred in the Philippines, Cuba, and so forth, are not being adequately pensioned. I am in favor of legislation which would grant service connection to every Spanish War veteran for the present degree of his disability.

This would, in a sense, be synonomous with the consideration accorded to Civil War veterans, and I do hope that our Democratic platform, as well as the Republican platform, will include a plank—which will not be ignored—providing for the removal of existing discriminations against our veterans through the enactment of an adequate, just, uniform pension law. From my close study of the subject I feel that we can treat our disabled veterans more fairly with little or no additional expense, provided we will enact uniform pension legislation and at the same time effect economies in the Veterans' Administration, which I know can be brought about without a decrease in the efficiency of the service to veterans.

CONSOLIDATION OF SOLDIERS' HOMES

I will not go into details on the economies which could be effected in the Veterans' Administration, but will merely mention one item as proof conclusive of my contention. Today, the Veterans' Administration is maintaining too many soldiers' homes, some of them only half full. Some of them could be closed immediately. There is no reason why the Veterans' Administration, the Army, and the Navy should maintain separate soldiers' homes. All men who are in these homes served in either the Army or Navy and we should have only one soldiers' home administration, and that should be entirely under the Veterans' Administration.

Instead of having a large number of soldiers' homes of small capacity we should have fewer soldiers' homes—with up-to-date facilities. The United States Soldiers' Home here in Washington occupies over 500 acres of the most desirable section of the city. Less than 150 acres are utilized for the soldiers. The balance of this valuable property is utilized in the raising of chickens and high-grade dairy cattle and for a private golf course for the myriad of Army officers on duty in Washington and their friends. I understand that the milk and meat products from the dairy herd at the home cost the home management about twice as much as would milk and meat from private sources. I would suggest that the Soldiers' Home, situated in the very heart of Washington, be enlarged for the disabled veterans under the Veterans' Administration; or if this cannot be done, that at least 300 acres of this valuable land be turned over for municipal playgrounds and other recreational purposes for the children of Washington. This property is too valuable and the need for additional playground facilities for our children is too imperative for us to utilize a large portion of the Soldiers' Home grounds—which belong to the enlisted men and are maintained by them—for a golf course for the officers and as grazing fields for a herd of high-bred dairy cattle.

One member of the home at one time played a few games of golf on this course, but it was not long before the management found it convenient to show him the gate, and he is no longer a member of the home. It should be borne in mind that the Soldiers' Home here in Washington was bought from enlisted men's funds and is maintained entirely by enlisted men. I am satisfied that these men would rather see 300 or more acres of this valuable property utilized for a municipal playground for all citizens than as a golf course for the officers and a home for high-grade milk cattle.

SOME OF THE MANY DISCRIMINATIONS OPERATING AGAINST VETERANS

Is there any man in America who would be so unfair as to say that an enlisted man who lost his eyesight in France and who becomes a member of a soldiers' home should receive only $15 per month pension while he is in the Soldiers' Home? Is there any citizen so short-sighted and so unfair from the standpoint of humanity that he would say that we are doing the fair thing with our disabled veterans by reducing the pension of a tubercular veteran who lost a lung from gas in France to $15 per month while he is trying to regain his health in a Government hospital? To give his health in the service of his country is a heroic sacrifice on the part of the individual, and for our Government to reduce his compensation to $15 per month only while he is fighting the battle of life and suffering the tortures of hell is certainly not my concept of justice to our veterans.

This same protest pertains to Spanish War veterans, with whom I served in 1898, and who have suffered physical agonies since that period. Now, when they must go into a soldiers' home or Government hospital, are we giving them a square deal when we reduce their pensions to $6 per month while they are undergoing treatment? Was it a square deal to their widows to reduce their pensions to $15 per month, as we did in the economy act? Think of it—$15 per month for an aged widow to subsist herself! Only last year, we provided $15 per month Government gratuity to our aged citizens, many of whom may have been citizens of a foreign nation, when the Spanish-American War widow was married to her soldier husband during the time of his service in the Philippines or Cuba. Is this treating the widows of our disabled veterans with just and equitable consideration?

I consider pensions granted to disabled veterans and their dependents as an inherent right, based upon the recognition of our obligation to provide for those who have suffered injury and who have served our Nation in war throughout the years.

Unfortunately, such pensions have been considered as an income by the W. P. A. and as a result thereof, just because they received a small pension from the Government, many of our disabled comrades and their widows have been denied relief work and thus were placed in a more disadvantageous position than the foreigner, inasmuch as foreigners, many of whom never even wish to become citizens, were considered as fit subjects for relief and obtained relief employment, whereas our own disabled comrades and their widows were left to eke out an existence with the insignificant pensions received.

OLD-AGE SECURITY SHOULD BE ADDITIONAL

I am afraid the same condition will apply in the administration of the Security Act whereby our aged citizens are to receive up to $30 per month pension from the respective States, of which amount the Federal Government appropriates $15 per person. In order that veterans and their dependents may not suffer discrimination in the Security Administration, I propose that each pensioner receiving less than $60 per month pension, including widows and other dependents, should have added to such pensions the $15 gratuity which we have provided for individuals over 65 years of age. Unless this is done, we will find that some veterans and widows will receive less pension than will civilians and widows of nonveterans under the Security Act. This would be discriminatory indeed and unless corrected, would wipe out the beneficent effects of our veteran pension laws.

A SQUARE DEAL TO EMERGENCY OFFICERS

I am opposed to the present provisions of the Economy Act whereby emergency officers, with direct war service-connected disabilities were taken from the emergency officers' retired list under the provisions of a New Deal term, "causative factor." Under this term several thousand emergency officers who served valiantly in France, many of them in the front lines, have been removed from the retired emergency officers' list and their pensions reduced to a figure of penury. Think of it! Are we fair and just with our emergency officers? Are we fair and square with the American people if we will remove from the emergency officers' retired list men who served in the front-line trenches and who went through the horrors of hell in so doing while, at the same time we enact legislation whereby officers of the Regular Army, at the age of 37 years, thoroughly able-bodied and competent, are placed on the retired list at $149 per month? To deny retired pay to war-disabled officers and to give such high retired pay to young men who did not serve in war and were not disabled one iota is certainly not my concept of a square deal. Further than this, we are putting through legislation whereby these able-bodied 37-year-old officers, receiving $149 per month, may take positions in civil life to further augment their income.

In other words, the taxpayer is being called upon to pay these able-bodied men $149 per month to compete with him for a job. What chance has an unemployed civilian against this competition of men who have been educated at Government expense and at this early age are retired for life? The emergency officers have a just grievance, and we can ill afford to permit this discrimination to exist between war-disabled emergency officers and peacetime able-bodied officers only 37 years of age.

DISABLED VETERANS SHOULD BE REIMBURSED FOR LOSSES

I am in favor of returning to every veteran and dependent the amount of money withheld from them during the operation of the Economy Act. While I am not an attorney, I am inclined to believe that the Economy Act, in itself was unconstitutional. It is almost synonymous with much other

New Deal legislation which has been thrown overboard by our Supreme Court.

Whether we as veterans recognize it or not, nevertheless the fact is that the average nonveteran, as a good, loyal, patriotic citizen, will uphold us in our just demands. This was evidenced in the Congress by the outstanding support given to the veterans by nonveteran Congressmen, which support in some instances eclipsed that of veteran Members of Congress themselves.

For that reason, when veterans go to the polls in the primaries and in November, I would suggest that they first examine party platforms, and especially the records of the candidates themselves before casting their votes. Veterans not receiving pensions have always evidenced the fullest measure of cooperation and helpfulness in the problems of the disabled, and with this background and with the further strength which the veterans have in their family relations and personal contacts, I feel the veterans of our country owe it to themselves, in helpfulness to our disabled comrades, to vote for the interest of the disabled rather than to permit blind partisanship to influence them when they cast their ballots. If we veterans will do this, there is no doubt that in the next session of Congress uniform pension legislation will be enacted which will eliminate the present discriminations against our disabled and their dependents and restore to the Congress its constitutional right and obligation to provide specifically for our disabled comrades and their dependents, rather than to permit such authority to rest in the hands of the Chief Executive or the Veterans' Administrator.

The Veterans' Administrator advises me that since the economy bill became a law there have been 11 different enactments of the Congress itself to correct discriminations resulting from this measure, and, in addition, the President has issued 12 Executive orders, with 29 amendments to these Executive orders, making a total of 41 Executive orders issued by the President as a result of the Economy Act. In addition, the Veterans' Administration has rendered 261 Administrator's decisions, and there have been revised wholly or in part 815 paragraphs of regulatory material used by the Veterans' Administration in carrying on its activities.

Addressing my comrades and the citizens of the Nation, may it not be said that this voluminous paper work adds confusion to confusion, the veterans never know where they are, and the taxpayers are called upon to pay for additional employees in the Veterans' Administration who are required because there are so many conflicting angles under the present Veterans' Administration set-up? The administration of veteran affairs could be simplified and millions of dollars saved to the taxpayers through the enactment of a sound, uniform pension bill, which I have been advocating since 1926.

PROBLEMS OF THE REGULAR VETERANS' ASSOCIATION

It is my desire to bring before this body the cause of the enlisted men of the Regular Army, Navy, Marine Corps, and Coast Guard. I can speak of those men because I am one of them through having served for more than 20 years as an enlisted man in the Army. Many thousands of fine young men from splendid homes in my district are now serving or have served in the regular service as enlisted men. They are proud of that service, and their families at home are proud that their son or brother is honorably wearing the uniform of his country. The military service is no place for a weakling, either physically or morally, because the enlisted men are subject to severe tests by the recruiting officer, and should a man slip through who is not up to the moral standards of the Army or Navy, he is quickly discovered and dropped. We may well feel proud of our regular services, and those services have always performed when called upon according to the highest standards and traditions. Those men have never complained, and have always obeyed orders no matter how distasteful has been the job assigned to them, or how hard it has been. Hundreds, if not thousands, of graves today bear the mangled bodies of enlisted men who have given their lives in the development of our air defenses during the past two decades. Yes; only the other day the President approved a bill to erect a monument to the men who gave their lives on the *Shenandoah*. Just over the river in Arlington Cemetery is a beautiful monument to the men who lost their lives on the *Maine*, 14 men gave their lives on the *Shenandoah*, and 260 gave their lives on the *Maine*, and we erect monuments to their memory, yet we pension the survivors of those disasters as inferior Americans. A man totally disabled on the *Maine* is entitled to only $30 a month.

When the World War started, all men who had been disabled in the service were equally pensioned, and this included all groups, such as the Civil War disabled, the Indian war disabled, the Spanish War disabled, and the disabled of the Regular Establishment. All those groups had organizations, except the enlisted men of the Regular Establishment, and those organizations were quick to follow the World War organizations in asking for pension increases to a place where the pensions would be reasonable and proper in consideration of the increased living costs. The Regulars had no organization and no voice, and the result was that they did not get any increase in pensions, except for a very minor group. They were declared inferior by Congress and given lower pensions; they were simply neglected by Congress. Looking back from the World War period, we are unable to find a single instance where there has been any discrimination in pensions awarded for service-incurred disability, and we can trace pension legislation back through American history, through English history, and through Roman history.

In America we have always recognized war service as eminent service, and have given something extra for such service. We have given land grants, service pensions, and cash bonuses. During war periods we have paid the soldiers more, and have given them other valuable considerations, such as family allowances, which have been taken away after the war periods have ended. This is perfectly proper, and, in my opinion, we cannot do enough for the men who have fought our wars. However, everything that we have given the war veterans for war service has applied to all equally, and prior to the New Deal we never have adopted the theory that part of the pension for the war-period disabled is for war service and part is for disability.

THE NEW DEAL ECONOMY ACT THREW ALL PRIOR VETERAN LEGISLATION OVERBOARD

The first official declaration that we are doing this has come from the White House in the form of the regulations and rates provided by the President under authority of the Economy Act.

The Economy Act, which I am proud to have voted against, repealed all public pension laws affecting men disabled in the service, as well as service pensions affecting men who had served subsequent to April 20, 1898, and the President was given power by the act to provide rates and regulations "as he shall deem equitable and just." In other words, the President was given the power to eliminate the great number of inequalities then existing in the pension laws, and his standard, as set by Congress, was equity and justice. Under that authority the President caused terrific reductions to be made in all groups of disabled, and Congress quickly stepped in and restored the war-period disabled groups and also the Spanish War service pensions. The Regular service disabled have been left right where they fell when the ax hit them.

In 1933 the administration proudly proclaimed that it had increased the pensions of the Regulars who had been so neglected since 1883, and as a matter of fact the rate for total disability was increased from $30 a month to $45 a month, which on the surface appears to be a considerable raise; however, on March 20, 1933, the average pension of the disabled Regulars was $19.65 a month, and 2 years later, notwithstanding the fact that a large number had been dropped in the meantime, the average had dropped to $18.42 a month, and this latter figure includes the men disabled prior to the War with Spain who suffered only small temporary reductions. It is estimated that instead of a raise

that the group who were disabled after the War with Spain were reduced about one-third in their pensions; in other words, they are now getting one-third less than they previously got under the standards of 1883.

THE BLIND, MAIMED, AND HELPLESS VETERANS SUFFER GREATEST LOSS IN PENSIONS

Every man who suffered the loss of his eyesight in the performance of duty suffered a reduction of more than 30 percent, while the men who suffered anatomical losses were given reductions which averaged about 60 percent. Think of it; we Congressmen suffered a temporary 15-percent reduction in our salaries and thought it was a lot, but compare that temporary 15-percent reduction with the permanent reductions in pensions to the men who lost their arms and legs in the performance of duty, which reductions went as high as 92 percent.

The President has caused a study to be made by the Veterans' Administration, and in the course of this study the Veterans' Administration called upon the War and Navy Departments and the Coast Guard for recommendations and comment. It is significant to note that the War and Navy Departments recommended equality in pension rates as between all men disabled in the service, whether in a war period or not, while the Coast Guard recommended retirement for disability for its enlisted men, which it has had since 1915, and which the officers of all the services have had for more than a generation. There we have the War and Navy Departments recommending equality in pensions, and concurred in, but in a different manner, by the Coast Guard. We see, then, the Veterans' Administration as being the only entity which recommends against such equality, and it is very significant to note that there is not one single individual in the upper councils of the Veterans' Administration who is qualified by experience to raise his voice in behalf of the disabled enlisted men of the Regular services.

In the year 1897 a young man named Alexander Wagner, who may be identified by the pension number, C–886136, entered the United States Army, and he continued to serve therein until the year 1907, when he was dropped for disability which consisted of having lost a leg at the hip in the performance of duty. Wagner was given a pension in 1907, and in the year 1933, which was 36 years after he had entered the service and when he was 36 years older, his pension was reduced 62 percent. At first he did not complain of the extreme hardship forced upon him, because he was told that the reduction was necessary to maintain the credit of his country. He had a hard time getting enough to eat, because the economic stress had caused sharp competition for every dollar that was to be earned, and the young, healthy men won in that competition. As time went on he saw all other groups restored in full, none of which were given such a reduction as he was, and he became bitter. He felt that the United States had broken faith with him in his hour of need, and that preyed on his mind together with the fact that he could not properly provide for himself and last summer he was found with a bullet through his head and a holographic will by his side in which he directed that his pension be given to the President. That is the story of one old man who in his youth gave 10 years of service and who lost a leg in that service. The pension reduction given to Wagner was not unusual, even though it amounted to 62 percent, because the average pension reduction to that group was about 62 percent for all men who had lost arms and legs.

EVERYTHING FOR THE OFFICER—NOTHING FOR THE ENLISTED MAN

Strange as it may seem, it is true that of all groups of people entitled to pensions, compensation, or disability benefits, the Regular services represent the two groups who get both the highest and the lowest. The Regular officer is given better treatment than is any other group, while the Regular enlisted man is given worse treatment than any other group. If we estimate that the captain in the Army represents the average disabled officer in pay status, which I believe is conservative, we find that the average disability benefit of the Regular officers is $187.50 a month, and we already know that the average disability benefit of the disabled enlisted men entitled to pension is $18.42 a month, so that the average officer gets much more than 10 times as much as does the average enlisted man for disability, and they serve together on the same ships and the same aircraft. I would not say that the enlisted man of the Regular services is entitled to as much for service-incurred disability as is the Regular officer, but I do submit that the ratio shown is all out of proportion according to American standards of fairness and justice.

Let us again compare the officers and enlisted men; this time of those now in service. We remember how all officers and men were given a 15-percent reduction, and then the enlisted men were given an additional reduction by having their reenlistment bonus taken away. This reenlistment bonus had been enjoyed by them for a considerable period, and it was the only time the average enlisted man could, because of his small pay, get together enough money to visit the home and his kinfolks that he left when he entered the service.

TWENTY-ONE DOLLARS PER MONTH ENLISTED MEN SUFFER FURTHER REDUCTIONS

When the restoration came the officers were fully restored but the enlisted men were left with the loss of their reenlistment bonus. Then it was discovered that promotions in the Army were slow, and as a result the morale of the officers was low, so, without also considering the promotions of the enlisted men, we promoted a large group of officers and gave to them the increased pay that goes with promotions. The final result, as it now stands, is that we have increased the officers and reduced the enlisted men.

What a record we have made during the past 38 months in the care and treatment given to the enlisted men of our military and naval forces. We have taken or sharply reduced the pensions of the sick and the maimed, and we have reduced the pay of the enlisted men while increasing that of the officers. This administration will live forever in the minds of the enlisted men of our services as being in direct contrast with the administration of another Roosevelt who caused raises in pay to the enlisted men and greatly improved their lot. Those disabled in the Regular services are comparatively few in numbers and the United States may well take steps to save its face in the treatment it has accorded that group. We may well take steps to clear our skirts of the charge that we have broken faith with the sick and the maimed of our services who we promised to care for and for whom we assumed the hazards of the service.

Let us consider that an enlisted man who adopts the service as a career does so on the definite assurance that the Government assumes the hazards of the service as to disability, and that the Government also guarantees to him a comfortable old age through retirement pay. Therefore, with each year of service the enlisted man acquires an increased equity in a life annuity, which he cannot collect on unless he completes the required number of years of service. Under the present set-up a man may complete as much or more than 90 percent of the required service, then become disabled, and be lucky to get a pension of $6 a month, even though he has grown gray in the service and is totally unfit to enter a strange commercial world and compete with young and able men for a living.

Notwithstanding the fact that enlisted men of 20 or more years' service are discharged from the Army because of physical disability incurred in line of duty incident to the service as shown by the certificate of Army doctors, we find the Veterans' Administration denying these disabled enlisted men pension benefits, as the Veterans' Administration frequently does not recognize the findings of service-connected disability incident to the service, as shown by the Army surgeon's certificates on disability. Our own "fighting Teddy Roosevelt", if living, would quickly correct this type of inhuman treatment to veterans.

PROPOSED THAT OFFICERS LIVE ON THE BACKS OF ENLISTED MEN

And now we find legislation proposed to add a number of officers on the retired list as members of a board at the Sol-

diers' Home, who are to be paid extra compensation above their retired pay, which compensation is to be taken from the contributions of 25 cents per month which the enlisted men are forced, against their will, to pay to the home each month.

The Soldiers' Home at Washington has approximately 343 civilian employees, whose organization forced through in this Congress the iniquitous bill taking from each $21-a-month enlisted man 25 cents per month. The enlisted man now receives $20.75 per month and the civilian employees at the home will very soon obtain an increase in pay—if this consideration has not already been shown them—all at the expense of the poor enlisted man.

NOT ONLY LAWS BUT INTERPRETATION OF LAWS DIRECTED AGAINST DISABLED ENLISTED MEN

We do not stop with discriminating against the disabled of the Regular Establishment in our laws, but instead we discriminate against them in the interpretation of the laws. In the veterans' regulations, which were promulgated by the President pursuant to the Economy Act, there is the provision that when a pensioner is being furnished domiciliary or hospital care by the United States his pension shall be limited in amount. The pensioners who are resident in the Soldiers' Home, Washington, are so reduced or limited in their pensions. Yet there is no instance where the United States has ever appropriated money for the maintenance of the Soldiers' Home, and, in fact, the home is maintained by the enlisted men of the Army, who in the past have suffered deductions in pay for the maintenance of the home and who are now contributing 25 cents per month for the Soldiers' Home fund. The Attorney General of the United States in volume 20, Opinions of the Attorney General, page 350, after carefully reviewing the source of the Soldiers' Home fund, rendered it as his opinion that the money and property flowing from the Soldiers' Home was not money and property flowing from the United States. In taking away the pensions of the residents of the Soldiers' Home because of such residence, the Veterans' Administration is overruling the Attorney General of the United States and is placing the United States in the position of making money out of the Soldiers' Home by taking the pensions of the men resident therein and keeping that money in the Treasury of the United States.

In conclusion I appeal to the Congress to consider the facts which I have stressed herein. I have in my files a list of over 150 blind, maimed, and helpless veterans whose pensions today, on an average, are 62 percent less than they were before the New Deal came into power. The New Deal, which created this havoc among our war service-connected, peacetime veterans, is obligated, in my opinion, to correct this injustice before this Congress adjourns. It should be recalled that in the last session of Congress we promoted approximately 9,000 able-bodied, well-paid officers of the Army, giving them increases in pay. This legislation was rushed through the Senate in 15 minutes and taken to the President so he could sign it on the same day to put about $100,000 extra money in the pockets of these officers. The pockets of the blind, maimed, and helpless peacetime veterans are empty.

THE ALAMO, MISSIONS, GOVERNOR'S PALACE—COME TO SAN ANTONIO—THE TEXAS CENTENNIAL

DRAMA SURGES THROUGH HISTORY OF TEXAS

Mr. MAVERICK. Mr. Speaker, Texas is celebrating its centennial; it happens that I live in and represent San Antonio, where in the middle of the city stands the Alamo, one of the greatest historical monuments in the entire world. It is quite true, I suppose, that when a Texan tells of his history, he may be given to what seems extravagance of expression.

This, however, is usually under the strain and stress of emotion produced from our dramatic past. However, my story will be accurate, and I state this not only that the record shall be kept in the national annals but that those who will this year visit Texas may know something of its history. Naturally I know something of the history of Texas, but I have made research and have had the direct assistance of Hon. Fred C. Chabot, well-known Texas historian, whose material I have used and whom I shall also directly quote, and whose help I now gratefully acknowledge.

YANAGUANA, INDIAN VILLAGE, NOW SAN ANTONIO, MODERN CITY

San Antonio is a great modern city; historically, however, it goes back to the village of Yanaguana of the Indians; for how long previous to written history, we do not know. The first written history was the christening of the village of San Antonio de Padua in 1691.

Today San Antonio de Bexar is the gateway to Mexico and the center of great farming, ranching, truck-growing, and fruit regions and the greatest military and aviation district in America. It has Kelly, Duncan, and Brooks Fields, which are, respectively, training, mechanical, and tactical units; also Randolph Field, "the West Point of the air", and numerous other military and civilian aviation fields; also Fort Sam Houston, Camp Travis, "the Arsenal", other military units, and Camp Stanley, the greatest maneuvering field for size and topography in the entire world.

THE SIX FLAGS OF TEXAS

Over the city of San Antonio and the State of Texas, now a progressive part of the American Nation, have flown six flags: that of Spain, France, Mexico, the Republic of Texas, the Confederate States of America, and the United States of America, and as Mr. Chabot says:

We may even count more, for the Freedonian Republic of Edwards was in Texas, as was the Republic declared by James Long, when the colorful Lafitte reigned the buccaneer camp on Galveston Island.

TEXAS, ONE-THIRD BIGGER THAN GERMANY

Texas a hundred years ago was nearly twice the size that it is at this time, taking in what is now part of New Mexico, Oklahoma, Kansas, Colorado, Wyoming, and had a population of only 35,000 men, women, and children thinly scattered over the widest areas. There were no roads as we understand them now. It is astonishing to know that in that primitive age there was such a unanimity of spirit and of revolution. Today, Texas, stripped of much of its territory, is still one-third larger than Germany, and its wealth, by virtue of natural resources, is incomparably greater than that of Germany. That Texas, once a sovereign nation, is a vassal principality to a little street in New York is not so pleasant to think upon—but I must stick to our history.

It is customary for people to dream about their mighty history. And every Texan who really knows Texas history, and who realizes the tremendous implications of Texas' formation as a sovereign State, has heard the shrill cry of empire.

PEACE WITH LATIN AMERICA AND THE WORLD

But our dream of empire is dead. This is only a fancy long since passed. For the people of Texas are peaceful with all Mexico, Latin America, and all of the world, and though willing to fight, despise war. Our people want to develop the "arts of peace", to work, to conserve what God gave us, and promote science, industry, and good government.

In San Antonio there are hotels (I swear the Chamber of Commerce is not inspiring this) that are the best—but not far from these very hotels are the ancient "chili stands" where food is served in the open in bright-colored stands—just as we did 200 years ago—and where Mexicans actually play guitars and sing the folk songs of Mexico and Texas ranches.

(NOTE.—The stands now have screens and are sanitary. The hot chili may burn you, but you will not get ptomaine poisoning.)

SPANISH MISSIONS; PLAZAS; OLD CATHEDRAL; MODERN BUILDINGS

Near the city are the great Spanish missions, established by the sacrifice of the Franciscan Fathers. In the vicinity of Military Plaza, named by the Spanish "Plaza des Armas", and Main Plaza, named also by the Spanish "Plaza de Mayor", one sees the old cathedral, and by its side a beautiful modern bank building, and on the different squares the city hall, the county courthouse, and bright tropical parks. Directly facing the Military Plaza is the old Governor's Palace, in a perfect state of reconstruction, rehabilitated through the leadership of the Conservation Society of San Antonio, of which the

architect was Harvey P. Smith, through funds supplied by the city of San Antonio.

The centennial celebrates the 100 years of liberty, and I shall first describe that phase.

Having lost the Battle of San Antonio in 1835 when General Cos was driven from San Antonio, the Republic of Mexico, under the leadership of the Mexican tyrant, Santa Anna, decided to concentrate her military forces in San Antonio in view of the rising tide of armed revolt of the Texans.

TEXANS OCCUPY THE ALAMO—ALL TO DIE

In fact, from a strategic viewpoint, the Mexicans could not afford to lose San Antonio, then and now the key and heart of the State of Texas. As the concentration proceeded the few Americans who lived there occupied the Alamo, fortified it again, and made ready to fight with blood and guns.

In this far-distant empire now being established the Americans who had formed the government of Texas disagreed among themselves and there was a lack of discipline in the volunteer troops. Only one-hundred-and-eighty-odd men were available, but all went into the Alamo. Enthusiastic historians say the Texans were attacked by a Mexican army of 5,000. The Mexicans claim there were 1,500 only, and no doubt the real number was around 2,000 to 2,500, if unbiased military estimates are correct.

THE SIEGE—REINFORCEMENTS NEVER CAME

Bowie and Neill were in command at San Antonio, and although Neill had orders to demolish the Alamo, he did not do it. He was given a furlough. Governor Smith then ordered William Barrett Travis, who was in charge of recruiting at San Felipe de Austin, to raise a company and go to Neill's assistance. Then Bowie learned through his Mexican relatives of the approach of the Mexican Army. He pleaded for help. David Crockett, fresh from Tennessee, entered the Alamo with about 15 men from his State.

The siege of the Alamo began. Travis asked for help, but never got it. Completely surrounded, nevertheless, on March 1, 32 brave men from Gonzales—also an historical spot which will celebrate the centennial, and which all should visit—led by Capt. Albert Martin, rode to Bexar, dashed through the Mexican lines, knowing that as they entered the walls that death rode with them.

"EL DEGUELLO", "NO QUARTER"—THE TYRANT'S BUGLES SCREAM DEATH

On March 6 the final attack was ordered by Santa Anna, the Mexican dictator. Messages had passed between the lines, and preceding the attack Santa Anna ordered the playing of El Deguello, which meant "no quarter." Some of those near there tell the bugles made a horrible noise in that screeching symbol of death. Old historians say, "They put the Texans to the sword, and not a single combatant was left alive to tell the story."

TRAVIS, BOWIE, BONHAM, AND CROCKETT DIE FOR LIBERTY

Colonel Travis, a young man with a flair for romance and military heroism, who is said to have been a student of the Latin poets, died in the breach, slaying the Mexican officer who had wounded him to death. James Bowie, dying of pneumonia, was slain in his bed. David Crockett fought valiantly; his ammunition giving out, he fought to the death with a broken gun. It is said that Santa Anna twice stabbed with a poniard the corpse of Evans, the man who might have ignited the powder magazines had he not been killed in the attempted act, thus burying Santa Anna and himself beneath the ruins of the citadel. Bonham was killed while working the cannon.

A JEW DIES IN THE ALAMO

The racial backgrounds of the soldiers of the Alamo were various; most of them were native-born Americans, but there were Irish, English, Scotch, Welsh, Danish, Mexican, and one of the heroes who died for liberty at the Alamo was a Jew, Aaron Wolff.

A full story of the contributions to Texas liberty, its growth, industry, and culture, by Jews was recently made in an address by Rabbi Ephraim Frisch, of Temple Beth El, San Antonio. He quoted the book of Leviticus, "Proclaim liberty throughout the land, to all the inhabitants thereof", and gave name after name of Jews in Texas history, including that of Wolff.

I mention the Jews in Texas history, and especially that of Wolff, not to please that race, but to show all of us that humanity loves liberty and will fight for it. Racial persecution is a horrible thing, and we Americans must never permit ourselves to travel the road of bitterness and persecution.

DR. FRISCH, RABBI, APPEALS FOR TOLERANCE

On the occasion of Dr. Frisch's address, which was March 6, 1936, in commemoration of the Alamo, he said:

> Here may we all, under God, Catholic, Protestant, and Jew, men of all faiths and all lineages, continue to live and prosper, cherishing our precious American traditions and ideals of liberty, of brotherhood, of justice, and of peace; everyone in the words of Scripture "sitting under his own vine and fig tree, with none to make him afraid"; each one eager to be his brother's keeper.

TEXAS BECOMES A SOVEREIGN NATION

Throughout the wide expanse of Texas the news of the fall of the Alamo spread consternation and horror. However, the men of Texas assembled in small companies. Then, by intelligent military tactics which he had learned in Indian campaigns, Gen. Sam Houston, former Governor of Tennessee, retreated over the face of Texas, engaged the Mexicans at the Battle of San Jacinto near the city of Houston, and a great victory was won by the Texans. This field, with a magnificent monument, will be a part of the great celebration.

The story of the establishment of the Republic, its trials, tribulations, and its paper money, the intrigue of the French Ambassador, all indicate to the historian events interesting enough to inspire years of study and research. And all these places representing this great epoch in American history are worthy of the pilgrimage of any American.

And Texas is the only State that was once a sovereign nation, recognized as such by the other countries of the world. This status was enjoyed for nearly 10 years, when it voluntarily accepted statehood in the United States of America.

But I am telling principally the story of San Antonio, although San Antonio is the history of early Texas.

WAR; BLOODY FEET; PRISONERS OF PEROTE

Texas' wars were not over. Although a treaty had been signed by the Mexicans and Texans and Texas had been recognized in every respect by Mexico, it decided it would annex Texas; so she began to harry the new republic and make military invasions. In 1842 Mexico made war. Vasquez came into San Antonio and departed with loot and treasure and Mexican sympathizers. Again General Woll and the trained regulars of the Mexican Army entered the city. The Mexicans under Antonio Menchaca took post in the old cabildo, and the Americans fortified the home of Samuel A. Maverick, a prominent citizen and signer of the Declaration of Independence, which place was located on the northeast corner of Main Plaza. The Texans attempted to defend the town but were finally captured by overwhelming numbers. Barefooted, they were then taken to Mexico, marching over deserts of cactus, tropical lands, and freezing mountains nearly 1,800 miles to the State of Vera Cruz and imprisoned in the Castle Perote. Castle Perote is near the village of Jalapa. It is one of the largest and most beautiful castles on the American continent. It is said that the Spaniards spent 15,000,000 pesos in building it, and I have never seen a more forbidding, though simple and beautiful piece of architecture.

TEXAS GIVES ITS STAR TO THE UNITED STATES

But Texas, composed of Americans, desired the security, prestige, and honor of their mother country, so it became a part of the Union in 1845. United States troops were moved in and quartered on Military Plaza. Later Major Babbitt occupied the Alamo as a quartermaster depot, and it was so occupied, except for the Civil War, until 1878. In 1849 General Worth, after whom the city of Fort Worth, also substantially participating in the centennial celebration, was named, resided in the old Justice John James home on Commerce Street, which I can remember as a child, and

which stood at the corner of Presa Street. The troops were in temporary barracks in Concepcion Mission on one side of San Antonio and at the head of the San Antonio River on the other. These latter springs were called Worth Springs, but this name is now forgotten.

SAN ANTONIO EARLY MILITARY CENTER

At the corner of Houston and St. Marys Streets stands the modern Gunter Hotel. On this location a hotel was built in the fifties by John and William Vance, which served as officers' quarters and barracks. They were first occupied in 1856 and then later were used as Confederate headquarters. The old French Building, which existed until just a few years ago, still lives in the minds of San Antonians, was built during the Civil War and was known as the Confederate Aid Store. In its place stands a modern police building.

The Maverick Hotel was built on Houston Street, and was constructed for Federal headquarters of the Army and occupied by General Ord in 1875. From 1875 on, San Antonio began to develop as a great center. Major Belknap, famous in Texas, began the building of Fort Sam Houston May 6, 1875, or over 60 years ago. It is today the finest military post in North or South America and should be visited by all Americans.

The history preceding the fall of the Alamo and the establishment of the Republic of Texas in 1836 is an interesting one in that it was more or less a "republican movement" which started in 1790.

SOME EVENTS PRECEDING TEXAS REVOLUTION

Let me quote Mr. Chabot:

The first revolutionary tendency in San Antonio seems to have been in 1790, when the "Republicans" here had the audacity of holding a junta without permission from the authorities. Four years later Philip Nolan arrived.

Then in 1803 came the company of the Alamo of Parras, Mexico, which was stationed in the old San Antonio de Valero mission, which had been secularized some years before. They gave their name to the mission, when it was used as a fort, the Alamo. With the war of independence from Spain, San Antonio suffered all the horrors imaginable. Each faction outdid the other in cruelty.

ROYALISTS OF SPAIN DEFEATED

In 1813 San Antonio surrendered to the Americans under Kemper, as a result of the defeat of the Spaniards on the Rocillo. The Royalists under Elisondo were defeated, and the Americans returned to San Antonio. Toledo was elected commander in chief. The Americans, or Army of the North, were defeated on the Medina, and only 93 Americans were able to escape to Natchitoches. Arredondo marched triumphantly into San Antonio and sought revenge on the Republicans. By 1814 San Antonio had become a desolate place, suffering from the heel of a ruthless tyrant within, and surrounded by ferocious Indians without. Prices became prohibitive and food very scarce.

A great flood came down upon the town on July 5, 1819, destroying lives and property alike. Those who could fled to higher ground on the east bank of the river; they started the new villita, or little town, and gradually occupied the properties which had belonged to the Indians and soldiers who had squatted around the Alamo.

As the American colonists came into Texas, San Antonio, the capital of the Province, received the most prominent of them, who came to petition the Governor. The Austins, Moses, and Stephen F., were here; Baron Bastrop lived here, and helped them. Then the leaders of the Irish immigration, McGloin and McMullen were here, the latter making San Antonio his permanent residence. James and Rezin Bowie arrived, the latter the inventor of the "Bowie knife", the former, Jim Bowie, Alamo hero, who married Ursula, the charming daughter of Governor Veramendi, one of San Antonio's richest merchants, and whose home, the Veramendi Palace, was a famous spot for hospitality, beauty, and political intrigue. Here Sam Houston visited when on an Indian jaunt.

In 1834 the first strictly revolutionary meeting to discuss Texas independence from Mexico was held in San Antonio.

WHO WILL FOLLOW OLD BEN MILAM?

The following year an attempt to disarm the Americans at Gonzales was the inauguration of actual warfare. General Cos was driven from San Antonio by the western army of Americans, under old Ben Milam, who lost his life when taking the Veramendi House. The capitulations for the surrender of the Mexicans and San Antonio to the Americans were signed in the Cos House, or the old Martinez House on Villita Street, in December 1835, when Gen. Edward Burleson was glad to terminate a campaign against such great odds.

CANARY ISLANDERS CAME IN 1731

Thousands of the people of San Antonio are descended from what is known as the "Canary Islanders." John W. Smith married a lady who was a member of a Canary family. He was the first mayor of San Antonio, and his grandson, John W. Tobin, was one of the most distinguished recent mayors of the city. Smith's friend, Samuel A. Maverick, married a lady from Alabama, and he was the first Congressman of the Texas Republic, representing the district of Bexar. His grandson, MAURY MAVERICK, became the first Congressman of the United States of America representing the single district of Bexar a hundred years later.

But let me tell the story of the Canary Islanders who came in the year 1731 from the Canary Islands, arriving on March 9. They formed the first municipality or civil settlement in the province of Texas, naming the villa San Fernando in honor of the Spanish Prince of Asturias, who later became king of Spain. San Fernando was located at the side of Main Plaza, then called the "Plaza of the Islanders" adjoining the Plaza of the Presidio, or Military Plaza. Chabot says:

According to the vice-regal decree for the founding of this villa, it was to be the capital of the province. This was the first political settlement, as we have said, and it received the usual royal protection and encouragement. The colonists, as first settlers, were made Hidalgos, those who had something or who were somebody: hijos de algo, in accordance with the laws of the Indies.

By 1734 the first foundation stone for their parish church was laid. This holy temple was then called San Fernando, in honor of the Spanish saint and king. It was finished in about 1746, and erected under the invocation of the Virgin of the Candelaria and Our Lady of Guadalupe, for whom the inhabitants had a particular reverence. This was the beginning of our present historical landmark, San Fernando Cathedral.

THE FLAG OF FRANCE

It must be remembered that Texas had six flags; one of those was that of France. The French had come down the Mississippi River from Canada and had established themselves in Louisiana. They claimed all the lands drained by the great Mississippi. Sieur de Robert La Salle landed on the Texas coast in 1685 and established a fort and settlement on the Garcitas Creek which he called St. Louis. Savage tribes soon destroyed the fort and La Salle was murdered by his own men.

Then St. Denis had a trading expedition from Louisiana to Mexico, and the Spanish governors were alarmed at the French encroachment. In the year 1719, French forces crossed the Louisiana frontier and drove the Spaniards out of east Texas. Let Mr. Chabot continue the story which largely concerns the beautiful Spanish missions of southwest Texas.

This train of events called for the appointment of the Marquis of Aguayo as Governor of Texas. He was the most powerful feudal lord of north Mexico, and soon organized a military expedition, entered Texas, and drove back the French, reestablishing the Spanish missions.

While the missionaries were in refuge in San Antonio, Father Margil founded the beautiful mission which he named in honor of the Governor, San José de San Miguel de Aguayo. This was in 1720. Now Aguayo removed the Presidio of San Antonio to the site of the present military plaza, and had a fortification built of adobe and stone, fireproof, and strong, with a residence for the commander or governor, and quarters for the officers. This was the beginning of our Governor's palace, and it was completed in 1722.

THE MISSIONS—THEY STILL STAND

Then the east Texas missions were abandoned and reestablished on the San Antonio River. On March 5, 1731, the captain of the San Antonio Presidio proceeded to the first mission ground, accompanied by his officers, and Father Vergara "grasped the hand of the captain of the tribe, in the name of all the other Indians who had attached themselves to the mission, and led him about over the locality, and caused him to pull up weeds, throw stones, and perform all the other acts of real possession", when the first mission, La Purisima Concepción, was founded here.

Then followed the founding of the San Juan and the Espada missions. In serving the Indians of east Texas Concepción had originally taken their name; now it was called Our Lady of Purisima Concepción de Acuña, in honor of the viceroy, Juan de Acuña, Marquis of Casafuerte. San Juan of the Nazones was rechristened San Juan Capistrano; and the Espada, the first mission established in Texas, as Our Father San Francisco of the Texas, was now rechristened San Francisco de la Espada.

These missions stand today. It is said that the Concepción Mission, from the viewpoint of massive beauty and outline, is the best. San Jose is recognized as the most beautiful in America, famous for its stone façade and its rose window. With the cooperation of several societies and the church, most of this mission church and surrounding quarters are

being preserved and restored. All of these missions should be visited by those attending the centennial.

The missions around San Antonio are not all that there are in Texas. In Goliad one finds two, and there occurred the massacre of Fannin's men.

REVOLT IN NEW MEXICO—MISSIONS—EL PASO

Among the missions in excellent shape are those near El Paso, which are still older than those around San Antonio. They were established because of the great revolt of the Indian tribes in New Mexico in 1690, when the Spanish Governor of New Mexico, Otermin, and a number of survivors of the revolt escaped from Santa Fe and came down the Rio Grande River to Ysleta, near El Paso, where one mission had already been established in 1682.

During the same period the missions of Socorro and San Elizario were established. Ysleta appears to be the first church in Texas. There is a farm near which El Pasoans claim is the oldest in the United States of America from the viewpoint of continuous cultivation.

REPRESENTATIVE THOMASON HAS SPECTACULAR AND BEAUTIFUL DISTRICT

The Texas Centennial is not intended as a celebration of its early period as a State of the Union, but the early period will naturally be considered. Every Texan and every visitor should know of the great forts in the western part of Texas, the Big Bend country, and the missions just mentioned, all of which are in the congressional district of Hon. R. E. THOMASON, of El Paso.

Fort Davis, named for Jefferson Davis, who was then Secretary of War, was established October 7, 1854, and is in Jeff Davis County. Congressman THOMASON is now establishing a great national park in this area, which, for spectacular scenery, high mountains, and wide plains, is one of the most beautiful areas in America. There is already the Fort Davis State Park, and this would be increased in size by several million acres.

This fort was established because of its being the center of wild Indian tribes, the Mescaleros, Apaches, and Comanches. It was continuously occupied until the Civil War, when Texas Confederate troops took command under Colonel Baylor. Any centennial visitor traveling between El Paso and San Antonio might stop overnight in such cities as Marfa, Van Horn, Alpine, and Fort Stockton. Not far from El Paso are the great Carlsbad Caverns and a national park.

TEXAS COLONIES—MOSES AUSTIN—"CONNECTICUT YANKEE"

To include in this statement a story of the Texas colonists is impossible. Representative CITRON, of Connecticut, urged me to do this, telling me of Moses Austin, from Durham, Conn., which is in his Congressional District. Moses Austin was a "Connecticut Yankee", and his son, Stephen F., took up his colonization work in Texas when he died and made the name of Austin immortal. There were many colonizers called "Empresarios", and they formed the background and support of the Texas revolution.

In telling history an interested party is likely to exaggerate and make of his ancestors gods and angels. It is true to Texas came ministers of the Gospel, priests, poets, musicians; but likewise came adventurers, rowdies, duelists, men who sang loud songs as they drank tequilla (a powerful Mexican distillate of cactus, putting whisky to shame, and well known to the descendants of our Texas heroes), and these men rode horses high, wide, handsome, and fancy-free. This is the true background of Texas. San Antonio is a great American city, but its cosmopolitanism, flash, and color are outstanding.

COSMOPOLITAN, INDUSTRIAL, HISTORICAL

The early Anglo-Americans of the forties and fifties were the true pioneers of the present industrial development. In this group were many Germans who left the tyranny of Europe and came to Texas for freedom and liberty, and they were a wholesome leavening to our Anglo-American speculation and extravagances. Many of our present banks, the pioneer lumber and housing concern, the pioneer flour mills and businesses are owned and operated by the descendants of these German pioneers. Throughout southwest Texas and in the trade territory of San Antonio are numerous German farmers, and their farms can be noted for their neatness and excellent condition.

In the cosmopolitanism of San Antonio is the Italian colony, many of whom have been born in San Antonio to the third generation, others who were born in Italy. Of course, many other nationalities are represented.

In celebrating the Texas Centennial the element of Mexican extraction and Spanish background must not be forgotten. In the city of San Antonio there are some 80,000 Americans of Mexican extraction. They maintain much of their racial and cultural heritage, although by education and patriotism they are American citizens. Historically, however, it must be remembered that the republican movement—the movement for a constitutional and free government was also of Mexican origin—and in the siege of San Antonio in 1835 on the side of liberty were Mexicans, as there were among heroes of the Alamo. There were Mexicans who fought for Texas in the Battle of San Jacinto.

The Anglo-American leaders were anxious to receive the cooperation of such great leaders as Erasmo Seguin and his son Juan—a town now being named after him; of Antonio Navarro, after whom the county of Navarro is named, as well as the city of Corsicana since he came from a Corsican family; Antonio Menchaca; Francisco Ruiz, and son, after both of whom well-known streets are named in San Antonio, and dozens of other cities; but old Spanish and Mexican families of San Antonio who cherished liberty and independence fought side by side with the Americans or Texans.

Reuben Rendon Lozano, a native-born citizen of Mexican extraction, a schoolmate of mine, and now a prominent lawyer in San Antonio, has written "Viva Tejas!—The Story of Mexican-born Patriots of the Republic of Texas." This book gives in detail what its title indicates, as well as the part played by the Mexicans as I have just outlined.

ON TO TEXAS

In visiting San Antonio the traveler should pass through Houston (see the battlefield of San Jacinto and monument), Dallas, or Fort Worth—or all of them; likewise through Austin, the State capital, where can be seen one of the greatest State capitals in America, a beautiful and well-planned city, an excellent university, the old Texas State Cemetery, the French Embassy and other sites, historic and modern. One should visit Gonzales and Goliad. If one travels west, they should not fail to see El Paso, passing through the Davis Mountains, and seeing near the city the two missions described elsewhere. One should always include San Antonio in any trip.

San Antonio is by automobile 3½ hours from the border of Mexico and 7 hours altogether from the city of Monterey, far in the interior of Mexico, an old, historic, but like San Antonio, modern metropolis. San Antonio is also 3½ hours from the Gulf of Mexico, the greatest place for tarpon fishing in southern waters. The city is the center of a great area, and from a viewpoint of history, modernity, and hope of future progress, is a valuable place for any American to visit to round out his knowledge of all the traditions that make up American history.

ADJOURNMENT

Mr. BANKHEAD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 50 minutes p. m.) the House, under the order just adopted, adjourned until Monday, May 18, 1936, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

835. Under clause 2 of rule XXIV a letter from the Acting Secretary of the Navy, transmitting a draft of a proposed bill to amend section 210 of the act entitled "An act to provide for the regulation of interstate and foreign communication by wire or radio, and for other purposes", approved June 19, 1934, was taken from the Speaker's table and referred to the Committee on Interstate and Foreign Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII,

Mr. HILL of Alabama: Committee on Military Affairs. H. R. 10640. A bill to authorize appropriations for construction at military posts, Panama Canal Department, and for other purposes; without amendment (Rept. No. 2653). Referred to the Committee of the Whole House on the state of the Union.

Mr. HILL of Alabama: Committee on Military Affairs. H. R. 12511. A bill to authorize appropriations for construction at military posts, and for other purposes; without amendment (Rept. No. 2654). Referred to the Committee of the Whole House on the state of the Union.

Mr. DICKSTEIN: Committee on Immigration and Naturalization. H. R. 12244. A bill to amend section 24 of the Immigration Act of 1917, relating to the compensation of certain Immigration and Naturalization Service employees, and for other purposes; without amendment (Rept. No. 2655). Referred to the Committee of the Whole House on the state of the Union.

Mr. CONNERY: Committee on Labor. H. R. 12599. A bill to provide more adequate protection to workmen and laborers on projects, buildings, constructions, improvements, and property wherever situated, belonging to the United States of America, by granting to the several States jurisdiction and authority to enter upon and enforce their State workmen's compensation, safety, and insurance laws on all property and premises belonging to the United States of America; without amendment (Rept. No. 2656). Referred to the Committee of the Whole House on the state of the Union.

Mr. WHITE: Committee on the Public Lands. H. R. 12698. A bill relating to the establishment and operation of grazing districts in the State of Nevada; without amendment (Rept. No. 2657). Referred to the Committee of the Whole House on the state of the Union.

Mr. ROBINSON of Utah: Committee on the Public Lands. H. R. 7086. A bill to establish the Mount Olympus National Park, in the State of Washington, and for other purposes; without amendment (Rept. No. 2658). Referred to the Committee of the Whole House on the state of the Union.

Mr. McSWAIN: Committee on Military Affairs. H. R. 11922. A bill to amend the act of May 25, 1933 (48 Stat. 73); without amendment (Rept. No. 2659). Referred to the Committee of the Whole House on the state of the Union.

Mr. DINGELL: Committee on Ways and Means. S. 3247. An act to amend title II of the National Industrial Recovery Act, as amended, by the Emergency Appropriation Act, fiscal year 1935, and as extended by the Emergency Relief Appropriation Act of 1935; with amendment (Rept. No. 2660). Referred to the Committee of the Whole House on the state of the Union.

Mr. COSTELLO: Committee on Military Affairs. S. 3334. An act to make provision for the care and treatment of members of the National Guard, Organized Reserves, Reserve Officers' Training Corps, and Citizens' Military Training Camps who are injured or contract disease while engaged in military training, and for other purposes; with amendment (Rept. No. 2663). Referred to the Committee of the Whole House on the state of the Union.

Mr. DUFFY of New York: Committee on the Judiciary. H. R. 12612. A bill to supplement the act of June 25, 1929 (ch. 41, 46 Stat. L. 41), which authorized and directed the Attorney General to institute suit against the Northern Pacific Railway Co. and others; without amendment (Rept. No. 2664). Referred to the Committee of the Whole House on the state of the Union.

Mr. CELLER: Committee on the Judiciary. House Joint Resolution 582. Joint resolution granting the consent of Congress to the States of New York and Vermont to enter into an agreement amending the agreement between such States consented to by Congress in Public Resolution No. 9, Seventieth Congress, relating to the creation of the Lake Champlain Bridge Commission; with amendment (Rept. No. 2665). Referred to the Committee of the Whole House on the state of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. COLMER: A bill (H. R. 12714) for the relief of former employees of the Federal subsistence homestead corporations; to the Committee on Claims.

By Mr. LEMKE: A bill (H. R. 12715) to liquidate and refinance agricultural indebtedness at a reduced rate of interest by establishing an efficient credit system, through the use of the Farm Credit Administration, the Federal Reserve Banking System, and creating a Board of Agriculture to supervise the same; to the Committee on Agriculture.

By Mr. RAMSAY: A bill (H. R. 12716) to prevent the manufacture, sale, or transportation of adulterated or misbranded liquors, and regulating traffic therein; to the Committee on the Judiciary.

By Mr. TOLAN: A bill (H. R. 12717) to provide for the right of election by employees subject to the provisions of the Civil Service Retirement Act of a joint and survivorship annuity upon retirement; to the Committee on the Civil Service.

By Mr. TONRY: A bill (H. R. 12718) to amend the Home Owners' Loan Act of 1933; to the Committee on Banking and Currency.

By Mr. RANDOLPH: A bill (H. R. 12719) for the relief of the Southeastern University of the Young Men's Christian Association of the District of Columbia; to the Committee on the District of Columbia.

By Mr. DEROUEN: A bill (H. R. 12720) granting the consent of Congress to the Louisiana Highway Commission to construct, maintain, and operate a free or toll highway bridge, or a railway bridge in combination with a free or toll highway bridge, and approaches thereto across the Mississippi River at or near Baton Rouge, La.; to the Committee on Interstate and Foreign Commerce.

By Mr. PETTENGILL: A bill (H. R. 12721) authorizing the sale of approximately 5,000 acres of land in the Gogebic purchase unit to the University of Notre Dame; to the Committee on Agriculture.

By Mr. CARMICHAEL: A bill (H. R. 12722) to aid the several States in making certain toll bridges free bridges, to authorize an appropriation for such purpose, to make such appropriation available for matching with funds apportioned under the Federal Highway Act, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. McLEOD: Resolution (H. Res. 513) to amend section 5 of rule XXII of the rules adopted as the rules of the Seventy-fourth Congress; to the Committee on Rules.

By Mr. DISNEY: Joint resolution (H. J. Res. 588) for the designation of certain streets or avenues in the Mall as Ohio, Missouri, Oklahoma, and Maine Avenues; to the Committee on the District of Columbia.

By Mr. KENNEY: Joint resolution (H. J. Res. 589) to authorize the Secretary of the Treasury to permit the transportation of bonded merchandise by other than common carriers under certain conditions; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BEITER: A bill (H. R. 12723) for the relief of Helmuth Heyl; to the Committee on Claims.

By Mr. CARLSON: A bill (H. R. 12724) for the relief of Maj. Wilbur Rogers; to the Committee on Military Affairs.

By Mr. CHANDLER: A bill (H. R. 12725) for the relief of Arthur J. Ellwood; to the Committee on Naval Affairs.

By Mr. DARDEN: A bill (H. R. 12726) for the relief of Jeremiah A. Kennedy; to the Committee on Naval Affairs.

By Mr. GRISWOLD: A bill (H. R. 12727) granting a pension to Ella May Farris; to the Committee on Invalid Pensions.

By Mr. KENNEDY of New York: A bill (H. R. 12728) for the relief of Isidore Ferzig; to the Committee on Claims.

By Mr. MORITZ: A bill (H. R. 12729) for the relief of the General Electric Corporation; to the Committee on Claims.

By Mr. RAMSPECK: A bill (H. R. 12730) to authorize the payment of an annuity to William H. Moran, Chief of the Secret Service Division of the Treasury Department, upon his retirement, in recognition and appreciation of his services to the United States; to the Committee on the Civil Service.

By Mr. SOMERS of New York: A bill (H. R. 12731) for the relief of Benjamin Weisenberg; to the Committee on Claims.

By Mr. SAUTHOFF: A bill (H. R. 12732) granting a pension to Alice Waste; to the Committee on Pensions.

By Mr. WALLGREN: A bill (H. R. 12733) for the relief of George Parker; to the Committee on Ways and Means.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

10885. By Mr. BEITER: Petition of the Lackawanna Housing Authority, endorsing the Wagner-Ellenbogen housing bill, known as the United States Housing Authority Act of 1936; to the Committee on Banking and Currency.

10886. By Mr. BOYLAN: Resolution unanimously adopted by the Bricklayers' International Union, Local No. 9, Brooklyn, N. Y., favoring improved housing conditions; to the Committee on Banking and Currency.

10887. By Mr. COCHRAN: Petition of Oscar H. Falkenberg, of St. Louis, Mo., and other residents of the Thirteenth Congressional District of Missouri, favoring pensions for the blind, as provided in House bill 7122; to the Committee on Pensions.

10888. By Mr. MEAD: Petition of the Lackawanna City Housing Authority, of Lackawanna, N. Y., urging the passage of the Wagner-Ellenbogen housing bill; to the Committee on Banking and Currency.

10899. By Mr. RABAUT: Petition of the Detroit Community Fund, suggesting a national policy for relief; to the Committee on Ways and Means.

10890. Petition of the Wisconsin Federation of Women's Clubs; to the Committee on the Civil Service.

SENATE

FRIDAY, MAY 15, 1936

(Legislative day of Tuesday, May 12, 1936)

The Senate met at 12 o'clock m., on the expiration of the recess.

THE JOURNAL

On request of Mr. ROBINSON, and by unanimous consent, the reading of the Journal of the proceedings of the calendar day Wednesday, May 13, 1936, was dispensed with, and the Journal was approved.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its reading clerks, announced that the House had agreed to the amendments of the Senate to the bill (H. R. 8287) to establish an assessed valuation real property tax in the Virgin Islands of the United States.

The message also announced that the House had severally agreed to the amendments of the Senate to the following bills of the House:

H. R. 2962. An act for the relief of Sarah Shelton;

H. R. 7110. An act to authorize the President to bestow the Navy Cross upon Brig. Gen. Robert H. Dunlap, United States Marine Corps, deceased;

H. R. 8262. An act for the relief of Tom Rogers and the heirs of W. A. Bell, Israel Walker, Henry Shaw, Thomas Bailey, and Joseph Watson.

H. R. 8431. An act to provide for the establishment of the Fort Frederica National Monument, at St. Simon Island, Ga., and for other purposes.

The message further announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 9496) to protect the United States against loss in the delivery through the mails of checks in payment of benefits provided for by laws administered by the Veterans' Administration, asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. MEAD, Mr. DOBBINS, Mr. HAINES, Mr. GOODWIN, and Mr. DOUTRICH were appointed managers on the part of the House at the conference.

The message also announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 11687) to amend the Federal Aid Highway Act, approved July 11, 1916, as amended and supplemented, and for other purposes, asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. CARTWRIGHT, Mr. WARREN, Mr. WHITTINGTON, Mr. TURPIN, and Mr. WOLCOTT were appointed managers on the part of the House at the conference.

The message also announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 12527) making appropriations for the Navy Department and the naval service for the fiscal year ending June 30, 1937, and for other purposes, asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. UMSTEAD, Mr. THOM, Mr. JOHNSON of West Virginia, Mr. SCRUGHAM, Mr. MCLEOD, and Mr. DITTER were appointed managers on the part of the House at the conference.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 3483) to provide for rural electrification, and for other purposes.

The message also announced that the House had agreed to the reports of the committees of conference on the disagreeing votes of the two Houses on the amendment of the Senate to each of the following bills of the House:

H. R. 8372. An act to authorize the acquisition of lands in the vicinity of Miami, Fla., as a site for a naval air station and to authorize the construction and installation of a naval air station thereon; and

H. R. 10267. An act to provide for adjusting the compensation of division superintendents, assistant division superintendents, assistant superintendents at large, assistant superintendent in charge of car construction, chief clerks, assistant chief clerks, and clerks in charge of sections in offices of division superintendents in the Railway Mail Service, to correspond to the rates established by the Classification Act of 1923, as amended.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10919) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1937, and for other purposes; that the House receded from its disagreement to the amendments of the Senate numbered 26 and 49 to the said bill, and concurred therein each with an amendment, in which it requested the concurrence of the Senate; and that the House insisted upon its disagreement to the amendments of the Senate numbered 48 and 52 to the said bill.

The message also announced that the House insisted upon its amendments to the bill (S. 3789) authorizing the Secretary of Commerce to convey the Charleston Army Base Terminal to the city of Charleston, S. C., disagreed to by the Senate; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. BLAND, Mr. SIROVICH, and Mr. WELCH were appointed managers on the part of the House at the conference.

The message further announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 12700. An act granting pensions to certain soldiers of the Civil War;

H. R. 12701. An act granting pensions and increase of pensions to certain helpless and dependent children of soldiers of the Civil War;

H. R. 12702. An act granting increase of pensions to certain widows and former widows of soldiers and sailors of the Civil War; and

H. R. 12703. An act granting pensions to certain widows and former widows of soldiers, sailors, and marines of the Civil War.

The message also announced that the House had agreed to the concurrent resolution (S. Con. Res. 35), as follows:

Resolved by the Senate (the House of Representatives concurring), That the Constitution of the United States of America (Annotated), including all amendments thereto, and with citations of the cases of the Supreme Court of the United States construing its several provisions, collated under each separate provision, be compiled and revised up to date, and that the same shall be printed and bound; and that 3,000 copies shall be printed, of which 2,200 copies shall be for the use of the House of Representatives and 800 copies for the use of the Senate.

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

The message further announced that the Speaker had affixed his signature to the following enrolled bills and joint resolutions, and they were signed by the President pro tempore:

S. 1975. An act to authorize certain officers of the United States Navy, officers and enlisted men of the Marine Corps, and officers and enlisted men of the United States Army to accept such medals, orders, diplomas, decorations, and photographs as have been tendered them by foreign governments in appreciation of services rendered;

H. R. 1398. An act to provide for the establishment of a Coast Guard station at or near Crescent City, Calif.;

H. R. 2119. An act for the relief of Mrs. E. L. Babcock, mother and guardian of Nelson Babcock, a minor;

H. R. 2467. An act for the relief of Holy Cross Mission Hospital;

H. R. 3340. An act for the relief of Jesse S. Post;

H. R. 5058. An act to convey certain lands to Clackamas County, Oreg., for public-park purposes;

H. R. 8089. An act for the relief of Joseph J. Baylin;

H. R. 8370. An act to provide for the establishment of a Coast Guard station at Port Washington, Wis.;

H. R. 8506. An act for the relief of Oliver Faulkner;

H. R. 9042. An act to provide for the sale of the Port Newark Army Supply Base to the city of Newark, N. J.;

H. R. 9370. An act for the relief of Frank Cordova;

H. R. 9373. An act for the relief of H. L. & J. B. McQueen, Inc., and John L. Summers, former disbursing clerk, Treasury Department;

H. R. 9455. An act for the relief of Robert J. Mann;

H. R. 10308. An act to amend article 3 of the "Rules Concerning Lights, etc.," contained in the act entitled "An act to adopt regulations for preventing collisions upon certain harbors, rivers, and inland waters of the United States", approved June 7, 1897;

H. R. 10321. An act to amend section 4 of Public Act No. 286, Seventy-fourth Congress, approved August 19, 1935, as amended;

H. R. 10589. An act to amend section 32 of the act entitled "An act to authorize the construction of certain bridges and to extend the times for commencing and/or completing the construction of other bridges over the navigable waters of the United States, and for other purposes", approved August 30, 1935;

H. R. 10847. An act to authorize the acquisition of land for cemeterial purposes in the vicinity of New York City, N. Y.;

H. R. 11036. An act to amend section 4321, Revised Statutes (U. S. C., title 46, sec. 263), and for other purposes;

H. R. 11302. An act to authorize the Secretary of War to lend to the reunion committee of the United Confederate Veterans 3,000 blankets, olive drab, no. 4; 1,500 canvas cots, to be used at their annual encampment to be held at Shreveport, La., in June 1936;

H. R. 11346. An act for the relief of H. R. Heinicke, Inc.;

H. R. 12162. An act to create an additional division of the United States District Court for the Southern District of Mississippi to be known as the Hattiesburg division;

H. R. 12183. An act for the relief of Gladys Hinckley Werlich;

H. J. Res. 538. Joint resolution to provide for participation by the United States in the Ninth International Congress of Military Medicine and Pharmacy in Rumania in 1937; and to authorize and request the President of the United States to invite the International Congress of Military Medicine and Pharmacy to hold its tenth congress in the United States in 1939, and to invite foreign countries to participate in that congress;

H. J. Res. 547. Joint resolution providing for the importation of articles free from tariff or customs duty for the purpose of exhibition at Great Lakes Exposition to be held at Cleveland, Ohio, beginning in June 1936, and for other purposes; and

H. J. Res. 569. Joint resolution to authorize an appropriation for the expenses of participation by the United States in a conference at Brussels to revise the Convention for the Protection of Literary and Artistic Works, concluded at Bern, September 9, 1886, and revised at Rome, June 2, 1928.

ADDITIONAL JUDGE, THIRD CIRCUIT—WITHDRAWAL OF MOTION TO RECONSIDER

Mr. DAVIS. Mr. President, I ask unanimous consent to withdraw the motion which I entered on Wednesday last to reconsider the vote by which the bill (S. 4457) authorizing the appointment of an additional circuit judge for the third circuit was passed.

The PRESIDENT pro tempore. Without objection, the motion to reconsider is withdrawn.

DRAFT OF PROVISION PERTAINING TO APPROPRIATIONS FOR THE NATIONAL ARCHIVES (S. DOC. NO. 215)

The PRESIDENT pro tempore laid before the Senate a communication from the President of the United States, transmitting draft of a proposed provision pertaining to existing appropriations for The National Archives for the fiscal years 1936 and 1937, which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

DEFICIENCY AND SUPPLEMENTAL ESTIMATES FOR DEPARTMENT OF STATE (S. DOC. NO. 216)

The PRESIDENT pro tempore laid before the Senate a communication from the President of the United States, transmitting, pursuant to law, a deficiency estimate of appropriation for the fiscal year 1935 in the sum of $4,039.68, and supplemental estimates of appropriations for the fiscal years 1936 and 1937 in the sum of $12,808.80, amounting in all to $16,848.48, for the Department of State, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

ALLEGED COMMUNISTIC ACTIVITIES AT HOWARD UNIVERSITY (S. DOC. NO. 217)

The PRESIDENT pro tempore laid before the Senate a letter from the Acting Secretary of the Interior, transmitting, in response to Senate Resolution 294 (submitted by Mr. McNARY (for Mr. HASTINGS) and agreed to on Apr. 30, 1936), photostatic copies of reports made by a special agent of the Division of Investigations on September 23 and 30, 1935, together with memoranda from the director of investigations and the Solicitor of the Department of the Interior, pertaining to alleged communistic activities at Howard University, Washington, D. C., which, with the accompanying papers, was ordered to lie on the table.

Mr. McNARY. Mr. President, in the absence of the Senator from Delaware [Mr. HASTINGS], I ask that the report be printed as a Senate document.

The PRESIDENT pro tempore. Without objection, it is so ordered.

PETITIONS AND MEMORIALS

The PRESIDENT pro tempore laid before the Senate a letter in the nature of a petition from Mrs. W. F. Scofield,

of Dade City, Fla., praying for the adoption of measures to adjust the losses incident to processing tax on cotton, which was referred to the Committee on Agriculture and Forestry.

He also laid before the Senate a resolution adopted by the seventh district board of the Wisconsin Federation of Women's Clubs, favoring the repeal of section 213 of the Economy Act of 1932, known as the married persons' clause, which was referred to the Committee on Appropriations.

He also laid before the Senate a letter from Hon. Santiago Iglesias, Resident Commissioner of Puerto Rico, requesting that no action be taken on any proposal pending in Congress relative to the future status of Puerto Rico, particularly the bill (S. 4529) to provide for a referendum in Puerto Rico on the question of independence, to provide for carrying it into effect, and for other purposes, without granting full opportunity for all concerned to be heard, which was referred to the Committee on Territories and Insular Affairs.

Mr. WALSH presented a resolution adopted by the Newspaper Guild of Boston, Mass., favoring the continuation of Federal arts projects on a national basis under Federal control, which was referred to the Committee on Education and Labor.

He also presented the memorial of the management and several employees of the Fitchburg (Mass.) Engineering Corporation, remonstrating against the enactment of the bill (H. R. 12395) to provide revenue, equalize taxation, and for other purposes, unless the bill be amended so as to eliminate provisions preventing the building up of a surplus by corporations, which was referred to the Committee on Finance.

He also presented the petition of the Central Labor Union of Lowell, Mass., praying for the enactment of the bill (S. 4174) to foster and protect interstate commerce by authorizing the Interstate Commerce Commission to approve or disapprove of the consolidation or abandonment of carrier facilities of public service, which was referred to the Committee on Interstate Commerce.

Mr. COPELAND presented a resolution adopted by the New York Electrical Contractors Association, Inc., of New York City, favoring additional appropriations for the Public Works Administration, and that its expenditures be confined to activities that will not encroach on public construction normally carried on by private enterprise, which was referred to the Committee on Appropriations.

He also presented a telegram from citizens of New York City deploring recent aspersions on directors of the Federal theater project in New York City, which was referred to the Committee on Appropriations.

He also presented resolutions adopted by the Lower East Side Community Council, of New York City; the City Housing Authority, of Lackawanna; Bricklayers' Local Union No. 1, Bricklayers' International Union, Local No. 29, and the Old South Brooklyn Social Workers' League, all of Brooklyn; the Niagara Falls Central Labor Union, of Niagara Falls, and the Board of Child Welfare, of Schenectady, all in the State of New York, favoring the enactment of the so-called Wagner-Ellenbogen low-cost housing bill, which were referred to the Committee on Education and Labor.

He also presented a resolution adopted by the board of directors of the Utica (N. Y.) Chamber of Commerce protesting against the enactment of pending legislation to materially change the method of taxing the earnings of corporations, which was referred to the Committee on Finance.

He also presented a resolution adopted by the New York Unemployment Insurance State Advisory Council, of New York State, favoring an amendment to the Social Security Act providing that employers shall be given credit against Federal taxation for all contributions paid by them into an approved State unemployment insurance fund, which was referred to the Committee on Finance.

He also presented a resolution adopted by the Coal Merchants Association of Albany, Inc., of Albany, N. Y., favoring the enactment of House bill 12161, the so-called fuel-oil tax bill, which was referred to the Committee on Finance.

He also presented a resolution adopted by the Lockport (N. Y.) Board of Commerce favoring the enactment of legislation providing for the repeal of the long-and-short-haul clause of the Interstate Commerce Act, which was referred to the Committee on Interstate Commerce.

He also presented a copy of an editorial from the St. Louis Globe-Democrat, of April 29, 1936, relating to the merchant marine, which was ordered to lie on the table.

He also presented an editorial from the Miami (Fla.) Herald relative to pending legislation providing for the deportation of undesirable aliens, which was referred to the Committee on Immigration.

He also presented a letter from the Director of the United States Shipping Board Bureau, Department of Commerce, transmitting copy of a resolution adopted by the National Society Daughters of Founders and Patriots of America at Washington, D. C., endorsing the principles of the policy providing for the maintenance and development of a merchant marine necessary for the national defense and for the proper growth of our foreign and domestic commerce, which was ordered to lie on the table.

He also presented a telegram from the General Federation of Women's Clubs in convention at Coral Gables, Fla., favoring the enactment of legislation to strengthen existing laws relating to the deportation of alien criminals, which was ordered to lie on the table.

Mr. WAGNER presented a resolution adopted by the Utica (N. Y.) Chamber of Commerce protesting against the enactment of legislation to materially change the present method of taxing the earnings of corporations, which was referred to the Committee on Finance.

LOW-COST HOUSING

Mr. WAGNER. Mr. President, I ask unanimous consent to have printed in the RECORD and appropriately referred resolutions adopted by the Board of Aldermen of the City of New York; the Board of Child Welfare of Schenectady, N. Y.; and the Central Labor Union of Cannonsburg, Pa., favoring the enactment of the so-called low-cost housing bill.

There being no objection, the resolutions were referred to the Committee on Education and Labor and ordered to be printed in the RECORD, as follows:

Resolution memorializing the Congress of the United States to enact at the earliest possible date the Wagner housing bill, known as no. 4424

Resolved, That the Board of Aldermen of the City of New York does strongly and earnestly request the Congress of the United States to enact at the earliest possible date the United States Housing Act of 1936, known as the Wagner housing bill (S. 4424); and be it further

Resolved, That a copy of this resolution be sent to the Vice President of the United States, the Speaker of the House of Representatives, Senator WAGNER, and the chairmen of the House and Senate committees having jurisdiction thereof.

Whereas it has been proven that bad housing is detrimental to the health of the people in a community and that slums constitute an economic waste; and

Whereas it is an acknowledged fact that good housing for persons of low income cannot be provided through the ordinary channels of private enterprise; and

Whereas, city, State, and National Governments have accepted the principles and acknowledged the obligation of governmental responsibility for the housing of persons who cannot be reached through private enterprise; and

Whereas it is necessary for the Government to bear a certain portion of the burden of financing the clearance of slums and the construction of low-rent housing: Therefore be it

Resolved, That the Board of Child Welfare of Schenectady, N. Y., endorses a bill introduced in the Senate by the Honorable ROBERT F. WAGNER, United States Senator from New York, and in the House of Representatives by the Honorable HENRY ELLENBOGEN, Congressman from Pennsylvania, which reads as follows:

"A bill to provide financial assistance to the States and political subdivisions thereof for the elimination of unsafe and insanitary housing conditions, for the development of decent, safe, and sanitary dwellings for families of low income, and for the reduction of unemployment and the stimulation of business activity, to create a United States Housing Authority, and for other purposes."

Be it further

Resolved, That a copy of this resolution be forwarded to the President and to Hon. ROBERT F. WAGNER and Hon. ROYAL S. COPELAND, Senators from New York, and the following Representatives: Hon. FRANK W. CROWTHER, Hon. BERTRAND SNELL, Hon. JAMES W. WADSWORTH, Hon. PARKER CORNING, and Hon. HAMILTON FISH.

Whereas we, in Canonsbburg, Pa., are urgently aware of the bad housing conditions here and elsewhere; of the acute housing shortage, which is growing rapidly worse; of the inability of private enterprise or local initiative alone to remedy this situation; and of the suffering caused by continuous unemployment in the building trades; and

Whereas the A. F. of L., in convention assembled last October, resolved unanimously that "a long-term public housing policy must be adopted in order to guarantee a minimum standard of decency in housing for all families"; and

Whereas the A. F. of L. convention likewise resolved that "broad Federal, State, and local legislation, establishing workers' housing as a public responsibility, setting up permanent machinery to effectuate the ends herein set forth, and providing adequate sources of funds, must be enacted as quickly as possible; and that all labor organizations should actively sponsor and promote such legislation, and should investigate and publicize the stand on housing of all candidates for office"; and

Whereas the Wagner-Ellenbogen housing bill presents the first concrete forward step toward fulfillment of labor's housing program: Be it therefore

Resolved, That the Canonsburg Central Labor Union heartily endorses the Wagner-Ellenbogen housing bill and urges its immediate adoption by the Congress of the United States; and be it further

Resolved, That we hereby petition the Congress, while leaving the general policy and administrative set-up as it now is in the bill, to increase the immediate appropriation from $51,000,000 to $100,000,000 and the first bond issue from $100,000,000 to $250,000,000, with corresponding increases for ensuing years; and be it further

Resolved, That copies of the resolution be sent to the President and to the Senators and Representatives in Congress of this State.

RESTORATION OF RELIEF RESPONSIBILITIES TO THE STATES

Mr. VANDENBERG. Mr. President, a few days ago I discussed on the floor of the Senate the question of the restoration of relief responsibilities to the States. I desire to ask to have printed in the RECORD and appropriately referred a letter and resolution upon this subject from the managing director of the Detroit Community Fund.

There being no objection, the letter and resolution were referred to the Committee on Appropriations and ordered to be printed in the RECORD, as follows:

THE DETROIT COMMUNITY FUND,
Detroit, Mich., May 6, 1936.

Hon. ARTHUR H. VANDENBERG,
Washington, D. C.

MY DEAR SENATOR: The enclosed suggested national policy for relief has been unanimously passed by the executive committee of the Detroit Community Fund and the board of directors of the Detroit Council of Social Agencies of Metropolitan Detroit, and I, as secretary, have been requested to forward this resolution to you as a suggestion to be followed in establishing the necessary relief legislation by the Congress of the United States.

Sincerely yours,

PERCIVAL DODGE, *Managing Director.*

Suggested national policy for relief, community chests and councils, incorporated.

The time has come in the interest of meeting the emergency relief needs and in laying a foundation upon which a long-time national relief program can be built when Federal, State, and local responsibility should be clearly defined.

1. Therefore it is recommended that Federal appropriations for relief be made on a grant-in-aid basis to the States after establishing a formula for financial participation of these various governmental units. This formula for the next 12 months should probably be about 70 percent Federal and 30 percent State and local. These grants-in-aid should be for both direct relief and work relief, as decided by local authorities, except that the Federal administration might require some minimum percentage to be spent on work relief. The ultimate program should look forward to placing as much financial responsibility upon States and local communities as they can carry. Private welfare agencies can never assume responsibility for an emergency relief program. To do so would wreck the services these agencies have always performed for family welfare, children, the sick, and the under-privileged youth, and the general welfare program which is indispensable for community life.

2. It is further recommended that the administrative responsibility be placed upon local communities, subject to general standards of administrative procedure set by the Federal and State Governments. These standards should include the establishment of State and local welfare departments.

3. It is further suggested that a Federal commission be appointed by the President to consider and recommend the long-time Federal relief policy.

STATUS OF BONUS RECIPIENTS ON WORK-RELIEF PROJECTS

Mr. VANDENBERG. I also present a resolution from the Wayne County Council, Veterans of Foreign Wars, dealing with the subject matter which I briefly suggested on the floor of the Senate recently, namely, the withholding of work relief from veterans who are being paid their bonus. I ask that the resolution may be printed in the RECORD and appropriately referred.

There being no objection, the resolution was referred to the Committee on Appropriations and ordered to be printed in the RECORD, as follows:

Whereas it has been reported to us that it is the intention of the Works Progress Administration of the State of Michigan to remove from service all veterans working thereunder, when and as they receive their allotments of Government bonds in lieu of their adjusted-service certificates; and

Whereas we feel that such action on the part of the Works Progress Administration will force such veterans to sacrifice for cash any bonds they may receive and tend to depreciate the value of Government bonds of this character to all holders; and

Whereas such action on the part of the Works Progress Administration would be contrary to the intent of Congress in ordering the allotment of these bonds to the veterans, and a nullification of the act; and

Whereas we feel that such a course would result in unjust discrimination against the veterans as a class and cause unfair hardships to them and their dependents in keeping them in a continual depressed financial condition: Therefore be it

Resolved, That we, the Wayne County Council, Veterans of Foreign Wars, meeting this 11th day of May 1936, do hereby protest any such unjust act be perpetrated on the veterans as the reported ruling of the Works Progress Administration, which would prevent him from settling past obligations, keep him in idleness while the cash from the sale of his bonds was being dissipated, and force him to apply for reinstatement with the Works Progress Administration in order that he and his family may live after his funds are gone; and be it further

Resolved, That a copy of this resolution be forwarded to Mr. Lynn Pierson, State administrator, Works Progress Administration of the State of Michigan, Lansing, Mich., and a copy be sent to Mr. J. J. O'Brien, county administrator, Works Progress Administration, Water Board Building, Detroit, Mich., to the two Senators from the State of Michigan, and the Congressmen from Wayne County.

REPORTS OF COMMITTEES

Mr. AUSTIN, from the Committee on Military Affairs, to which was referred the bill (S. 4289) to correct the military records of DeRosey C. Cabell, Thomas McF. Cockrill, James N. Caperton, Junius H. Houghton, Otto F. Lang, Paul B. Parker, James DeB. Walbach, and Victor W. B. Wales, reported it with amendments and submitted a report (No. 2027) thereon.

Mr. CHAVEZ, from the Committee on Foreign Relations, to which was referred the bill (S. 3536) authorizing construction, operation, and maintenance of Rio Grande canalization project and authorizing appropriation for that purpose, reported it with amendments and submitted a report (No. 2029) thereon.

Mr. POPE, from the Committee on Agriculture and Forestry, to which was referred the bill (S. 4520) to amend the act approved June 29, 1935 (49 Stat. 436–439), entitled "An act to provide for research into basic laws and principles relating to agriculture and to provide for the further development of cooperative agricultural extension work and the more complete endowment and support of land-grant colleges", reported it without amendment and submitted a report (No. 2030) thereon.

Mr. COPELAND, from the Committee on Immigration, to which was referred the bill (H. R. 9991) to extend the time for applying for and receiving benefits under the act entitled "An act to provide means by which certain Filipinos can emigrate from the United States", approved July 10, 1935, reported it without amendment and submitted a report (No. 2031) thereon.

Mr. SHEPPARD, from the Committee on Military Affairs, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

H. R. 190. A bill granting authority to the Secretary of War to license the use of a certain parcel of land situated in Fort Brady Reservation to Ira D. MacLachlan Post, No. 3, the American Legion, for 15 years (Rept. No. 2032); and

H. R. 10849. A bill to authorize an appropriation for improvement of ammunition storage facilities at Aliamanu, Territory of Hawaii, and Edgewood Arsenal, Md. (Rept. No. 2033).

Mr. SHEPPARD also, from the Committee on Commerce, to which was referred the bill (H. R. 11006) providing for the examination of the Nueces River and its tributaries in the State of Texas for flood-control purposes, reported it without amendment and submitted a report (No. 2034) thereon.

TAXATION OF INTOXICATING LIQUOR—REPORT OF FINANCE COMMITTEE

Mr. KING. Mr. President, there has been before the Committee on Finance for a long time House bill 9185, a formidable-looking bill of about 90 pages. I am instructed by the Finance Committee to report the bill; and I shall ask early consideration of it, because it is an important bill, and it ought to be passed before the tax bill.

Mr. KING, from the Committee on Finance, to which was referred the bill (H. R. 9185) to insure the collection of the revenue on intoxicating liquor, to provide for the more efficient and economical administration and enforcement of the laws relating to the taxation of intoxicating liquor, and for other purposes, reported it with amendments and submitted a report (No. 2028) thereon.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. BARKLEY:

A bill (S. 4627) to create a division of stream-pollution control in the Bureau of the Public Health Service, and for other purposes; to the Committee on Commerce.

By Mr. BLACK:

A bill (S. 4628) to aid the several States in making certain toll bridges free bridges, to authorize an appropriation for such purpose, to make such appropriation available for matching with funds apportioned under the Federal Highway Act, and for other purposes; to the Committee on Commerce.

By Mr. RUSSELL:

A bill (S. 4629) to provide for a refund of taxes and amounts paid for tax-exemption certificates under the Bankhead Cotton Act of 1934, the Kerr-Smith Tobacco Act, as amended, and the Potato Act of 1935; to the Committee on Finance.

By Mr. SCHWELLENBACH:

A bill (S. 4630) for the relief of Charles Parker; to the Committee on Finance.

By Mr. McKELLAR:

A bill (S. 4631) for the relief of Drs. W. S. Davis, P. A. Palmer, H. S. Oakes, and J. M. Ousley; to the Committee on Claims.

By Mr. SHEPPARD:

A bill (S. 4632) providing for a survey of the Colorado River, Tex., above the county line between Coke and Runnels Counties; to the Committee on Commerce.

By Mr. JOHNSON:

A bill (S. 4633) to provide for the selection of certain lands in the State of California for the use of the California State park system; and

A bill (S. 4634) to provide for the selection of certain lands in the State of California for the use of the California State park system; to the Committee on Public Lands and Surveys.

By Mr. COPELAND:

A bill (S. 4635) to authorize the coinage of 50-cent silver pieces in commemoration of the one hundred and fiftieth anniversary of the adoption of the Constitution of the United States; to the Committee on Banking and Currency.

A bill (S. 4636) granting the consent of Congress to the Interstate Bridge Commission of the State of New York and the Commonwealth of Pennsylvania to reconstruct, maintain, and operate a highway bridge across the West Branch of the Delaware River between a point in the vicinity of the village of Hancock, Delaware County, N. Y., and a point in the town of Buckingham, Wayne County, Pa., and a highway bridge across the Delaware River between points in the village of Barryville, Sullivan County, N. Y., and the village of Shohola, Pike County, Pa.; to the Committee on Commerce.

HOUSE BILLS REFERRED

The following bills were severally read twice by their titles and referred to the Committee on Pensions:

H. R. 12700. An act granting pensions to certain soldiers of the Civil War;

H. R. 12701. An act granting pensions and increase of pensions to certain helpless and dependent children of soldiers of the Civil War;

H. R. 12702. An act granting increase of pensions to certain widows and former widows of soldiers and sailors of the Civil War; and

H. R. 12703. An act granting pensions to certain widows and former widows of soldiers, sailors, and marines of the Civil War.

CHANGE OF REFERENCE

Mr. CONNALLY. I move that the Committee on Claims be discharged from the further consideration of the bill (S. 4576) to amend an act entitled "An act authorizing the Court of Claims to hear, consider, adjudicate, and enter judgment upon the claims against the United States of J. A. Tippit, L. P. Hudson, Chester Howe, J. E. Arnold, Joseph W. Gillette, J. S. Bounds, W. N. Vernon, T. B. Sullivan, J. H. Neill, David C. McCallib, J. J. Beckham, and John Toles", approved June 28, 1934, and that it be referred to the Committee on Indian Affairs. I have consulted with the chairman of the Committee on Indian Affairs, and this reference is agreeable to him.

The motion was agreed to.

PASSAMAQUODDY AND FLORIDA CANAL PROJECTS—AMENDMENTS

Mr. VANDENBERG. Mr. President, a few days ago the Senator from Arkansas [Mr. ROBINSON] introduced Senate Joint Resolution 266, respecting the Passamaquoddy tidal power and Florida ship canal projects. I ask to present a series of proposed amendments to the joint resolution, and request that they be printed and lie on the table.

Mr. ROBINSON. Mr. President, with respect to the amendments which the Senator from Michigan has just presented to the joint resolution relating to the Florida canal and the Passamaquoddy projects, let me say that the joint resolution was referred to the Committee on Commerce. I inquire of the Senator whether he desires to have his amendments also referred to that committee for its consideration?

Mr. VANDENBERG. I should be very glad to have them take that course.

Mr. ROBINSON. Very well.

The PRESIDENT pro tempore. The amendments submitted by the Senator from Michigan will be received, printed, and referred to the Committee on Commerce.

AMENDMENTS TO FIRST DEFICIENCY APPROPRIATION BILL

Mr. BARKLEY submitted amendments intended to be proposed by him to House bill 12624, the first deficiency appropriation bill, which were referred to the Committee on Appropriations and ordered to be printed, as follows:

On page 19, line 6, after "Bend", insert the following: "a dam at or near Gilbertsville, Ky., and a dam at or near Watts Bar, Tenn.,".

On page 19, line 6, strike out all after "Bend" down to and including "River", in line 8.

On page 19, line 18, strike out "$39,900,000" and insert in lieu thereof "$41,100,000."

Mr. RUSSELL submitted an amendment intended to be proposed by him to House bill 12624, the first deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed, as follows:

On page 22, line 20, to change the period to a colon and insert the following: *"Provided further,* That not more than one-half of 1 percent of the total number of persons employed within any State shall be persons who were nonresidents of the State at the time of the appointment or employment of such person, nor shall more than 1 percent of the total amount allocated for expenditures for any purpose within any State be paid as salaries, wages, or other compensation, to persons who were not bona fide residents of such State at the time of appointment or employment.

AMENDMENTS TO RIVER AND HARBOR FLOOD CONTROL BILL

Mr. MINTON and Mr. SHEPPARD each submitted an amendment, and Mr. WALSH submitted two amendments intended to

be proposed by them, respectively, to the bill (H. R. 8455) authorizing the construction of certain public works on rivers and harbors for flood control, and for other purposes, which were referred to the Committee on Commerce and ordered to be printed.

INTERNAL-REVENUE TAXATION—AMENDMENTS

Mr. SCHWELLENBACH submitted an amendment and Mr. BONE and Mr. SCHWELLENBACH jointly submitted an amendment, intended to be proposed by them to the bill (H. R. 12395) to provide revenue, equalize taxation, and for other purposes, which were referred to the Committee on Finance and ordered to be printed.

INTOXICATING LIQUOR—AMENDMENTS

Mr. McADOO and Mr. JOHNSON jointly submitted three amendments intended to be proposed by them to the bill (H. R. 9185) to insure the collection of the revenue on intoxicating liquor, to provide for the more efficient and economical administration and enforcement of the laws relating to the taxation of intoxicating liquor, and for other purposes, which were ordered to lie on the table and to be printed.

PRINTING OF HEARINGS RELATIVE TO COTTON COOPERATIVES

Mr. McKELLAR submitted the following concurrent resolution (S. Con. Res. 39), which was referred to the Committee on Printing:

Resolved by the Senate (the House of Representatives concurring), That, in accordance with paragraph 3 of section 2 of the Printing Act approved March 1, 1907, the Committee on Appropriations of the Senate be, and is hereby, empowered to have printed 2,000 additional copies of the hearings held before the subcommittee of said committee of the Senate during the first session of the Seventy-fourth Congress, pursuant to the resolution (S. Res. 185) authorizing the Committee on Appropriations to conduct an investigation of the expenditures by the Federal Government for the Cotton Cooperatives, etc. These 2,000 copies are to be divided as follows: 1,500 copies of volume no. 1 and 500 copies of volume no. 2.

RURAL ELECTRIFICATION

Mr. NORRIS. Mr. President, I present the conference report on Senate bill 3483, to provide for rural electrification, and for other purposes, and I ask unanimous consent for its immediate consideration.

The PRESIDENT pro tempore. Is there objection?

There being no objection, the Senate proceeded to consider the report, which was read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 3483) to provide for rural electrification, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the House amendment insert the following:

"That there is hereby created and established an agency of the United States to be known as the 'Rural Electrification Administration', all of the powers of which shall be exercised by an Administrator, who shall be appointed by the President, by and with the advice and consent of the Senate, for a term of ten years, and who shall receive a salary of $10,000 per year. This Act may be cited as the 'Rural Electrification Act of 1936.'

"SEC. 2. The Administrator is authorized and empowered to make loans in the several States and Territories of the United States for rural electrification and the furnishing of electric energy to persons in rural areas who are not receiving central station service, as hereinafter provided; to make, or cause to be made, studies, investigations, and reports concerning the condition and progress of the electrification of rural areas in the several States and Territories; and to publish and disseminate information with respect thereto.

"SEC. 3. (a) The Reconstruction Finance Corporation is hereby authorized and directed to make loans to the Administrator, upon his request approved by the President, not exceeding in aggregate amount $50,000,000 for the fiscal year ending June 30, 1937, with interest at 3 per centum per annum upon the security of the obligations of borrowers from the Administrator appointed pursuant to the provisions of this Act or from the Administrator of the Rural Electrification Administration established by Executive Order Numbered 7037: *Provided*, That no such loan shall be in an amount exceeding 85 per centum of the principal amount outstanding of the obligations constituting the security therefor: *And provided further*, That such obligations incurred for the purpose of financing the construction and operation of generating plants, electric transmission and distribution lines, or systems shall be fully amortized over a period not to exceed twenty-five years, and that the maturity of such obligations incurred for the purpose of financing the wiring of premises and the acquisition and installation of electrical and plumbing appliances and equipment shall not exceed two-thirds of the assured life thereof and not more than five years. The Administrator is hereby authorized to make all such endorsements, to execute all such instruments, and to do all such acts and things as shall be necessary to effect the valid transfer and assignment to the Reconstruction Finance Corporation of all such obligations.

"(b) There is hereby authorized to be appropriated out of any money in the Treasury not otherwise appropriated, for the fiscal year ending June 30, 1938, and for each of the eight years thereafter, the sum of $40,000,000 for the purposes of this Act as hereinafter provided.

"(c) Fifty per centum of the annual sums herein made available or appropriated for the purposes of this Act shall be allotted yearly by the Administrator for loans in the several States in the proportion which the number of their farms not then receiving central station electric service bears to the total number of farms of the United States not then receiving such service. The Administrator shall, within ninety days after the beginning of each fiscal year, determine for each State and for the United States the number of farms not then receiving such service.

"(d) The remaining 50 per centum of such annual sums shall be available for loans in the several States and in the Territories, without allotment as hereinabove provided, in such amounts for each State and Territory as, in the opinion of the Administrator, may be effectively employed for the purposes of this Act, and to carry out the provisions of section 7: *Provided, however*, That not more than 10 per centum of said unallotted annual sums may be employed in any one State, or in all of the Territories.

"(e) If any part of the annual sums made available for the purposes of this Act shall not be loaned or obligated during the fiscal year for which such sums are made available, such unexpended or unobligated sums shall be available for loans by the Administrator in the following year or years without allotment: *Provided, however*, That not more than 10 per centum of said sums may be employed in any one State or in all of the Territories: *And provided further*, That no loans shall be made by the Reconstruction Finance Corporation to the Administrator after June 30, 1937.

"(f) All moneys representing payments of principal and interest on loans made by the Administrator under this Act shall be covered into the Treasury as miscellaneous receipts, except that any such moneys representing payments of principal and interest on obligations constituting the security for loans made by the Reconstruction Finance Corporation to the Administrator shall be paid to the Reconstruction Finance Corporation in payment of such loans.

"SEC. 4. The Administrator is authorized and empowered, from the sums hereinbefore authorized, to make loans to persons, corporations, States, Territories, and subdivisions and agencies thereof, municipalities, peoples utility districts and cooperative, nonprofit, or limited-dividend associations organized under the laws of any State or Territory of the United States, for the purpose of financing the construction and operation of generating plants, electric transmission and distribution lines or systems for the furnishing of electric energy to persons in rural areas who are not receiving central station service: *Provided, however*, That the Administrator, in making such loans, shall give preference to States, Territories, and subdivisions and agencies thereof, municipalities, peoples utility districts, and cooperative, nonprofit, or limited dividend associations, the projects of which comply with the requirements of this Act. Such loans shall be on such terms and conditions relating to the expenditure of the moneys loaned and the security therefor as the Administrator shall determine and may be made payable in whole or in part out of income: *Provided, however*, That all such loans shall be self-liquidating within a period of not to exceed twenty-five years, and shall bear interest at a rate equal to the average rate of interest payable by the United States of America on its obligations, having a maturity of ten or more years after the dates thereof, issued during the last preceding fiscal year in which any such obligations were issued: *Provided further*, That no loan for the construction, operation, or enlargement of any generating plant shall be made unless the consent of the State authority having jurisdiction in the premises is first obtained. Loans under this section and section 5 shall not be made unless the Administrator finds and certifies that in his judgment the security therefor is reasonably adequate and such loan will be repaid within the time agreed.

"SEC. 5. The Administrator is authorized and empowered, from the sums hereinbefore authorized, to make loans for the purpose of financing the wiring of the premises of persons in rural areas and the acquisition and installation of electrical and plumbing appliances and equipment. Such loans may be made to any of the borrowers of funds loaned under the provisions of section 4, or to any person, firm, or corporation supplying or installing the said wiring, appliances, or equipment. Such loans shall be for such terms, subject to such conditions, and so secured as reasonably to assure repayment thereof, and shall be at a rate of interest equal to the average rate of interest payable by the United States of America on its obligations, having a maturity of ten or more years after the dates thereof, issued during the last preceding fiscal year in which any such obligations were issued.

"SEC. 6. For the purpose of administering this Act and for the purpose of making the studies, investigations, publications, and

reports herein provided for, there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, such sums as shall be necessary.

"SEC. 7. The Administrator is authorized and empowered to bid for and purchase at any foreclosure or other sale, or otherwise to acquire, property pledged or mortgaged to secure any loan made pursuant to this Act; to pay the purchase price and any costs and expenses incurred in connection therewith from the sums authorized in section 3 of this Act; to accept title to any property so purchased or acquired in the name of the United States of America; to operate or lease such property for such period as may be deemed necessary or advisable to protect the investment therein, but not to exceed five years after the acquisition thereof; and to sell such property so purchased or acquired, upon such terms and for such consideration as the Administrator shall determine to be reasonable.

"No borrower of funds under section 4 shall, without the approval of the Administrator, sell or dispose of its property, rights, or franchises, acquired under the provisions of this Act, until any loan obtained from the Rural Electrification Administration, including all interest and charges, shall have been repaid.

"SEC. 8. The administration of loans and contracts entered into by the Rural Electrification Administration established by Executive Order Numbered 7037, dated May 11, 1935, may be vested by the President in the Administrator authorized to be appointed by this Act; and in such event the provisions of this Act shall apply to said loans and contracts to the extent that said provisions are not inconsistent therewith. The President may transfer to the Rural Electrification Administration created by this Act the jurisdiction and control of the records, property (including office equipment), and personnel used or employed in the exercise and performance of the functions of the Rural Electrification Administration established by such Executive order.

"SEC. 9. This Act shall be administered entirely on a nonpartisan basis, and in the appointment of officials, the selection of employees, and in the promotion of any such officials or employees, no political test or qualification shall be permitted or given consideration, but all such appointments and promotions shall be given and made on the basis of merit and efficiency. If the Administrator herein provided for is found by the President of the United States to be guilty of a violation of this section, he shall be removed from office by the President, and any appointee or selection of officials or employees made by the Administrator who is found guilty of a violation of this Act shall be removed by the Administrator.

"SEC. 10. The Administrator shall present annually to the Congress not later than the 20th day of January in each year a full report of his activities under this Act.

"SEC. 11. In order to carry out the provisions of this Act the Administrator may accept and utilize such voluntary and uncompensated services of Federal, State, and local officers and employees as are available, and he may without regard to the provisions of civil-service laws applicable to officers and employees of the United States appoint and fix the compensation of attorneys, engineers, and experts, and he may, subject to the civil-service laws, appoint such other officers and employees as he may find necessary and prescribe their duties. The Administrator is authorized, from sums appropriated pursuant to section 6, to make such expenditures (including expenditures for personal services; supplies and equipment; lawbooks and books of reference; directories and periodicals; travel expenses; rental at the seat of government and elsewhere; the purchase, operation, or maintenance of passenger-carrying vehicles; and printing and binding) as are appropriate and necessary to carry out the provisions of this Act.

"SEC. 12. The Administrator is authorized and empowered to extend the time of payment of interest or principal of any loans made by the Administrator pursuant to this Act: *Provided, however,* That with respect to any loan made under section 4, the payment of interest or principal shall not be extended more than five years after such payment shall have become due, and with respect to any loan made under section 5, the payment of principal or interest shall not be extended more than two years after such payment shall have become due: *And provided further,* That the provisions of this section shall not apply to any obligations or the security therefor which may be held by the Reconstruction Finance Corporation under the provisions of section 3.

"SEC. 13. As used in this Act the term 'rural area' shall be deemed to mean any area of the United States not included within the boundaries of any city, village, or borough having a population in excess of fifteen hundred inhabitants, and such term shall be deemed to include both the farm and nonfarm population thereof; the term 'farm' shall be deemed to mean a farm as defined in the publications of the Bureau of the Census; the term 'person' shall be deemed to mean any natural person, firm, corporation, or association; the term 'Territory' shall be deemed to include any insular possession of the United States.

"SEC. 14. If any provision of this Act, or the application thereof to any person or circumstances, is held invalid, the remainder of the Act and the application of such provision to other persons or circumstances shall not be affected thereby."

And the House agree to the same.

E. D. SMITH,
BURTON K. WHEELER,
G. W. NORRIS,
Managers on the part of the Senate.

SAM RAYBURN,
GEORGE HUDDLESTON,
CARL E. MAPES,
Managers on the part of the House.

Mr. ROBINSON. Mr. President, may I inquire of the Senator from Nebraska whether the conference report represents a full agreement between the two Houses?

Mr. NORRIS. It is a full agreement; yes, sir.

Mr. ROBINSON. Will the Senator briefly explain the nature of the agreement?

Mr. NORRIS. Mr. President, there were several amendments made by the House, most of which were unimportant, and unless a particular question is asked about them I will not refer to them. There were, however, three very material disagreements. One pertained to the interest which could be charged for making loans for the construction of rural lines and also for equipment. The Senate bill provided for a rate of interest not to exceed 3 percent. The House bill provided for a rate of interest of not less than 3 percent. So what was the maximum in the bill as passed by the Senate became the minimum in the House bill. The conferees all agreed to a modification of the rate of interest provision so that the rate of interest shall be the same as that which the Government has to pay for any money it borrowed on a 10-year or longer period during the fiscal year preceding that in which the loan shall be made.

Mr. McKELLAR. Mr. President, will the Senator kindly repeat his last statement? I did not understand it fully, as I was engaged at the moment. My attention was diverted.

Mr. NORRIS. The agreement of the conferees is that the rate of interest charged for rural electrification purposes shall be the same as that the Government has to pay for money borrowed by it during the preceding fiscal year on the basis of 10 years or a longer period.

Another disagreement was in reference to the loaning of money to private corporations. The Senate bill provided that the money could be loaned only to public corporations, such as municipalities and to farm and other organizations operating on a nonprofit basis. The House included private corporations in the list of those who could borrow. The agreement of the conferees, as we have reported it, is that the House provision to loan to private corporations or persons shall remain in the bill, but a proviso has been added to the effect that in making such loans the Rural Electrification Administrator shall give preference to loans asked for by public bodies and organizations of farmers operating on a nonprofit basis.

Another disagreement was as to the Senate provision that in the administration of all rural lines and in the loaning of money, the machinery set up should be operated without regard to partisan politics, and that efficiency should be the guide instead of any political affiliation in making appointments or in promotions or in any demotions or discharges. The House struck that provision out entirely. Under the agreement reached by the conferees that provision has been retained in the bill.

I do not know of any other material disagreements. If there are any questions which Senators desire to ask, I shall be very glad to answer them if I can.

The PRESIDENT pro tempore. The question is on agreeing to the conference report.

The report was agreed to.

CHARLESTON ARMY BASE TERMINAL, CHARLESTON, S. C.—CONFERENCE REPORT

Mr. COPELAND submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3789) authorizing the Secretary of Commerce to convey the Charleston Army Base Terminal to the city of Charleston, South Carolina, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its amendment numbered 2.

That the Senate recede from its disagreement to the amendment of the House numbered 1, and agree to the same.

ROYAL S. COPELAND,
HIRAM W. JOHNSON,
MORRIS SHEPPARD,
Managers on the part of the Senate.

S. O. BLAND,
WILLIAM I. SIROVICH,
RICHARD J. WELCH,
Managers on the part of the House.

The report was agreed to.

SENATOR LEWIS, OF ILLINOIS—AN APPRECIATION BY C. L. MOSHER

Mr. ASHURST. Mr. President, I ask leave to have printed in the CONGRESSIONAL RECORD an appreciation written by Mr. Clinton L. Mosher, published on Friday, May 8, 1936, in the Brooklyn Daily Eagle, of one of the most erudite and accomplished gentlemen in public life in America—Senator JAMES HAMILTON LEWIS, of Illinois.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Brooklyn Daily Eagle of May 8, 1936]

CONGRESS CAPERS

By Clinton L. Mosher

J. HAM LEWIS, EXPERT ON LIVY—A CHARMING MAN, BRIGHT WITH PLUMAGE, BRILLIANT WITH WORDS—TO THE SENATE HE'S INDISPENSABLE

WASHINGTON, May 8.—When J. HAM LEWIS first came to the United States Senate from Illinois, with his maroon spats, pink whiskers, he was known as the greatest dude in America and the garrulous rainbow.

As time wore on and it became apparent there was a great deal more to the Senator than a charming personality, bright plumage, and fine-sounding words, an editorial writer rose up in his wrath and, in an editorial entitled "Hark, Hark, the Lark", declared J. Ham's speeches would sound just as good read backward.

Yet LEWIS is an extremely valuable, if eccentric, Member of the upper branch of Congress, if for no other reason than that he preserves the fine old tradition that a Senator should be able to express himself on the floor of the Chamber with a better brand of language than is employed by an alderman on a soapbox during campaigns.

It is very refreshing, for example, after spending a day listening to second-rate mouthings from his colleagues, to have J. Ham stand at his desk, adjust his purple ascot tie, and repeat at great length the discourses of Christ and the orations of Gaius Plinius Caecilius Secundus, late of Rome.

A youth grown old

At this present age—he won't tell the date of his birth—the Senator is a thoroughly enjoyable character. As a youth, in what was the Territory of Washington, J. Ham first grew his facial shrubbery in order to conceal his lack of years. He once said he was born in 1862, and stuck to his story for many years, until his mother, unable to stand it any longer, squelched him.

He is greatly in demand at social functions in Washington, and so is his charming wife, whose parlor tricks consist of telling uproariously funny stories about her dignified husband and in reading fortunes. She once attempted to read the palm of a Supreme Court Justice while the A. A. A. case was pending, but he backed away. It would have served as an excellent test of Mrs. Lewis' familiarity with black magic.

Repaid his benefactors

The Senator was born in Danville, Va., the child of the customary poor but proud parents. When the time came for young LEWIS to make his way in the world, he secured employment as an office boy in Augusta, Ga., but the job was not to his liking and he ran away to Savannah, where he got work washing dishes, a humbler position, which, nevertheless, gave him a degree of independence.

He soon discovered how necessary to success is an education and borrowed from friends to pay his tuition in the University of Virginia. Years later, when he had laid aside some money from a lucrative law practice, the Senator returned to Savannah, hired an open barouche and, dressed in his loudest clothes, went about the city with a bag of gold, paying off his benefactors. It was a grand performance, and typical of LEWIS. After all, isn't it a fine thing to have in the Senate a man so honest about paying his debts? J. Ham believes the foreign countries should do as he did and pay up, and he makes frequent speeches to that effect.

Once out of college, LEWIS was fired with an ambition to be Governor of the Territory of Washington. He started for the north country where his parents had gone, but got only as far as San Francisco, where he fell so low as to accept employment as a newspaper reporter. His wages were $8 a week. He did so well as a reporter that he was promoted to the job of stevedore on the docks, studying law on the side.

His one handicap at the time was his youth. He was too young to get the rich clients, so he sprouted the famous pink whiskers, which added years to his appearance. His next move was to purchase a horse and loud clothes and ride through the main streets to attract attention and also business. The trick worked.

What? Perfumed whiskers

Just before the turn of the century J. Ham was the Democratic leader of the Territorial senate, the husband of Rose Lawton Douglas, and a power in the Northwest. He almost achieved his ambition to be Governor, and probably would have been successful had he not refused the nomination because he disagreed with his party over some obscure matter then known as the ditch issue.

In 1896 LEWIS was elected to the House of Representatives. His entrance into the Chamber caused wild excitement. The first charge made against him was that he perfumed his whiskers. He retaliated by introducing a resolution to curb the powers of Tom Reed, the Speaker. The resolution, of course, fell by the wayside, and Czar Reed and LEWIS later became friends when someone sent Reed a letter in Greek and LEWIS was the only person who could translate it.

Sword tipped with rose

When the Spanish-American War came along, LEWIS joined the Washington National Guard, and was promoted to the rank of lieutenant colonel. He had made pictures of himself, striking fine poses with his sword. Years later, when he reached the Senate, J. Ham said of his verbal sword that it is always tipped with a rose.

He quit the House in 1898 to pursue his law practice here and abroad. One of his clients was a syndicate that proposed a tunnel under the Bering Straits and run through trains from Paris to New York. He traveled through practically every country in Europe, partly on business, partly in search of information to bolster his theory that the lands across the sea are covetous of our wealth, security, and prestige. He is to this day the perpetual Paul Revere.

The year 1913 saw LEWIS back in Congress, this time in the Senate. When the World War broke out he volunteered for service in the regiment which the late Theodore Roosevelt was organizing, but Congress put a stop to the whole thing. Later the Senator managed to get a job that took him to Europe to observe the movement of supplies. He saw considerable fighting, and on one occasion a stray bullet whizzed through his facial shrubbery, but without causing any damage. King Albert was so pleased with the incident that he offered to decorate the Senator but, because the decoration would have been unlawful, J. Ham turned it down.

Clemenceau and the scholar

While abroad, the Senator called on Clemenceau. They had an extended conversation on the problems of the war. Reporters gathered around LEWIS as he left the Tiger's office. Clemenceau, said LEWIS, had predicted the end of the war within a year.

The next day the Premier's office announced:

"Premier Clemenceau cannot be held responsible for uncontrolled statements of well-intentioned and honorable visitors more or less familiar with the nuances of the French language."

It was a bitter blow to LEWIS, the scholar, but he took it and left foreign shores aboard an Army transport. On the way back a German submarine torpedoed the boat. LEWIS escaped. An observer said later of the Senator that he simply smoothed his tie and helped the wounded.

Back in Washington, LEWIS announced his intention of leaving the Senate, but President Wilson, his close friend, pleaded with him to run again. Despite a disagreement they had had over the League of Nations, LEWIS accepted renomination, only to be defeated in the Republican landslide that carried into his seat Medill McCormick.

Spent $35 and won

Twelve years later, after more than a decade devoted mostly to local politics and the law, LEWIS engaged in an election fight with McCormick's wife, Ruth Hanna McCormick, the daughter of the famous Mark Hanna. Ruth spent $250,000 getting the nomination; LEWIS, $35. Mrs. McCormick was a dry Republican; LEWIS a wet Democrat, both running in a wet Republican State. The victory went to LEWIS.

Let those who think of the Senator from Illinois only as the man who had pink whiskers lend his attention to the Senate debate on neutrality.

Said Senator THOMAS of Utah: "The real definition for war is ultima ratio regum. Will the Senator from Illinois translate that for me?"

"I think that means the last argument of kings," replied LEWIS.

And again, THOMAS speaking:

"If I may have the attention of the able Senator from Illinois, probably we may quote a line from Livy, and get the Roman theory, showing that there was no place for the neutrality idea there:

" 'Media nulla via est'—'There is no middle way; and those who fight, or those who are enemies to the Romans, are either friends, allies, or enemies.'

"The Roman theory had its reflection in the statement which I think will be found in the New Testament, that those who are not for us are against us. Am I right?"

He knows his Livy

In reply, LEWIS, delighted with the attention, said:

"Mr. President, I was about to say to the able Senator from Utah, since he complimented me by calling my attention to the quotation from Livy, that it occurs in a letter in which the position was taken that you are either against your country or you are with it. There is no middle ground.

"The able Senator is quite right. That was expressed by Jesus Christ in the words, 'He that is not with Me is against Me.' And that doctrine is borne out, as the able Senator says, in the classic reference to which he has made allusion."

What would a Senator do when he was uncertain about his Livy if J. HAM LEWIS were not in that body?

NEW FRONTIERS—STORY OF RESETTLEMENT—ARTICLE BY R. G. TUGWELL

Mr. DIETERICH. Mr. President, I ask unanimous consent to have inserted in the RECORD an article written by Hon.

R. G. Tugwell entitled "New Frontiers—The Story of Resettlement", which was published in the Chicago Sunday Times of April 19, 1936.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Chicago Sunday Times of Apr. 19 and 26, 1936]

NEW FRONTIERS—THE STORY OF RESETTLEMENT

By R. G. Tugwell

WASHINGTON, D. C.—Throughout the course of our history we have waged a relentless battle with nature. We have brought the soil under cultivation. We have cut the forests. We have changed the courses of rivers. In short, we have bent the forces of nature to serve our needs.

Yet today we find ourselves the victims of the very forces we sought to subdue. In floods and dust storms, in high taxes, and in human misery we are paying the price of our folly.

We know now that man and nature must work hand in hand. Nature intended her gifts for certain uses. But we have abused her endowments by riotous exploitation. Before it is too late, we must protect the heritage that each generation holds in trust for posterity.

Time and again great leaders in our national life have sounded the call to conserve our resources. Since the days of President Theodore Roosevelt men of vision have reminded us that our soil and our forests are not limitless and have urged us to use our land wisely.

"Gloomy Jeremiahs," we shouted. "Our land is inexhaustible. For three centuries already it has fed and clothed and housed America. It will continue to feed, clothe, and house us and our children after us."

Then came the depression. All about us we saw people broken in mind and spirit, hungry and jobless, caught in the gears of a huge, uncontrolled economic machine—industrial and white-collar workers waiting in bread lines or adding their names to the lengthening relief rolls.

But what of the farm people? Surely they had food, for they had the land on which to raise food. But they, too—more than a million of them—were on the relief rolls. Then people realized that perhaps our land was not producing the way it ought to produce.

Agricultural experts and scientists called our attention to the fact that much of our once fertile soil was now barren. They pointed out that land intended by nature for grass and trees had been plowed under, that we have been exposing to the disastrous forces of wind and water valuable soil which needed coverage, and that natural watersheds had been destroyed. As a result, each successive year was adding to the toll of human poverty and to the dangers of violent dust storms and ravaging floods.

The Federal Government, aware of the situation, has embarked on a Nation-wide program of land use designed to conserve our natural resources leading to a proper readjustment between the people and the land.

To carry out a major portion of this program, President Franklin D. Roosevelt, on April 30, 1935, established the Resettlement Administration.

The Resettlement Administration has been charged with a number of duties all designed to benefit large numbers of our people who are in need of help—to initiate projects on behalf of rural families and industrial workers in our cities, to alleviate the distress of farmers in our rural areas, and to carry on specific work useful to the Nation as a whole.

The work which the Resettlement Administration is doing may be summed up as follows:

1. Initiating and administering projects to check the misuse of our land.

2. Making loans to farmers and reestablishing their credit, so as to put them on their feet again.

3. Initiating projects involving the resettlement of distressed people in rural areas.

4. Fostering town planning and demonstrating both the need and the feasibility of adequate housing for city families with modest incomes.

The various phases of this work in adjusting the people of the Nation to the land on which they live are interrelated. They are all parts of a coordinated effort to achieve a more stable national economy. It is just as important for the city laborer, the craftsman, the clerk, the merchant, and the banker that this work be done as it is for the farmer, the sharecropper, and the rural resident. The problems that face us are not new. They were implicit in the careless way our continent was settled.

TIDE OF EMPIRE

When a little troop of blue-coated soldiers, in wigs, strode along the sandy shores of Lake Michigan in 1830, and, in sight of the Pottawatomie Indians, constructed Fort Dearborn at the mouth of the Chicago River, the United States, then recovering from its war for independence, was in the first throes of westward expansion.

For a decade and a half the inhabitants of the Atlantic seaboard had been in the grip of a nomadic fever. Over the Cumberland route, the Genesee Road, and the various trails leading to the Ohio River via Pittsburgh, thousands of American colonists, on foot and by wagon, moved in search of new opportunities.

What they wanted was land—good land, a plot of ground which each man could call his own and upon which he could build his home.

From the dawn of our history free land had been a fighting matter. The proclamation of the British Crown in 1769, forbidding migration beyond the Appalachians, had met with open defiance. And after Cornwallis had been forced to surrender at Yorktown, the colonists pressed even further into the back country, toward the setting sun.

On and on they went, their numbers augmented by the throngs of immigrants from the Old World. Into the fertile valleys of Ohio, Indiana, and Michigan; into the bluegrass country of Kentucky and Tennessee and along the Coastal Plain, they pressed in search of greater opportunities.

The tide continued to roll westward. Chicago, which developed from a village of four cabins to an important link in a chain of outfitting posts, watched immigrants as they came out of the East and settled in northern Illinois and Wisconsin.

Nothing could stop the "horizon hunger" which gnawed at the invaders of the western States. In 1834 over 250 wagons a day streamed out of Buffalo on the road to Chicago and the great Northwest. Wagon wheels left deep imprints in the sands along the lake shore and bucked the muddy roads which led out of the city.

The land-hungry immigrants settled on the fertile soils of the Mississippi Valley, moved on beyond to the Great Plains, and even over the Rockies to the great Northwest and to the Pacific coast.

To this mass migration further impetus was given by the discovery of gold in California, by the continental expansion of railroads, and by famine in Europe. Land speculators, real-estate agents, railroads, editors, and self-appointed prophets sang the glories of the land, and the pioneers answered by trekking westward.

In 1862 another boost was given to the movement when Congress, by the homestead law, which permitted any head of a family to settle free of charge on 160 acres of public land, inaugurated a field of settlement which did not come to an end until the twentieth century.

As purveyor, merchant, and shipper for the pioneer, Chicago served as a barometer for the great movement into the western lands. As meat packer, granary, processor, and transportation center it reflected the development of the national domain by the pioneer.

The early pioneer was a strong individualist. He settled on his isolated holding and fought an unremitting battle with the wilderness. Single handed he tilled his broad acres and beat back the enemies from his homestead. In the thousand emergencies of a difficult and dangerous existence he had only his own ability and courage to rely on. He produced his own foodstuffs, warded off diseases with home-made remedies, and manufactured most of his clothing.

But often as not he was an unskilled farmer. Renewal of the exhausted soil called for more scientific knowledge than he could command. When overcultivation rendered his land unproductive he took the easiest way out. He picked up his belongings and headed for a new homestead. Thus, although his virtues were many, his faults included a prodigious wastefulness.

Through the years forests were cleared for cultivation and cotton, and other staples were planted. Along the upper Mississippi Basin acres and acres of green tasseled stalks of corn reached out toward the sun, and in place of the buffalo grass of the Great Plains, acres and acres of wheat rippled like water in the breezes. Mineral resources too were tapped, and millions of trees felt the cold steel of the wood chopper's ax. And in the semiarid regions cattlemen virtually ruled a vast domain of thousands of miles of grazing land until, after many bitter battles fought with sheep herders and homesteaders, they lost their unrestricted grazing grounds.

ROBOTS ON THE FARM

Then came the World War. Another period of expansion started. A great demand arose for farm products. "Wheat will win the war" became a catchword.

As a result, agriculture became an industry. The farmers called upon science to aid them in the problem of production, and science responded. Here was a new ensilage harvesting machine that cut cornstalks in the field; here were tractors to draw drills, discs, and plow bottoms; here were binders, threshing machines, combines—all aiding in the process of supplying grain.

Semiarid regions, suitable only for grazing, became dotted with huge wheat lands. Farms were turned into food factories. The "man with the hoe" became a food engineer, with a mechanical menagerie. He raised a "cash crop" and bought his fruits and vegetables in tin cans from the nearest city.

The system put a premium on exploitation, rather than on conservation. The farmer frequently treated his land as a temporary investment for speculation, rather than as a permanent home. Often he would crop his land to exhaustion. With sharp-edged ax and firebrand he would destroy forest to sell the lumber or to provide more space for cash crops.

Logging companies, in order to meet the pressing demand of growing cities and thriving industries for wood, cut forest after forest clean, leaving large areas exposed to the ravages of flood and fire.

The expansion of agriculture left a trail of waste and desolation. From the Atlantic to the Pacific, abandoned farms and cut-over forests testify to the wasteful conquest of the continent. Of the original forest lands which covered the United States, less than one-half remains. The timber supply has been decreased at several times the rate of annual growth. In some areas timber

has almost entirely disappeared as a source of supplementary income. About 80,000,000 acres of cut-over and burnt-over land have been permitted to lie idle without adequate provision for reseeding. In the lake States alone over 25,000,000 acres of forests have been cut over and the land allowed to go to waste.

Grass lands and other lands not suitable for cultivation have been exposed to the wind and rain by the plow. The rains that flow off this land now wash the rich topsoils to the rivers and oceans. In dry periods the fertile soils are blown by winds out of the reach of man.

Bare, plowed ground, it has been said, loses as much soil in 4 years as unbroken ground in 4,000 years. In a recent dust storm 300,000,000 tons of fertile topsoil was swept off the Great Plains. Each year 400,000,000 tons of soil material, the National Resources Board reports, are washed into the Gulf of Mexico by the Mississippi River. Those twin demons—wind and water—together remove, beyond use, 3,000,000,000 tons of soil annually, creating a yearly loss estimated at $400,000,000.

Our soil experts estimate that one-fifth of our agricultural lands are badly eroded and that close to 100,000,000 acres of land have been destroyed beyond recovery. Still other vast areas yield so low a return as to place them in the unproductive class. As many as 650,000 farm families in the lower income classes occupy substandard farms with a total area in the neighborhood of 100,000,000 acres.

Such submarginal lands create an ever-growing problem for State and county governments. The national conference on land utilization, which met in Chicago in 1931, pointed out then that the lack of a program for such lands has resulted in "an increased number of abandoned farms, a rapidly growing area of tax-delinquent land which is being resold for the same uses under which it became tax delinquent * * * serious dislocations of the physical and institutional arrangements of units of local government through the disappearance of land from the tax rolls, and a sparse and scattered population that can be supplied with adequate schools and roads only at a great expense."

In one of the States adjacent to Illinois a study showed that in one county, for example, 28 families stranded on isolated unproductive farms cost the Government $185 a year each merely for the transportation of their children to and from school. The same families each paid an average annual tax of $10.80 a year. As a result the other taxpayers of the county had to subsidize the residence of these people on poor land at the rate of $5,000 a year. In order to maintain roads leading to dwellings on submarginal farms, another county spent 13 times as much as the total tax collected from these families.

Submarginal land may be found in every State in the Union. In Illinois, the State land planning consultants have indicated that there are 1,587,000 acres of submarginal land which should be retired from their present use. The Resettlement Administration is not only continuing the necessary studies of such problems in land use, but is also executing a Nation-wide program of projects demonstrating the manner of converting lands to proper uses.

LAND-USE PROGRAM

The land-use program of the Resettlement Administration calls for the purchase—through 206 projects—of more than 9,000,000 acres of land throughout the United States. This land is to be retired from its present wasteful and uneconomic uses. It will not, however, lie idle. Some of our projects call for the conversion of wasted land into recreation areas, others—the largest of which is in the western plains and contains 1,000,000 acres—will be permitted to develop into grazing land. Still others will involve work of reforesting, erosion control, establishment of wildlife refuges, and development of parks and forest preserves.

Of the total number of acres planned for purchase by the Resettlement Administration, over 1,000,000 acres have already been bought and are being restored to their proper uses. In Illinois the Resettlement Administration has three land-retirement projects. The land-development phase of the program is under way on two of these at the present time. Altogether, about 35,000 acres will be acquired by the Resettlement Administration in Illinois.

The Federal projects now being undertaken throughout the United States will demonstrate in concrete form the results which may be expected from a wiser public use of land.

Inherent in this land program is the human element. There are 17,000 families living on this land that is to be retired. What is to become of them?

From some angles this may be considered to be the most difficult phase of the work of Resettlement Administration. We feel that human beings should not be dealt with as pawns on a chessboard, to be moved about at the will of disinterested agencies—or simply as cogs in a giant economic machine, to be fitted into place by objective social engineers. We, therefore, are bound to consider strongly the matter of psychology, and allow full play for the native energy and the initiative of the people themselves.

Yet it is essential, if there is to be a real rural prosperity in the United States—and there can never be a genuine Nation-wide prosperity without it—that we do what we can to achieve the American ideal of individual ownership of good farm lands. The old geographic frontiers are closed; we must open new frontiers of individual farm ownership.

To a large extent, hard economic facts and severe poverty which people living on submarginal land have encountered have already convinced them of the necessity for moving to more suitable locations. The sale of their land to the Government is, of course, entirely optional, and it is a striking fact that our records to date do not show a single refusal to sell.

Some of these families, with the money received for their exhausted homesteads, are, under the guidance of the Resettlement Administration, buying productive lands and are helping themselves to a fresh start. Others are using their funds to lease new lands, as the first step in farm ownership.

Unfortunately, however, there are families which are in a position to do neither. For these families and other deserving people we are offering the opportunity to resettle, if they wish, on new farms.

In general, three types of projects are made available to them.

Where we can find good individual farm tracts in their vicinity, we acquire these lands and offer them to the new settlers for purchase. The terms under which they are sold are very reasonable—easy payments over a long period of years. In this way the new settlers achieve a large degree of economic independence, and become an acceptable part of established community life—tax-paying, self-respecting people, with a worthy social outlook.

COMMUNITY PROJECTS

On the other hand, where we can find large tracts of good lands on which farms can be more economically developed when grouped together, we establish community projects and offer the new settlers farms in these communities.

In such resettlement communities individual farm units, ranging in size from 10 acres to 120 acres, are arranged in such a manner as to provide communication, roads, utility services, and schools as conveniently and as economically as is possible.

A third type of project is also available to the new settlers. This consists of rural-industrial communities which were initiated by other Government agencies—the Subsistence Homesteads Division of the Department of the Interior and the Rural Rehabilitation Division of the Federal Emergency Relief Administration—and were taken over by the Resettlement Administration at the time of its establishment. We are completing these projects and are establishing a few more like them.

The new frontiers opened to Americans by the Resettlement Administration take into account many people who have literally been misplaced or forgotten in the hit-or-miss methods of our national development. There are, for example, the young married farm couples just starting out in life. Had they lived three generations ago they would have moved westward with the tide of migration. Had they been born one generation earlier they would have moved to the cities with the tide of industrial expansion. Now they find themselves out of time—stranded couples. They have no alternative except to start as hired servants or farm tenants, and in many cases even these opportunities are closed to them.

Then there are the stranded people—families whose breadwinners have been employed in forestry or in coal, lead, zinc, iron, and other mines which have been fully exploited and are now practically exhausted. With the resources gone, they have no way to turn. Part-time work combined with small-scale farming can save them.

Finally, there are good farmers in the farm-tenant class who have been caught in the meshes of an economic arrangement from which they cannot extricate themselves without assistance.

Families from all these classes, in addition to those who have been living on submarginal land which has been purchased by the Federal Government, furnish the candidates for resettlement. It is only right and fair that the new frontiers be opened to these people.

We have made plans to establish about 230 resettlement projects, exclusive of 33 projects initiated by the Subsistence Homesteads Division. It is likely, however, inasmuch as our funds are limited and since our intention is merely to demonstrate the need and feasibility of such projects, that we will actually carry out plans for perhaps half that number. Resettlement projects have already been approved for 42 States. Projects completed are providing homes and better farming opportunities for more than 14,000 people. In Illinois, 4 resettlement communities providing for approximately 660 families, have already been established or are in the process of construction.

Resettlement and land utilization are significant for the future welfare of America. Work of this sort must be carried on with a long-term policy in view. But there is also an emergency at hand. A great many rural families are in dire need. They must be helped at once. An integrated civilization like ours cannot permit a whole segment of the Nation's population to be destitute.

The city dweller, of course, may be shocked to learn that the Federal Emergency Relief Administration has had over 1,000,000 farm families on its rolls. Farmers on the dole! It seems impossible, yet that was the situation.

A large number of these distressed farmers were those who had land of fair or good quality. But inefficient and unwise methods of farming or the burdening pressure of debts, or both, have kept them in the state of poverty.

For years these farmers had planted their entire acreage in cash crops. They sold their crops and bought their own food at the stores. In good times, when prices for farm products were high, they managed fairly well. But when the market sagged or such phenomena as continued drought or general economic depression occurred they faced utter privation.

Farmers, like merchants and manufacturers, operate on credit. For many years they were able to plant and cultivate and market their crops with loans from farmer friends or credit agencies. Since 1929 this sort of credit has been harder and harder to obtain. After a year, consequently, the farmer got along with less. His

unpaid debts piled higher and higher. If he was lucky, he struggled along under a debt he could never hope to repay; otherwise, he lost his possessions. This was a severe hardship on farmers who had owned property. For those who had been renting land or sharecropping the hardship was no less acute.

A FEDERAL GRUBSTAKE

I have felt that the Government should do more than merely help destitute farm families survive on a minimum of food and clothing given to them from time to time. I have believed that opportunities should be furnished them to help them help themselves toward independence.

Rural rehabilitation is a definite part of the work of the Resettlement Administration. The idea behind this phase of our work is to reestablish the credit of poor farmers by extending to them small loans, ranging anywhere from $50 to $600, with which to purchase seed, work animals, livestock, farm machinery, tools, or other items essential to proper farming.

In conjunction with such loans these farmers (and others who may wish such advice) are aided by carefully prepared farm plans which aim toward restoration of the farmer to a self-supporting basis. These plans provide a live-at-home program by which the farmer can raise most of his own food and not be entirely dependent on one cash crop to enable him to support his family. The farmers' wives are likewise taught better home management and are encouraged to can their home-grown foods for family use.

The manner in which this scheme is working is gratifying. Already some $10,000,000 of these loans have been repaid to the Government. But there is an even larger implication in the work of rehabilitation. These loans keep the farmer off the relief rolls. The average loan does not exceed the amount necessary to keep a farm family on the dole for a year.

At the present time there are about 550,000 farm families throughout the United States who have received such assistance. Approximately 3,000,000 people have thus been given an opportunity to become independent and self-respecting again. Certainly such an investment is worth while.

In Illinois the number of families in need of rehabilitation has been proportionately large. During the past 6 months the Resettlement Administration under this phase of its program has come to their assistance with loans totaling more than $1,000,000. In addition to that to such Illinois farm families so poor that they lacked even bare subsistence, the Resettlement Administration has made emergency grants of almost $185,000 to stave off threats of starvation.

A MATTER OF DEBT

Small loans or grants, of course, are of no fundamental value to those farmers whose difficulties are heavy debt burdens. From 1910 to 1930 the mortgage debt per acre on American farms increased approximately two and three-quarters times. During this period the mortgage debt on Illinois farms increased from $3,135 to $6,180 per farm. At the same time the prices of agricultural products had declined in 1930 to about one-half of the 1910 level. This brought about a situation whereby many farmers were attempting the almost impossible task of trying to pay huge debt charges with small incomes. Obviously it could not be done, and with the arrival of discouraging years came an avalanche of ruthless foreclosures, frequently desired neither by creditor nor debtor.

The Federal Government has found that both creditors and debtors have to gain by scaling down burdensome debts to a reasonable amount. Accordingly the Resettlement Administration organizes voluntary personnel to serve on State and county farm debt adjustment committees. These committees, appointed by the Governor of the State, bring creditors and debtors together in order to arrive at a mutual agreement which will result in a reduction of the debts or an extension of time in which they are to be paid. In the last 6 months creditors, to whom was owed more than $46,480,000, have agreed to reductions totaling over $12,750,000. In Illinois the voluntary committees initiated meetings which resulted in the scaling down of debts during this period of time by 30 percent.

This work of rehabilitation and farm-debt adjustment is essentially simple, practical, and concrete.

The people living in our metropolitan areas are likely to regard this whole program of rural rehabilitation, resettlement, and land use as a matter of concern only to the farmers of the Nation. This is a far cry from actual facts. City residents are related more directly to the whole program than they realize. Proper planning for our living needs is universally essential.

In the matter of housing, for example, the urban dweller should see the need for a more carefully planned development. Industrial workers with low incomes have found little consideration for their needs in the sporadic and undirected growth of our cities. In our most beautiful cities, ugly and filthy slums house a substantial part of the population. And even in the country, unsightly suburban developments, accompanied by industry, have grown up.

The fact remains that there is a real need for decent housing for people with modest incomes. It is an equally unfortunate fact that private industry and public policy seldom work in harmony with such a need. The Resettlement Administration feels that much can be done to stimulate the proper agencies to satisfy this need by demonstrating the feasibility of properly planned housing for people with modest incomes.

We are, therefore, engaging in a program of suburban resettlement which is far more than a simple housing venture. Our idea is to erect model towns in suburbs where land is reasonable and where industrial workers can enjoy a modicum of simple life and still live within easy transportation distance of their work. In each of these communities the residents will have an opportunity to engage in small-scale farming as an avocation and form of recreation. Full-time farming, with a ready-made market, will be provided for in the green-belt region for neighboring farmers.

It is interesting to note the first thinking along these lines was done by Ebenezer Howard, a young English immigrant, who had been working as a stenographer in a Chicago office at the time of the great fire. He published a little book in which he described a certain kind of idealized town which he called garden city. It pictured a union of city and country life in which the land was planned to eliminate waste and to provide the dwellers with a pleasant and spacious living.

Howard's ideas were materialized in England, to which he later returned, and two garden cities were set up there with success.

In America garden cities have also been constructed, but they have been limited to rather expensive suburban regions for wealthier people and have not met the real needs of our workers.

GREEN-BELT TOWNS

At present the Resettlement Administration is constructing four communities to demonstrate that such projects should and can be carried out with the worker of modest income in view. One of these which is farthest along is located in Berwyn, Md., near Washington, D. C. Another is near Cincinnati, Ohio; a third is at Bound Brook, N. J., and a fourth near Milwaukee, Wis. Each of these will be a green-belt town, so-called because the community will be surrounded by a belt of farm land, woods, and parks, to prevent encroachment of undesirable housing and industry.

The green-belt project near Milwaukee, for example, is to be constructed near the center of a plot of 3,500 acres. The land, because of the rolling terrain, its good soil, and its proximity to county parkways and roads, provides an excellent site. On it there will be erected, to begin with, 750 dwelling units—mostly individual homes and chain houses. Each resident will be no more than 15 to 25 minutes away from the working districts of Milwaukee, West Allis, Cudahy, and South Milwaukee. Every house will have a garden and a porch, and nearly every house will have its own garage. The house will be simple, practicable, and sanitary and designed in accordance with the best architectural plans.

The community will have stores, a post office, a community center, recreational grounds, picnic grounds, and will also have provisions for the construction of inns, schools, and churches.

The Milwaukee projects and the other suburban communities will not be "Federal islands" within their respective States. We intend that every citizen shall have his full share both in duties and in privileges. Each community, as soon as it is practicable, will be turned over to a nonprofit corporation for holding and managing the properties. The Federal Government will be represented only in such capacity as will insure its financial stake. The government of each community will be that which is appropriate to its size under the laws of the respective States; the land and the buildings on it will bear their full share of State and local taxation. And from those tax revenues the schools and other public services will be supported just as they are elsewhere.

The charges to be paid by the holders of these properties will be kept as low as possible. It is expected that the rent to be paid by the dwellers will not exceed one-quarter of their income.

The people of Chicago are perhaps better aware of the advantages of such planning than are the people of some other cities. Chicago, whose motto is "city within a garden", is justly appreciative of the advantages of proper city planning. Its lake-front development, its street-widening efforts, its slum-clearance projects, its distinctive system of public parks and boulevards, as well as its creation of notable public buildings for the fostering of art and culture, testify to the progressive thinking of the citizens. It is just such a kindred and sympathetic understanding which gives us courage in dealing with problems on a Nation-wide scale.

I have described in some detail the reasons for such a program as ours, and have, I hope, pointed out the aims and the work of the Resettlement Administration. The problems are tremendous; the obstacles numerous; the possible consequences are far-reaching. Obviously the causes for the deplorable conditions existing today cannot be solved overnight. But my associates and I have confidence in the value of the task we are performing, and hope that our work will contribute substantially toward "the more abundant life" which President Roosevelt envisages for our country in the future.

SENATOR CLARK'S ADDRESS AS TEMPORARY CHAIRMAN OF MISSOURI DEMOCRATIC CONVENTION

Mr. TRUMAN. Mr. President, I ask unanimous consent that the address delivered by my colleague the senior Senator from Missouri [Mr. CLARK], as temporary chairman of the Missouri Democratic State convention, held at Joplin, Mo., May 5, 1936, be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

I would regard it as a great honor and a great privilege at any time and in any year to be permitted to preside for a brief time and to address this great gathering of truly representative Missouri Democrats. I would have regarded it as a great honor in the years of our disasters and defeats. In this year when Democracy in State and Nation is militant, harmonious, triumphant, and certain of victory, the evidence of your favor in my selection as

temporary chairman of this convention is something which I will deeply cherish.

We meet today as Democrats—a term broad enough to embrace all who believe in liberal Democratic principles and narrow enough to exclude those who persist in advocating a return to the errors which recently brought this Nation to the sorry pass from which the present Democratic administration is painfully and slowly extricating it.

I speak today as a Democrat to an assemblage of Democrats. I am a Democrat both by birth and conviction. My great-grandfather voted for Jefferson electors in New Jersey in 1796, and from that day to this the men of our name have followed the standard of Jeffersonian Democracy without variation or shadow of turning, because we have believed in the principles which that standard represented. And so today I have no hesitation in calling every believer in liberalism and Democracy in Missouri and in the Nation to rally round the banner of the only exponent of liberalism who, in this year of our Lord, 1936, has any chance to be President of the United States—Franklin D. Roosevelt.

Let us always keep before us the history of the Democratic Party. From the foundation of our Government under the Constitution it has ever stood as a tremendous bulwark against the encroachments of Toryism upon the rights of the people on the one hand and against the advances of radicalism to destroy our constitutional system of government on the other.

I pray God that the Democratic Party may never become either a reactionary party or a radical party. If it ever does, it will suffer and deserve to suffer the fate of obliteration which has been suffered by the Liberal Party in England in its absorption by the old-line Tory industrialists and the Labor Party. Liberalism today in the United States is resisting major attacks from the theories of fascism on the one hand and radicalism on the other. Liberalism can only be recognized in the Democratic Party as represented by Franklin D. Roosevelt. Whether or not you agree with all his acts—and I have disagreed with and voted against some—no one can deny intelligently that today he stands as the great liberal bulwark against the extremes of the Fascists and the Communists.

The Democratic Party was founded as the party of progress and throughout the Nation's history, save for a few brief lapses, it has consistently remained the party of progress. By party of progress I mean a party which, while recognizing that underlying principles do not change, yet also recognizes that the application of those principles must keep abreast of advancing civilization. Thomas Jefferson himself—to my mind the greatest political philosopher that the world has ever known—realized fully and founded his political creed upon the theory that the science of government is a progressive science and that advances must constantly be made in the promotion of the welfare of the people lest we perish. So Jefferson wrote a century and a quarter ago: "We have chanced to live in an age which will probably be distinguished in history for its experiments in government on a larger scale than has yet taken place." I may be old-fashioned, but as an old-line Democrat, sprung from the loins of old-line Democracy, somehow I would still rather take Thomas Jefferson as an authority on Jeffersonian Democracy than Jouett Shouse or John Raskob or Irénée Du Pont.

After a little more than 3 years in complete control of the National Government in this period of great stress, the Democratic Party confidently subjects itself to the judgment of the people upon its record of achievement. It is well that under our system of government the people shall have opportunity to judge the past, take stock of the present, and estimate the future at frequent intervals. The issue which the people must decide is this: Does the record of President Roosevelt and the Democratic Party since March 4, 1933, justify the people of the United States, who are the masters of all parties and all public servants, in granting to us a new lease on power, or is that record such as to justify the electorate in casting us into outer darkness? And this issue can best be decided if each voter will soberly and dispassionately cast up in his own mind a comparison between conditions as they were on that stormy day in March 1933 when Franklin D. Roosevelt took office and conditions as they are today. It is upon this comparison and this record that we with full faith and confidence appeal to the men and women of the United States who, when they go to the polls to vote, hold in their hands full power to govern the destinies of this great Nation.

Let me briefly recount the history leading up to our present situation. The United States has from the earliest times of the Republic been the bulwark of liberty throughout the world. We set the example of republicanism to the nations of the earth. Our Government was created and stands as a monument to the proposition that men are fit to govern themselves. A little more than 20 years ago it seemed that the principles upon which our Government had been founded were to encompass the earth, for nearly 30 nations had followed our example in setting up constitutional governments. Today, as a result of events which have gone on in the latter years and of events which are still taking place, every lover of constitutional liberty in the world must bow his head in shame. But even in this time, this time of crisis, when as a result of the brutal bestiality of war, of the lowering of standards, the destruction of morale which accompanied and followed that awful conflict, liberty is prostrate throughout the world, with brutal dictators in the ascendent in nearly every land, the United States still affords the last hope to the oppressed and liberty-loving peoples of the world.

We ourselves have been passing through the fiery furnace of the aftermath of war. We are just emerging from a crisis more serious than any in our history, with the possible exception of the period of the Revolution and that of the Civil War. The survival of our institutions and of our whole economic fabric has been tested to the uttermost. But under the leadership of the President of the United States there is evidence today of recovery on every hand.

During the war there was an enormous waste of blood and treasure throughout the world. When that dreadful conflict was ended, bankruptcy or its equivalent, utter lack of financial stability in international relations, suspicion, jealousy, rancorous hates, breaking down of morale were on every hand.

The United States, as the leading creditor nation in the world, deliberately pursued the part of aggressor in an economic war with all the nations of the earth. Through retaliation by other countries, international trade was practically ended. We cornered the gold supply of the world, and while properly demanding payment of international obligations owed us by other nations, we set up tariff walls and embargoes to prevent them from paying in the only medium in which they could pay—goods and commodities.

On the 4th of March 1921 Woodrow Wilson retired from the Presidency after an administration which had witnessed the enactment of more remedial legislation than had been placed on the statute books for 50 years prior thereto, and after having successfully conducted the greatest war in all history, involving on our part the expenditure of billions of dollars. He retired under circumstances where not even the bitterest partisan opponent of his administration ever dared even to intimate that every dollar of those vast sums had not been properly spent or that as much as one penny had ever stuck to the fingers of any public official.

And then came days never to be remembered without a blush by any lover of his country. With the advent of Harding we entered upon a period of riotous extravagance, of uncontrolled inflation, and speculation. Special privilege exercised absolute control of Government, of business, and of the lives and well-being of our people—with unprecedented arrogance, not troubling to mask its ugly face. The Mellons, the Insulls, the Wiggins, and scores of others of like ilk reigned supreme and bilked the American people to their hearts' content. Corruption stalked the land, involving some of the highest officials of the Nation; and men who sat at the President's very Cabinet table were guilty of crimes so treasonable that they would have brought the blush of shame to the brow of Benedict Arnold or Judas Iscariot.

And for 12 long, weary, tragic years the march toward calamity continued. Harding died; Daugherty and Fall and scores of others were driven from office in disgrace, some to prison; but the organized forces of public plunder retained control of the Government with less crude and more astute agents. Andrew Mellon remained as the dictator of the fiscal policies of the Nation.

The most serious economic maladjustments were not only permitted to continue but were actually created by the Government itself. Agriculture, the basic and fundamental industry of the Nation, had been prostrated shortly after the war by the sudden and arbitrary deflation of farm values forced by the indefensible action of the Federal Reserve Board; and that depression continued and grew worse throughout the administrations of Harding, Coolidge, and Hoover. In the false, pseudo-prosperity of the Harding and Coolidge administrations American agriculture had no part. To the wiping out of the buying power of the American farmer a major part of the responsibility for the ultimate disaster may be traced.

May I pause for just a moment to reflect in passing upon the varying standards of value of farm lands under the Hoover and the Roosevelt regimes? I read a few days ago that my old and dear friend, Senator James A. Reed, had just purchased a farm in Platte County for a reported price of $45,000, and it was further stated that he had purchased the place as an investment. In spite of the Senator's constant predictions of evil to the people of the United States through the enactments of the last 3 years, I wonder if he knows of any prudent investor, himself included, who would 4 years ago, at the height or depth of the Hoover prosperity, been willing to risk $45,000 or any considerable portion of it for the farm which he has just purchased as an investment. I wonder if the Senator knows of any responsible citizen who in the halcyon days of the old regime before Roosevelt, for the return of which he longs so much, would have been willing to buy farm land as an investment, except at the beggarly low prices at which shavers of foreclosures might be able to wring a profit from the impoverished farmer.

To return to our discussion, it is fair to assert that to the heads of three Republican administrations, from 1921 to 1933, the panic of 1929 and the misery which ensued for millions of Americans is directly chargeable.

They deliberately encouraged inflation. They studiously abetted the delusion that an era had arrived in our national affairs in which depression or panic could not recur. They permitted the prostitution of the Nation's credit, through a system set up by the Wilson administration of the use of legitimate business, into the power of Wall Street for purposes of speculation. High Government officials, great financial experts, constantly prated to the effect that a permanently high plateau of prosperity had been reached, that inflation of values was entirely justifiable, that there could never be another depression in the United States. And so the mad orgy of inflation and speculation went on.

And then when the inevitable day of reckoning came and the market crashed, when the country stood in need of encouragement and reassurance, the very same men who had stimulated and led the talk of a permanently high level of prosperity—of "a radio in every home, a chicken in every pot, and two cars in every garage",

as Hoover once promised the American people—these very same men raised a cry of alarm. Instead of saying frankly to the people that a bubble of inflation had burst, that a few rich plungers had lost fortunes, and that most unfortunately a multitude of small investors, or small speculators, as the case might be, had been ruined, but that the basic wealth of the Nation was still intact, that we still had as vast resources, as rich agricultural lands, as great mineral stores, as much machinery, as adequate transportation facilities, as many skilled workmen, as honest, industrious, God-fearing a people as ever lived on this earth, and that what the country needed was for everyone to forget the stock market and go back to work, Mr. Hoover raised a shout of panic.

He summoned to Washington a crowd of capitalists and he told them in the most public manner possible that this country was in the most serious crisis of its fate and that unless they stood by the whole country was headed for destruction. And these industrial captains, each and every one, promised to carry on. And then, alarmed by the President's warning, they each and every one went home and trimmed the sails of his own little ship to weather a terrific storm.

The reaction of the public was immediate as it was inevitable. Public confidence was utterly destroyed. A stampede ensued; and without making a substantial effort to correct the basic economic maladjustments which had created the situation, the leaders of this school of thought gave way to counsels of despair.

Trade was paralyzed, factories were shut down, workmen were thrown out of employment, credit which had been substituted during the inflation years for currency as a medium of exchange was suddenly and abnormally contracted, and the price of agricultural products nose-dived because millions who would gladly have paid a decent price for the necessities of life had not the wherewithal with which to pay. A remarkable and unprecedented situation was created wherein millions of people were starving in the midst of plenty.

And then in the face of this situation of disaster, right on top of the collapse, a Republican Congress proceeded to pass and President Hoover proceeded to sign the most outrageous, the most indefensible, the most criminal tariff act in the entire history of the world—one which made the historic and infamous "tariff of abominations", which laid the foundation for the Civil War, seem by comparison mild and equitable. In the face of the solemn written protest of nearly a thousand of the leading economists of the United States, in spite even of the urging of leading industrial captains, who had hitherto been glad themselves to participate in the tariff loot, that the limit had been exceeded, President Hoover signed the bill.

The result was immediate. Every civilized nation in the world proceeded to retaliate. Our foreign trade fell away to nothing. Huge surpluses of the products of American industry and agriculture, the sale of which in foreign lands had made the prosperity of the United States, accumulated on our hands. The more food there was produced in the United States, the more millions were hungry within our borders. The more gold we accumulated, the more our financial structure was impaired. The more superficial remedies were applied without regard to the basic economic ailments, the more aggravated and dangerous became the constitutional disease. Yet no effort was made to adjust the basic economic condition which had brought about the collapse. Apparently it was not recognized that starvation in the midst of plenty was an indictment of our system which could not be blinked at, glossed over, or ignored.

And so, on the 4th of March 1933, Franklin D. Roosevelt was inaugurated into the Presidency to face a situation more desperate than had ever confronted any President upon his induction into office, save possibly only Lincoln in 1865. The Republican policy of pandering to special privilege had at last reached its full fruition. Agriculture, long suffering through the tariff policy which compelled it to buy everything it had to buy in a protected market—paying a tariff tax on every item of consumption—and to sell everything it had to sell in a free market, was prostrate.

Industry, long profiting by unjust discrimination against agriculture through our system of prohibitive tariffs, had finally come upon destruction through the vicious excesses of that policy, particularly as exemplified by the Hoover-Grundy Tariff Act of 1930, which had effectively closed the markets of the world to our products of every kind.

Public confidence had been utterly destroyed. A bank, with its vaults bulging with idle money, did not dare loan a dollar on any sort of security, because in the state of the public mind the best of security was likely to prove worthless. Citizens with money in their pockets anxious to put it in places of safekeeping did not dare deposit a dollar in any bank because they feared that where so many had failed in no place might there be security. Hoarding had become an inevitable national vice. Disclosures of the extent to which Insull and Morgan and Wiggin and Mitchell and a host of others of the great captains of privilege had been allowed to plunder the American people—largely through the aid and protection granted them by Government—had led the American people to a state of despair which was closely akin to desperation.

Franklin D. Roosevelt, as a result of all these conditions, took office with every bank in the United States closed, every industry prostrated, every decent citizen apprehensive of the future of his country.

With superb courage the President took the lead. He recognized that bold measures were needed to correct the situation. He realized and proclaimed that certain fundamental economic adjustments were necessary, and that in addition certain emergency and temporary measures were necessary and desirable to restore the equilibrium. His courage and his masterful grasp of the spirit of his countrymen have been like the music of silver bugles sounding the charge to the people of the United States. He recognized his grave responsibility in a great crisis and he did not dodge or shirk.

It is not necessary to have agreed with every item of the enactments of the last 3 years to be able to rejoice in the spiritual and material improvements which have taken place in the country during that period as a result of that program as a whole. That gallant figure, President Roosevelt, with his high courage, with his indomitable will, which has enabled him to rise far above the limitations of mere physical misfortunes, with his magnificent abilities, with his unswerving devotion to the body of the people—to the "forgotten man" as he once denominated him—is leading the American people out of the slough of despond. The very buoyancy of his courage and optimism has had a tremendous and inspiring effect upon the hearts and minds of our people in ending the depression. He has done more in 3 years to rout the entrenched forces of special privilege than has been accomplished in any similar period of our history since Andrew Jackson sat in the White House.

Some of the measures advocated by the President are purely temporary in their nature; some call for permanent readjustments in our economic structure, to as far as may be removed the causes of the dreadful ordeal through which we have been passing. Some have been frankly experiments so recognized and denominated by the President himself with the promise that if they shall prove unsuccessful he will recognize the fact and abandon them. Some have proved unsuccessful and have been abandoned. Others will prove unsuccessful and will be abandoned. But the great majority have proved successful and should and will by the determination of the people become a part of our permanent system of laws.

Some of them, to my mind, have been dangerous experiments; some of them have involved a grant of power by Congress or an assumption of power by government which I myself was unable to reconcile with my views of the Constitution of the United States.

I may say to you very frankly that I have not agreed with all these measures, and that when I have not been able to reconcile my views on fundamental grounds with those of the President I have differed with him with great regret, but under my own oath of office have voted my own convictions. I hold it to be the duty of a Senator or Representative sworn on his own oath to represent the sovereign people of a great State to give most careful and deferential considerations to the recommendations of the President, to resolve all possible doubts in favor of his proposals, but if thoroughly convinced that they are wrong to vote against them. Such, I conceive, to have been the theory of the fathers of the Republic, and such will be my course as long as I remain in a position of responsibility under the Constitution.

But, my fellow Democrats, I say with all possible earnestness that it is not necessary for you or for me to agree with every act of this administration in order to revere the character and intellect of President Roosevelt and to glory in the sum total of the magnificent achievements of his administration since he took office. The proof of the pudding is in the eating; the test of Roosevelt's administration should be the benefits which have accrued to the people of the Nation under his leadership.

Taking his program as a whole, the audacity, the power of decision, the gallantry of spirit of the President have been an inspiration to the people of the United States the like of which we have not seen since the immortal Jackson formed and led the hosts of Democracy. Whatever may be the outcome of any particular measure of his program, he has convinced the American people that he is literally and faithfully carrying out his pledge to drive the money changers from the temple.

Whether he succeed or fail in any particular engagement of what must necessarily be a long war to finally redeem the Nation from the forces of reaction and depression, the whole country realizes that the whole force of Government is now being exerted to the uttermost in the interest of the masses of the people instead of the interest of special privilege. More than any President since Andrew Jackson he has been the invincible and triumphant foe of entrenched special privilege. More than any President since Thomas Jefferson he has visioned a Government conducted exclusively in the interest of the whole people. More than any President since Woodrow Wilson he has demonstrated that an honest, vigorous Executive can conduct an administration through the fiery ordeal of vast expenditures of public money and emerge without even the fumes of suspicion or corruption or veniality upon its garments.

And yet, even in this time, which is still a time of stress, even in the midst of this vital struggle for recovery, even as we are toiling back from the depths, since we have this year under the Constitution a national election, there are men and women, some formerly in high places and some still in high positions in our Government, who are willing for fancied partisan advantage to indulge in the practice of abusing the President and damning all his acts. Their viewpoint is set forth in the old doggerel: "I do not like thee, Dr. Fell; the reason why I cannot tell; but this I know, and know full well, I do not like thee, Dr. Fell."

Old battle-scarred veterans of the army of privilege—men who unctuously defended every infamy of the Harding administration; men who cheerfully supported the Hoover-Grundy tariff bill; men who ballyhooed the stock-market inflation, which led to our present deplorable state; men who even had the hardihood to defend Hoover as a great President, who had fulfilled his extravagant

campaign pledges and brought unparalleled prosperity to the United States—have the effrontery to stand upon the floor of the American Congress or on convention floors throughout the country and abuse the President of the United States for his every act and deed in the interest of recovery.

My fellow Democrats—and in that term I include, of course, the sisterhood as well as the brotherhood of our party—let us look the situation squarely in the face as we determine the policies which are to govern our actions. Their best and bravest have left them to follow the standard of the gallant Roosevelt. Grand old GEORGE NORRIS, battle-scarred veteran of many contests in the people's interest, refused to give the weight of his great name to the Republican ticket in his State, because he desired to be perfectly free to support the President. But while we are gaining such notable accessions, we are today suffering the opposition of others who have been with us in battles of the past. In the animosity of some we rejoice, because they were never with us in spirit and actuality. At the same time there are few among us who do not have regret for the attitude of some whom we have followed on many stricken fields. Most of us have political scars; some of us have scars on our bodies which we have carried as badges of honor and decent mementoes from the campaigns of Alfred E. Smith and James A. Reed.

In 1928 the nominee for President, availing himself of the courtesy which has been extended to nominees, picked a man for the chairmanship of our national committee in every way unsuitable except for the choice of the candidate. The man had been a Republican and had never made any pretense at all of being a Democrat. In a campaign in which we all lent our best efforts Governor Smith was defeated. I will not take the trouble to recount the inevitable debacle which happened to the Democratic Party in Missouri through our honest efforts to support the nominee.

Many of us in Missouri were at that time so concerned about the election of Governor Smith that we did not stop for the moment to regard the fact that he had appointed as chairman of the national committee a sworn, notorious, and acknowledged henchman of the Du Ponts—John J. Raskob. We fought the fight for Governor Smith—a fight which many of us have reason to remember to the day of our death.

With the defeat of Governor Smith every element of common decency would have dictated that Mr. Raskob should have retired as chairman of the Democratic National Committee. By his own confession he had never been a Democrat. By his own publication he had in mind only to change the acknowledged and traditional policy of the party. Yet he not only clung to his post in the party organization, but by loaning money from himself in his individual capacity to himself in his representative capacity for extravagant salaries to Jouett Shouse and others, he sought to create a situation where he could control the party. He was foolish enough to believe that by himself creating a situation where the party was in his personal debt he could create a situation in which he could control the party policies and dictate the party nominee. He assumed that he had a mortgage on the Democratic Party, which under threat of foreclosure he could control at will. Under this assumed power he sought, a year and a half in advance of the national convention, to dictate a platform, and later he sought to use the position to which he was never entitled to defeat the overwhelming choice of the people for our party's nomination.

Because he had himself put the party in his personal debt he attempted to assume the role of dictator and selector of candidates. His efforts in that regard should have convinced him that the Democratic Party is not for sale. He should have been able to recognize the fact that a party founded on principle, representing the hopes and aspirations of millions of his fellow citizens could not have its principles changed at his will by the mere act of his loaning money to himself in a temporary capacity which he never had any real right to occupy. Neither he nor his backers, the du Ponts, have ever had money enough to buy the Democratic Party. That party with its fundamental principles, its great traditions, is not for sale. When Mr. Raskob sought to foreclose his mortgage, he found that he had no control over the hearts and minds of millions who followed the teaching of Jefferson through principle. I thank God today that at last Mr. Raskob has been paid in full and that the boldest effort ever made in our history to buy a great party has completely failed. Franklin D. Roosevelt was nominated and elected as President of the United States despite the efforts of Mr. Raskob and kindred chiselers, and he will be reelected in the same way by the overwhelming choice of the American people.

But Mr. Raskob and the Messrs. Du Pont were not satisfied. They did not even after the 1932 election realize, and have not yet realized, that the American people do not intend to suffer the dictation of a group of munition makers, who in their swollen and ill-gotten profits due to war have assumed to regulate the policies of the Nation.

They have proceeded to organize and finance a multitude of propaganda organizations for the purpose of hamstringing any effort on the part of the present administration toward reform. The American Liberty League, the Crusaders, the Farmers' Independent Council (which does not number among its membership an actual farmer), the Sentinels of the Republic, and the recent Grass Roots Convention at Atlanta (one of the major jokes of our entire history) are major examples of their activity. What a travesty it is to have a meeting under the auspices of the Du Ponts and Raskob held under the name of the Southern League for Jeffersonian Democracy! It has been disclosed that almost the whole of the expense of that futile attempt to undermine the Democratic administration was borne by that noble brotherhood represented by Raskob and the Du Ponts. As the contributions to the various propaganda organizations have been disclosed we have found the Rockefellers and the Morgans in some but the Du Ponts and the delectable Raskob in practically all.

So frequent has been the appearance of their names in the list of contributors for fake organizations that I am reminded of a story once told by Abraham Lincoln. He said that in the old days a country school was having a reading lesson from the only text which was available—the Bible. The lesson for the day was the story of the Hebrew children in the fiery furnace. When it came to the turn of one boy to read he caught a verse which contained the names Shadrach, Meshach, and Abednego. The boy stuttered badly in the pronunciation of the names and was sternly reproved by the teacher for unfamiliarity with his lesson. As the reading went around the class, a verse to each pupil, it came back to the boy with a verse which again contained the names of Shadrach, Meshach, and Abednego, and again he made a sorry mess of his pronunciation and again was scolded by the teacher. As the reading started around again the boy counted ahead to see what verse he would catch the next time. Suddenly he burst into tears. "What in the world is the matter with you now?" asked the teacher. The boy replied, "Here come those three damned scoundrels back again." And so whether we start with the American Liberty League or the Crusaders or the Farmers Independence Council or the Sentinels of the Republic or the National Economy League or the Southern League for Jeffersonian Democracy we find the Du Ponts and the Raskobs coming back again. Last year they contributed $270,000 out of the $480,000 expended by the American Liberty League in abuse of the President, including the $54,000 taken down by Jouett Shouse.

Of course, the Morgan interests, who divided $30,000,000 among six or seven partners in 3 years for their efforts which contributed so much toward dragging us into the World War, could not be expected to approve the democratic policies of President Roosevelt in forcing the divorcement of the business of floating securities from the banking business. Of course, munitions makers who made hundreds of millions of dollars out of the agony of mankind during the period of the war cannot be expected to look with favor upon the wise and statesmanlike course of President Roosevelt in advocating a neutrality policy designed to keep us out of future wars and prevent profiteering by munitions makers. We glory in that fact. But when these same munitions makers come forward with their tear-rusted, blood-stained gold to try to set Jouett Shouse up as the political dictator of the country it is a spectacle to make the angels weep. And since the night of the "feast of Belshazzar" last winter, at which 12 Du Ponts by name and 7 Du Pont "in-laws" sat at the same table to listen to Al Smith's speech, the prospect of the President's reelection has become more certain day by day.

I know that many of you are inclined to have feelings of bitterness toward some of those whom we have been happy and proud to follow in other years. I urge you not to indulge that feeling. Let us think of them in their greatest years, of the gallant struggle that they made in former years in the interest of the people. It makes me think of a story that some of you have heard my father tell about an old fellow up in Pike County who was a mighty good man but who finally became very old and feeble and finally childish and despondent. At last he concluded that he had better commit suicide. So he went out to the barn and looked for something with which to hang himself and all he could find was an old blind bridle. He took the reins and threw them up over the rafters and tied them and got up on a box and stuck his head through the blind bridle and kicked the box out from under him. Just as he was about to pass out his son came and cut him down. The old man was dazed. He did not know where he was. He rubbed his eyes and said, "John, if you had left me alone a minute longer, I would have been in Heaven." John said, "Yes; and wouldn't you have cut a devil of a figure in Heaven looking through a blind bridle?" That is the same kind of a figure that Jim Reed and Al Smith are cutting in their present company.

In the impending contest the Democratic administration will have the support of millions who formerly classed themselves as Republicans. No intelligent man has ever had any belief other than that as private citizens the rank and file of the Republican Party were just as patriotic, just as conscientious, and just as law-abiding as their Democratic neighbors. They were merely not so well-informed, which was the occasion of their voting the Republican ticket. And now, since the dreadful pass to which their policies had brought the Nation has caused concentration upon policies of government by many who formerly looked only for traditional party labels, millions who formerly called themselves Republicans have definitely and permanently aligned themselves with the Democratic Party.

Millions of others, recognizing the need for reform but clinging precariously to their party ties, have demanded a complete reformation of the Republican Party. A year or so ago the Republican National Committee drew up a declaration of principle which contained what the lawyers call a plea in confession and avoidance. They declared the pressing need of the day to be remedial social legislation. Yet by that very declaration they admitted that while in undisputed power for 12 long years they had failed and refused to enact any of the legislation which they now assert to be vital to the welfare of the country. They would

have the people believe that if again entrusted with power their conduct will be the diametric opposite of their course in the past.

But the dominant group in the Republican Party is now, as it has always been, the reactionary group typified by such notable diehards as Dave Reed and Ogden Mills, by Andy Mellon and Joe Grundy, by Dan Hastings, of Delaware, and Arthur Hyde, of Missouri, and by Herbert Hoover. The settled determination of the dominant "old guard" elements to return to the policies which proved so calamitous to the Nation is shown by their frantic efforts to select a candidate so colorless and so little known to the country that they hope to unite for him the jangling, discordant, and hopelessly antagonistic forces which make up the opposition to President Roosevelt.

The Democratic Party appeals to people of the United States upon its record of achievement since the 4th of March 1933. I consider one of the greatest declarations of the President his statement a few days ago in Baltimore, when, in direct contrast to the drifting, do-nothing, let-nature-take-its-course theories of Mr. Hoover, he said that "we should do something; if it is successful, do it some more; if it does not succeed, abandon it and do something else; but do something."

That there has been great progress toward recovery cannot be denied. As a matter of fact, some of those who are now loudest in criticism of Mr. Roosevelt 3 years ago were desperate and hopeless, urgently imploring the Government to do something to aid them. They have profited along with the rest of the country in the progress toward recovery.

The difference between the theory of Mr. Hoover and that of Mr. Roosevelt has been the difference between indolently sinking lower in the slough of despond and manfully struggling back to recovery. That divergence is emphasized in the change of policy from letting agriculture steadily drift to perdition to taking vigorous measures which have increased the national income of agriculture two and one-half fold. Even though the Supreme Court did declare unconstitutional the first act passed in aid of agriculture, the principle of restoring parity of purchasing power to the American farmer has been established, and the Democratic Party is committed to establishing that parity within the Constitution.

The contrast between the policies of Hoover and Roosevelt is again shown in the difference between Hoover's course in allowing our banking system, carrying the savings and hopes of millions of our citizens, to drift into unnecessary wreck and bankruptcy and that of Mr. Roosevelt in bravely setting up a deposit-insurance system which, without substantial cost to the Government, has restored confidence and been so successful that it has protected the savings and working capital of our people without the loss of a penny of deposits since its establishment. Such a measure put into effect 2 years before would have saved billions to the American people and prevented the depth of the depression.

The contrast in the theory and practice of Hoover and Roosevelt is illustrated once more in the difference between Hoover's policy of ruining our foreign trade by constantly inviting retaliation by piling up additions to already excessive tariff duties and that of Roosevelt in carefully and systematically restoring markets for the products of our farms and factories through reciprocal-trade agreements without substantially injuring any national interest. It is again set out in the fact of Hoover's dogged adherence to his theory of "rugged individualism", with its inevitable corollary, that labor must bear the brunt of every depression and the attitude of Roosevelt under which labor has attained to the best status in our history. It was shown again in the deadly parallel of the course of Hoover's complacence in permitting the bogus inflation of stock-market values leading to the crash of 1929 and Roosevelt's sturdy policy of sponsoring and promoting legislation to make such operations impossible in the future.

Thomas Jefferson once said: "Lay down true principles and adhere to them inflexibly. Do not be frightened into their surrender by the alarms of the timid or the croaking of wealth against the ascendency of the people." To this dictum of the great Virginian the Roosevelt administration has adhered and will adhere. Again Jefferson said: "The only orthodox object of the institution of government is to secure the greatest degree of happiness possible to the general mass of those associated under it." To the accomplishment of that object President Roosevelt and the Democratic Congress are devoting themselves without stint.

I say again that the Democratic Party submits its case upon its record of achievement. The test of the pudding is in the eating. The test of this administration must be the effect of its enactments upon the well-being of the country. And that must come back to a comparison between conditions as they were in March 1933 and conditions as they are today. The struggle is between Roosevelt and reaction, and reaction spells chaos.

THE DRAMA OF CONSERVATION—ADDRESS BY HON. MAURY MAVERICK

Mr. NORRIS. Mr. President, I ask unanimous consent to have printed in the RECORD an address on the subject The Drama of Conservation, delivered by Hon. MAURY MAVERICK, Member of the House of Representatives from Texas, before the Virginia State Planning Board on May 5, 1936, at Richmond, Va.

This meeting of the Virginia State Planning Board was on national conservation, in which the American Planning and Civic Association, the American Society of Planning Officials, and the American City Planning Institute cooperated.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

PLANNING IS NECESSARY TO PRESERVE COUNTRY

Fellow Americans, I appreciate the fine introduction of your toastmaster, Hon. Morton L. Wallerstein, who is district chairman of the National Resources Committee and chairman of the Virginia State Planning Board. I like to speak in Virginia because people always give me such wonderful introductions. For instance, Mr. Wallerstein made me commander of the Twenty-eighth Infantry, during the war, thereby promoting me to a colonel. [Laughter.] I was only a lieutenant. And besides, he made me a hero. It's great to be a hero, although you never can plan for sure whether you will come out with a couple of legs missing, or blind—or missing altogether. Anyhow, I appreciate the introduction.

Only 10 percent of this audience are Virginians, but you must know that a Virginian is always proud of a Virginian, and my first name is "Maury." Governor George C. Peery, who preceded me, also had some nice things to say, but I regret to find that Mr. Wallerstein's people have only been in Virginia some 111 years, and the Governor's people only some 150 to 200 years—which means that they are mere newcomers, because my people have been here—I do not remember exactly—but something like from 250 to 300 years. [Laughter.]

You must forgive me for meandering a little about ancestors: First, because I am not too well informed on the technique of conservation, and because ancestors work right in with the subject of conservation, anyhow.

THOMAS JEFFERSON, FATHER OF LIBERTY AND CONSERVATION

I say this because every demagogue trying to attract attention, or every reactionary trying to make money without respect to the public welfare, is using the name of Thomas Jefferson at will, trying to make a Liberty Leaguer out of him. [Laughter.] Thomas Jefferson was no reactionary, no selfish citizen, no Liberty Leaguer. [Applause.]

The reactionaries and Liberty Leaguers, and that same stupid class that always generally succeeds in wrecking some nation, have pulled his corpse out of the grave and have tried to drape his bones with the royal purple of reactionaryism, but I think they will fail. Of course, Thomas Jefferson was a believer in individual liberty—civil, religious, and academic—he believed in the utmost liberty of intellect and spirit. But let us remember he was the first man in America who advocated plowing on contours, conservation, reforestation, and the preservation of our natural resources. Not only that, but he advocated farm cooperatives—and some people tell us that that is some terrible form of socialism.

Yet neither Thomas Jefferson nor any man then living could have foretold the tremendously changed conditions in the United States of America today. And, of course, he did not have the integrated ideas of today on the subject of planning and conservation by all our governmental units, but he did have the idea of conservation within the limits of science of that day.

He thought, and so expressed himself even before the Louisiana Purchase, that there was enough land to last our people forever. And then, as President, he made the Louisiana Purchase and thought for sure that the day would never come when there would be a shortage of land. He did it just like in the old days when a Texan would go out and get ten or twenty thousand acres more land, feeling sure that the ranch business would go on prosperously forever and that the trail up to Abilene, Kans., would always be roaring with the cloven hoofs of cattle. But in that thought Jefferson was mistaken, just like the early cattlemen of Texas.

So I have only this to say: We who are Americans have an "important mission", or else, to put it in plain American language, a big job to save our country. Most of you in this audience know that cities and metropolitan areas and States must be planned with all the tremendous problems of roads, highways, bridges, homes, apartment houses, business buildings, sanitation—everything. You all know that our resources are in extremely bad shape. So let us all quit making reactionaries out of our ancestors and do what they did—think for ourselves, be democratic, and plan and coordinate our country so that it will be a decent place in which to live. [Applause.]

So when we talk about planning and conservation let us talk about it in such a way that we come to certain logical conclusions, upon which we can act intelligently. Let us go into a labyrinth of thought, and if this labyrinth of thought brings us to certain conclusions, then let us accept those conclusions without fear. In this adventure will come all of our concepts of the Declaration of Independence, the theories of our forefathers, the interpretation of the Constitution, our opinions on the Supreme Court, everything. But we need not go into all this intricate phraseology and thought; let us think only of the simple necessity of the preservation of a free country to live in, with a free people in it, and with the people in possession of their God-given resources.

NATURAL RESOURCES BELONG TO PEOPLE

I started out my first premise by saying that the natural resources of America are the heritage of the whole Nation, or the people as a whole, and should be conserved and utilized for

the benefit of all the people. I deny no man the right to his ambition, or his individuality. But I deny to every man in America any right to destroy any portion of the natural resources, or to so plan his business or industry as to be a danger to the health and lives of his fellow citizens. The gains of our democracy in civilization and culture are essentially mass gains. If you don't believe that, I am sure you will understand that the losses of our democracy in the matter of our natural resources are essentially mass losses.

Let me be more specific: If in a certain section of the country we destroy the natural resources and there come great floods or dust storms, then the people as a whole suffer the result of all this destruction. Therefore, we should not let a few people or any number of people destroy these resources, but the resources should be protected for the general welfare.

There can be no logical, constitutional, patriotic, or sensible denial of this. Yet in the past, when efforts have been made to put these principles into living facts, a multitude of pretexts and evasions and obstacles have been advanced. We cannot stay progress—or, rather, we should not do it. Nature is the servant of man—or, again, she should be the servant of man. Our natural resources, properly conserved, are limitless—why shouldn't we take a limitless advantage? There is absolutely no excuse for the senseless, savage, and brutal exploitation which has defaced many pages in our national history.

THEODORE ROOSEVELT STARTS IDEA OF CONSERVATION

I have been interested in conservation for a few years, and do not know as much as those who are in this audience about its technical aspects. But I can remember in the old days when Gifford Pinchot and Theodore Roosevelt and the others were making a good fight against great odds in the matter of conservation. I remember then the discussions about saving our forests, our rivers, our hills, and valleys—that was 25 or 30 years ago, but since then we have destroyed untold natural wealth. In fact, all that Teddy Roosevelt accomplished was to save a little, build an idea, and have it as a matter of record that we were really destroying our natural resources, and ourselves.

FRANKLIN D. ROOSEVELT REALLY ACCOMPLISHING CONSERVATION

And now, at this time, Franklin D. Roosevelt and the Government are starting all over again a policy of conservation with intelligent zeal and real convictions. [Applause.] I do not say this as a Democrat, because I dislike party platitudes as much as anyone. However, it is a matter of fact that a great work has been begun in this country. "Planning" may sound odious to some—but that is now possible through various agencies of Government. And I see no reason why we should not "plan" to prevent dust storms, floods, diseases—and save our country.

Now that a large body of public opinion is alert, let us, as Americans, make a clean breast of the fact that for years the attempt to execute even rudimentary conservation policies was jeered as visionary or banished as a threat to individual liberties. The recent floods and dust storms have shocked and appalled the whole country.

LET US PLAN AGAINST DUST STORMS AND FLOODS

Now what are we going to do about it? Are we going to stop the dust storms and the floods? The answer is that we must; we have to do it. And the reason is that we cannot do as we used to do and exist. We cannot move West nor go to a foreign country. We must stay in our own country and conserve it. We must stay in the big city and make it livable.

Generally we have almost broken down the natural "plan" in America. Now it must be restored. It is of little use to rehabilitate and conserve our lands if we cannot thereby improve the condition of human beings. Therefore, the final and most significant element to be considered is neither land nor water but the people who live on the land and are dependent on the water.

I have recited these facts because the use and control of our natural resources presents a bewildering array of problems, some technical, some economic, some social, some legal and constitutional, in which, without a guiding master-plan we would inevitably lose our way. The vastness of the country, the wide range of climate and topography, the abrupt seasonal changes, our inherited prejudices all tend to make the formulation of a national policy difficult. But nothing short of a national policy can deal effectively with conditions.

The task of making and carrying out such a policy will involve many agencies. It will take a long time. It will demand the highest order of patriotism, statesmanship, and skill.

T. V. A. EXAMPLE OF PROFITABLE PLANNING

Now let me bring together the different ends of the threads and make something of a conclusion. In many of these things our inherited ideas, our ideas of government, may clash with the principle of saving our own lives. But, I hold that individuality should not go to the extent of destroying the country. I should like to see a man make all the money he wants to make, but not at the expense of the natural resources or the general welfare of the people.

Let me take a particular case on which we may base some conclusions, the Tennessee Valley Authority. There is where dams are built—where power can be produced cheaply (if we have as much sense as the Canadians, and I think we have)—where there is a coordinated plan of conservation. Now, a dam is built. The water backs up. The water begins to pour over.

Now the question is, should the Government steal this water from its own people and give it to some private monopoly in order that they may exploit the people, or should the Government take advantage of the water which God let fall from the skies and use that for the benefit of the people of the United States and to help pay for the project? I hold unalterably to the latter view.

NO FASCISM OR COMMUNISM; BUT SOMETIMES GOVERNMENT OWNERSHIP

Now let me state a conclusion: The people of this country will not accept the regimentation of fascism or communism. The people will, however, find it necessary to conserve their own natural resources. This will necessitate, when it comes to matters which solely concern the public welfare, the Government having sufficient power to accomplish the purposes. Sometimes it means government—National, State, or local—ownership. Remember that, from a legal viewpoint, a drop of water which falls in Idaho goes all the way through its course down the Mississippi Valley into the Gulf of Mexico. Through its course it does not worry about city, county, State, or National lines, about Governors, Congressmen, or even judges of the Supreme Court. Some of the water even flows from Canada. No water cares anything for our courts and cannot be cited for contempt, or at least water or nature does not obey.

With this in view, let us get back to the T. V. A. It concerns six or seven States. It would be utterly impossible to have the various units in there to make contracts and treaties in order to accomplish these purposes. Therefore, the only way this great plan of conservation and cheap power can be accomplished is through the Federal Government. If our Government does not do it, it will not be done.

NATIONAL PLAN NECESSARY FOR STATES

Now I presume that there are many here who will say that I am making a speech for a strong centralized government. I am not doing so. I am saying that the Federal Government should have the necessary power to have a coordinated plan, and that the work of the different States should be done by those different States. Various State planning boards will have plenty to do; in fact, they will have too much to do, and the Federal Government has neither the time nor the inclination to take any of their powers away from them. And yet, I am perfectly frank in saying that I do not believe that any State should have a right to destroy another State either with its flow of water, its dust storms, or the effect that it may have on another.

We are in the most primitive state of national planning. People are afraid to use the word "plan." It's supposed to be radical or something bad. But in order to accomplish anything in the conservation of natural resources, we must start somewhere. The first thing we must do is to enlarge the work that has already been established by the National Resources Committee. As you know, the National Resources Committee is appointed by the President and has no independent statutory standing. I have introduced a bill known as the "national resources board bill", which provides for the statutory creation of a permanent board. I want the board to be, and I am sure you want it to be, a permanent national institution which will study our natural resources, collect data, and prepare programs according to the hearings on the bill "as may be helpful to a planned development and use of land, wind, water, and other national resources and such related subjects as may be referred to it by the President."

HISTORY OF NATIONAL RESOURCES BOARD

Let me tell you about the National Resources Committee. It and its predecessors, the National Planning Board and the National Resources Board, have brought together for the first time exhaustive studies and plans for public works, land use, water use, minerals, and other related subjects in relation to each other and to national planning. These reports provide a sound basis for effective conservation.

When I came to Congress the first Government publication sent me was this report of the National Resources Board. I believe it is by far the most important work done by any Government agency and probably one of the most effective. I became interested in the National Resources Board report because it brought together material on national policy or national planning that had not been put in one place since Theodore Roosevelt's Commission on Country Life got out their report in 1909. I set about to find out what kind of people were working on the report and what they were driving at.

First of all, I found out it was a nonpartisan effort, and that the men who were responsible for making this plan for the better use of our land and water resources were Frederic A. Delano, Charles E. Merriam, and Wesley C. Mitchell. Dr. Mitchell and Dr. Merriam had previously been working on President Hoover's Committee on Recent Social Trends; in fact, they were chairman and vice chairman of that committee. So in this work they were just carrying out what they had started some years before.

Back in 1929 Mr. Frederic Delano, through the Federated Societies on Planning and Parks, got out a book on "What About the Year 2000?" That book stated in concise and interesting form the problem of making the best use of our land. Mr. Delano and his coworkers were interested in this planning work as a continuing inventory of our natural resources and a constant readjustment of our policies to meet emerging problems. The planning work that they have been doing is a job that does not get finished with just one report or with two reports. It must be continued as long as we have a country.

ICKES ENCOURAGES DECENTRALIZATION AND STATE BOARDS

The second thing I found out about this National Resources Board was that they not only talked about decentralization of planning, but they practiced it.

With Secretary Ickes' help, back in November 1933, they suggested to the Governors of the various States that each State ought to have a planning agency to think about what was going

to happen to the resources of the State. The Resources Board agreed to help by assigning specialists and consultants to these State planning boards. When they started this idea there were one or two States where some work of this sort had gotten under way—in Iowa and in New York, for instance. Now there are 46 State planning boards, and 32 of these boards have laws behind them to make them permanent. This National Resources Committee has done all that in a little over 2 years. Now they are encouraging the State boards to get the cities and counties to thinking about their future, following the example of what has been done in county planning in California and the rural zoning work that has been going on in Wisconsin. There are three or four hundred of these county planning boards in this country, and over 800 city and town planning boards.

The third thing I found out about this report on the national resources was that it represented a real cooperative job by a great many different bureaus of the Government—that they did not just go out and duplicate what a lot of other people were doing. They got the people with experience—the people who knew—in different bureaus to get together and to put all of their material in one report.

They have followed up this cooperative work through continuing committees on land and water and other things, which have helped to prevent competition in the purchase of land by different Government bureaus, and more recently to coordinate projects for drainage and storage of water to avoid conflicts between the wildlife interests and the agricultural, power, and other groups. The Resources Committee is showing us a way to get results without interfering with bureau activities.

It is to assure the continuance of these valuable efforts that I introduced in Congress the bill I just mentioned to make this National Resources Committee a permanent and continuing body. Such a body will take a long-range view of the entire national problem and will apply the highest engineering and technical knowledge to the reorganization of our natural resources.

ARE WE TO LIVE LIKE CHINESE COOLIES?

And all this should be done not as an end in itself but as a means of decreasing the burdens imposed on the average citizen, raising the living standards of the Nation, and enhancing the well-being of all Americans. And when I say Americans, I mean it! If we keep on going, we'll be like a hive of Chinese coolies. We might as well admit the fact, according to the situation of our natural resources today and our lack of conservation, that our standard of living is slipping. We of course have electric lights, automobiles, and fine roads and apartment houses in different places; but the country is blowing and washing away and we have certain large groups of our citizens who have a lower standard of living than many Americans who lived from fifty to a hundred years ago.

Thus we should proceed from the viewpoint of intelligent, human, and natural conservation and planning, both within and without Congress—that is, in the cities and States, our business relations, our human relations, our clubs and societies, everywhere. And along with this, I think we should support a statutory continuance of the National Resources Committee. This will not come without effort, and I mean great effort. That's because people talk about bureaus when it isn't an additional bureau, and isn't going to cost any more than it does now.

As a matter of fact, it's going to save the country if established—and if we carry on intelligently. So let me talk about this National Resources Board in a legislative way:

At this point let me "coordinate" a few conclusions, and then let's talk about what we're going to do about it.

The first conclusion is that we should not let our prejudices, however dear they may be to our hearts, keep us from realizing the public necessity of conservation. Many of you are technical men, engineers, professional planners—I am an elected public official and, for all I know, you probably call me a "politician." So in abandoning your inherited prejudices—if you have any—you may also find it a good thing to cooperate with elected public officials toward the end of effectuating something really worth while.

Second, an immediate objective is the adoption of a coordinated national plan with a proper decentralization for smaller units, and as a first step in the realization of this the National Resources Board bill must be adopted by Congress.

Third, the most important thing is to have a correct mental attitude on the subject of "planning." The word is woefully misunderstood and widely distorted. It does not mean destruction, anarchy, and the end of the world. It means the opposite—the practical, orderly, and far-sighted use of what God gave us. But by pernicious propaganda and misrepresentation it has a sinister meaning. Opponents of conservation and planning are generally persons who have some interest in some speculative enterprise which will bring a profit out of the natural resources. The public must know this.

I have stated three conclusions briefly. They are, to repeat, leave off your prejudices and cooperate with your elected officials; put over the Resources Board bill; and let the public know what "planning" and "conservation" really mean.

Now let's keep those in mind.

CONGRESS RESPECTS INTELLIGENT PUBLIC OPINION

All right, let's get to the practical things. A session of Congress immediately preceding a national election is, of course, not such an opportune time to press a measure like this. It's too easy for opponents to yell about "more Government interference", "paternalism", "bureaucracy", and so on, and it's not good manners of me to suggest that you "write your Congressmen."

But I do say this: You have been doing a good piece of work in your various capacities and in your various organizations and you must get in the fight publicly and politically, yourselves, with your own courage and your own minds. Hence, you must create public opinion so that public opinion will know and you must also discuss this either personally or by letter with your Congressmen—and back them up and give them courage to do this. To put isolated pressure on a Congressman is useless, but to have him understand an intelligent plan, with the backing of public opinion, is another thing.

LET'S DRAMATIZE OUR PEACEFUL FIGHT!

Now, here are some other things you can do. I have seen a lot of your State reports. They are about this thick. [Mr. MAVERICK held up two fingers, indicating about 2 inches thick.] You start out by trying to tell a story from the beginning like an old English novel and it's tiresome and unreadable. We should get out shorter reports, much shorter; we should have a foreword, heads and subheads, colored drawings that mean something, so that the average man can understand it without going crazy over hideous black statistics that blur your eyes and confuse your thoughts. Some of the stuff you get out goes to the ashcan, where it belongs, or to the statisticians who make your statistics and who are the only ones who can possibly understand it.

So my final message to you is that we must dramatize this battle to save the natural resources. We must put color in it and organize, and make the game worth fighting for. You can always put color in a war, where people are killing each other and destroying each other and their resources. It looks like we ought to have sense enough to make a colorful fight for the preservation of human and natural resources and for making this a decent country in which to live. Fellow Americans, that's our job and let's go to it. [Applause.]

ADDRESS BY GOVERNOR CROSS, OF CONNECTICUT, AT DINNER TO POSTMASTER GENERAL FARLEY

Mr. LONERGAN. Mr. President, I ask unanimous consent to have printed in the RECORD an address delivered by Hon. Wilbur L. Cross, Governor of Connecticut, at a dinner given in honor of the Postmaster General, Hon. James A. Farley, at the Hartford Club, in Hartford, Conn., on the evening of May 6, 1936.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

Mr. Chairman and fellow Democrats, where is the man or woman who, looking over this vast audience filling every available room in this club, can have any doubt about how the election in Connecticut is going in November? You men and women and those whom you represent in every part of the State have it in your power to win Connecticut for Franklin D. Roosevelt and the entire State ticket. If Connecticut is lost, the ignominy will rest upon you and me.

I welcome here tonight Postmaster General Farley as the representative of President Roosevelt. I welcome also our Representatives in the two Houses of Congress who have found it possible to be here. Let it not be forgotten that the two Senators from Connecticut are Democrats for the first time in more than a half century; nor that four of Connecticut's Members in the House of Representatives are Democrats also. I congratulate them all on the conspicuous part they have played in national legislation since their election.

Here in the comparative quiet of Connecticut, away from the Washington strife, broken only by visits to various parts of the country, I have been able to keep close watch on the political campaign as it has been developing. Nothing else has gratified me so much as to see the gradual return to prosperous days such as we have been dreaming of since the inauguration of President Roosevelt. It is a conservative estimate to say that our business is back to where it was in 1930, and that in some lines it has reached the magnitude of 1929 on what appears to be a more secure basis.

It is clear that the Republicans began their campaign 6 months too early, with the result that it has already completely collapsed. It is now degenerating into shrieks of despair. The Republicans have proposed no measures of a constructive character. In this respect they are silent. They have confined themselves to criticism of details of the policies of the Democratic Party, but they have proposed no substitutes. They cannot propose substitutes, for they have none. So they are forced to shriek to save themselves.

You recall how they shrieked over the President's "brain trust." Now they have formed one of their own. But they do not like the word "brain" or "brains." So they call their brain trust a research division of the national Republican committee, presided over by Henry P. Fletcher, the chairman. For a time the Republicans thought that they needed no brains to help them out. They relied upon ghost writers flitting through their offices to supply them with material for shrieking. Some of these ghost writers are brilliant young men rather clever in devising phrases, none of which, however, have stuck with the public. What has been lacking in them is an understanding of the significance of recent political and economic history. Hence the imperative need of the Republican "brain trust" to supply the ghosts with facts and views for better Republican propaganda. Why do not the candidates for the highest office in the Republic speak for themselves? Is it because they do not dare? Or is it because they have nothing but shrieks to utter? I would remind them that Abraham Lin-

coln, when he had a speech to make, retired to his attic alone and wrote it. The attic was not haunted by ghosts.

Chairman Fletcher insists that the Republican "brain trust" is different from the Democratic "brain trust." He is correct.

When Mr. Roosevelt became President, he was faced with an economic and financial collapse more devastating than any other that had ever occurred in our history. His problem was the restoration of our economic equilibrium and the preservation during this process of the physical, mental, and moral welfare of the underprivileged people of the country. It was a tremendous problem. He called in for his assistance groups of brilliant men and women, many of them young men and women.

The realm of the social sciences is vague. There are few or no definite lines that guarantee success. There was nothing for President Roosevelt to do except to try out one plan after another and to eliminate eventually such as did not promise success. It was, as he himself has implied, a process of trial and error. The Republicans would judge him by such errors as may have been made. The proper judgment should be based upon all his plans taken together. So judged it must be conceded that they have done the business. We have moved far out of the depression, and the morale of the people has been maintained.

Mr. Fletcher does not claim for his division of research anything more than a means for turning out propaganda against the so-called New Deal. It is composed, with one or two exceptions, of men who are bitterly opposed to the New Deal. It is their function to discover flaws in the New Deal for syndicated articles in the newspapers, for ghost writers, and for candidates for office who are in desperate need of such assistance in writing their political speeches. Nothing, however, is to see the light unless it is "timely", which is the same as saying that anything favorable to the New Deal is to be suppressed. The motive is purely political. The Republican "brain trust" is thus already thoroughly discredited before getting a start on its discoveries.

Just now the Republicans are playing upon the fears of the people. Their shrieks are very loud. We are, they say, in the midst of an enormous credit inflation which must inevitably result in direct inflation of the currency. One thing seems to be forgotten. It is that there has been set up in the revision of the Federal Reserve Act a mechanism of control which was absent at the time of the credit inflation leading to the explosion of 1929.

Talk about inflation comes with poor grace from the Republicans. In my brief lifetime there have been two immense inflations, both of which occurred when the Republicans were in power. The first was a direct inflation of the currency initiated during the Civil War against the advice of Abraham Lincoln and bringing financial disaster in the following decade. The old greenbacks with which the country was then flooded depreciated to the point where it took two dollar bills to get a gold dollar. It is almost impossible to exaggerate the filth of that old paper money, much of which wore out passing from hand to hand and so was never redeemed.

The question arose whether this paper money was a legal tender in the settlement of domestic debts. A decision of the Supreme Court declared that it was not a legal tender. The next step was for the Republicans to enlarge by two the membership in the Supreme Court by the appointment of men who could be trusted to declare the greenbacks a legal tender. By this maneuver the Supreme Court of the United States became an adjunct of the Republican Party. The prestige which it lost was not regained until the advent of Grover Cleveland.

You all remember the inflation of credit during the Coolidge and Hoover administrations. All attempts at control were feeble. The bubble should have burst in 1927. But it was delayed until 1929 by an inflation which mounted beyond all bounds except the blue sky. Instead of an attempt to control credit, Mr. Hoover and his Congress gave their attention to a revision of the tariff, which extended over a long period of dickering lasting 15 months. On the other hand, one of the first things accomplished by the present administration was a revision of the Federal Reserve Act for the purpose of preventing an explosion like the one in 1929.

This is the record of the Republican Party, now engaged in shrieks against a possible inflation of the currency and an imaginary disrespect for the Supreme Court of the United States.

What troubles the Republicans most is the restoration of prosperity under Democratic auspices. This prosperity they are not yet ready to concede in spite of the trade news anyone may read in the newspapers every day. They are trying to convince manufacturers, merchants, and farmers that there has been no permanent recovery; that it is all an illusion.

Within the last fortnight Senator DICKINSON, of Iowa, addressing the Senate, expressed alarm over the increased manufacture and sale of canned dog food, which may be purchased in groceries and drug stores where food for humans is sold. According to the statistics, this increased sale cannot be accounted for by any "sudden rise in the birth rate in dogdom." His conclusion is that about 20 percent of all the canned dog food now manufactured is eaten by humans. This, in his view, is undeniable evidence that the depression is yet with us. Or, to put it another way, the policy of the present Democratic administration has forced great masses of people to feed on stuff fit only for dogs. It would seem as if the time had come for the Republican organization to put an end to this irresponsible talk and to tell the people what the Republicans would do were they in power. The time has come for something more than shrieks.

An urgent need of the Republicans is a leader. Where is he? They got Harding out of the Middle West. So they are again looking there for another. At the present moment Governor Landon, of Kansas, appears to be ahead in the race for the nomination for President. One of his qualifications for the office, it is proclaimed, is his ability to balance the budget in a State where the constitution requires that expenditures must not exceed income. In one or more counties of Kansas it was necessary, in order to balance the budget, to close the schools. The Federal Government stepped in and opened the schools. Who deserves the praise—Governor Landon or President Roosevelt?

Another qualification of Governor Landon is his fight for national prohibition down to the last ditch after the struggle had been given up by President Hoover. It is conceded by the Republicans that national prohibition cannot be made a political issue again till 1944. But, it is argued, it would be well to begin to build up a popular demand for the restoration of the eighteenth amendment now, for it will take at least 8 years to do the job. There is danger that Governor Landon may fail his party. According to the newspapers, some months ago a group of Republican wets in Chicago took the alarm and visited Governor Landon. They came away feeling better than when they arrived, convinced that prohibition was with him only a political matter, in no sense a personal concern.

THEORY AND PROGRESS OF RECOVERY PROGRAM—ADDRESS BY HON. M. S. ECCLES

Mr. FLETCHER. Mr. President, I ask unanimous consent to have printed in the RECORD an address on the Theory and Progress of the Recovery Program, delivered by Hon. Marriner S. Eccles, Chairman, Board of Governors of the Federal Reserve System, at the Conference on Debt Taxation and Inflation, held at the Waldorf-Astoria in New York City on May 8, 1936.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

THE PROBLEM IN 1933

As one who has followed with keen interest the comprehensive program adopted 3 years ago to bring about recovery, I should like to attempt to explain my understanding of developments since it was adopted and how, in my view, it may achieve and maintain the complete restoration which we all desire.

Let me first direct your attention to the conditions prevailing in 1932 and early 1933, and to that most fundamental of all economic data, the national income. The national income, which was estimated at more than eighty billions in 1929, had shrunk to half that amount by 1932. The annual buying power and debt-paying capacity of the community, therefore, had been reduced by more than forty billions. The problem of recovery was to raise that national income to above its 1929 level, which could only be brought about by the Government undertaking activities and expenditures which private enterprise was not in a position to undertake. How could it be accomplished?

Leaving aside plans which involved fundamental and far-reaching changes in our whole economic organization, the solutions offered to the country in 1933 were of two main types. On the one hand there were those who contended that all that was needed was the restoration of confidence. They insisted that it was essential to balance the Budget; that the gold standard must be retained at all costs; that no legislation disturbing to business should be enacted. On the other hand there were those who, like myself, felt that recovery in the present situation could only be achieved by bold and aggressive intervention by the Government, largely through underpinning the entire private-credit structure, which had collapsed, and undertaking to restore purchasing power through relief, public expenditures, and other measures.

I think the hope of success by the former method rested on faith rather than logic. After all, a budgetary surplus did not prevent the downturn in 1929; a balanced Budget in 1930 did not prevent an acceleration of the decline. Not only were we on the gold standard in those years but gold was flowing in steadily. Efforts to balance the Budget in 1931 and 1932, maintenance of the gold standard, and the absence of reform legislation did not prevent us from descending to lower and yet lower economic depths. What reason was there for thinking that factors which failed to prevent or check the downturn would in themselves lead to an upturn?

THE QUESTION OF CONFIDENCE

Looking at this question of confidence a little more closely, let us try to see exactly what conditions are necessary for its establishment. With the national buying power cut in half, the demand for goods of all kinds was reduced accordingly. Industry as a whole possessed more than enough equipment to satisfy the current demand. What does confidence mean in conditions such as these? Does it not mean confidence that increased expenditure on plant, equipment, and inventory will be profitable? What businessman would have added to his plant, when he already possessed a great amount of excess capacity, merely because he read that the Budget had been balanced? It is difficult to understand why people would be expected to invest money in new enterprise when existing investments were becoming less profitable every day. It should not require any great insight to understand that a reduction of Government expenditures, while everybody else as a matter of self-protection was being forced to reduce expenditures, could only accentuate the processes of deflation by reducing buying power. An increase in tax rates at such a time would have had a deflationary effect to the extent that they reduced expenditures

that otherwise would be made, and would consequently have yielded little, if any, additional revenue.

A belief that industry would have voluntarily entered upon capital expenditures in 1933 if the Government had restricted its expenditures and raised taxes is unrealistic to the highest degree. It displays an utter miscomprehension of the considerations that influence a businessman in planning expenditures. There must be reason to believe that capital expenditures can be profitably made before they are undertaken. This profitable outlook existed at the bottom of the depression in but few industries, such as brewing, distilling, and gold mining. In these industries plant expenditures actually occurred and an abundance of capital was readily available. Why? Because there was confidence—that is, an expectation that funds could be profitably invested in these industries—which had been renewed by repeal of prohibition and the premium on gold.

What was the opportunity generally throughout the country for profitable investment in new enterprise? Throughout industry there was excess capacity in relations to consumer buying power, nor was there any inducement for residential construction so long as it was cheaper to rent or buy than it was to build.

THE THEORY OF THE RECOVERY PROGRAM

Obviously, what was needed to absorb excess capacity generally was an increased demand arising from increased consumer buying power. And here, it seems to me, is the crux of the matter. Increased demand could come about only as a result of increased incomes; and increased incomes depended upon increased disbursements by industry or by Government or by both. As far as industry was concerned, it was being forced, in self-preservation, to reduce wages and expenditures of all kinds, thus rapidly increasing the number of unemployed, further shrinking consumer buying power and accelerating the deflationary forces which threatened complete collapse of the entire credit structure.

The only alternative under the circumstances was intervention by Government. Only in this way was it possible to arrest the forces of deflation by bringing about an increase in incomes, and hence an increase in the demand for goods and services of all kinds through increasing disbursements financed initially by borrowings rather than by taxes. Those of us who advocated this course believed that an increase in incomes brought about in this way would lead to an increase in the demand for goods. Industry would pay out more in wages and materials in making these goods. These payments would result in further increased demands until finally the stage would be reached when here and there individual businessmen would see some point in taking up deferred maintenance, in adding to plant, or venturing to establish a new type of service or industry. Here and there it would become profitable to build new houses as the demand for houses, and consequently rents, rose. As this process proceeded, we anticipated that tax revenues would increase as incomes increased, and the gap between expenditures and receipts would gradually close. A little later the whole burden of the recovery movement could rest on increasing business and individual expenditures, and the Federal Government could not only balance the Budget but could begin to retire the debt built up in the depression. The expenditures of the Federal Government can be fully justified solely on humanitarian grounds—on the urgent necessity of relieving the home owners and the farmers, who were about to lose their homes and their farms, and aiding the great army of unemployed who were destitute and helpless through no fault of their own. However, I feel that the expenditures are fully justified as a means of achieving business recovery.

HAS THE PROGRAM BEEN SUCCESSFUL TO DATE?

Has the economic philosophy of the past 3 years, which I have attempted to outline, fulfilled reasonable expectations?

The answer is to be found by looking without bias at the results to date. On the debit side we should put the gross increase in the Federal debt from $20,935,000,000 on February 28, 1933, to $31,459,000,000 on March 31, 1936, and the continuing large number of unemployed, many of whom are dependent on relief. Neither of these adverse factors is as unfavorable as most of the business and financial community have been led to believe. Against the increase in the debt must be offset the increase in the Treasury's cash balance from $221,000,000 to $2,866,000,000 in the same period (exclusive of the stabilization fund), and an increase in the recoverable assets of Government agencies from an estimated $2,400,000,000 to $4,300,000,000, largely in the Reconstruction Finance Corporation, which was used very largely to support directly the banking and private credit structure. So that this leaves a net increase in the national debt of $5,979,000,000, which is less than a month's national income in 1928–29. The annual interest charge on the Federal debt as computed at the end of March 1936 increased by only 8 percent over the end of March 1933. This may be compared with an increase in the gross debt of 50 percent in the same period. The total carrying charges amount to a little over 1 percent of our current national income; not, I think you will admit, an excessive burden.

In considering the continuing heavy volume of unemployment, it should be remembered that there were 2,000,000 to 2,500,000 of unemployed prior to the depression, and that the number of people seeking work has increased since then by 3,500,000 to 4,000,000, due to the increase in the number of those reaching employment age. The lack of employment in many cases of the principal breadwinner of the family is also responsible for other members of the family, who would not ordinarily be employed, seeking employment. More important than these considerations, however, is the fact that millions of workers who were formerly working only 1 or 2 days a week, and yet were listed as employed, are now working 4 and 5. The increase in man-hours worked, in other words, has been much greater than the increase in the number of men working. The introduction of labor-saving machinery has doubtless also played its part. I am not saying that the employment situation is at all satisfactory. I am merely saying that the progress has been far more substantial than appears at first sight. Because of the various factors I have just mentioned, the burden of relief has not diminished correspondingly with the increase in employment. As recovery proceeds we can, of course, expect relief expenditures to diminish.

INCOME, PRODUCTION, AND RESTORATION OF MONEY SUPPLY

On the favorable side of the recovery program to date I would stress particularly the rise in the national income and production, the restoration of the supply of money, increasing tax revenues, and the rise in building activity.

Although current direct estimates are not available, it would appear from other evidence that the national income is running currently about sixty billions a year as contrasted with approximately forty billions in 1932. The index of production has risen from 58 percent to 94 percent of its 1923–25 level. The supply of deposits of all commercial banks rose from $27,000,000,000 on June 30, 1933, to $37,000,000,000 on December 31, 1935, or about the predepression level, so that the contraction in the money supply which occurred as a result of deflation has been largely offset. This replenishing of bank deposits is chiefly attributable to the increase in bank holdings of Government securities and to the inflow of gold. It is directly attributable, in other words, to the relief and recovery expenditures of the Government and indirectly attributable to the revaluation of gold, which was a necessary condition for the reversal of the international flow of capital. In the absence of Government borrowing and the revaluation of gold no progress would have been made toward a restoration of the community's supply of purchasing power, since private loans and investments of banks continued to decline until 1935. It is encouraging to note that recovery is bringing about some increase in the demand for an extension of private credit by the banking system.

PROGRESS TOWARD A BALANCED BUDGET

Turning to Government revenues, the trend is most reassuring. In the calendar year 1932 they amounted to $1,880,000,000. In 1935, despite the nonpayment of part of the processing taxes, they amounted to $3,857,000,000, an increase of nearly $2,000,000,000. With bonus payments met and a revision in taxes enacted, this favorable trend should be accelerated so that we would have every reason to expect a balanced Budget within a reasonable period. Balancing the Budget through increasing taxes or decreasing expenditures, or both, as the national income is restored, is an absolutely indispensable element in the eventual and complete success of a program of recovery requiring Government intervention which entails large deficit financing.

ORDERLY CHARACTER OF THE RECOVERY MOVEMENT

Finally, I would stress the increasing activity in the heavy industries and in building construction. During 1934 and 1935 it was constantly said that the deficit financing experiment had been a failure because heavy industry and building construction had not picked up substantially. Such criticism displayed a misconception of the necessary sequence of events. First, the process of forced liquidation, caused by deflation, had to be stemmed. Second, the demand for consumer goods had to be greatly increased before there could possibly be any inducement for corporations or individuals to add to productive capital facilities to provide more goods and services. Third, long-term interest rates had to be brought down to encourage and make profitable the use of capital for new enterprise, and to adjust, through refunding, a substantial portion of the existing debt structure on a supportable basis.

In the real-estate field liquidation had to be stopped and rents had to rise, this, together with lowered interest rates, bringing about a reopening of the mortgage market. All of these necessary steps took time. They could not have been accomplished in a much shorter space of time, considering the depth of the depression and the immensity of the problems thus created. For more than a year the improvement of underlying conditions has become increasingly steady and orderly in character. The ground has been well prepared. The national income has been increased by some 50 percent. Industry and finance have been enabled by the recovery program to improve greatly their financial position through increased earnings, adjustment and reduction of debts, and refunding on more favorable terms. Favorable long-term interest rates are available for financing in practically every field of activity. Rents have risen, hence real-estate values have increased, making it again profitable to increase building construction. Excess capacity in nearly every field of production is rapidly diminishing. The index of commodity prices has remained steady for more than a year.

THE PRESENT PHASE OF THE RECOVERY MOVEMENT

The present phase of the recovery movement is a most important one. Will the disbursements of private business and individuals increase sufficiently to warrant a lessening of the Government's contribution to the growth in the national income? It is encouraging to note that activity in the housing field is rapidly increasing; capital financing is gradually being undertaken for new enterprise; an expansion of private credit on the part of the banking system is in evidence; activity in the machine-tool, industrial-equipment, and heavy industries reflects substantial improvement.

Barring unforeseen contingencies, the present improvement should continue. The outlook at the moment is very encouraging.

CONCLUSION

The Federal Government cannot and should not decrease its expenditures on recovery faster than private industry is able profitably to take over the load. To do so would reduce consumer buying power and thus retard, if not reverse, the progress of recovery.

The flow of money must be maintained and increased in an expanding economy. If private capital fails to maintain and expand the flow, and widespread unemployment exists or develops, Government must act as a compensatory factor.

Purchasing power can only be maintained by private business as a whole disbursing its income or, insofar as it fails to do so, by Government expenditure either on the basis of deficit financing or by taxing in such a way as to insure the flow of funds that individuals and corporations otherwise would accumulate and maintain in idle balances, so that socially beneficial work will be provided for those who are able and willing to work but for whom private enterprise fails to provide.

I am sure that we will all agree that our objective should be the maintenance of long-term prosperity and the avoidance of the twin evils of inflation and deflation. The attainment of this objective depends not only upon the effective coordination of monetary and fiscal policies, but also upon an enlightened body of public opinion.

DEPRESSION, UNEMPLOYMENT, AND RECOVERY

Mr. FLETCHER. Mr. President, I ask unanimous consent to have printed in the RECORD extracts from a speech on Depression, Unemployment, and Recovery delivered by Hon. Gerald G. McGeer, K. C., mayor of Vancouver and member of the Canadian Parliament for Vancouver-Burrard, in the House of Commons of Canada on Monday, April 20, 1936.

There being no objection, the extracts were ordered to be printed in the RECORD, as follows:

RECOVERY UNDER ROOSEVELT

May I hurriedly draw the attention of the committee to the nature and extent of the problem we have to face by placing before you the amounts appropriated by the United States Congress, the channels through which such moneys have been spent, and the amounts of appropriated funds still to be expended in the Roosevelt recovery program at the end of February 1936. The total appropriations for agriculture were $2,530,136,016.38, the sum of $859,623,352.25 remaining unexpended. The agricultural appropriations of Congress were administered through the Agricultural Adjustment Administration, the Commodity Credit Corporation, the Federal Farm Mortgage Corporation, the Federal land banks, and through a reduction in interest rates on mortgages. The appropriations for relief amounted to $5,284,108,151.95, this sum being administered through the Federal Emergency Relief Administration, the Federal Surplus Relief Corporation, the Civil Works Administration, the Emergency Conservation Work, and the Department of Agriculture relief. Of that $5,284,108,151.95, only $170,654,098.40 remains unexpended. The public-works appropriation by Congress totals $5,479,848,495.89, and this amount included expenditures on the Boulder Dam project, loans and grants to States and municipalities, loans to railroads, expenditures on public highways, river and harbor work, Rural Electrification Administration, Works Progress Administration, and several other projects. Then, as an aid to home owners, Congress set aside $792,772,232.30, of which sum $338,552,597.29 remains unexpended. As a miscellaneous appropriation we have the sum of $4,215,495,418.39, of which $1,759,188,908.61 remains unexpended. The miscellaneous sum is administered through the Export-Import Banks of Washington, the Federal Deposit Insurance Corporation, the Administration for Industrial Recovery, the Reconstruction Finance Corporation, and the Tennessee Valley Authority.

The point I wish to make is that facing that problem, a problem common to all people on the North American Continent, the total amount appropriated by Congress prior to February 29, 1936, is shown as $18,339,000,000 of which amount $6,009,413,350 remains unexpended. Notwithstanding the fact that over $6,009,413,350 remains unexpended, the President asked, and Congress approved, an expenditure in the present year of a further appropriation of $1,500,000,000.

In addition, Congress voted $2,300,000,000 to pay the soldiers' bonus, making in all a total of $9,300,000,000 now available for the continuation of the recovery policy.

Mr. ROGERS. Has the honorable member the figures showing the numbers of unemployed in the United States during the period those expenditures were made?

Mr. MCGEER. Yes; and that is exactly where I suggest the minister is failing to grasp the true significance of our problem.

Mr. ROGERS. Would the honorable member give the figures?

Mr. MCGEER. I have not the figures with me, but I have followed them. The point I am dealing with is that while there were 13,000,000 unemployed in 1933, in 1936 the figure is placed below 9,000,000. But there is an unemployment of people and an unemployment of business. While the numbers actually destitute and unemployed are on relief and have been cared for, unemployment in business, which is just as serious, has been done away with in the United States.

CURRENCY MANAGEMENT

I know there are many people who say that nothing has been accomplished in the United States but an increase in the national debt of $8,000,000,000. For that reason I would like to draw the attention of the committee to some of the more important features of the Roosevelt scheme of managed currency. Under the gold policy inaugurated by the Roosevelt administration, one which was the very opposite of that proposed at the World Economic Conference in 1933, the gold reserves of the United States have been increased from $4,000,000,000 in 1933 to $10,000,000,000 in 1936.

Mr. BENNETT. A creditor nation.

Mr. MCGEER. Yes; a creditor nation, but a creditor nation which saw the wisdom of increasing the price of gold to $35 an ounce so that debtor nations could pay their bills. That is exactly what has happened. And the silver policy——

Mr. BENNETT. Failure.

Mr. MCGEER. My right honorable friend says "failure." Let us see about that. Silver was remonetized, and silver certificates were issued as full legal tender. The accumulation of silver reserves and silver certificates now in issue and circulating as money show an increase of $2,000,000,000.

I suppose it will be said that the spending program was a failure as well. Under the spending program of the National Government, American bank deposits, which had fallen to $38,000,000,000 in 1933, had risen to $45,000,000,000 in 1935, or an increase of $7,000,000,000. Thus, under Roosevelt's recovery policy, while the people of the United States may have an increase of $8,000,000,000 of debt, if you add the gold increases, silver-reserve increases, silver-certificate increases, and bank-deposit increases, you have $15,000,000,000 more money in the United States at the end of 1935 than existed in 1933, or a net increase of $7,000,000,000 in excess of the national debt incurred through the recovery program. Now, according to the gold-standard theorists, who accept orthodox economic practice, this is the situation in the United States. With $10,000,000,000 of gold in reserve they can place $5,000,000,000 at the disposal of the Treasury to use as a stabilization fund, an amount far in excess of what is needed. That leaves $5,000,000,000 available to support domestic currency. Now, on the 25-percent gold-reserve basis established at the economic conference in 1933, $20,000,000,000 of full legal tender Federal Reserve notes may be issued. Under the Federal Reserve Bank Act every dollar of Federal Reserve notes is good for $10 bank credit. Therefore, under the managed currency system of Roosevelt that Nation has managed its monetary power so that it can now support a bank deposit currency of $200,000,000,000, or an amount sufficient to pay off the National debt, the State debt, the municipal debt, and corporate and individual debts and still leave $22,000,000,000 in reserve.

Let us see what else has been done. In many respects the managed currency and recovery policies of the Roosevelt administration are similar to those adopted in Great Britain; in some respects they went much further. The Roosevelt program may be summarized as follows:

The gold standard was abandoned.

The gold debts were repudiated.

The Government established a monopoly on the ownership of gold. It then revalued the price of gold, raising the value from $20 to $35 an ounce, a course which all other leading nations followed.

Silver was remonetized and the issue of silver certificates as full legal tender money was authorized.

All American currency was established on a legal-tender basis.

The Government established measures of control over the international movement of gold, silver, currency, and credit.

The Treasury, working in cooperation with the Federal Reserve bank, secured the effective cooperation of Federal Reserve member banks and other banking institutions, together with loan and trust companies, insurance, and other financial corporations. Working together, they proceeded to bring order out of the chaos that had followed the collapse of the gold-standard system.

National obligations were refunded at rates of interest averaging 2½ percent.

Money was borrowed on short term for 0.011 percent, or less than the cost of printing and maintaining paper currency.

National currency, profits from monetary management, and taxes were used to finance obligations incurred to alleviate destitution, to put people to work, to restore business to normal, and to balance the standard of living for all classes and throughout all sections of the Nation.

The control of production prices, wages, and competition was attempted.

Much was done to assist States, municipalities, home and farm owners, carrying unpayable interest-bearing debts.

Banks, railway companies, industries, businesses, and agriculturists in trouble were assisted.

Public works and social services to relieve unemployment were inaugurated. Better housing and slum clearance were assisted and encouraged, and today Congress is proceeding to go forward with the largest housing program ever undertaken by any nation in the world. True, the national income has not been restored to the 1929 level of nearly $90,000,000,000, but it has increased from $38,000,000,000 in 1933 to $55,000,000,000 in 1935, or an increase of $17,000,000,000. It is still rising and will go above $60,000,000,000 in 1936.

National wealth has been increased in the same period of time by over $125,000,000.

It is true that unemployment has not been eliminated, but it has been reduced from 13,000,000 to less than 9,000,000, and, what is more important, it has been prevented from rising from 13,000,000 to figures that would have resulted in the complete destruction of the social and economic life of the American people.

Mr. BENNETT. Last year it was stated that there were 20,000,000 people on relief.

Mr. MCGEER. You could get statements from Wall Street that would go higher than that, but I want to give you an unbiased opinion. You might get an even worse opinion from your friends in St. James Street.

Mr. BENNETT. No; they are all on the other side now.

Mr. MCGEER. It is therefore not surprising that above the howls of condemnation that the forces of entrenched greed are hurling at Roosevelt, who is humanity's foremost contemporary champion, those who care to may perceive sanctions of approval for the Roosevelt policy already being presented by unbiased recorders of historical facts.

In the April 1936 issue of Current History, which I think everyone will admit is a nonpartisan journal, there is a leading article reviewing the Roosevelt recovery program. Among other things, this article says:

"Most of what happened is well known. The important thing is how we came through it. True, we hear very little cheering and practically none from the great capitalists whose system was saved from possible destruction in those black days of March 1933. Yet the National City Bank in its economic reports states that the year 1935 closed with business activity at the highest level in more than 5 years and with signs of recovery more widespread than at any time since the turn of the depression was reached in 1932.

Some industries making consumption goods are doing more business now than they did even in 1929. Some of the heavier industries such as the manufacturers of machine tools, steel ingots, pig-iron foundry equipment, and other classes of machinery have reached the highest level since 1930. Some mail-order and chain-store houses report greater sales than in 1929."

People say that Roosevelt has not accomplished anything, but I think that just as Jefferson freed the people of the British colonies in America from the slavery of irresponsible monarchy, and as Lincoln destroyed the slavery of evil and selfish monopoly that threatened his Nation with disruption, Roosevelt has moved to free his people from the bondage of money power.

Basing my conclusions upon such facts, I believe that future generations will add the name of Franklin Delano Roosevelt to that illustrious galaxy that is now exclusively reserved for the names of George Washington, Thomas Jefferson, and Abraham Lincoln.

Through his courageous and wholesome effort to complete the great work of establishing universal freedom launched in America by Jefferson and carried on by Lincoln, Roosevelt has carved for himself a permanent place in the history of human progress.

I am not alone in that conclusion. Lloyd George, observing Roosevelt's war with high finance, took occasion to state:

"The intrepidity with which he is fighting against the machinations of the established and arrogant priesthood of the golden calf is being watched with a thrill of admiration by those who, all the world over, have been suffering from its thraldom. If he wins he will have rendered a service to mankind which will exceed that of Lincoln when he abolished a more limited slavery.

"But his task is even more formidable, for the hierarchy he has challenged is powerful and its janissaries in all lands are federated in a well-knit, well-drilled, and well-equipped brotherhood in arms. They play into each other's hands—they fight each other's battles. If they fail, they will share each other's ruin; if they succeed, they will divide the loot among themselves.

"In London and in Paris they are unassailably entrenched. To adopt the scriptural quotation, 'Judas is their law given; industry is their washpot, and over successive ministeries have they cast their shoe.'

"The President of the United States has resolved that this verse shall no longer apply to American governments and American producers."

It is also well to note that the same powerful forces are deriding the Roosevelt program that jeered at Lincoln and assailed Thomas Jefferson.

I have placed before the committee a summary, brief but definite, of the recovery programs in Great Britain and the United States. I have done this because I think in those countries, with widely different economic conditions, programs of definite relief such as I think are available to us have been undertaken and have achieved some measure of success.

INDEPENDENCE FOR PUERTO RICO—ADDRESS BY DR. BLAS HERRERO

Mr. WALSH. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD a radio address entitled "Independence for Puerto Rico", delivered over Station WJSV, Washington, D. C., on May 13, 1936, by Dr. Blas Herrero, member of the Legislature of Puerto Rico.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

As a member of the Legislature of Puerto Rico, I desire to express appreciation to President Roosevelt, to the Congress, and to all of the good people in this great Nation who have manifested interest in the welfare of Puerto Rico.

Those of us who have lived on the island under the benevolent influence of American administration, those of us who have beheld the transformation from an obscure, Old World colonial possession to that of a progressive American dependency, those of us who view this transformation through eyes that are not beclouded by political insincerity, are profoundly grateful. We are thankful also for our status as American citizens and proud in our allegiance to a flag that is respected the world over.

The political organization with which I have the honor to be affiliated—the Coalition Party—is the majority party in Puerto Rico, and as such controls both branches of the legislature and the administration of insular governmental affairs. It constitutes a union of the conservative and labor groups, the latter of which is affiliated with the American Federation of Labor. Both of these groups represent important elements of the population—elements that are vital keys to the economic and social security of the islands, elements that have been "pro-American" since the occupation, elements that always have manifested unswerving loyalty to American institutions.

The Coalition Party—the majority political party of Puerto Rico—favors not independence, but statehood or a territorial status permitting popular election of Governor and cabinet, a status that will cement forevermore the bonds of friendship between the American people and the people of Puerto Rico.

There is no evidence of widespread, deep-rooted sentiment for independence in Puerto Rico. Present agitation is confined to a group of students and malcontents—a group that polled less than 2 percent of the total vote in the last general election. One of the political parties have seized upon it as a convenient means of enticing votes in the coming election, but few members of that same party sincerely favor it. One movement for independence, initiated in 1912, ceased entirely in 1917 when residents of the island were granted American citizenship. The present effort would find but few supporters if statehood or a territorial form of government were granted.

But what would be the result if independence actually were achieved? Suppose that the Congress, deceived by the clamor of a noisy minority, enacted a law providing for independence. What would happen to Puerto Rico? What would be the fate of those who were taken to the mountain top and shown the Utopia of independence below? What would be the effect upon trade with the United States? For Puerto Rico, utter ruin. For the credulous who listened too long to the blandishments and hollow promises of irresponsible spellbinders, hunger and hopeless poverty. For the United States, the loss of one of its most lucrative, one of its most important world markets, for Puerto Rico ranks sixth among all of Uncle Sam's world markets and second only to Canada among markets of the American continents. Sales of rice alone bring an annual revenue of $10,000,000 to American business houses; other commodities bring almost equally large revenue.

Sugar is the indispensable key to the economic security of Puerto Rico, the determining factor between economic ruin and prosperity. That industry alone represents 80 percent of the island revenue. It employs directly 130,000 people; indirectly, thousands more. The American railroad in Puerto Rico carries on only because of its sugar freightage, an item which constitutes 80 percent of all its traffic. Ships of the American merchant marine carry 800,000 tons of sugar annually from Puerto Rico to ports of the continental United States. And these same ships return to the island laden with commodities from American markets.

Tariff protection is indispensable to the economic stability of Puerto Rico. Without it the island would be bankrupt. With tariff protection the Puerto Rican producer markets sugar in the United States at $3.84 per 100 pounds. The world market price brings but 84 cents per 100 pounds. Without the benefit of tariff which, of course, would not continue in the event of independence, island producers competing in the world market would receive $3 less per 100 hundred pounds than under present conditions. One hardly needs to be an economist to visualize the disastrous effect of such a diminution in revenue. Sugar mills, unable to prevail against world competition, would be compelled to discontinue operations. With the closing of the mills, 130,000 people would lose their sole means of earning of livelihood; and, taking entire families into account, the disaster directly would affect five or six hundred thousand souls, or close to one-third the entire population. Discontinued pay rolls would stop the circulation of money in insular commerce. Stores and other establishments of trade would be affected. Wholesale bankruptcies would be the rule. American merchant-marine vessels would suffer the loss of sugar cargoes. Business houses in the United States would find no market for commodities now consumed in great quantities on the island. And all of the careful planning, all of the great humanitarian works that have been wrought upon our island by the American people will have gone for naught.

This is not a wild, ill-considered prophecy of Puerto Rico under independence. It is not a distorted, fanciful picture drawn from the imagination. Nor is it a prediction prompted by bias or by hope of political advantage. It is rather a statement that is based upon cold economic facts. With tariff protection we carry on; without it we perish.

The mere introduction of an independence bill in the Congress recently had tremendous financial reverberations on the island. Property owners became apprehensive. Straight-thinking citizens were fearful of the future.

The superpatriots who paint such glowing word pictures of an independent Puerto Rico have yet to explain what revenue will supplant that which will vanish with the removal of tariff protection on sugar. Like all visionaries, their theories are patterned

from the clouds. They have no thought for stark realities. Thousands may starve miserably, poverty and destitution may be widespread, disease may be rampant, and their native land hopelessly mired in the stagnant pool of economic hopelessness. To them the goal is all that matters; what happens after is of no consequence.

But what other industry is available to supply the tremendous loss of revenue that would result from collapse of the sugar market? The answer is none. The coffee industry, in competition with Brazil, Guatemala, Venezuela, and other South American nations, has been reduced to a state of insignificance due to losses sustained from two devastating hurricanes. Citrus fruits, in competition with Florida and California products, find American markets, but their revenues are inconsequential when compared with those from sugar. Other exports are in the same category. None can take the place of sugar.

Those who are giving lip service to the cause of independence for the purpose of corralling a few votes neglect to state who will sustain the thousands whose employment in the cane fields and sugar mills will cease with the collapse of sugar markets, or from whence will come the revenue to feed hungry children and to continue the splendid campaign against malnutrition initiated and furthered by the Government of the United States, or to continue the superb system of education installed and fostered by the same authority, and to carry on countless other useful improvements that have brought Puerto Rico the status of an important political subdivision of business energy and progress.

Intelligent men and women on the island know that there can be no appreciable source of revenue without lucrative sugar markets; and that there can be no lucrative sugar markets without tariff protection. People prompted by an honest desire to be of service to their native land, therefore, are not in favor of independence; are opposed to any movement that has for its objective the severance of the tie that binds the people of Puerto Rico and the people of the United States. All of these people, the intelligent, patriotic group on the island, favor first, statehood; statehood because it will bind them the closer to American institutions and make them feel that they have a share in the Government that has shaped their political destiny with such a degree of benevolence. As an alternative, they seek a form of territorial government that will authorize popular election of Governor and cabinet; a form of self-government that will come as a reward for unswerving loyalty to the American flag; loyalty that was notably demonstrated during the European war when 17,000 troops were equipped, trained, and made ready for embarkation to the battlefields of France. And surely, these aspirations will find favor with all Americans who are familiar with the orderly conduct of government that has prevailed on the island during 36 years of the occupation. Surely they will not be misunderstood among a people whose government is grounded upon the sacred principle of self-determination.

It has been asserted that the people of Puerto Rico are incapable of self-government because of illiteracy and because of an alleged prevalence of fraud in elections. Neither of these assertions has any basis in fact. Both are grounded upon a misunderstanding of and unfamiliarity with statistics and insular law.

During the regime of Spain illiteracy was widespread. Educational facilities were limited, means of communication primitive. Consequently an education, even of the most rudimentary form, was available only to the rich and middle classes. Thousands of people in parts of the island remote from municipalities or towns never entered school—never learned to read or write. Many of these people still live, and for the remainder of their lives will be carried of necessity, on the illiteracy side of the ledger as legacies inherited from the days of Spanish dominion. But tremendous strides have been made toward reduction of illiteracy on the island, thanks to educational efforts of the Government in Washington. Illiteracy has been reduced from 80 percent during the Spanish era to less than 40 percent at the present time. And with available facilities the percentage of illiterates on the island within the next 10 years will be reduced to a negligible figure. What other people, what other government, has accomplished better results in the short period of less than 40 years? The assertion, then, that the people of the island are incapable of self-government because of widespread illiteracy is without foundation.

It has been alleged in support of arguments against self-government that Puerto Rican elections are chronically fraudulent. Clean, honest elections should be the ideal of every government, of every people, and all sensible people demand that elections should be so conducted. But how many nations, how many governments, how many political subdivisions of government, have been without election frauds at some time in their history? But now, concerning Puerto Rico, "Let's look at the record", as one of our distinguished American statesmen would put it. The Thirty-third Annual Report of the Governor of Puerto Rico rendered to the Secretary of War by the Honorable James R. Beverley, then Governor, contains the following (I quote from Governor Beverley's report): "It is extremely gratifying to state that there was less disorder than in any previous election held in Puerto Rico, and it is believed that in spite of charges and countercharges by parties and candidates the elections of 1932 were the fairest and most orderly ever held on the island." I have no hesitancy in stating that elections in Puerto Rico are conducted on as high a plane of fairness and honesty as in any nation or political dependency functioning under a democratic form of government. But the word of a former American Governor, an unbiased observer, if you will, is most persuasive evidence on that score. And the American people, I am certain, will abide by the observations of Governor Beverley.

The American people assumed a grave obligation when they undertook the responsibility of administering the governance of Puerto Rico—an obligation that has been fruitful in returns both in loyalty of the people on the island and in trade revenues. The great work that has been accomplished since the occupation has merited the appreciation of Latin peoples the world over, and particularly of peoples in South American republics, for there is a feeling of brotherhood among Latins, as among Anglo-Saxons, and among other kindred races. Geographically, Puerto Rico is but a tiny speck on the map of the world—a grain of sand in the Caribbean Sea—but it is an important link in the chain that would be forged politically and economically between this Nation and those of South America. The undertaking to shape the political destiny of Puerto Rico has progressed to a vital stage—a stage where lack of further interest or abandonment will be ruinous; ruinous to Puerto Rico and disastrous to the confidence and good will that has resulted from it in other Latin countries. Those of us who have been consistent proponents of Americanism on the island; those of us who have resisted vigorously the efforts of selfish politicians to engender hatred of American institutions; those of us who are willing to shed our lifeblood, if necessary, in defense of these institutions—and our numbers are legion—feel that our efforts merit recognition—recognition in the form of a step that will make us feel that we are not just a mere insular possession but a real, integral part of this great Government; a step that would place us in a position to say to our people, "We are now a genuine part of the great government of the people, by the people, and for the people."

I thank you.

MEMORIAL DAY ADDRESS BY MONSIGNOR CONDON

Mr. LA FOLLETTE. Mr. President, I ask unanimous consent that there be printed in the RECORD a Memorial Day address delivered by Msgr. Robert B. Condon at La Crosse, Wis., on May 30, 1924.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

Today America pauses amid her myriad schemes of enterprise to honor the men who more than six decades ago, in the great struggle for national existence, won imperishable renown for themselves, and as imperishable, we trust, freedom for the Republic. Animated by this sentiment, we, a portion of the American people, assemble under the auspices of the Grand Army of the Republic. Fitting auspices, indeed. Who can better honor the heroic dead, who sleep in the sepulcher of glory carved with the good sword, than the comrades who laid them to rest when the thunders of battle had been hushed over many a blood-drenched field of fame—the comrades who shared similar perils, and whom a merciful Providence has spared from a similar destiny? Flowers fall on the tomb with heavenly peace from hands which bore the sword of freedom, and which laid to rest the inmate of that tomb.

Not only are the auspices fitting—the occasion, the day, is inspiring. It is sacred alike to memory and to hope. It commemorates a triumph of human liberty and of eternal right. It commemorates the emancipation of one race, the sacrifice of another, and strengthens our hope for the growth and glory of their cooperation. In commemorates a revelation of all that man, when true to God, can do for his fellow man.

GREAT THINGS IT DID

The Grand Army of the Republic. It marched farther than the armies of Caesar or Alexander. It fought more battles than the hosts of Tamerlane. But it carried out the ambition of no vulgar conqueror. It extended not the sway of oppressor. In the march of the Grand Army no helpless peoples were mowed down, no rights were trampled on, no arts were lost; civilization was not swept away. The only ruins the Grand Army left were the ruins of the auction block, of the whipping post, and of 4,000,000 shackles.

The Grand Army of the Republic. The very name carries us back over half a century. The years intervening roll away, and we stand in spirit in the great struggle for freedom. In that struggle the Grand Army of the Republic, the soldiers of the North, were, I believe, the instrumentality chosen by Heaven to redeem the land from the foul blight of slavery and to advance mankind. Let us, then, consider the principles for which that struggle was waged, and the results which followed it, in order that we may correctly estimate the services of the Grand Army of the Republic and the debt of gratitude we owe them.

A WAR FOR FREEDOM

The Civil War was a war for liberty, a war for national unity, a war for civilization.

It was a war not only for the freedom of the North, threatened by the arrogant slave power of the South, but for the freedom of an alien and proscribed race. Many and illustrious have been the deeds for liberty from the beginning of time, and in every part of the world. Mankind preserves their memory and crowns them with applause. Never, however, was a struggle for liberty grander than the struggle of the soldiers of the North from '61 to '65. They struggled not only for their own liberty, and the liberty of their race, but primarily, it would seem, for as despised and subjugated a race as the world had ever seen. They fought to actualize the Declaration of Independence, to make good the lofty professions

with which we began our career as a Nation, and with which we electrified mankind. Think of it. In the Declaration we proclaim that all men are created equal, that they are endowed by the Creator with certain inalienable rights, that among these rights are life, liberty, and the pursuit of happiness. And then, like a blotch of blood on our own Constitution, was the clause permitting traffic in human flesh and blood.

DECLARATION MEANS SOMETHING

If, however, the wrong was great and the contradiction glaring, noble was the reparation and mighty has been the change. Today the Declaration of Independence is more than a theory.

America is a Commonwealth of over 100,000,000 of freemen, without a slave and with no master save God.

The Civil War was a war for national unity. It was to emphasize beyond possibility of misinterpretation the opening words of the Constitution, "We, the people of the United States." It was to demonstrate the truth of those immortal words of Webster, "Liberty and union, now and forever, one and inseparable."

Today the southern people salute the flag of our common country with patriotism as fervent as that of the North, and would rally as enthusiastically in its defense. Indeed, the sentiment of the South may be summoned up in these words of Henry Grady, "Sons of the South, sir, would die to defend the Union which their fathers sought to destroy."

The Civil War was a war for civilization. It requires neither wide range of historic reading nor depth of philosophy to realize how much of supreme importance was at stake in the Civil War. He who believes with Talleyrand that "everybody is wiser than anybody", he who believes with Lincoln in a "government of the people, by the people, and for the people", must behold suspended on the issue of that conflict the fate of popular government and the political salvation of the world.

WOULD END THE COUNTRY

If the South had succeeded, the Republic would have been no more. Another chapter, and the saddest in all the melancholy record of unsuccessful struggles for liberty would have been written. The experiment of self-government by the people would have failed. And the hopes of the oppressed of all the earth would have gone out forever. Dreadful, indeed, were the possibilities attendant upon southern success. Hands red with guilt of slavery would have held the political destinies of America. Perhaps the slave power would have established a strong centralized government. Like a huge boa constrictor the slave power would then have coiled itself around the States, crushing in its slimy folds the last instinct of liberty, and striking its deadly fangs into all who would resist. Perhaps the principles of Calhoun would have been carried to the extremity of his logic. There would have been secession from those who had seceded. Separate and independent governments would have been established. And, superadded to the horror of slavery, would have been the repetition of European history, with its centuries of militarism, devastation, and woe.

But this was not to be. The blood and treasure, the sacrifice and heroism of the Revolution, of the War of 1812; the civic virtues displayed on land and sea, in peace and war, in public office, and in private station; the patriotism and statesmanship of Washington and Jefferson, of Hamilton and Jackson, of Webster and Clay were to have a fairer issue. It was not given to mankind to hear amid the ruins of our country and over the tomb of liberty, the jubilations of the oppressor, mingled with the wailings of the oppressed.

A COST TREMENDOUS

But, oh, at what a cost was this awful destiny averted. We think today of those who died that the Nation might live, of all they wrought and suffered. We think of the homes made desolate, of the hearts broken over loved ones who marched away and came not back, of the lives that went up to God in battle, in hospital, and in prison pen. Surely if we have reached a height of unprecedented national glory, we have passed through the valley of suffering. Surely if we have beheld the salvation of God it was by the red sea of fraternal blood! We are thankful those days have passed away. We pray God they have passed away forever. Far, very far from us, O God of battles, be Thy fiery host, Thy destructive march, and Thy terrible vengeance. But Thou, O Prince of Peace, come, abide with us forever and let Thy rays, O Light of Ages, fill the land.

SISTERS OF CHARITY

Dr. Condon next spoke of the heroic women of the Civil War, of the mothers and wives and daughters and sisters of the boys in blue, of the Woman's Relief Corps, and of the Sisters of Charity. He spoke of the merciful ministrations of that sister on the field of battle, as she stanched the lifeblood of the wounded soldier, cooled the fevered brow, and spoke words of heavenly consolation to the soul about to go into the presence of God.

He spoke, too, of the necessity of carrying out in peace the spirit which the "Grand Army of the Republic" carried out in war.

"The soldiers of the Grand Army knew what they were fighting for", he said. "Theirs was an intelligent patriotism. And such a patriotism must needs be ever, if our country is to endure. How much of the crying out against the Constitution arises from not understanding that Constitution. We, all of us, owe a great debt to the lawyers and statesmen of the land for their knowledge of the Constitution, and their defense of it against rash and thoughtless innovators. But that knowledge should be possessed by every citizen who would fain preserve the inheritance of the soldiers and emulate their patriotism. Let every American be educated in the principles of the Constitution.

TEACH PATRIOTISM

"Let us begin, even in the grades, to teach every American boy and girl the meaning of every clause of the Constitution, how much it cost to write that clause into public law, and the frightful oppression from which it delivered those who arduously secured it, and from which, it was hoped, it was to deliver every American forever. Let us reflect, too, that the greed for power and the other evil passions, which caused that oppression, are ever latent in the human heart and are ever striving to extend their sway. To war against these and every other evil passion is our duty as men, conscious of an eternal destiny and our duty, too, as citizens, who would realize a glorious destiny for our country.

"Let us, therefore, on this great day pledge ourselves over the ashes of our heroic dead to the maintenance of those great principles of religion and morality which are the indispensable condition of the growth and worth of the individual, and of the weal, the greatness, and the perpetuity of the Nation."

INTEREST RATES ON FARM LOANS—STATEMENT BY W. B. DOAK

Mr. FRAZIER. Mr. President, I ask unanimous consent to have printed in the RECORD a statement by Mr. W. B. Doak, a farmer living in Virginia, in regard to interest rates on farm loans.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

Eighty percent of loans taken over by the Farm Credit Administration (mainly on a 5-percent bond) have been refunded at 3 to 3¼ percent, saving Federal land banks $12,000,000 annually for 20 years on interest. Among other rights conveyed by the Federal farm loan associations to stockholding farmers is this very process of calling in bonds and refunding at a lower rate of interest. Is it reasonable to expect that we will be satisfied with a reduction to 3½ percent for 1 year, 4 percent for 2 years? Then to pay 5 percent for the rest of the 40 years. Much ado is made of our being given the benefit of half, of this reduction for 3 years, of what they get for 20 years.

At no time in 20 years history of farm credit have bondholders or brokers ever accorded us fair or even honest treatment. Their first move was to syndicate the bonds for three or four banking and investment houses—30 or 40 percent too high—to amend, repeal, or reorganize the system. The Federal farm loan associations provided for cooperative control by farmers who still own over 90 percent of all voting stock, and pay expenses (twenty-odd million dollars a year for 12 land banks). They undertook to relieve us of an $18,000,000 reserve fund. Compare Federal land-bank reports, December 31, 1933, with June 30, 1934. They have never shown the slightest regard for their obligation to a million contracts with farm families who trusted and fed them.

Instead of being merely a matter of peeling off $5 to $7 from a roll of $100 bills, interest payments have become chronic nightmares hitched to every bedpost.

Farmers in land banks are being ordered to get ready to pay more than ever, commissioners' loans added in for camel's back-breaking measure. Instead of being willing to admit claim of Farm Credit Administration.

Five thousand Federal farm loan associations are being turned into what would, in organized labor, be called company unions.

No farmer in America has betrayed so many trusts, broken so many contracts, or been so long delinquent—12 years—as farm-loan banks.

A Midas hand, that of the professional banker, has laid its withering curse upon the only flower still blooming in the Democratic garden of our Wilson administration.

We hope to help our great humanitarian and progressive President Roosevelt in his inaugural avowed purposes, "to drive the money changers out of the temple." What the money changers have undertaken to do is to drive the cooperating farmers out of their agrarian wing, added to our financial system in 1916.

We must come back to Thomas Jefferson-Andy Jackson principles and precepts about money and credits. Passing the Frazier-Lemke bill is our first step. I make no effort to say where or when this farmer-banker fight will end, but entertain no doubt how. Borrowers outnumber lenders 10 to 1. We are in the majority and, what is of infinitely more importance, in the right. We are bound to win—only a matter of time.

I will use a holder of $10,000 worth of F. L. B. bonds on "the Hill" by way of illustration. Knowing our constant effort to reduce bond rates, tax-free, he claimed for years that he didn't get worth of his money. So when his 5-percent bonds were called in and paid off, I asked what he did. After some hesitation he admitted reinvesting his $10,000 in the new issue, 3¼ percent; also that 2 percent was all he could get in a safe investment otherwise. What does this signify? Simply that three farmers had sweat blood for 14 years, so our county agent says, to pay this investor 50 percent more than, he was finally forced to admit, his money would bring elsewhere.

The Farm Credit Administration statement that "farm mortgage rate is lowest in history" is incorrect. On the contrary it is one of the highest—its own overhead, the highest of which I have any knowledge.

No blight or pest, not even the boll weevil, ever hurt our beloved Southland like usury. Experts have testified there is more usury in some Southern and Western States than in the whole of Europe.

Smith's Bible Dictionary, page 723, "The word usury has come in modern English to mean excessive interest upon money loaned

either formally illegal or at least oppressive." In the Scriptures, however, the word did not have this sense but meant simply interest of any kind upon money. Jews were forbidden by the law of Moses to take interest from their brethren. The practice of mortgaging land, sometimes at exorbitant interest, grew up among the Jews during the captivity in direct violation of the law. We find the rate reaching 1 to 100 per month, corresponding to the "Roman Centesimae Usurae, or 12 percent per annum." "Nehemiah firmly repressed exactions of the nobles and usury of the rich."

Nehemiah, fifth chapter: "We have mortgaged our land, vineyards, and houses that we might buy corn, because of the dearth (drought). * * * We have borrowed money for the king's tribute and that upon our lands and vineyards. * * * I rebuked the nobles and the rulers and said unto them, Ye exact usury every one of his brother. And I set a great assembly against them. * * * Also I shook my lap and said, So God shake out every man from his house * * * that performeth not this promise, even thus be he shaken out and emptied."

FEDERAL GASOLINE TAX

Mr. CONNALLY. Mr. President, at the request of the junior Senator from Oklahoma [Mr. GORE], who is absent, I ask leave to have printed in the RECORD an editorial entitled "Federal Gasoline Tax Is Direct Burden on Farmers, Business, and Industry."

There being no objection, the editorial was ordered to be printed in the RECORD, as folows:

[From the Oil and Gas Journal of Apr. 23, 1936]

FEDERAL GASOLINE TAX IS DIRECT BURDEN ON FARMERS, BUSINESS, AND INDUSTRY

Of the total revenue received by all of the taxing jurisdictions of our Government—National, State, and local—the taxes levied on the sales of gasoline produce approximately one-twelfth of the total revenue raised in the United States.

There are 182,651 governmental units in the United States which exercise the sovereign power to tax the citizen, his properties, his business, and his income. The aggregate annual tax revenue levied and raised by all of these taxing jurisdictions amounts to approximately $10,000,000,000. The aggregate expenditures of these governmental jurisdictions amounts to approximately $15,000,000,000. The difference is made up by loans and not by taxes.

In view of the extremely large number of taxing jurisdictions and the many ramified problems of Government revenue and expenditures, it is exceedingly significant that when the collection of all taxes is considered, whether direct or indirect, specific or ad valorem, customs or excise, or property or income, the sales tax levied upon one single item of commerce, namely, gasoline, produces approximately one-twelfth of all the revenue raised annually in these United States.

In the year 1935 it is estimated that State gasoline taxes produced revenue for the States totaling $625,000,000, while the Federal Government's tax produced revenue in excess of $170,000,000.

The Federal gasoline tax is called an "excise tax", and while it is collected at the refinery instead of at the filling station, it is none the less a sales tax and must be passed on to the consumer of the gasoline. Every time any citizen of the United States buys 10 gallons of gasoline, he pays 10 cents to the Federal Government as a tax, whether he knows it or not. This is not only an extremely heavy burden, but it is also an added burden to all who operate private cars, trucks, tractors, busses, and other forms of automotive transportation. There is no rebate of the Federal tax to the farmer or to anybody else, such as is the case in many State gasoline taxes that are levied.

To illustrate the effect of the Federal gasoline tax upon the citizen of any given area, it is only necessary to consider any given State and observe the State burden upon users of automotive units in that State, and then observe the added burden caused by the Federal gasoline tax. The State of Oklahoma is a case in point.

OKLAHOMA AS EXAMPLE

Oklahoma is one of the leading oil States in the Union, and in 1935 it supplied 185,348,000 barrels, or 18.65 percent of the total crude oil produced in the United States. Oklahoma refineries ran to stills 57,442,000 barrels of crude oil, or 5.94 percent of the total crude oil refined in the Nation. Every citizen in the State is either indirectly or directly a recipient of the economic betterment brought about by the wealth-producing operations of the industry and, as a consequence, every citizen in the State is interested in the welfare of the petroleum industry. Truly, Oklahoma is one of the predominant oil States of the Union.

The people of the State of Oklahoma, according to the best records available at this time, consumed approximately 327,500,000 gallons of gasoline during the year 1935, on which Federal gasoline taxes were paid in the round amount of $3,200,000. Of this amount, it is roundly estimated that Oklahoma farmers paid approximately $910,000 in Federal taxes, while other citizens and motor users in the State contributed the balance, or $2,290,000 in Federal gasoline taxes.

There are approximately 140,000 cars and trucks on Oklahoma farms. Under the Oklahoma State gasoline tax law, farmers residing within the State can secure a refund of the State tax on gasoline used in tractors, stationary engines, etc., when same are used strictly for agricultural purposes. The Oklahoma Tax Commission reports that in the year 1935 there were 21,136,730 gallons of gasoline exempted from the State tax for such purposes. Despite this assistance to the farmers of Oklahoma by the State itself, these same Oklahoma farmers paid over $211,000 in Federal gasoline taxes on the gasoline from which they were exempted in paying a State tax.

It is roughly estimated that the cars and trucks on Oklahoma farms consumed 70,000,000 gallons of gasoline last year, for which they were not exempt the State tax. Therefore, roughly, the total consumption of gasoline by the farmers of the State of Oklahoma was approximately 91,000,000 gallons. If these figures are roughly correct, Oklahoma farmers then paid approximately $910,000 in 1935 in gasoline taxes to the Federal Government.

Roughly speaking, the farmers of the United States, in carrying on their business and in the use of their private cars, consume approximately one-fourth of all the gasoline sold each year. Therefore they pay approximately one-fourth of the annual Federal gasoline-tax bill, or $43,000,000. This is an immense sum, and its payment by the farmer constitutes one more exceedingly heavy burden which he has been called upon to bear in these recent "lean years." Thus it is that the repeal of the Federal gasoline tax would, in itself, be quite an item of "farm relief" to the farmers of the State of Oklahoma and, similarly, to the farmers of every other State in the Nation.

INDIRECT BURDEN, TOO

In addition to being a direct burden on the farmers and motorists of the State, the Federal gasoline tax is also an indirect burden on two of Oklahoma's leading industries, namely, petroleum production and petroleum refining. It is further an indirect burden on every citizen who owns an acre of oil land or who owns a dollar's worth of oil royalty. It is an indirect burden on every citizen who owns stock in any oil company, whether such company be engaged in producing crude oil, transporting crude oil, refining crude oil, or marketing the products from the industry. It is especially an indirect burden on every person who owns or operates a service station, because in the eventual long run the demand for the product sold at the station is decreased due to the higher cost to the consumer for each gallon which he purchases.

The gasoline tax creates other problems with which the filling-station operator must deal. Most important of these is tax evasion and the consequent "price-cutter." The tax-evasion scandals just brought to light in Colorado and Tennessee furnish ample evidence that evasion is a serious problem. These situations show clearly that unreasonable and excessive gasoline tax rates invite tax evasion and avoidance, and that legitimate marketers who pay their gasoline taxes are placed at a competitive disadvantage. Every cent added to the total gasoline tax paid by the consumer makes this condition just that much worse. Studies made by automotive associations show that the money spent for gasoline amounts to approximately 40 percent of the cost of operating a car. Since the tax comprises more than one-third of the price the motorist pays for his gasoline, it is evident that the gasoline tax is an item of great importance to every car owner, which, in turn, indicates that there might be every inducement for the motorist to patronize the "price-cutter."

Oklahoma refineries produced 33,288,000 barrels, or 1,398,096,000 gallons, of gasoline in 1935. Making allowance for exempt gasoline (sales to governmental units and for export), the Federal gasoline tax on the total amount of gasoline manufactured within the borders of Oklahoma amounted to approximately $13,000,000. It is further estimated that the Federal tax payable on all gasoline made from all crude and natural gasoline produced in Oklahoma, whether said crude was refined in Oklahoma or elsewhere, amounts to approximately $40,000,000 annually. Reviewing these figures, it is ostensible that the importance of such a tax load cannot but fail to curtail the demand for the output of Oklahoma refineries and oil wells.

We find consumers and retail merchants vigorously protesting sales taxes of 1 and 2 percent. These protests are heard throughout the land. However, at present prices in Oklahoma the 1-cent Federal gasoline tax is, in effect, a 7-percent retail sales tax upon gasoline. This is all in addition to the Oklahoma gasoline tax, which approximates a sales tax of over 30 percent. As a consequence, motorists in Oklahoma are paying a sales tax of almost 40 percent upon the gasoline they purchase.

The average price of United States motor gasoline (63–70 octane, regular) in 1935 at Oklahoma refineries was approximately 5.3 cents per gallon, and for third-grade gasoline (62 octane and below) the average was approximately 4.5 cents per gallon. Very little premium grades of gasoline are now sold, so the average price of all gasoline at Oklahoma refineries in 1935 was probably not more than 5 cents per gallon. On this basis the Federal gasoline tax of 1 cent per gallon constituted a manufacturers' excise tax of 20 percent on an essential and necessary commodity purchased by Oklahoma citizens.

While the Federal gasoline tax is paid directly by the manufacturer, it is paid by the final consumer in the last instance. As the tax increases and thus the consequent price to the consumer increases, sales resistance is increased because the consumer is able to buy less gasoline with the same amount of money. Sales fall off and prices have a tendency to weaken, and thus again the Federal gasoline tax affects the refiner and also, in turn, the crude-oil producer.

EFFECT ON DEMAND

Studies and analyses made by the American Petroleum Industries Committee, by comparing the consumption of gasoline in States that have increased the tax with the consumption in other

States of similar geographic and economic conditions and structure indicate that each 1-cent increase in the gasoline tax results in a 5-percent decrease in gasoline consumption.

Assuming the correctness of these figures, it is thus estimated that had it not been for the 1-cent Federal tax on gasoline in 1935:

The revenue of Oklahoma oil producers would have been greater by $8,750,000.

The revenue of Oklahoma royalty owners would have been greater by $1,250,000.

The gross income of Oklahoma refineries would have been greater by $3,675,000.

The net income of Oklahoma filling stations would have been greater by $500,000.

And the gasoline tax revenue to the State would have been greater by $625,000.

Had the revenue of Oklahoma producers and refiners been increased by the above amounts, probably only a small part of it would have gone to profits. However, the increased production and refining activities would have brought about increased employment, increased expenditures for supplies and other products, and would generally have benefited the State as a whole.

The repeal of this tax would be a stimulant to business and industry and would assist in speeding economic recovery in Oklahoma, as well as in every other State in the Union.

NAVAL APPROPRIATIONS

The PRESIDING OFFICER (Mr. McGILL in the chair) laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 12527) making appropriations for the Navy Department and the naval service for the fiscal year ending June 30, 1937, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. WALSH. Mr. President, I move that the Senate insist on its amendments, ask for a conference with the House on the disagreeing votes of the two Houses thereon, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. BYRNES, Mr. COPELAND, Mr. WALSH, Mr. HALE, and Mr. KEYES conferees on the part of the Senate.

LOSS OF CHECKS IN THE MAILS

The PRESIDING OFFICER laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 9496) to protect the United States against loss in the delivery through the mails of checks in payment of benefits provided for by laws administered by the Veterans' Administration, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. McKELLAR. I move that the Senate insist on its amendments, agree to the conference asked by the House on the disagreeing votes of the two Houses thereon, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. McKELLAR, Mr. HAYDEN, and Mr. FRAZIER conferees on the part of the Senate.

PHILIPPINE CURRENCY RESERVES ON DEPOSIT IN UNITED STATES

Mr. ADAMS. Mr. President, I ask unanimous consent that Monday next, upon the convening of the Senate, the Senate proceed to the consideration of Calendar No. 1772, being Senate bill 3486.

Mr. McNARY. Mr. President, I ask that the bill be reported by the clerk.

The PRESIDING OFFICER. The clerk will report the bill by title.

The LEGISLATIVE CLERK. A bill (S. 3486) to repeal the act entitled "An act relating to Philippine Currency reserves on deposit in the United States."

Mr. ROBINSON. Mr. President, in the absence of the chairman of the Committee on Territories and Insular Affairs, the Senator from Maryland [Mr. TYDINGS], I cannot consent to an agreement to take up the bill Monday. As the Senator from Colorado knows, the Senator from Maryland is interested in the bill and has indicated a purpose to move to refer the bill to the Committee on Territories and Insular Affairs, of which the Senator from Maryland is chairman. May I inquire of the Senator from Colorado whether he has an understanding with the Senator from Maryland about the matter?

Mr. ADAMS. The matter has been pending some 2 months, delayed largely in order to accommodate the Senator from Maryland. I talked to him the other day, and he told me to have the bill set down for consideration and let him know the hour and he would be here. That is the reason why I am asking to have it set down for Monday, in order that he may have ample notice. He said he would be willing to come any day upon notice sent to his office during the day. I am asking, however, that it go over until Monday in order to give him ample notice.

Mr. ROBINSON. In view of the statement made by the Senator from Colorado, I shall not object to his request that when the Senate convenes Monday it shall proceed to the consideration of the bill which he has designated.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Colorado [Mr. ADAMS] for unanimous consent that upon convening on Monday next the Senate shall proceed to the consideration of the bill (S. 3486) to repeal the act entitled "An act relating to Philippine currency reserves on deposit in the United States."

Mr. HAYDEN. Mr. President, reserving the right to object, I may say that I have just entered the Chamber, and I should like to inquire if the arrangement proposed is agreeable to the Senator from Maryland?

Mr. ADAMS. Yes. I have arranged with him to have the bill taken up any day and to let him know during the day when it will come up, so that he may come over from his office. I am now asking that the bill be taken up Monday, in order that the Senator from Maryland may have 2 or 3 days' notice.

Mr. HAYDEN. Is the Senator from Maryland aware that the Senator from Colorado is making this request?

Mr. ADAMS. No; but he said that any time I could arrange to have it taken up all I would have to do would be to telephone his office and he would come over. I have gone beyond that, and am asking to have the bill set down for consideration Monday, which will give him 3 days. I have waited week after week—really, month after month—to have the bill brought before the Senate. The point is being reached that unless the bill shall be taken up promptly it will not be considered at this session.

Mr. HAYDEN. Under the circumstances, I shall be constrained to object unless the Senator from Maryland knows that the request is being made.

Mr. ADAMS. He knows the request is being made, but he does not know the exact form of the request.

Mr. HAYDEN. I should like to have him know all about it.

Mr. ROBINSON. Mr. President, may I suggest to the Senator from Colorado that he communicate with the Senator from Maryland, if he finds it practicable to do so, and then renew his request a little later?

Mr. CLARK. Mr. President, I have no objection to the procedure outlined by the Senator from Arkansas [Mr. ROBINSON], but, as a member of the Committee on Territories and Insular Affairs, I feel it incumbent upon me to say I think the bill should be referred to that committee for consideration by it. The measure which it seeks to repeal was reported from the Committee on Territories and Insular Affairs originally. Personally I shall not be willing to agree to unanimous consent to consider a bill to repeal an act which was reported out of that committee and passed unanimously by the Senate, when the request applies to a bill which has been reported from another committee and not from the Committee on Territories and Insular Affairs which originally considered the act which it is now sought to repeal.

Mr. ROBINSON. Mr. President, probably before the Senator from Missouri entered the Chamber I made the statement that it was my information that the Senator from Maryland [Mr. TYDINGS] desired an opportunity to move a reference of the bill to the committee of which he is chairman, namely, the Committee on Territories and Insular Affairs.

Mr. ADAMS. It is my understanding that the arrangement I have suggested is satisfactory to the Senator from Maryland.

Mr. CLARK. I have no disposition to interfere with any such arrangement, but I do not wish the Committee on Territories and Insular Affairs to be precluded from consideration of the bill because of the absence of the chairman of that committee, who desires to submit a motion to refer the bill to that committee.

Mr. ROBINSON. An agreement to proceed to the consideration of the bill would not preclude a motion to refer it to that committee.

Mr. HAYDEN. Mr. President, let me suggest to my friend from Colorado that he delay making the request until he can actually contact the Senator from Maryland. As a member of the Committee on Territories and Insular Affairs, I feel that I should object at this time.

Mr. ADAMS. Mr. President, the matter has been pending more than 2 months. I have been talking to the Senator from Maryland in an effort to have the bill brought before the Senate; but it has been delayed time after time in order to meet the convenience of the Senator from Maryland. It has been delayed until it is now probable the bill cannot be passed just because of the courtesy extended. We are approaching the end of the session. The bill, in my judgment, is important. I may say to the Senator from Arizona that it is the only bill pending which proposes to make money for the Treasury of the United States. Every other bill that I know of has proposed to take money out of the Treasury. This one bill proposes to put some money into the Treasury, and yet I find it is impossible to secure consent for its consideration Monday.

Mr. HAYDEN. If the Senator from Maryland intends to move——

Mr. ADAMS. The Senator from Maryland has told me that I might arrange to have the bill taken up for consideration. I have not the slightest hesitancy in saying to the Senator from Arizona that if the time fixed is not convenient for the Senator from Maryland and he is willing to fix a time in the reasonably near future subsequent to Monday, it will be agreeable to me; but I do want a time fixed for consideration of the bill.

Mr. HAYDEN. The primary question for the Senate to consider is whether the bill should be considered by the Committee on Territories and Insular Affairs before it is considered by the Senate. My understanding is that that is the motion which the Senator from Maryland desires to make. If he and the Senator from Colorado can agree when the motion shall be made—and I see no reason why they cannot come to accord upon that point—then the Senate will have an opportunity to determine whether it wants to consider the measure without the advice of the Committee on Territories and Insular Affairs. If the Senate decides that it does want to do that, then the bill can be taken up for consideration.

Mr. ROBINSON. Mr. President, that is the suggestion I made sometime ago. The Senator from Colorado has repeatedly applied to me to have opportunity afforded for the consideration of the bill. I have not entered into any arrangement to that end. I understood he had an agreement with the Senator from Maryland.

I wish it made clear that the Senator from Maryland desires to move to refer the bill to the Committee on Territories and Insular Affairs. As already stated, that motion would not be precluded by the agreement which the Senator from Colorado suggests. If there is an objection to the request, I will state to the Senator from Colorado that, while I do not commit myself to the attitude he has taken concerning the bill, I see no reason why he should not move on Monday to proceed to its consideration.

Mr. HAYDEN. I think the Senator had better do that.

Mr. ADAMS. I shall have to move today to have a time fixed on Monday for the consideration of the bill. I assume that is within my rights.

Mr. ROBINSON. Mr. President, for the present I shall call for the regular order. If the Senator desires his request acted upon now, of course, that may be done.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Colorado?

Mr. HAYDEN. I am constrained to object.

The PRESIDING OFFICER. Objection is heard.

Mr. ROBINSON. I call for the regular order.

PARKWAY AND RECREATION FACILITIES

The PRESIDENT pro tempore. The Chair lays before the Senate the unfinished business.

The Senate resumed the consideration of the bill (H. R. 10104) to aid in providing the people of the United States with adequate facilities for park, parkway, and recreational-area purposes, and to provide for the transfer of certain lands, chiefly valuable for such purposes, to States and political subdivisions thereof.

The PRESIDENT pro tempore. The clerk will state the amendment reported by the committee.

The amendment of the Committee on Public Lands and Surveys was to strike out all after the enacting clause and insert:

That the Secretary of the Interior (hereinafter referred to as the "Secretary") is authorized and directed to cause the National Park Service to make a comprehensive study, other than on lands under the jurisdiction of the Department of Agriculture, of the public park, parkway, and recreational-area programs of the United States, and of the several States and political subdivisions thereof, and of the lands throughout the United States which are or may be chiefly valuable as such areas, but no such study shall be made in any State without the consent and approval of the State officials, boards, or departments having jurisdiction over such lands and park areas. The said study shall be such as, in the judgment of the Secretary, will provide data helpful in developing a plan for coordinated and adequate public park, parkway, and recreational-area facilities for the people of the United States. In making the said study and in accomplishing any of the purposes of this act, the Secretary is authorized and directed, through the National Park Service, to seek and accept the cooperation and assistance of Federal departments or agencies having jurisdiction of lands belonging to the United States, and may cooperate and make agreements with and seek and accept the assistance of other Federal agencies and instrumentalities, and of States and political subdivisions thereof and the agencies and instrumentalities of either of them.

SEC. 2. For the purpose of developing coordinated and adequate public park, parkway, and recreational-area facilities for the people of the United States, the Secretary is authorized to aid the several States and political subdivisions thereof in planning such areas therein, and in cooperating with one another to accomplish these ends. Such aid shall be made available through the National Park Service acting in cooperation with such State agencies or agencies of political subdivisions of States as the Secretary deems best.

SEC. 3. The consent of Congress is hereby given to any two or more States to negotiate and enter into compacts or agreements with one another with reference to planning, establishing, developing, improving, and maintaining any park, parkway, or recreational area. No such compact or agreement shall be effective until approved by the legislatures of the several States which are parties thereto and by the Congress of the United States.

SEC. 4. As used in sections 1 and 2 of this act the term "State" shall be deemed to include Hawaii, Alaska, Puerto Rico, the Virgin Islands, and the District of Columbia.

Mr. McNARY. Mr. President, would the Senator from New York be willing to describe briefly the differences between the bill as it was recommitted and the bill now pending? I think probably the report sets forth the facts, but I think it would be well for the Senator to indicate in what respect modifications were made by the committee looking to the removal of some of the objections to the bill.

Mr. WAGNER. Mr. President, I suppose that it is not necessary to say much about the measure that is pending, because we had the bill under consideration for 2 days when it was originally reported by the Committee on Public Lands and Surveys. The purpose of the bill is to aid in providing the people of the United States with adequate facilities for parks, parkways, and recreational-area purposes.

As the bill came to the Senate originally from the committee it provided not only for a survey and study of the recreational facilities throughout the United States for the purpose of bringing about a coordination of park and parkway facilities and recreational areas between the Federal Government and the States, but, in addition thereto, it authorized the making of transfers of Federal property to the States for the purpose of carrying out this type of coordination. Many objections were made to that provision upon the floor, and some very valid

criticisms were voiced. As the result of those criticisms the bill was recommitted. Thereupon the committee itself recognized the validity of the criticisms and eliminated all the features of the original bill which authorized, even subject to the approval of Congress, the transfer of any Federal lands to States for recreational-facility purposes. The bill now comes before us embodying a single purpose, to which, it seems to me, no one can object—a study by the Department of the Interior of the recreational facilities of the United States for the purpose of bringing about this type of coordination. These studies will not be made within any State unless the State itself consents to them. Then, of course, after the studies and surveys shall have been made, reports will come back to Congress for such action as Congress may deem wise and proper.

That is all there is to the proposed legislation. We have lately come to recognize the usefulness, from the social as well as the economic standpoint, of the development of recreational facilities. My own State probably will not be affected at all by this proposed legislation, for its park development has reached a position of which we are justly proud. I do not think it is excelled anywhere in the world.

To show the popularity of our national park development I may refer to statistics and say that in our national parks, numbering, I think, 24, spread through the country, there were nearly 8,000,000 visitors last summer, or the largest number in history. Our citizens enjoy the facilities of these parks. They are wholesome from the standpoint of recreation and health.

We desire, if possible, to aid the States by extending the technical knowledge which the National Park Service has. It may be found in certain areas of the country that lands are owned by the Federal Government which are of no use at all to it, but which might be of great use to the States in their park development. If the study so finds, Congress in its wisdom may decide that these transfers should be made. But the present bill is limited to a study.

Mr. WHEELER. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Montana?

Mr. WAGNER. Yes.

Mr. WHEELER. Has this bill the approval of the National Park Service?

Mr. WAGNER. The National Park Service, I understand, would prefer the more comprehensive measure which was originally passed by the House, but it was very definitely disclosed on the floor of the Senate that Senators are opposed to going beyond a mere study and survey at this stage.

Mr. ADAMS. Mr. President, when this bill came before the Public Lands Committee I was rather favorably impressed with it, and joined in reporting it. The bill now has been modified and trimmed until it is perfectly futile and useless. It merely will involve the expenditure of money in the employment of persons on a perfectly useless survey.

There is no one, not merely in the Senate but in the United States, who has a higher regard than I have for the services of the national-park organization. They have done fine work in preserving and exhibiting the natural wonders which are found in the various national parks. However, like all other bureaus and departments of the Government, they have cultivated a bureaucratic mind. They have narrowed down their viewpoint until with them the only thing that matters is the parks. I think their frame of mind can be illustrated in this way—that if a group of men were caught in a heavy snowstorm in one of the parks, and the only food available were the wild animals, and the wild animals were starving, the park authorities would very readily agree that the men should be fed to the animals to keep them from starving, but would not consent that the animals be killed to keep the men from starving. [Laughter.] That has become the attitude of the National Park Service. As I say, I think well of them, but they are not so minded as to be able to make a coordinated survey of the United States.

I repeat, the National Park Service has done marvelous work in various sections of the land, and I would not in any way decry it; but to turn the Service loose to go through the land, as proposed in the bill, simply means the recommendation to Congress of endless appropriations and demands for additional parks. The Park Service men, skilled in geology, skilled in natural history, skilled in the lore of the mountains, have now taken their musty history books down from the shelves and are seeking to take under their jurisdiction all historical places, battlefields, and other localities within the country. That objective is within the minds of the Park Service in seeking the opportunity to make a survey.

Senators speak of coordinating the parks. What coordination is possible between the administration of Rock Creek Park and the administration of the Rocky Mountain National Park in my State? There is no common policy which requires the National Park Service to make a great survey and see whether or not there are lands suitable for park areas; whether or not, in order to commemorate John Brown, we should make a park out of the whole area in which the Battle of Ossawatomie occurred; whether or not we should make a park of the whole city along the Delaware where Washington crossed for the Battle of Trenton.

Nothing less than that will satisfy the Park Service. They now have pending a bill asking that the Park Service be given authority to purchase all the land within a radius of 10 miles of the site of the Battle of New Orleans, which was on the edge of the city of New Orleans. There is no limit to their ambition, which is a very creditable one; but I am merely saying that their attitude of mind is such that they ought not to be given authority to act as the arbiters of Congress to determine park locations and park policies.

In this bill there was a provision, wide and sweeping, under which they could make an investigation covering the entire United States. But from the bill there have now been eliminated the areas which, in the West at least, are the only available areas of consequence for recreational purposes. I refer to the forest reserves in my State. Recreation is to be found in the forest reserves. But we are asked to exclude from this survey the very best and most available recreational areas. Yet the bill is spoken of as a great, comprehensive measure.

The National Park Service wants to make a survey. I wish to give an illustration of the reason why I question its understanding of surveys; and this is where it comes home. Great mountain ranges, the Continental Divide, pass through the State of Colorado. The waters of the West flow through the Colorado River into the Gulf of Mexico. There is more water on that side of the range than we can use. We have our compacts made with other States by which the States known as the upper-basin States have a right to use a certain portion of the waters of the Colorado River. On the eastern slope there are vast areas of marvelous farm land, without water. The people of my State have been endeavoring to transfer some of the surplus water from our western slope to the thirsty lands on the eastern slope.

When the Rocky Mountain National Park, in my State, was ceded to the United States by an act of my State legislature it was specifically provided that the rights of the people of Colorado in their waters should be reserved and that rights-of-way should be reserved.

Following that, plans were worked out to transfer some of this water—not from the park, but from sources lying completely out of the park, west of the park, under the mountains in the park, 4,000 feet below the crest. We asked for an appropriation to survey this proposed transfer. The Secretary of the Interior allowed $150,000 for a mere survey, and the Park Service filed protests against even entering upon the national-park grounds to make a survey in order that needed water be taken, where there was a surplus, which would not damage or impair the park in any particular. We were forced to have a public hearing. The Reclamation Service, under the Secretary of the Interior, favored the project. His Park Service opposed it. It was referred to the Geological Survey, which, after inquiry, made a report in which it was stated that no damage would be done to the park.

I desire Senators to understand the attitude of mind of those connected with the Park Service. At this public hearing they said to us, "You are going to commercialize the park, and that is terrible." They intimated that we would commercialize it by putting a tunnel 4,000 feet under the surface, touching the park only at a small outlet, an opening 9 feet in diameter, not using a drop of water from the park, but taking it out where there are 200,000 acres of the finest land on this earth, already under cultivation, but needing a supplemental water supply. They complained. They said, "You are going to put this hole in the mountains and desecrate the park. You are going to build a trail."

I said, "Yes, gentlemen, and within the past week you have been before the Committee on Appropriations, of which I am a member, asking for money for trails in the parks."

"Oh, yes; but these are different trails. You are going in there to drill."

I said, "Yes; we want to drill in order to make sure that there is proper ground through which the tunnel can go, to make sure that there will be no drainage of lakes."

They said, "Yes; but when you set up your drills there is going to be oil and grease in your machine."

We have 405 square miles, but we cannot take the water through the park, because when we put an engine in there to drill, a quart of oil or grease might be dropped in an utterly unused portion of the park.

Then they said to us finally, "These engines are going to be noisy. The drilling operations will be terribly noisy in the park."

Can Senators imagine the terrible destruction which would ensue in the park by allowing a diamond drill to operate there, the terrible noise, waking up the bears from their hiberation, disturbing the robins? That illustrates the type of mind it is sought to send out to make a survey of parks.

Mr. President, that is not all. I am merely illustrating the attitude of mind of these men, who are wonderful in their proper place, and have done excellent work. Then the Secretary of the Interior allowed us to go ahead with our survey, and the Reclamation Service recommended the project. The Committee on Appropriations included an authorization for the project in the bill then pending. The Senate of the United States approved the authorization for the project. Then the Park Service went before the committee of the House and protested against that which their superior officer, the Secretary of the Interior, had approved; protested against that which the Department of Reclamation had approved; protested against that which the Geological Survey had approved; protested against that which the Committee on Appropriations of the Senate had approved; protested against that which the Senate of the United States had approved; and repudiated the good faith of the Park Service when they said to the people of Colorado, "We will not interfere with the development of your water if you cede the park lands to us."

Mr. President, I am not willing that authority of the kind included in the bill before us be placed in the hands of those who are willing to deny to thirsty citizens who need it water which is going to waste, water which is flowing today down into Mexico, where it will be used to grow cotton and vegetables and fruit to compete with the cotton of Arizona and the South and the fruit and vegetables of Texas. But the Park Service are so minded that they would rather the people of my State should be denied water which they need, water which the statute gives to them, water which a constitution approved by this Government gives to them, rather than allow some trifling thing to be done in the park, not taking one thing from the park.

Mr. President, the bill is futile, it is useless, and it seeks to put into improper hands a great and extensive power.

Mr. McADOO. Mr. President, there are two bills on the calendar which I desire to have considered, which have been reported favorably by the Committee on Patents, relating to the extension of patents on the badges of two societies, the Holy Name Society and the Disabled American Veterans of the World War.

I ask unanimous consent for the present consideration of House bill 9995, to grant a renewal of Patent No. 59560, relating to the emblem of the Disabled American Veterans of the World War.

The PRESIDING OFFICER. Is there objection?

Mr. McNARY. Mr. President, has the unfinished business been disposed of?

The PRESIDING OFFICER. The unfinished business has not as yet been disposed of.

Mr. McNARY. I should prefer that the unfinished business be disposed of before proceeding to any other measure on the calendar.

Mr. ROBINSON. Mr. President, I suggest to the Senator from California that he withdraw his request for the present consideration of the bill to which he has referred. Opportunity will be afforded a little later for him to renew the request.

Mr. McADOO. Mr. President, I withdraw the request.

Mr. ROBINSON. I think there is no objection to the bill.

Mr. WAGNER. Mr. President, I am not sufficiently informed to comment upon the merits of the controversy which the junior Senator from Colorado [Mr. ADAMS] has had with the Park Service regarding some legislation in which he is interested. I am quite willing to accept his assertion that the proposed legislation ought to be enacted. But I do not believe that the existence of a controversy on the part of a single Senator with reference to policy within his own State is sufficient ground for condemning the whole Park Service or for determining that it cannot be entrusted to make a survey such as is proposed in the pending measure.

It is difficult for me to follow the argument of the Senator from Colorado, because, while assailing the Park Service, he admitted that he favored a bill before the Senate prior to the bill now under consideration, which gave to the Park Service very much greater power in the relation to this whole matter than is now proposed.

As I said before, this bill is limited to providing a survey, whereas in the bill previously passed, which the Senator from Colorado favored, there was also included an authorization to report upon property which might be transferred by the Federal Government to States upon the approval of Congress.

The Senator referred, I think, to the "grasping attitude" of the Park Service. I think he made one intimation that he did not intend. He said that the Park Service is seeking to purchase additional property to enlarge Chalmette National Monument. Neither of the Senators from the State of Louisiana is present in the Chamber at the moment; but the two Senators from that State proposed that legislation dealing with the national monument, and are urging its passage. The Park Service, of course, is agreeable to the enactment of that legislation, but did not initiate it. The Committee on Public Lands and Surveys has held a number of hearings upon that bill.

Senators generally seem to have confidence in the National Park Service, and from private conferences I have had with the Senator from Colorado I am sure the Senator himself really has confidence in the National Park Service. We have now pending before the Committee on Public Lands and Surveys at least 15 bills, introduced by Senators, in which they seek an extension of the national parks within their own States. This in itself shows that they recognize the great service which the National Park Service renders to the masses of our people, and that they are satisfied with its methods of administration.

I may say also that nearly every organization which is interested in park development and in making the parks accessible to the masses of our people is urging the passage of the proposed legislation, both by personal appearance before the committee and by communications addressed to it.

The Senator from Colorado has also said that the proposed legislation contemplates a futile expenditure of money. But the bill does not ask for any money at all. Whatever money may be needed has already been provided for.

Let me now address myself to what was said about the futility of the survey. A legislator so wise and able as the Senator from Colorado knows that intelligent legislation should always be preceded by a thorough investigation of the subject matter upon which we are to legislate. If we are to legislate upon this subject—and I think there is a general sentiment in the country in favor of extending the Park Service and aiding some of the States in developing their own park services—we need just such a survey as is proposed by the pending legislation. I am sure the Congress would not wish to act until there has been a thorough study and investigation made by one of our departments with reference to the necessity or desirability of any particular development. I do not think the Senator from Colorado will dispute that statement.

I had the privilege of visiting about 11 of our parks after the last session of Congress; and any Senator who has visited those parks, or any of the parks, is, I am sure, proud of their administration. The Park Service is making the parks accessible to the humblest of our citizens; and the parks are run free from partisanship, and free from even any suggestion of corruption. I think they are as ably managed as they possibly can be managed; and I desire to pay a public tribute to the National Park Service for the wonderful way in which they are administering our parks.

That is about all I desire to say about the matter. I am sure the Senator from Colorado really does not mean to say that this particular survey would be a mere futility.

Mr. ADAMS. Mr. President, I feel greatly complimented that the able and distinguished Senator from New York should take occasion to pay any attention to what I have said. However, I reiterate my approval of the administration of the parks as they are now laid out, and call the Senator's attention to the fact that the national parks have all been established and laid out by the Congress of the United States.

I have no personal controversy with the men who are in charge of the parks. I like those men. I have no controversy over any political matter in connection with them. The Park Service is one of the few departments of the Government which has given me some consideration, if I may say so, in matters of patronage. There is nothing I have to say about those administering the national parks except that in the pending bill the administrators of the parks, who have done a good job in the parks, are seeking to go outside the national parks and engage in activities with respect to which they have demonstrated by their action in other matters their incapacity to take a broad view.

The Senator from New York spoke of various organizations favoring the measure. I pay to the Park Service the compliment of saying that they have the finest propaganda organization of which I have any knowledge. They can draw to their support almost instantly a great group of organizations who will approve the stand taken by the Park Service without knowing anything about the substance of it.

The whole story—I have tried to tell it before—is that the proposed survey is a futility. It is an endeavor to coordinate where coordination has no place. A park is proper or is not proper in accordance with the local situation and the people to be served. The question whether a particular park area should be established to serve the people of the city of New York does not require a national survey, and a national survey would merely delay a proper adjudication. I further say that those who live within the neighborhood to be served are those best qualified to determine what should be done.

Mr. CONNALLY. Mr. President, will the Senator yield?

Mr. ADAMS. I yield.

Mr. CONNALLY. Let me inquire of the Senator whether the proposal before us is not substantially the one which the Senate rejected overwhelmingly sometime ago, when contained in a separate bill?

Mr. ADAMS. The pending bill is the same as the one to which the Senator refers. It has been cut down until there is little left in it but provision for a roving commission to go about the land and make studies, make surveys, hire employees, spend money, and make reports, action on which finally will have to be determined by the Members of Congress from the respective States.

Mr. CONNALLY. As I recall, when the Senate rather decisively rejected the proposal on a previous occasion, there was a much larger attendance than there is today.

Mr. WAGNER. Mr. President, I am sure that the Senator from Colorado intended to be a little more specific than he was in his answer to the Senator from Texas. The provisions to which the Senator objected in the earlier bill, and with respect to which there was a good deal of valid criticism, have all been eliminated from the proposed legislation; and the very thing the Senator from Colorado advocated in the course of his criticism is all that remains in the proposed legislation; namely, that study be made by the National Park Service within those State areas where the State itself invites the survey. So the intent to impose something upon the State is not in accordance with the provisions of this bill.

If Senators desire to defeat the bill, that is their privilege; but let there be no misapprehension about its provisions. Many of the States are interested in inviting this aid by the Federal Government, because of the attained success of the Federal Government in developing other recreational facilities, including many parks. I do not know whether or not Texas has extended such an invitation.

I do not wish to reiterate constantly, but it must be done in view of the assertions which are made concerning the provisions of the bill. The proposed legislation does not provide anything except that a study shall be made by the Park Service of the Interior Department of recreational facilities and areas within States in whose development the Federal Government might assist.

Mr. CONNALLY. Mr. President, I will say to the Senator from New York that the Senator from Texas has been busily engaged on committee work, and did not know what was in the measure, and that his inquiries were made for the purpose of eliciting some information.

The Senator has taken occasion to refer to what might probably be the attitude of my State. I suppose my State is not different from any other State in that when we can get a little Federal money, of course, we are inviting it. That would include making surveys, buying sites for State parks, paying their running expenses, and similar activities. There seems to be a great theoretical devotion to State rights, but when it comes to getting a Federal dollar that devotion vanishes.

Mr. WAGNER. I may say to the Senator from Texas that no Federal money at all is involved in this situation, and it is in recognition of the very valid criticism made by the Senator from Texas when the bill previously was before the Senate that the amendments to the bill have been proposed. All the prior provisions of the bill relating to the transfer of lands have been eliminated from it, and there has been substituted authorization for a mere study—something about which, until the Senator from Colorado decided to oppose the proposed legislation, there was practical unanimity of agreement. Even the Senator from Texas, it will be recalled, made no objection to a survey or a study, but opposed—and as I have said the committee recognized the validity of that objection—any suggestion of the transfer of land until that matter was again decided by the Congress.

The PRESIDING OFFICER. The question is on the adoption of the committee amendment. [Putting the question.] The noes seem to have it.

Mr. WAGNER. I ask for the yeas and nays, and I raise the point of no quorum.

Mr. LOGAN. Mr. President, I make the point of order that the committee amendment was adopted sometime ago; the committee amendment has already been adopted.

The PRESIDING OFFICER. The present occupant of the chair will say that the question before the Senate was stated to him by the President pro tempore of the Senate at the time he vacated the chair. It is the understanding of the present occupant of the chair that the amendment has not been agreed to.

Mr. LOGAN. I am quite sure, if I can hear and understand, that as soon as the clerk read the amendment it was

announced by the then Presiding Officer that the amendment was adopted.

The PRESIDING OFFICER. The parliamentarian advises the Chair that it was stated that "without objection" the amendment was agreed to; but there was no announcement made by the Chair that the amendment had been agreed to. It is the understanding of the present occupant of the chair that it has not been agreed to.

Mr. ROBINSON. Mr. President, I suggest that the question be again submitted to the Senate. The Senator from New York has no objection to that being done.

The PRESIDING OFFICER. The Senator from New York has suggested the absence of a quorum.

Mr. WAGNER. I withdraw that suggestion.

The PRESIDING OFFICER. Without objection, the Chair will again submit the question to the Senate. The question is on the adoption of the amendment reported by the committee.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "An act to authorize a study of the park, parkway, and recreational-area programs in the United States, and for other purposes."

BUSINESS OF THE SESSION

Mr. ROBINSON. Mr. President, for the convenience of Senators and the press, it is deemed proper at this time to make a brief statement concerning the future proceedings in the Senate.

It is expected the omnibus flood-control bill, reported by the Committee on Commerce on April 27, will be brought before the Senate early next week, probably not later than next Tuesday.

The commodity-exchange bill has been pending on the calendar for a long time. Controversies have arisen in the committee over amendments relating to cotton. As soon as it is found practicable, it is my desire that that bill be also taken up for action.

Two major measures, the work-relief bill and the tax bill, are pending in the Committees on Appropriations and Finance, respectively. It is not possible at this time to determine when those bills will be ready for consideration by the Senate. I think it is already generally understood that shortly after the reports on those bills have been submitted it will be the purpose of myself and others cooperating to take up those measures. It cannot now be announced when the reports will be made, and, therefore, no definite statement on the subject will be forthcoming at this time.

It is my intention when the Senate completes its labors today to move a recess until next Monday.

I take occasion now to express my appreciation to my fellow Senators for the splendid, gracious, and courteous cooperation that has been afforded during the proceedings of the Senate at this session. We are approaching a time when it will be necessary to continue work longer hours. We are all desirous of completing the session, if possible, before the date when the Republican National Convention is scheduled to meet, if it does not abandon its purpose to hold a meeting [laughter]; and I realize that in order to accomplish that end it will be necessary that the full measure of cooperation which we have had heretofore shall be continued.

Mr. WHEELER. Mr. President, will the Senator yield?

Mr. ROBINSON. I yield to the Senator from Montana.

Mr. WHEELER. I understand that the Republicans are going to abandon their convention and let the Liberty League hold a convention instead. [Laughter.]

Mr. ROBINSON. Well, Mr. President, that would be a still greater calamity in all probability. [Laughter.]

I wish also to add that it is my understanding that the Senator from Nevada [Mr. PITTMAN], chairman of the Committee on Foreign Relations, under the instructions of his committee, will report the naval arms treaty today and that there has been a tentative understanding among the members of the Foreign Relations Committee that that treaty may be proceeded with next Monday if the Senator from Nevada is ready at that time to take it up.

Mr. McNARY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Arkansas yield to the Senator from Oregon?

Mr. ROBINSON. I yield.

Mr. McNARY. I regret that I did not hear all the Senator had to say with respect to the program, but I understood that he mentioned the flood-control bill, the commodities-exchange bill, the work relief, or deficiency appropriation bill, and the tax bill as the four major bills to be considered between now and the date he hopes the Congress may adjourn.

Mr. ROBINSON. I especially mentioned those bills.

Mr. McNARY. Does that exclude other measures of less importance?

Mr. ROBINSON. It does not. I think it is proper to add, in view of the Senator's suggestion, that there are several bills which it is expected will be brought forward today, probably under requests for unanimous consent for their consideration.

Of course, conference reports will, as usual, have right of way.

The statement I have made is not to be interpreted as precluding, from my own standpoint, the action of the Senate on other measures. I have pointed out these special measures because it is my opinion that the country as well as the Members of both Houses of Congress expect that action shall be taken on those four measures.

Mr. McNARY. Mr. President, does the Senator from Arkansas desire to take up for consideration the flood-control bill on Monday?

Mr. ROBINSON. I stated that, in all probability, it would be reached not later than sometime during the calendar day of Tuesday next.

Mr. McNARY. Then, may I ask again, is it the desire and purpose of the Senator from Arkansas to drive to a conclusion the session by June 6, which will be on a Saturday?

Mr. ROBINSON. Yes; it is my desire that the session shall conclude its labors by June 6. I presented that situation somewhat fully. Of course, it will require a continuance of the cooperation of the able Senator from Oregon and others on his side of the Chamber with those of us who sit on this side, but my information is that we may feel assured that that cooperation will be extended.

Of course, I must admit that when these important bills get into conference difficulties in adjusting the differences between the two Houses may arise which will make impossible an adjournment sine die by the 6th of June. But we can only meet those difficulties when they arise.

I think that is all I have to say.

Mr. WAGNER. Mr. President, will the Senator yield for a suggestion?

Mr. ROBINSON. Yes.

Mr. WAGNER. I understood the Senator, in enumerating the bills which he regarded as important, not to intend to limit the consideration of other bills. There is the housing bill, for instance, which I expect confidently will be reported very soon by the Committee on Education and Labor. That is a bill which I regard as one of the most important of all the bills pending before the Senate.

Mr. ROBINSON. I think the Senator from New York has had sufficiently liberal experience in legislative matters to know that it is a physical, moral, mental, and every other kind of an impossibility to pass judgment on whether a measure that has not even been reported by one of the committees of the Senate shall be disposed of during this session. So far as I am concerned, I would not favor continuing the session beyond the 6th of June for the purpose of passing the bill to which the Senator has referred, although I recognize its importance.

Mr. WAGNER. I appreciate that, but I did not want it to be understood that the program was limited and that we were foreclosed from the consideration of the housing bill.

Mr. ROBINSON. I thought I had made it entirely clear, in answer to the question of the Senator from Oregon [Mr.

McNARY], that the statement respecting the four bills I have mentioned by no means precluded the consideration of other bills.

Mr. COPELAND. Mr. President, our leader says he hopes to have the flood-control bill considered next Tuesday. He has also stated the importance of acting as speedily as possible on the bill. As chairman of the Committee on Commerce, may I ask, if any Senators have amendments which they desire to propose to the flood-control bill, that they will be good enough to have them sent to the desk and printed so they may be considered by the committee? If we may have that consideration in advance, it will expedite the ultimate passage of the bill.

In the next place, may I suggest to the Senator from Nevada [Mr. PITTMAN] that he make every effort possible to bring before the Senate the safety-at-sea treaty? I have reason to believe that with a very slight reservation, which is in process of preparation, the treaty may be ratified without any particular argument in the Senate.

Mr. PITTMAN. Mr. President, will the Senator from Arkansas yield?

The PRESIDING OFFICER. Does the Senator from Arkansas yield to the Senator from Nevada?

Mr. ROBINSON. Certainly.

Mr. PITTMAN. I may state that the committee has been awaiting the adjustment which the Senator from New York has in mind. Without that adjustment there will be a long debate on the treaty, which would make it almost impossible of consideration soon.

Mr. COPELAND. If I can succeed in formulating the reservation and giving it to the Senator, perhaps that will assist him in reporting the treaty.

Mr. PITTMAN. I shall be very glad to have the Senator assist in any way he can, because if the adjustment which is in mind is brought about, in my opinion the treaty can be ratified without opposition.

Mr. COPELAND. I shall do everything I can, because it is very important, in order to promote safety at sea, that the treaty shall be ratified.

Mr. PITTMAN. I thoroughly agree with the Senator.

Mr. ROBINSON subsequently said: Mr. President, referring to the suggestion of the Senator from New York [Mr. COPELAND] while I had the floor and was discussing a program for legislative action, I ask unanimous consent that during the recess of the Senate the Secretary may receive from Senators and have printed amendments relating to the flood-control bill, and that during the recess of the Senate they may be referred to the Committee on Commerce.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request made by the Senator from Arkansas? The Chair hears none, and it is so ordered.

LAND GRANT TO UNIVERSITY OF UTAH

Mr. THOMAS of Utah. Mr. President, I ask unanimous consent for the immediate consideration of Senate bill 4609.

The PRESIDING OFFICER. The bill will be reported by title.

The LEGISLATIVE CLERK. The bill (S. 4609) to correct the description of certain land granted to the University of Utah.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Utah for the immediate consideration of the bill?

There being no objection, the bill (S. 4609) to correct the description of certain land granted to the University of Utah was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That in order to correct the description of that portion of the Fort Douglas Military Reservation, State of Utah, granted to the University of Utah by an act approved June 22, 1934 (Public, No. 450, 73d Cong.), the Secretary of War is authorized to accept from the University of Utah a deed quitclaiming all its rights, title, and interest in and to the tract of land granted by the act approved June 22, 1934, supra, and upon such acceptance is further authorized and directed to convey to the said University of Utah by quitclaim deed the right, title, and interest of the United States in and to the tract of land intended to have been granted by the act approved June 22, 1934, supra, said tract of land containing 61,266 acres, more or less, and correctly shown on map dated October 15, 1935, entitled "Land Grant to University of Utah": *Provided*, That the University of Utah shall improve the said property and maintain same for university purposes, and not otherwise, and that in case said land shall be abandoned by the University of Utah for said purposes, the said land and all improvements thereon shall revert to the United States: *Provided further*, That the conveyance of the land shall in no manner carry with it any right or title in or to any portion of the water of Red Butte Canyon Creek: *Provided further*, That there is reserved to the United States the perpetual right to maintain, alter, rebuild, and enlarge the sewer which runs from the Fort Douglas Military Post across said tract of land, or to construct and maintain a new sewer system across the same, should it be or become desirable to do so: *Provided further*, That there is reserved to Salt Lake City, a municipal corporation organized and existing under the laws of the State of Utah, a perpetual easement and right-of-way for the operation, maintenance, repair, and renewal of the conduit and pipe line as now constructed over and upon the Fort Douglas Military Reservation, the same being connected with the water supply system of said city, and also for the construction, operation, maintenance, repair, and renewal of all valve houses which may be deemed necessary in connection with said pipe line: *And provided further*, That a fence satisfactory to the Government shall be erected and maintained by the university between its land and the military reservation upon demand made by the Secretary of War in his discretion.

SEC. 2. Section 2 of the act approved June 22, 1934, is hereby repealed.

SUIT AGAINST NORTHERN PACIFIC RAILWAY CO. ET AL.

Mr. VAN NUYS obtained the floor.

Mr. ASHURST. Mr. President, will the Senator from Indiana yield to me?

Mr. VAN NUYS. I yield.

Mr. ASHURST. I propose to ask unanimous consent for the immediate consideration of Senate bill 4594, which was reported unanimously from the Senate Committee on the Judiciary, after a hearing before a subcommittee of which the able Senator from Texas [Mr. CONNALLY] was chairman.

The PRESIDING OFFICER. The bill will be reported by title.

The LEGISLATIVE CLERK. The bill (S. 4594) to supplement the act of June 25, 1929 (ch. 41, 46 Stat. L. 41), which authorized and directed the Attorney General to institute suit against the Northern Pacific Railway Co. and others.

Mr. ASHURST. Mr. President, in the act of June 25, 1929, the Attorney General was authorized and directed to institute suit against the Northern Pacific Railway Co. and others in a matter involving nearly 3,000,000 acres of land. An interlocutory decree has been entered in the matter after hearing before a special master in the United States District Court for the Eastern District of Washington.

I am advised by the Department of Justice that both sides to the controversy agree that it may be impossible to take an appeal from the interlocutory order direct to the Supreme Court.

If such an appeal may be taken it will obviate or remove the necessity for examination of 250 different tracts of land. I was told yesterday at the Department of Justice that it would save the Government some $75,000.

If I have not correctly stated the facts the Senator from Texas, who was chairman of the subcommittee of the Committee on the Judiciary which considered the matter, will correct me.

Mr. CONNALLY. Mr. President, the Senator from Arizona has correctly stated the situation. The only purpose of the bill is to permit an appeal direct from the district court to the Supreme Court by appeal rather than by certiorari. Representatives of the Government and the railway companies were before the subcommittee and agreed on the matter.

Mr. McNARY. Mr. President, I am advised that the committee report was unanimous. Is that correct?

Mr. ASHURST. The report was unanimous. I now ask unanimous consent for the immediate consideration of the bill.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Arizona?

There being no objection, the Senate proceeded to consider the bill (S. 4594) to supplement the act of June 25, 1929 (ch. 41, 46 Stat. L. 41), which authorized and directed the Attorney

General to institute suit against the Northern Pacific Railway Co. and others, which had been reported from the Committee on the Judiciary with an amendment, on page 2, line 1, after the numerals "1936", to strike out the following: "inasmuch as the time and expense incident to determining the value of the lands in controversy will be large and the best interests of all parties will be served by first securing a final determination by direct appeal to the Supreme Court of the United States of all questions in said suit on which any party may wish to take an appeal except the determination of the value of the lands in controversy and the amount of compensation due the plaintiff or any of the defendants and the questions of bona-fide purchasers raised by certain defendants and reserved by order of the court for final hearing", so as to make the bill read:

Be it enacted, etc., That in the suit entitled United States of America, plaintiff, against Northern Pacific Railway Co., and others, defendants, no. E-4389, instituted and pending in the District Court of the United States for the Eastern District of Washington, under the authority and direction of the act of June 25, 1929 (ch. 41, 46 Stat. L. 41), now on reference to a special master for hearing under an order of said court entered in said suit on April 21, 1936, a direct review by the Supreme Court of the United States by appeal may be had by any party to said suit of any order or decree of said district court entered upon a review of the report of the master to be made pursuant to said order of April 21, 1936, and also of the order or decree of said district court entered in said suit on October 3, 1935, as amended by an order of January 29, 1936. Such direct review by the Supreme Court of either or both of the said orders or decrees may be had by appeal taken within 60 days from the date of the order or decree of the district court entered upon a review of the report of the master to be made pursuant to the said order of April 21, 1936. The right of review of any final judgment, authorized by the said act of June 25, 1929, shall continue in force and effect.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ASHURST. Mr. President, owing to the importance of the bill, I ask that the report thereon may be printed in the RECORD at this point.

There being no objection, the report (No. 2020) submitted by Mr. CONNALLY from the Committee on the Judiciary was ordered to be printed in the RECORD, as follows:

The Committee on the Judiciary, to whom was referred the bill (S. 4594) to supplement the act of June 25, 1929, which authorized the Attorney General to institute suit against the Northern Pacific Railway Co. and others, after consideration thereof, report the bill favorably to the Senate and recommend that it do pass with the following amendment:

On page 1, line 10, after the figures "1936", strike out the following words: "inasmuch as the time and expense incident to determining the value of the lands in controversy will be large, and the best interests of all parties will be served by first securing a final determination by direct appeal to the Supreme Court of the United States of all questions in said suit on which any party may wish to take an appeal, except the determination of the value of the lands in controversy and the amount of compensation due the plaintiff or any of the defendants and the questions of bona-fide purchasers raised by certain defendants and reserved by order of the court for final hearing."

The reason for this amendment is that the bill provides for a technical appeal as distinguished from certiorari.

OFFICE OF THE ATTORNEY GENERAL,
Washington, D. C., May 4, 1936.

Hon. HENRY F. ASHURST,
Chairman, Committee on the Judiciary,
United States Senate.

MY DEAR SENATOR: Pursuant to the authority and direction contained in the act of June 25, 1929 (ch. 41, 46 Stat. 41), suit was brought in behalf of the United States against the Northern Pacific Railway Co. and others in the United States District Court for the Eastern District of Washington for the purpose of securing a judicial determination of certain controversies respecting the operation and effect of grants of land made by the Congress to the Northern Pacific Railroad Co. under the act of July 2, 1864, and the resolution of May 31, 1870, and to secure an accounting between the United States and said company and its successors with respect to matters relating to said grants.

Certain preliminary questions of law were referred to the master for determination. The master made his report, and the court has entered an order confirming it. Subsequently, on April 21, 1936, an order was made by the court referring the case to the special master for hearing, and proceedings before him are now pending.

Nearly 3,000,000 acres of land are involved in this suit. A final determination by the Supreme Court of the preliminary questions of law and fact may eliminate the necessity of determining the value of a substantial portion of the lands. It appears highly desirable to secure such final determination before entering upon the valuation of the lands in controversy, which will be an exceedingly costly and protracted proceeding.

Neither the general law nor the special act under which the suit was brought permits a direct appeal from interlocutory orders or decrees in the suit.

I enclose herewith a bill which is intended to allow such appeals, and I shall appreciate it if you will introduce the measure and assist in securing its enactment.

I am informed that the defendants in the above suit also desire to secure this legislation.

Sincerely yours,

STANLEY REED,
Acting Attorney General.

[Enclosure]

In the District Court of the United States for the Eastern District of Washington, Northern Division. In equity no. 4389. Order. *United States of America, plaintiff*, v. *Northern Pacific Railway Co., a corporation; Northern Pacific Railroad Co., a corporation; Northern Pacific Railroad Co., as reorganized in 1875; Northwestern Improvement Co., a corporation; Bankers Trust Co., a corporation; Guaranty Trust Co., a corporation; City Bank Farmers Trust Co., a corporation, defendants*

On motion of the plaintiff filed in this court, plaintiff appearing by two of its solicitors, J. M. Simpson, United States district attorney for the eastern district of Washington, and E. E. Danly; the defendants, Northern Pacific Railway Co., a corporation; Northern Pacific Railroad Co., a corporation; and Northwestern Improvement Co., a corporation, appearing by one of their solicitors, D. R. Frost; Bankers Trust Co., a corporation, and City Bank Farmers Trust Co., a corporation, appearing by one of their solicitors, F. J. McKevitt; the court having heard argument on the motion on this 21st day of April 1936, by consent of all parties, and no objection being made by any of the parties to the granting of the motion, and the court being fully advised in the premises, it is now

Ordered, adjudged, and decreed that that certain order of reference heretofore entered in the above-entitled cause on February 25, 1932, ratified by the order of this court entered on October 3, 1935 (as amended by an order entered on Jan. 29, 1936), be, and the same is hereby, amended as follows:

That the special master proceed with the hearing of said cause and take evidence relative to all matters therein not covered by the special master's report filed herein May 31, 1933, except evidence relative to the values of lands in controversy and the amount of compensation due plaintiff or any of the defendants, hear argument of counsel thereon, and report to this court his findings of fact and conclusions of law and the evidence taken, together with recommendations for an order or decree thereon, said findings and conclusions to be subject to review by this court.

After the findings and conclusions and recommendations have been reported to this court and any exceptions thereto have been heard and determined, and an order or decree thereon has been entered, in event no appeal from any order or decree in this cause shall be taken within 60 days thereafter, said special master shall proceed with the final hearing of said cause and make full and complete findings of fact and conclusions of law and report the same to this court, together with the evidence taken, said findings and conclusions to be subject to review by this court.

Done in open court this 21st day of April 1936.

(Signed) J. STANLEY WEBSTER,
United States District Judge.

PAYMENT OF FEDERAL TAXES IN RAILROAD REORGANIZATIONS

The PRESIDING OFFICER. The Senator from Indiana [Mr. VAN NUYS] has the floor.

Mr. McADOO. Mr. President, will the Senator yield?

Mr. VAN NUYS. I prefer not to yield for the moment.

Mr. President, on the last call of the calendar, Order of Business 2082, being Senate bill 3841, was objected to by the Senator from Michigan [Mr. VANDENBERG]. Since that time he has stated publicly, as appears in the RECORD, that he has no further objection to the bill. I ask unanimous consent that the Senate proceed to the consideration of the bill at this time.

The PRESIDING OFFICER. The bill will be reported by title.

The CHIEF CLERK. A bill (S. 3841) to amend an act entitled "An act to establish a uniform system of bankruptcy throughout the United States", approved July 1, 1898, and acts amendatory thereof and supplementary thereto.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

Mr. McNARY. Mr. President, while withholding consent for the present, I should like to have the Senator from Indiana state briefly the purpose of the bill.

Mr. VAN NUYS. Mr. President, I will say to the Senator from Oregon that the bill applies to the Railroad Reorganization Act the same provisions which are incorporated in

section 77B, which is the Private Corporation Reorganization Act, in that the bill provides that before any plan for reorganization of a railroad under the terms of that law may be approved by the court, provision must be made for the payment of Federal taxes.

The necessity for this proposed legislation is shown by the fact that at the present time the Government has over $10,000,000 of claims pending against 21 railroads now in reorganization under section 77. As of December 31, 1935, a total of 89 railroads were in the hands of receivers or trustees. Many of these railroads propose to reorganize under section 77; and we are simply incorporating into the railroad act the provisions which have proved so successful and wholesome in the Private Corporation Reorganization Act.

I know of no objection to the bill. It has the support of and has been reported by the full committee, the Treasury Department is requesting its passage, and I sincerely hope it may have favorable action.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That (1) the last three sentences of the second paragraph of subsection (e) of section 77 of the act of July 1, 1898, entitled "An act to establish a uniform system of bankruptcy throughout the United States", as amended, are hereby further amended to read as follows: "If the United States of America, or any agency thereof, or any corporation (other than the Reconstruction Finance Corporation) the majority of the stock of which is owned by the United States of America, is a creditor or stockholder, the interests or claims thereof shall be deemed to be affected by the plan, and the President of the United States, or any officer or agency he may designate, is hereby authorized to act in respect of the interests or claims of the United States or of such agency or other corporation. The expense of such submission shall be certified by the Commission and shall be borne by the debtor's estate. The Commission shall certify to the judge the results of such submission."

(2) That the first sentence of the third paragraph of said subsection (e) of said section 77 is amended by striking out the period at the end thereof and inserting in lieu thereof a colon and the following: "*Provided further*, That if, in any reorganization proceeding under this section, the United States is a creditor on claims for taxes or customs duties (whether or not the United States has any other interest in, or claim against, the debtor, as creditor or stockholder), no plan which does not provide for the payment thereof shall be confirmed by the judge except upon the acceptance, certified to the court, of a lesser amount by the President of the United States or the officer or agency designated by him pursuant to the provisions of the preceding paragraph hereof: *Provided further*, That if the President of the United States or such officer or agency shall fail to accept or reject such lesser amount for more than 90 days after receipt of written notice so to do from the court, accompanied by a certified copy of the plan, the consent of the United States insofar as its claims for taxes or customs duties are concerned shall be conclusively presumed."

EMBLEM OF DISABLED AMERICAN VETERANS OF WORLD WAR

Mr. McADOO. Mr. President, I ask unanimous consent for the present consideration of House bill 9995, being Calendar No. 2127. The bill has been favorably reported, without amendment, by the Committee on Patents.

The PRESIDING OFFICER. Is there objection to the request of the Senator from California?

There being no objection, the bill (H. R. 9995) to grant a renewal of patent no. 59560, relating to the emblem of the Disabled American Veterans of the World War, was considered, ordered to a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That a certain design patent issued by the United States Patent Office of date of November 1, 1921, being patent no. 59560, is hereby renewed and extended for a period of 14 years from and after the date of approval of this act, with all the rights and privileges pertaining to the same, being generally known as the emblem of the Disabled American Veterans of the World War.

BADGE OF THE HOLY NAME SOCIETY

Mr. McADOO. Mr. President, I now ask unanimous consent for the present consideration of House bill 10194, being Calendar No. 2128. This is a similar measure, extending for a period of 14 years the patent of the badge of the Holy Name Society. The bill has been favorably reported, without amendment, by the Committee on Patents.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the bill (H. R. 10194) granting a renewal of patent no. 40029, relating to the badge of the Holy Name Society, was considered, ordered to a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That a certain design patent issued by the United States Patent Office of date of June 8, 1909, being patent no. 40029, is hereby renewed and extended for a period of 14 years from and after the date of approval of this act, with all the rights and privileges pertaining to the same, being generally known as the badge of the Holy Name Society.

PHILIPPINE CURRENCY RESERVES ON DEPOSIT IN UNITED STATES

Mr. ADAMS. Mr. President, earlier in today's session I asked unanimous consent for the consideration on Monday of Senate bill 3486, to repeal the act entitled "An act relating to Philippine currency reserves on deposit in United States." Objection was made unless the Senator from Maryland [Mr. TYDINGS] should be advised. Since that time I have taken up the matter with the Senator from Maryland, and it is agreeable to him to have the bill set down for consideration on Monday. I therefore renew my request that, by unanimous consent, Senate bill 3486 be set down for consideration on Monday.

Mr. McNARY. Mr. President, I have no objection to the request except as to the manner of procedure. If the bill is to become the unfinished business, it ought to be made the unfinished business by motion. In the meantime, I understand, the Senator from Arkansas suggested that other bills might come up this afternoon. Why does not the Senator from Colorado wait and make his motion just before the Senate takes a recess?

Mr. ADAMS. I will say to the Senator from Oregon that it was not my intention to make the bill the unfinished business in that sense, but to have a time fixed for taking it up in order not to interfere with the consideration of other measures in the meantime.

Mr. ROBINSON. Mr. President, I suggest to the Senator that he modify his request so as to provide that when the Senate convenes on Monday it shall proceed to the consideration of the bill.

Mr. McNARY. I have no objection to the request in that form. I was merely discussing the question of procedure.

Mr. ADAMS. I modify my request in accordance with the suggestion of the Senator from Arkansas. I understood that that was the substance of the request.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Colorado for unanimous consent that when the Senate convenes on Monday it proceed to the consideration of Senate bill 3486. The Chair hears none, and it is so ordered.

CUSTOMHOUSE, SALEM, MASS.

Mr. WALSH. Mr. President, I ask unanimous consent for the immediate consideration of a bill on the calendar which is in no way controversial. It is House bill 10934, being Calendar No. 2123. The bill authorizes the transfer of the historic customhouse at Salem, Mass., from the Treasury Department to the Interior Department. The bill is agreed to by all departments of the Government.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Massachusetts?

There being no objection, the bill (H. R. 10934) to authorize the transfer of the customhouse at Salem, Mass., from the jurisdiction of the Treasury Department to the Department of the Interior was considered, ordered to a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to transfer to the control and jurisdiction of the Secretary of the Interior the customhouse at Salem, Mass., and such adjoining property, both real and personal, as may now be under the jurisdiction of the Secretary of the Treasury.

SEC. 2. That the Secretary of the Interior be, and he is hereby, authorized to acquire the above property for the purpose of estab-

lishing same as an historic site or otherwise preserving the buildings and grounds in connection therewith: *Provided*, That the Secretary of the Treasury may retain sufficient space in the building for the necessary operation of the Bureau of Customs.

THROUGH ROUTES AND JOINT RATES

Mr. WHEELER. Mr. President, I ask unanimous consent for the present consideration of Senate bill 1636, being Calendar No. 2066, to amend the Interstate Commerce Act, as amended, and for other purposes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana?

Mr. McNARY. Mr. President, I have just been advised that the senior Senator from Delaware [Mr. HASTINGS] desires to be present when that bill is called from the calendar. I suggest that in his absence the Senator from Montana refrain from asking for the consideration of the bill.

Mr. WHEELER. Mr. President, I should like to accommodate the Senator from Delaware; but this bill was reported from the Interstate Commerce Committee sometime ago, and what I intend to do at this time is to propose a substitute for the bill, because of the fact that when the bill was reported the clerk included in it more than was intended by the committee to be included and reported to the Senate. I desire to offer the substitute and then to explain the substitute to the Senate. I do not think there will be any objection to the substitute. The present law expires on June 16, and the substitute proposes practically the reenactment of the law as it stands upon the statute books at the present time.

Mr. McNARY. All I am trying to do is to preserve the rights of the Senator from Delaware. I am now trying to get into communication with him. I suggest to the Senator from Montana that he make a statement of the substitute, and in the meantime I may be able to advise him further regarding the attitude of the Senator from Delaware toward the bill.

Mr. WHEELER. I should be perfectly willing to accommodate the Senator if I could have an understanding that on Monday the bill may be taken up and disposed of. I do not wish to take advantage of the Senator's absence.

Mr. McNARY. If the Senator from Montana will wait a few moments, I may be able to advise him whether or not the Senator from Delaware is in the city and what arrangements may be made.

Mr. ROBINSON. Mr. President, we have just agreed to proceed to the consideration of another bill when the Senate shall meet on Monday. As I stated about an hour ago, the Senator from Nevada [Mr. PITTMAN] probably will desire to have the Senate take up the naval treaty on Monday. I think ample time will still be afforded to consider this bill if the request for its consideration be not granted now, as requested by the Senator from Montana. I wish him to understand that these other measures have, in a sense, priority.

Mr. HASTINGS entered the Chamber.

Mr. WHEELER. Mr. President, I understand that the Senator from Delaware has just come in. I send to the desk an amendment in the nature of a substitute for the bill to which I refer, and ask to have it read.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill referred to by the Senator from Montana?

Mr. McNARY. Mr. President, I suggest that the proposed substitute be read, now that the Senator from Delaware is in the Chamber.

The PRESIDING OFFICER. The clerk will read the proposed substitute for the information of the Senate.

The CHIEF CLERK. As a substitute for Senate bill 1636, it is proposed to strike out all after the enacting clause and in lieu thereof to insert the following:

Paragraph (3) of section 15 of the Interstate Commerce Act, as amended, is further amended by adding the following: "The elimination of any existing through route or joint rate, fare, charge, or classification without the consent of all carriers parties thereto or authorization by the Commission shall be deemed prima facie unreasonable and contrary to the public interest."

SEC. 2. Paragraph (4) of section 15 of the Interstate Commerce Act is hereby amended to read as follows:

"In time of shortage of equipment, congestion of traffic, or other emergency declared by the Commission it may (either upon complaint or upon its own initiative without complaint, at once, if it so orders without answer or other formal pleadings by the interested carrier or carriers, and with or without notice, hearing, or the making or filing of a report, according as the Commission may determine) establish temporarily such through routes as in its opinion are necessary or desirable in the public interest."

Mr. ROBINSON rose.

Mr. WHEELER. Mr. President, I wonder if I may make a statement, and then let the bill go over?

Mr. ROBINSON. I should be very glad to have that done; I think it will be necessary to have the measure go over until a later date, probably until Monday. However, I should be glad to have the Senator make his statement.

Mr. WHEELER. I should like to make a statement regarding the bill. The substitute I have presented provides merely for a reenactment of the present law with reference to through routes. The Emergency Transportation Act of 1933 contains a proviso that—

No routes now existing shall be eliminated except with the consent of all participating lines or upon order of the Coordinator.

This proviso was inserted in order to prevent the railroads from canceling in wholesale manner many joint routes which were of benefit to shippers.

This proviso will expire with the act on June 16, if the act is not extended. This bill proposes to write into the permanent law at the end of paragraph (3) of section 15 the following language, which has the same practical effect as that in the Emergency Transportation Act:

The elimination of any existing route or joint rate, fare, charge, or classification without the consent of all carriers parties thereto, or authorized by the Commission, shall be deemed prima facie unreasonable and contrary to the public interest.

Under this amendment, if all the carriers involved in the joint route agreed to abandon it, that could be done without any further action. However, if one of the participants in the route objected, and shippers objected, then the railroad which was proposing the abandonment of the route would have to convince the Commission that the abandonment was in the public interest.

Surely there can be no objection to this, because whenever a controversy might arise over cancelation of such a route the Commission must conduct an orderly proceeding to determine the facts and the effect of the abandonment on all concerned. In some instances when a trunk line originates a shipment of freight to a certain destination, it can carry the freight on its own line all the way. But if there is a shorter route and perhaps a cheaper route over which the goods can be shipped by giving them to another road or series of roads somewhere along the line of the originating carrier, then the shipper certainly should have the right to use that shorter or cheaper route.

A representative of the National Industrial Traffic League, speaking for over a thousand shippers and shippers organizations, appeared to strongly recommend the bill. Commissioner McManamy, of the Interstate Commerce Commission, appeared and stated that the Commission favored it, and had urged it for years. Coordinator Eastman has recommended the bill, and, in fact, it was introduced at his request. A letter from Mr. Eastman in support of it will be found on pages 2 and 3 of the committee report.

The American Short Line Railroad Association is also in favor of the bill.

The PRESIDING OFFICER. Objection is heard to the consideration of the bill.

Mr. McNARY. A parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. McNARY. What is the present status of the request made by the Senator from Montana?

The PRESIDING OFFICER. Objection has been made to the consideration of the bill.

Mr. WHEELER. Mr. President, I did not understand that there was objection to the adoption of the amendment I have offered in the nature of a substitute.

The PRESIDING OFFICER. The Senator from Arkansas asked that the measure go over.

Mr. WHEELER. I do not understand that the Senator asks to have action on the amendment in the nature of a substitute go over.

Mr. ROBINSON. Mr. President, I have been compelled to engage in discussion of other matters pertaining to the business of the Senate and have not been able to follow the debate, so I do not know what has transpired since my attention was diverted.

Mr. WHEELER. I asked to have the amendment in the nature of a substitute agreed to, and I made the request because of the fact that in reporting the bill the clerk included things which the committee did not intend to have in the measure.

Mr. ROBINSON. And the purpose of the amendment is merely to make the report reflect the real action of the committee?

Mr. WHEELER. That is exactly the purpose.

Mr. ROBINSON. Certainly I have no objection, and I am not sure that I object to the present consideration of the bill.

Mr. McNARY. Then I shall have to object, Mr. President.

Mr. ROBINSON. Very well. Let the amendment be agreed to and let the bill go over.

Mr. McNARY. The Senator expressly stated a few moments ago that the bill should go over until Monday, and the Senator from Delaware [Mr. HASTINGS] relied upon that statement.

Mr. ROBINSON. Very well. Let it go over.

The PRESIDING OFFICER. The bill will be passed over.

THE LONDON NAVAL TREATY OF 1936

Mr. PITTMAN. Mr. President, I have the honor, as chairman of the Committee on Foreign Relations, to report to the Senate the so-called London Naval Treaty of 1936, Executive F, Seventy-fourth Congress, second session, with the recommendation that the Senate advise and consent to it.

As has been stated by the Senator from Arkansas, it is my intention to attempt to obtain consideration of the treaty on Monday next. The hearings will be printed by tomorrow morning, I believe, and will then be available to any Senator interested in the matter.

In the meantime, I think it might be well if I should make a brief statement with regard to the treaty, so that it may be in the RECORD for the benefit of those who may desire to read it.

Mr. President, this treaty was negotiated and executed in accordance with the provisions of the Washington Naval Treaty of 1922. In 1930 there was another so-called London Naval Treaty, which was supplemental to the Washington Naval Treaty. Both the Washington Naval Treaty and the London Naval Treaty of 1930 expire on January 1, 1937. It is obvious, therefore, that unless this treaty is advised and consented to by the Senate prior to the adjournment of this session there will be no naval treaty looking to the limitation of naval armaments and the regulation of the construction of naval vessels after January 1, 1937.

This treaty does not limit the number of vessels that may be constructed of the present type. It is agreed, however, that no new types of vessels of war shall be purchased or constructed, or the keels laid down, prior to 1943. It is also provided in the treaty that prior to January 1, 1943, no 8-inch-gun cruisers shall be laid down or acquired. In other words, a holiday until January 1, 1943, is declared relative to the construction or acquisition of such vessels of war.

The maximum size of a capital ship is limited to 35,000 tons standard displacement. The age of ships at the time they may be replaced has been increased. The treaty categorically defines the various vessels of war. In my opinion, the most important provision contained in the treaty is found in article 13. It reads as follows:

> No vessel coming within the categories or subcategories mentioned in article 12 (a) shall be laid down by any high contracting party until after the expiration of a period of 4 months both from the date on which the annual program in which the vessel is included and from the date on which the particulars in respect of that vessel prescribed by article 12 (b) have reached all the other high contracting parties.

This provision of the treaty and other provisions of the treaty give each of the high contracting parties full notice of the various vessels of war of the other high contracting parties, and further give each high contracting party 4 months' notice, before any keel is laid down, of a complete description of such proposed vessel and every detail relative thereto, including displacement, measurements, armament, and power plant.

This avoids surprise, suspicions, excitement created by false rumors, and gives an opportunity for conferences with regard to the construction of such proposed vessels. These fair expositions and the friendly discussions that may take place with regard to the construction of such vessels will, it is hoped, in many cases bring about such an amicable understanding as will prevent an unnecessary naval race.

While there is no limitation as to the number of vessels that may be constructed within the defined types, the limitation of construction to these types and the armament provided for will, in my opinion, eliminate a threatening cause for naval races. The effectiveness of war vessels of the present type is well known, and therefore it is easy to determine the respective weight and efficiency of navies. On the other hand, if inventive genius is brought into play, a new character of war vessel, with new armament of far greater efficiency than present naval vessels, may be invented and constructed. In such event it very probably would be necessary for many of the naval vessels of the present type to be scrapped, at tremendous expense to the various governments.

Again, the institution of the building of such new types would be unregulated and would inevitably result in an intense and excited naval race. It is true that it is expressly provided in the treaty that when any of the high contracting parties believe that their national security is threatened they may depart from any or all of the limitations in the treaty without delay, simply upon informing the other high contracting parties of such fact and of the reasons that in their opinion require such departure. In other words, the high contracting parties are morally bound to adhere to the provisions of the treaty until some act is committed by another government that threatens the national safety of a high contracting party.

Under the Washington Treaty only adherents to that treaty were qualified to become members of the present treaty. This provision could not be changed except by unanimous consent, and such consent was not given. It is hoped, however, that through bilateral treaties between the various high contracting parties and outside governments, eventually all naval powers may be brought under the limitations contained in the treaty.

It is well known that Japan refused to become a party to the treaty because the treaty did not provide for an equal ratio as between Japan, the United States, and Great Britain. As the treaty provides for no limitations whatever on the present types of ship it would seem that Japan could adhere to the present treaty without having the question of ratio in any way involved. We cannot conceive that Japan would be unwilling to adhere to the limitation as to present types, nor that she would hesitate to agree to the provisions in the treaty with regard to granting full information as to the naval vessels of the respective high contracting parties.

Admiral Standley, Chief of Naval Operations and chief naval advisor of our delegation at London, testified before our committee that he favored a naval holiday on 8-inch-gun cruisers because we have either constructed or laid down all of such cruisers permitted to us under the Washington Treaty; and, further, that none of the member governments of the Washington Treaty have exceeded the limit of such cruisers allotted to them under the Washington Treaty. He very frankly stated that the General Naval Board had concurred with him in the opinion that we have all of such type of vessels that we desire under the present set-up and balance of the Navy. He was frank to admit that he had changed his opinion with regard to the efficiency of such 8-inch-gun cruisers in the performance of services that other

governments considered could be more efficiently performed by 6-inch-gun cruisers. In other words, he now takes the position that there are certain in-shore duties that cannot be performed by these large 8-inch-gun cruisers, and that for such services we must have 6-inch-gun cruisers.

Hon. Norman H. Davis, chairman of our delegation at London, and Admiral Standley, also a delegate and chief naval adviser, as well as the other attachés of the delegation, are to be congratulated upon the manner of the negotiation of the treaty and the results accomplished. They had given very careful study to the questions that would arise in connection with the General Naval Board of the United States Navy, the Department of State, and other departments before leaving the United States for attendance upon the conference. During the entire conference they were in constant touch with the General Naval Board with regard to all questions that arose, and the final draft of the treaty was submitted both to the State Department and to the General Naval Board before it was executed.

I am submitting with this report, and as a part thereof, parts of statements made by Hon. Norman H. Davis and by Admiral William H. Standley before the Foreign Relations Committee. The hearings will be printed for distribution tomorrow, and I am hopeful that, after consultation with our leader, the Senator from Arkansas [Mr. ROBINSON], action may be had upon the treaty next Monday.

The PRESIDING OFFICER. Without objection, the statements referred to will be printed in the RECORD.

The statements are as follows:

STATEMENT OF HON. NORMAN H. DAVIS, AMBASSADOR AT LARGE, BEFORE THE SENATE FOREIGN RELATIONS COMMITTEE MAY 14, 1936

Mr. DAVIS. Mr. Chairman and Senators, a full report of the recent Naval Conference in London and of the treaty which was signed on March 25 last has been made to the President, who, in turn, has transmitted this to the Senate. I should like, however, to make certain additional observations with regard to the treaty that is now before you for ratification.

At the outset, I must state that there are two regrettable but unavoidable omissions in this treaty. One is that two of the Washington Treaty powers, Japan and Italy, have not yet signed it; the other is that this treaty does not provide for any reduction in total tonnage or for a continuance of the principle of quantitative limitation established by the two previous treaties. The facts are, however, that it was not possible to secure agreement to that effect, because all of the naval powers represented at the conference, with the exception of Great Britain and the United States, refused to enter into a new treaty which continued the limitations and the ratios established by the present treaties. In fact, Japan left the conference a few weeks after it began because the other powers were unable to accept as a basis for negotiation the Japanese proposal for a so-called common upper limit which in effect was to scrap the present system of naval limitation and, without regard to relative needs and security, to change the present ratio of 5–5–3 to 3–3–3 or 5–5–5. While recognizing Japan's right to equal security, which we believe was achieved under the Washington and London Treaties, it was obviously impossible to accept the Japanese proposal because, owing to the difference in relative needs and vulnerability, naval parity would give to Japan naval superiority.

As it was impossible to agree to continue existing treaties beyond the end of this year, it was necessary, after the Japanese withdrawal from the conference, for the remaining powers to decide whether to throw up their hands and quit or whether to proceed to the negotiation of such a treaty as might be possible in order to prevent, if possible, the chaotic situation that would develop upon the termination of the existing treaties in case there should be nothing to take their place.

Notwithstanding the difficulties that were inherent in this situation, it was decided to continue in conference, with the result that after considerable time and patient effort we succeeded in negotiating a treaty which, while preserving in a modified but practical way the principle of naval limitation, contains new and important provisions which largely offset the omissions.

Although some things which we wanted are not in this treaty, there is nothing in it to which we object. There is, in fact, no single provision of the treaty which is objectionable or unfair to any participating state or to any of the other naval powers, but there is much that should prove to be mutually beneficial. It can thus be hoped that those states who have not yet signed the treaty will readily adhere to its provisions.

The main objectives of this treaty are twofold. First, to preserve the foundation of general naval limitation; and, second, to prevent a naval race. To accomplish this it standardizes and limits the size of ships and the caliber of their guns and provides for a full exchange of information between the contracting powers as to all projected and actual construction.

In substance, this treaty differs from its predecessors in that there are no provisions for the direct quantitative limitation of naval armaments. As a result of the elimination of this principle, more prominence is given to restrictions upon the size and gun caliber of the different classes of naval vessels. Although the absence of quantitative limits is a matter of regret, it is believed that qualitative limitation will serve effectively to eliminate competitive construction in naval armaments and thus to avoid dangerous rivalry in the construction of new types. Governments know today what the existing sizes are both as to type and number, and their respective naval strength is accordingly adjusted to this. If, however, countries are permitted to build new types of ships, such building might overnight render obsolete existing classes of ships and necessitate replacement of one or more categories, thereby creating heavy additional costs. Such competition may easily become even more expensive than competition in numbers.

The maximum size of battleships is left at 35,000 tons, but the treaty provides for a reduction in the caliber of guns on future battleships from 16 to 14 inches, provided all of the Washington Treaty powers enter into an agreement to that effect before the new treaty comes into force. The age limit for battleships has been increased by 6 years, thus prolonging their life and effecting substantial savings in their replacement. To insure that no hybrid vessel between battleships and cruisers, such as the German "pocket" battleships, will be built which would create a new type and upset existing classes, a zone of nonconstruction between these two categories has been created.

Aircraft carriers are to be reduced from 27,000 to 23,000 tons, and the maximum size of submarines is placed at 2,000 tons.

In respect to cruisers we, in effect, agreed upon certain conditions, not to increase our present number of 10,000-ton cruisers during the next 6 years. In so doing, however, we did not sacrifice any American principle or agree to anything that is detrimental to our own national security. The United States now has, either built or building, all of the 10,000-ton cruisers which we were permitted to have under the London Treaty. This, in fact, gives us all of the cruisers of this type which we expect to need for the next few years, unless the construction of cruisers by some other power or powers upsets the balance of this type, in which case we have the right under the treaty to terminate the so-called cruiser holiday and to construct such 10,000-ton cruisers as we may deem necessary in the circumstances.

While the new treaty has not been signed by Japan and Italy, it has been left open for their future adherence. It may be pointed out, however, that Italy collaborated in the formation of the treaty, which it is expected she will sign at a later date. Also Japanese observers remained throughout the conference, and it is hoped that Japan will see fit later on to adhere to the treaty. It is, furthermore, expected that Germany and Russia, two other principal powers who were not parties to the present treaties, will come into the new treaty system through bilateral treaties with Great Britain.

There has been some comment on the so-called safeguarding clauses of this treaty to the effect that the treaty is so full of holes as to have no substance whatever. No one will question, I am sure, the necessity for providing that, in case the construction of powers outside the scope of the treaty should menace the national security of any of the contracting parties, such contracting party shall have the right to depart from the limits established by the treaty. These clauses, however, are so drafted that, although they give each power ample assurance that it will be able to meet an emergency, they do not contemplate that the whole structure of the treaty will be destroyed by a simple noncompliance with the letter or spirit of its provisions. Only if a country considers that the requirements of its national defense are seriously threatened by the action of a noncontracting party will it undertake to put into operation the machinery to release it from its treaty obligations. Experience has shown that such action is not apt to be taken lightly. It is further provided that each power wishing to avail itself of this right must set forth in detail the reason for so doing and justify its action to the other powers.

The new treaty provides for much more elaborate and detailed exchange of information than has heretofore existed. Under the provisions for exchange of information, no program of construction is to be put into effect and no keel is to be laid without 4 months' advance notice and full information to all the parties to the treaty. This is a considerable improvement over the Washington and London treaties. To the layman it may seem unimportant, but to all naval experts and to you who are conversant with the problem this feature of the treaty is of considerable importance. It removes an element of uncertainty and guards against any sudden development of naval building as to type or quantity which would seriously disturb confidence or the relative security. In effect, it reduces suspicion and danger of the most harmful and costly kind of naval competition.

Although no limits have been placed on total naval tonnages, and each power is therefore free to build as many or as few of the permitted types of naval craft as it sees fit, England and America are in agreement that there shall be no competitive building between them. The exchange of letters which took place between the British Foreign Secretary and myself as chairman of the American delegation recognized this point of fundamental importance. These letters reaffirmed the understanding between England and America that the principle of parity between the fleets of the United States and of the British Commonwealth of Nations is an established principle which shall continue to govern their naval policies. The reaffirmation of this basic principle of the preceding treaties should go far, in these days of uncertainty, to show that at least as between the two greatest naval powers, the United States of

America and Great Britain, there is no thought of naval competition.

When one considers the difficulties which stood in the way of negotiating any treaty whatsoever, and what the situation would be without any treaty at all, it is, indeed, a source of real satisfaction that we were able to achieve as much as we did. We were indeed fortunate in being able to negotiate a treaty which not only preserves a structure of naval limitation but which establishes a basis for further progress toward naval reduction under more favorable conditions than now exist.

While the new naval treaty is less rigid and less far-reaching than the previous treaties, it has many advantages and its lack of rigidity may well be one of them. The fact is that the Washington treaty has been denounced because of its rigidity, and for the same reason the London treaty could not be renewed, whereas the new treaty, which is more flexible, may be more enduring and prove in the long run to be more practical. At any rate, we have nothing to lose in trying it out, but possibly much to gain.

STATEMENT OF ADMIRAL WILLIAM H. STANDLEY, CHIEF OF NAVAL OPERATIONS, BEFORE THE SENATE FOREIGN RELATIONS COMMITTEE, MAY 14, 1936

The CHAIRMAN. Admiral Standley, will you state to the committee your understanding of this treaty, and why you approve it?

Senator LEWIS. Admiral Standley, before you answer that question, in that connection, this is giving me more concern: Would you also include in that answer to the chairman, is it true that we are granting in this treaty to France a superiority of submarines, and an advantage to England, the right of having superiority on the cruisers over us, both on the guns and quantity of construction?

Admiral STANDLEY. Senator, we were sent over to London to negotiate agreements to take the place of the Washington and London Treaties. The Washington and London Treaties both were to expire on the 1st day of January. We were sent over there to negotiate agreements. The idea of our country, apparently of our administration, and our instructions were, we were to negotiate agreements. In other words, it was the desire that we bring back an agreement. The duty of this delegation over there was to see that any agreements we brought back were not inimical to the interests of this country. It was my function, as the naval delegate, to see that nothing was agreed to over there that was inimical to our national needs, or our needs in national defense, so far as the Navy was concerned.

If our mission had been to refuse an agreement, we could have come home very quickly when the Japanese went out. We could have left immediately and said, "We are finished. Come home." But our purpose was to negotiate agreements, if it could be done, consistently with our national needs and security.

We spent considerable time there. Preliminary to that, however, we knew that this conference was to be called. We went over there in 1934, because the London Treaty called for a conference in 1935, and after the preliminary conversation the Japanese denounced the Washington Treaty, and that brought that to an end on the 1st of January 1937, so that the two treaties ended together.

Now, in 1934 we went over and had conversations to see whether or not we could arrive at some agreements which would take the place of these treaties. We were not able to reach any conclusions in 1934. We left there with the understanding that the British Empire would continue the explorations through diplomatic channels, with the idea of finding whether that would be a common meeting ground. The conversations in 1934 were between Japan and ourselves, and England and ourselves, the three of us—bilateral conversations. During 1935 England made inquiries of France and Italy, who are also signatories to the Washington Treaty, and so when we went over there in 1935 our delegation had instructions, or, rather, had understandings, of what we could agree to, what would be acceptable to us in any terms of agreement; so, having in mind our mission to get and reach agreements, our mission to safeguard in every way possible our country's interests, or, rather, to accept agreements only in case we felt that our country's interests and our national defense were not jeopardized. We considered the various things that could be put into an agreement, the various considerations that could be used as a basis for agreement; and the treaty that we brought home was the result of those explorations.

We took out of the Washington and London Treaties those things which we felt could be continued and would be desirable to continue. We built up a treaty on various things upon which we could agree without any conflict of thought, or what not; there was no controversy; and eventually we built up this agreement, this treaty, which contains the reasons which I felt were desirable and advantageous to us, and without any disadvantage whatever, so far as our country's needs were concerned.

I felt that the information part of the treaty, and which in effect is limiting a building program for a year, I felt that that would have the effect of lessening suspicion, and feeling that some other fellow is doing something he is not telling you about; and we have that right today. I felt that that would have a tendency to eliminate suspicion, and to that extent probably tend to avoid a naval race; and I, as the senior officer in the Navy, the Chief of Naval Operations, I have come to feel that a naval race is a most disastrous thing in the way of naval needs.

The second part of the treaty is, as I have felt—and I have come to believe that, too—I did not, in the beginning—that a limitation on armament is a desirable thing. I felt, when the Washington Treaty was signed, that it was highly undesirable to limit by agreement our naval needs, particularly if we felt that we did not get all the advantages. I have come to the opinion that limitation is a desirable thing, and that if we can limit our naval power to our naval needs, and base it on that, and frankly state it, that it is a desirable thing to have in the way of a navy. In this treaty, therefore, we have not only provided for that information which will tend to avoid a naval race but we have retained the structure for the limitation of armament set up by the Washington and London Treaties, and which I consider a good thing. Now, while we practically got no limitation, or we did not get what we expected, in this quantitative limitation, we did get certain qualitative limitations, and we preserved the structure, and those are the reasons which made me feel that this treaty was a good treaty, something that was worth while bringing home, and worth while trying to get before this honorable body. As I started to say in the beginning, in 1935 we prepared for this treaty by anticipating every possible contingency that would come up. In London, however, when these questions came up, there was never a question brought up that we did not, after considering it there, whether or not we thought it was a good thing or not, whether it was inimical to our interests, whether it would hurt our national defense, then we put it back up to the Navy Department and to our General Board, and it came through the State Department and to our General Board and to the President. "This is the proposition. We feel so-and-so." And in no place, no agreement in this treaty, have we accepted that that was inimical to our national interests, and that was not in entire accord with the delegation, State Department, and General Board of the Navy, and the administration. And I feel, as I have stated, that we have brought back something that is disappointing in the way of a limitation of armament. It is not what we expected.

The CHAIRMAN. Was this proposed treaty submitted to the General Board of the Navy before it was agreed to in London?

Admiral STANDLEY. Yes, sir. Before it was finally accepted and signed it was submitted, in its entirety, to the State Department and the General Board of the Navy, and accepted by them.

Mr. DAVIS. We were reporting constantly. You see, you build these things up as you go along, and we submitted every detail to the General Board, every technical question that came up at all, and every other aspect, to all the branches of Government.

Admiral STANDLEY. To answer your first question, Senator, your statement is not a correct one. Great Britain is not allowed to have cruisers superior to ours, nor guns superior to ours, and she has not got them. Now, we are allowed, under the Washington Treaty, eighteen 8-inch-gun cruisers, and Great Britain is only allowed 15, so we exceed her by 3 on 8-inch-gun cruisers.

Now, we have accepted a holiday in that type of ship; so has she. She is going to increase her cruiser strength in type 8,000 below. We have the same right as she has to build as many of those as we want if we want to build that type of ship. We do not need the same number that she needs, of that smaller type, and we did not intend to build any of the 8-inch type during this period; and we have simply accepted something that was going to be the case, anyhow.

Senator LEWIS. In other words, that which she exceeds us in is something which we do not need at all, from your point of view?

Admiral STANDLEY. We do not need at all; and we have a perfect right, if we want, to match that with aircraft carriers, or with some other craft of standard type. We can build in some other type, if we want to, or we can match her, ship for ship, in her cruisers; and if we do that, we will still be three 8-inch cruisers ahead of her under the present standards.

Now, so far as the French submarines are concerned, there is no way we can prevent any country building anything they wanted to, when Japan went out and threw out the question of quantitative limitations, or limitations of ratios. Once that went, there was no way, no possible way, unless they would agree to some other limit, of limiting any power in the number of any kind they could build. So what we brought back was a limitation, a qualitative limitation, which only limited us in the sizes and guns, and so forth, but no limitation whatsoever as to the numbers, and there was no way we could get that.

Mr. DAVIS. As to the large number of submarines which France has got, you see the London Treaty limited the United States and Great Britain and Japan to 57 submarines, but France did not get into the London Treaty, and so there was no limitation upon her at all, and she has got something like 90 submarines. I forget the exact number.

Admiral STANDLEY. So it is a case, Senator, of trying to bring back something that we felt was worth while. It is not what we would like to have brought back, but we brought back something we consider is of no damage to us, to our national interest, to our national defense, and we do feel, and I feel, that it is worth while putting it into effect.

Senator WAGNER. Admiral, we are not limited, under this treaty, on the construction of submarines at all?

Admiral STANDLEY. No; not as to number.

Mr. DAVIS. Just as to the size.

Senator JOHNSON. Admiral, will you pardon me a question or two?

Admiral STANDLEY. Yes, sir.

Senator JOHNSON. What type of cruiser is most suited to our needs?

Admiral STANDLEY. Senator, we have felt that the large-size cruiser and the 8-inch guns was the most all-around—we did—the most all-around cruiser for our needs. At the time we were discussing that, Senator, we did not have any. We had two of those types built.

Mr. PITTMAN. Mr. President, I will say that we have taken all these steps so that every Senator may have an opportunity to familiarize himself with the treaty between now and next Monday. The hearings are very short. The treaty itself is quite short. The questions involved are few and quite simple. I hope Senators will take advantage of the opportunity to read the hearings between now and next Monday.

WITHHOLDING COMPENSATION DUE GOVERNMENT PERSONNEL

Mr. SHEPPARD. Mr. President, on the last call of the calendar the Senate passed Senate bill 3220, to authorize withholding compensation due Government personnel where payments have been made illegally.

On May 4 the House passed an identical bill, being House bill 8784, which, on reaching the Senate was inadvertently referred to the Senate Committee on Claims instead of being placed on the Senate calendar with Senate bill 3220. Inasmuch as House bill 8784 is identical with Senate bill 3220, I ask unanimous consent that the Senate rescind its action on Senate bill 3220, discharge the Committee on Claims from the further consideration of House bill 8784, and pass House bill 8784 in lieu of the identical measure, Senate bill 3220.

The PRESIDING OFFICER (Mr. CLARK in the chair). Is there objection to the request for unanimous consent of the Senator from Texas? The Chair hears none, and the vote by which Senate bill 3220 was passed is reconsidered.

Without objection, the Committee on Claims is discharged from the further consideration of House bill 8784.

Is there objection to the present consideration of House bill 8784?

There being no objection, the bill (H. R. 8784) to authorize withholding compensation due to Government personnel was considered, ordered to a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That hereafter, whenever upon the statement of the account of any disbursing officer of the United States in the General Accounting Office credit shall have been disallowed for any payment to any person in the executive branch of the Government, otherwise entitled to compensation from the United States or from any agency or instrumentality thereof, such compensation of the payee may be withheld until full reimbursement has been accomplished under such regulations as may be prescribed by the head of the department, branch, or independent establishment (including corporations) under which such payee is entitled to receive compensation: *Provided*, That nothing contained in this act shall be construed to repeal or in any way modify existing laws relating to the collection of the indebtedness of accountable or disbursing officers.

Mr. SHEPPARD. I ask unanimous consent that Senate bill 3220 be indefinitely postponed.

The PRESIDING OFFICER. Without objection, Senate bill 3220 will be indefinitely postponed.

EXECUTIVE SESSION

Mr. ROBINSON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE REPORTS OF COMMITTEES

Mr. McKELLAR, from the Committee on Post Offices and Post Roads, reported favorably the nominations of sundry postmasters.

Mr. HARRISON, from the Committee on Finance, reported favorably the nomination of Harry M. Hickey, of Albany, N. Y., to be collector of internal revenue for the fourteenth district of New York, to fill an existing vacancy.

Mr. PITTMAN, from the Committee on Foreign Relations, reported favorably the nominations of several officers in the Diplomatic and Foreign Service.

He also, from the same committee, reported favorably Executive F, Seventy-fourth Congress, second session, a treaty for the limitation of naval armaments and the exchange of information concerning naval construction, together with the protocol of signature and additional protocol, signed in London on March 25, 1936, and submitted a report (Exec. Rept. No. 2) thereon.

Mr. SHEPPARD, from the Committee on Military Affairs, reported favorably the nomination of Brig. Gen. Howard Seymour Borden, for reappointment in the Officers' Reserve Corps of the Army, under the provisions of law, as a brigadier general in the Inactive Reserve, from July 13, 1936.

He also, from the same committee, reported favorably the nominations of sundry officers for appointment in the Regular Army.

The PRESIDING OFFICER (Mr. CLARK in the chair). The reports will be placed on the Executive Calendar.

If there be no further reports of committees, the clerk will state the first nomination in order on the calendar.

GREAT LAKES EXPOSITION

The Chief Clerk read the nomination of A. Harry Zychick, of Ohio, to be United States Commissioner General for the Great Lakes Exposition.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

POSTMASTERS

The Chief Clerk proceeded to read sundry nominations of postmasters.

Mr. ROBINSON. I ask that the nominations of postmasters on the calendar be confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations of postmasters are confirmed en bloc.

IN THE NAVY

The Chief Clerk proceeded to read sundry nominations in the Navy.

Mr. WALSH. I ask that the nominations in the Navy be confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations in the Navy are confirmed en bloc.

MARINE CORPS

The Chief Clerk proceeded to read sundry nominations in the Marine Corps.

Mr. WALSH. I ask that the nominations in the Marine Corps be confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations in the Marine Corps are confirmed en bloc.

That completes the calendar.

RECESS TO MONDAY

The Senate resumed legislative session.

Mr. ROBINSON. I move that the Senate take a recess until 12 o'clock noon on Monday next.

The motion was agreed to; and (at 1 o'clock and 55 minutes p. m.) the Senate took a recess until Monday, May 18, 1936, at 12 o'clock meridian.

CONFIRMATIONS

Executive nominations confirmed by the Senate May 15 (legislative day of May 12), 1936

COMMISSIONER GENERAL, GREAT LAKES EXPOSITION

A. Harry Zychick to be United States Commissioner General for the Great Lakes Exposition.

PROMOTIONS IN THE NAVY

TO BE REAR ADMIRAL

Julius C. Townsend

TO BE CAPTAINS

Harry A. Badt
Edward J. Foy

TO BE COMMANDERS

Otto Nimitz
Frank D. Wagner
Ralph D. Weyerbacher

TO BE LIEUTENANT COMMANDERS

Myron A. Baber
Harley F. Cope
Stanley J. Michael
Clayton S. Isgrig
Philip R. Kinney
James A. Crocker

SENATE

MONDAY, MAY 18, 1936

(Legislative day of Tuesday, May 12, 1936)

The Senate met at 12 o'clock m., on the expiration of the recess.

THE JOURNAL

On request of Mr. ROBINSON, and by unanimous consent, the reading of the Journal of the proceedings of the calendar day Friday, May 15, 1936, was dispensed with, and the Journal was approved.

CALL OF THE ROLL

Mr. LEWIS. I observe the absence of a quorum, and suggest that the roll be called.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Adams	Barkley	Borah	Byrd
Ashurst	Benson	Brown	Byrnes
Austin	Bilbo	Bulkley	Capper
Bachman	Black	Bulow	Caraway
Bailey	Bone	Burke	Carey
Chavez	Guffey	Maloney	Schwellenbach
Clark	Hale	Metcalf	Sheppard
Connally	Harrison	Minton	Shipstead
Coolidge	Hatch	Moore	Smith
Copeland	Hayden	Murphy	Steiwer
Couzens	Holt	Murray	Thomas, Utah
Davis	Johnson	Neely	Townsend
Dickinson	Keyes	Norris	Truman
Dieterich	King	Nye	Tydings
Donahey	La Follette	O'Mahoney	Vandenberg
Duffy	Lewis	Overton	Van Nuys
Fletcher	Lonergan	Pittman	Wagner
Frazier	Long	Pope	Walsh
George	McAdoo	Radcliffe	Wheeler
Gerry	McGill	Reynolds	White
Gibson	McKellar	Robinson	
Glass	McNary	Russell	

Mr. LEWIS. I announce that the Senator from Alabama [Mr. BANKHEAD], the Senator from Colorado [Mr. COSTIGAN], and the Senator from Nevada [Mr. MCCARRAN] are absent from the Senate because of illness, and that the junior Senator from Oklahoma [Mr. GORE], the senior Senator from Oklahoma [Mr. THOMAS], and the Senator from Kentucky [Mr. LOGAN] are unavoidably detained.

Mr. AUSTIN. I announce that the Senator from New Jersey [Mr. BARBOUR] and the Senator from Delaware [Mr. HASTINGS] are necessarily absent.

The VICE PRESIDENT. Eighty-six Senators have answered to their names. A quorum is present.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILLS AND JOINT RESOLUTIONS

Messages in writing from the President of the United States were communicated to the Senate by Mr. Latta, one of his secretaries, who also announced that the President had approved and signed the following acts and joint resolutions:

On May 1, 1936:

S. 371. An act for the relief of G. Elias & Bro., Inc.;

S. 788. An act for the relief of the International Mercantile Marine Co.;

S. 790. An act for the relief of the Compagnie Generale Transatlantique;

S. 1062. An act for the relief of James R. Young; and

S. 3413. An act to give effect to the convention between the United States and certain other countries for the regulation of whaling, concluded at Geneva, September 24, 1931, signed on the part of the United States, March 31, 1932, and for other purposes.

On May 5, 1936:

S. 753. An act to carry out the findings of the Court of Claims in the case of the Wales Island Packing Co.;

S. 998. An act to carry out the findings of the Court of Claims in the case of George Lawley & Son Corporation, of Boston, Mass.; and

S. 4335. An act to authorize the coinage of 50-cent pieces in commemoration of the centennial celebration of Cleveland, Ohio, to be known as the Great Lakes Exposition.

On May 7, 1936:

S. J. Res. 247. Joint resolution authorizing the recognition of the three hundredth anniversary of the founding of Harvard College and of the beginning of higher education in the United States and providing for the representation of the Government and people of the United States in the observance of the anniversary.

On May 11, 1936:

S. 2517. An act to provide for the advancement on the retired list of the Navy of Walter M. Graesser, a lieutenant (junior grade), United States Navy, retired;

S. 3950. An act to aid in defraying the expenses of the Sixteenth Triennial Convention of the World's Woman's Christian Temperance Union to be held in this country in June 1937; and

S. 3977. An act to authorize the Washington Gas Light Co. to alter its corporate structure, and for other purposes.

On May 12, 1936:

S. 3516. An act for the relief of Alice D. Hollis; and

S. 4135. An act for the relief of Helen Curtis.

On May 13, 1936:

S. J. Res. 260. Joint resolution to provide an additional appropriation for folding speeches and pamphlets for the Senate for the fiscal year 1936;

S. 1379. An act to amend section 981 of title IV and section 843 of title VI of the Canal Zone Code;

THE LATE SENATOR TRAMMELL, OF FLORIDA

The VICE PRESIDENT laid before the Senate resolutions adopted by the North East Council, United Spanish War Veterans, Department of Florida, Jacksonville, Fla., as a tribute to the memory of Hon. Park Trammell, late a Senator from the State of Florida, which were ordered to lie on the table.

HARVARD UNIVERSITY TERCENTENARY COMMISSION

The VICE PRESIDENT appointed the Senator from Massachusetts [Mr. COOLIDGE], the Senator from Ohio [Mr. BULKLEY], the Senator from Maine [Mr. HALE], and the Senator from New Hampshire [Mr. KEYES] as members, on the part of the Senate, of the Harvard University Tercentenary Commission, established by the joint resolution approved May 7, 1936 (Pub. Res. 88).

COAT OF ARMS OF THE SWISS CONFEDERATION

The VICE PRESIDENT laid before the Senate a message from the President of the United States, which was read, and, with the accompanying papers, referred to the Committee on Foreign Relations, as follows:

To the Congress of the United States:

I transmit a report from the Secretary of State in regard to the obligation of this Government, under the Red Cross Convention of 1929, to take such measures as may be necessary to prohibit the commercial use in the United States of the coat of arms of the Swiss Confederation.

I recommend that, as proposed by the Secretary of State, the necessary legislation be enacted to fulfill the treaty obligation mentioned. A draft bill which is believed to be suitable for this purpose accompanies the Secretary's report.

FRANKLIN D. ROOSEVELT.

THE WHITE HOUSE, *May 18, 1936.*

(Enclosures: Report, draft bill.)

CLAIM FOR DAMAGES TO PRIVATELY OWNED PROPERTY—DEPARTMENT OF JUSTICE (S. DOC. NO. 218)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting an estimate of appropriation, submitted by the Department of Justice, to pay a claim for damages to privately owned property, amounting to $4.02, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

CLAIMS FOR DAMAGES TO PRIVATELY OWNED PROPERTY (S. DOC. NO. 219)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting estimates of appropriations submitted by the executive departments and independent offices, to pay claims for damages to privately owned property, amounting to $7,854.15, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

JUDGMENTS RENDERED AGAINST THE GOVERNMENT BY DISTRICT COURTS (S. DOC. NO. 220)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting, pursuant to law, records of judgments rendered against the Government by the United States district courts, amounting to $21,985.31, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

JUDGMENTS RENDERED BY THE COURT OF CLAIMS (S. DOC. NO. 221)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting, pursuant to law, a list of judgments rendered by the Court of Claims, amounting to $302,495.07, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

CLAIMS ALLOWED BY GENERAL ACCOUNTING OFFICE (S. DOC. NO. 222)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting, pursuant to law, a schedule of claims allowed by the General Accounting Office, amounting to $23,975.26, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

SCHEDULE OF CLAIMS ALLOWED BY GENERAL ACCOUNTING OFFICE (S. DOC. NO. 223)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting, pursuant to law, a schedule of claims allowed by the General Accounting Office, covering judgments rendered by the United States District Court for the Southern District of New York against the Collector of Customs, amounting to $19,005.90, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

SUPPLEMENTAL ESTIMATES, DEPARTMENT OF COMMERCE (S. DOC. NO. 227)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting, pursuant to law, estimates of appropriations for the Department of Commerce for the fiscal years 1936 and 1937, amounting to $681,680, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

SUPPLEMENTAL ESTIMATE, LEGISLATIVE ESTABLISHMENT (S. DOC. NO. 228)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting, pursuant to law, a supplemental estimate of appropriation for the legislative establishment, Architect of the Capitol (maintenance of Senate Office Building), for the fiscal year 1936, in the sum of $75,180, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

DRAFT OF PROVISION AFFECTING APPROPRIATIONS FOR THE POST OFFICE DEPARTMENT (S. DOC. NO. 231)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting draft of a proposed provision of law affecting two appropriations for the Post Office Department for the fiscal year 1937, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

DRAFT OF PROVISION PERTAINING TO THE APPROPRIATION "EMERGENCY RELIEF, 1935–37" (S. DOC. NO. 230)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting draft of a proposed provision of law pertaining to the appropriation "Emergency relief, 1935–37", contained in the Emergency Relief Appropriation Act of 1935, which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

SUPPLEMENTAL ESTIMATE, LEGISLATIVE ESTABLISHMENT (S. DOC. NO. 229)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting a supplemental estimate of appropriation for the legislative establishment, Architect of the Capitol (Joint Committee on Inaugural Ceremonies) for the fiscal year 1937, in the sum of $35,900, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

OPERATION OF FOREIGN AND AMERICAN SHIPS IN THE FOREIGN TRADE (S. DOC. NO. 224)

The VICE PRESIDENT laid before the Senate a letter from the Secretary of Commerce, transmitting, pursuant to Senate Resolution 260 (submitted by Mr. TYDINGS and agreed to Apr. 24, 1936), information concerning the operation of foreign ships and of American ships engaged in foreign trade, which, with the accompanying papers, was referred to the Committee on Commerce and ordered to be printed.

REPORT OF BOARD OF GOVERNORS OF FEDERAL RESERVE SYSTEM

The VICE PRESIDENT laid before the Senate a letter from the chairman of the Board of Governors of the Federal Reserve System, transmitting, pursuant to law, copy of the annual report of the Board of Governors of the Federal Reserve System covering operations during the year 1935, which, with the accompanying report, was referred to the Committee on Banking and Currency.

REPORT OF THE NEAR EAST RELIEF

The VICE PRESIDENT laid before the Senate a letter from the comptroller of the Near East Relief, transmitting, pursuant to law, the report of the Near East Relief for the year ended December 31, 1935, which, with the accompanying report, was referred to the Committee on Printing.

PETITIONS AND MEMORIALS

The VICE PRESIDENT laid before the Senate resolutions adopted by the Board of Aldermen of New York City, N. Y.; the Council of the City of East St. Louis, Ill., and the mayor and Common Council of the City of Sheboygan, Wis., favoring the enactment of Senate bill 4424, known as the Wagner-Ellenbogen low-cost housing bill, which were referred to the Committee on Education and Labor.

He also laid before the Senate a letter in the nature of a petition from the United Korean Christian Society of Hawaii, of Honolulu, Territory of Hawaii, calling attention to the plight of American citizens in Korea and the Far East and praying that protection be accorded to such citizens and their properties, which was referred to the Committee on Foreign Relations.

Mr. WALSH presented a resolution adopted by the Massachusetts Fruit Growers' Association, favoring action by the Government of the United States looking to the repeal of duties now levied by foreign governments on fresh fruit exported from the United States, which was referred to the Committee on Finance.

He also presented a letter and memorials from H. F. Thayer, financial secretary of the Dump Truck Owners' Association of Massachusetts, eastern division, of Boston, and sundry other citizens of the State of Massachusetts, remonstrating against the enactment of the so-called Pettengill bill, being the bill (H. R. 3263) to amend paragraph (1) of section 4 of the Interstate Commerce Act, as amended February 28, 1920 (U. S. C., title 49, sec. 4), which were referred to the Committee on Interstate Commerce.

He also presented petitions of sundry citizens of the State of Massachusetts, praying for the enactment of the bill (S. 4174) to foster and protect interstate commerce by authorizing the Interstate Commerce Commission to approve or disapprove of the consolidation or abandonment of carrier facilities of public service, which were referred to the Committee on Interstate Commerce.

FLOOD CONTROL

Mr. WALSH presented resolutions favoring the construction at Federal expense of dams for the prevention of floods,

which were ordered to lie on the table and to be printed in the RECORD, as follows:

Whereas in March 1936 the Connecticut Valley suffered devastating floods which damaged farms, homes, and industries to an extent far exceeding the hitherto unprecedented flood of 1927; and

Whereas the flood damage was caused by both excessive flow from the north and the inability of the river to drain; and

Whereas the Army Engineer Corps has (under the provisions of H. Doc. No. 308, 69th Cong., 1st sess.) already surveyed and reported February 11, 1936, and later modified, on a system of flood-protection dams in Vermont and New Hampshire; and

Whereas flood-control dams in Vermont and New Hampshire are essential parts in a project involving dikes and drainage, the cost of building dams would be greatest in the States least affected: Therefore be it

Resolved by the inhabitants of South Hadley in town meeting assembled on May 5, 1936—

First. That the Federal Government should proceed to construct at Federal expense at least 80 percent of the comprehensive system of flood-control dams recommended in said report.

Second. The control and maintenance of protection dams should be placed in the hands of a Connecticut Valley States compact commission, the maintenance cost to be borne by each State in such proportion as the 1935 assessed valuation of the Connecticut Valley drainage area in each State shall be to the total 1935 assessed valuation of the drainage area of the entire Connecticut Valley in the four Connecticut Valley States.

Third. The Federal Government should survey the Connecticut River to determine what measures are necessary to improve the run-off in times of flood and provide for such improvements, as well as restoring and raising necessary dikes.

Fourth. A copy of these resolutions, properly certified, shall be sent by the town clerk to the President, each Connecticut Valley Congressman, and the Senators of the four States of the valley watershed with the request that they act cooperatively for the future protection of the lives and property of the people in the valley.

CITY OF SPRINGFIELD,
In Board of Aldermen, May 6, 1936.

Whereas in March 1936 the Connecticut Valley suffered devastating floods which damaged farms, homes, and industries to an extent far exceeding the hitherto unprecedented flood of 1927; and

Whereas the flood damage was caused by both excessive flow from the north and the inability of the river to drain; and

Whereas the Army Engineer Corps had, under the provisions of House Document No. 308, Sixty-ninth Congress, first session, already surveyed and reported February 11, 1936, and later modified, on a system of flood-protection dams in Vermont and New Hampshire; and

Whereas flood-control dams in Vermont and New Hampshire are essential parts of the project involving dikes and drainage and the cost of building dams would be greatest in the States least affected: Therefore be it

Resolved (if the common council concur)—

First. That the Federal Government should proceed immediately to construct at Federal expense at least the major portion of the comprehensive system of flood-control dams recommended in said report.

Second. The control and maintenance of protection dams should be placed in the hands of a Connecticut Valley State compact commission, the maintenance cost to be borne by each State in such proportion as the 1935 assessed valuation of the Connecticut Valley drainage area in each State is to the total 1935 assessed valuation of the drainage area of the entire Connecticut Valley in the four Connecticut Valley States.

Third. The Federal Government should survey the Connecticut River to determine what measures are necessary to improve the run-off in times of flood and provide for such improvements as well as for restoring and raising necessary dikes.

Fourth. A copy of these resolutions shall be sent to the President, each Connecticut Valley Congressman, and the Senators of the four States of the valley watershed, with the request that they act cooperatively for the future protection of the lives and property of the people in the valley.

Board of aldermen, May 6, 1936. Read, passed, and sent down for concurrence.

CLIFFORD F. SMITH, *Clerk.*

Common council, May 6, 1936. Read and concurred.

GEORGE J. CLARK, *Clerk.*

Presented to the mayor for approval May 6, 1936.

CLIFFORD F. SMITH, *City Clerk.*

MAYOR'S OFFICE,
Springfield, Mass., May 6, 1936.

Approved.

HENRY MARTENS, *Mayor.*

REPORTS OF COMMITTEES

Mr. ASHURST, from the Committee on the Judiciary, to which was referred the joint resolution (S. J. Res. 246) requesting the President to proclaim October 9 as Leif Ericson Day, reported it with amendments and submitted a report (No. 2035) thereon.

Mr. WALSH, from the Committee on Naval Affairs, to which was referred the bill (S. 4354) to authorize the attendance of the Marine Band at the Arkansas Centennial Celebration, at Little Rock, Ark., on June 2, 3, 4, and 5, 1936; the Texas Centennial, at Dallas, Tex., on June 6, 7, and 8, 1936; and the Forty-sixth National Confederate Reunion, at Shreveport, La., on June 9, 10, 11, and 12, 1936, reported it with amendments and submitted a report (No. 2036) thereon.

He also, from the same committee, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

H. R. 7825. A bill for the relief of Michael Stodolnik (Rept. No. 2041);

H. R. 8278. A bill for the relief of Earl Elmer Gallatin (Rept. No. 2042); and

H. R. 8884. A bill for the relief of Mrs. Ollie Myers (Rept. No. 2043).

Mr. HATCH, from the Committee on the Judiciary, to which was referred the bill (H. R. 8875) to clarify section 104 of the Revised Statutes (U. S. C., title II, sec. 194), reported it without amendment and submitted a report (No. 2037) thereon.

Mr. CHAVEZ, from the Committee on Foreign Relations, to which was referred the bill (H. R. 11768) authorizing construction, operation, and maintenance of Rio Grande canalization project and authorizing appropriation for that purpose, reported it without amendment and submitted a report (No. 2038) thereon.

Mr. DUFFY, from the Committee on Military Affairs, to which was referred the bill (H. R. 11920) to increase the efficiency of the Air Corps, reported it with amendments and submitted a report (No. 2039) thereon.

Mr. WHEELER, from the Committee on Indian Affairs, to which was referred the joint resolution (S. J. Res. 245) authorizing distribution to the Gros Ventre Indians of the Fort Belknap Reservation, Mont., of the judgment rendered by the Court of Claims in their favor, reported it with an amendment and submitted a report (No. 2040) thereon.

Mr. BONE, from the Committee on Naval Affairs, to which was referred the bill (S. 4094) to provide for the transfer from the Treasury Department to the Navy Department of the property in Bremerton, Wash., known as the Navy Yard Hotel site, reported it without amendment and submitted a report (No. 2044) thereon.

Mr. SHEPPARD, from the Committee on Commerce, to which was referred the bill (S. 4533) granting the consent of Congress to the Mississippi State Highway Commission to construct, maintain, and operate a free highway bridge across the Pascagoula River at or near Wilkersons Ferry, Miss., reported it without amendment and submitted a report (No. 2045) thereon.

REPORT OF AMERICAN INSTRUCTORS OF THE DEAF (S. DOC. 233)

Mr. HAYDEN, from the Committee on Printing, to which was referred the report of the proceedings of the Twenty-ninth Meeting of the Convention of American Instructors of the Deaf, held at Jacksonville, Ill., June 17 to 21, 1935, reported it with the recommendation that it be printed with illustrations; and on motion by Mr. HAYDEN, it was

Ordered, That the letter from the President of the Columbia Institution for the Deaf, transmitting the report of the proceedings of the twenty-ninth meeting of the Convention of American Instructors of the Deaf, held at Jacksonville, Ill., June 17–21, 1935, be printed, with illustrations, as a Senate document.

SPECIAL COMMITTEE ON CONSERVATION OF WILDLIFE RESOURCES

Mr. PITTMAN (for himself, Mr. MCNARY, Mr. NORBECK, Mr. CLARK, Mr. BAILEY, Mr. BYRD, and Mr. WHITE), from the Special Committee on Conservation of Wildlife Resources, reported a resolution (S. Res. 299), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

Resolved, That the special committee authorized and directed by the Senate resolution No. 246, agreed to April 17, 1930, to investigate the conservation of wild animal life, hereby is authorized to expend from the contingent fund of the Senate, in further-

ance of such purposes, $9,500 in addition to the amounts heretofore authorized for such purposes; and the said committee hereby is directed to file with the Senate not later than February 1, 1937, its final report and recommendations.

TAXATION ON INTOXICATING LIQUOR—MINORITY VIEWS

Mr. BAILEY submitted the views of the minority of the Committee on Finance on the bill (H. R. 9185) to insure the collection of the revenue on intoxicating liquor, to provide for the more efficient and economical administration and enforcement of the laws relating to the taxation of intoxicating liquor, and for other purposes, which were ordered to be printed as part 2 of Report No. 2028.

ENROLLED BILLS PRESENTED

Mrs. CARAWAY, from the Committee on Enrolled Bills, reported that that committee presented to the President of the United States the following enrolled bills:

On May 13, 1936:

S. 3161. An act to amend section 13 (c) of the act entitled "An act to provide for the regulation of motor-vehicle traffic in the District of Columbia, and so forth", approved March 3, 1925, as amended.

On May 15, 1936:

S. 1975. An act to authorize certain officers of the United States Navy, officers and enlisted men of the Marine Corps, and officers and enlisted men of the United States Army to accept such medals, orders, diplomas, decorations, and photographs as have been tendered them by foreign governments in appreciation of services rendered.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. GIBSON:

A bill (S. 4637) for the relief of Alex St. Louis; to the Committee on Claims.

By Mr. NEELY:

A bill (S. 4638) granting a pension to Ida B. Cutright; to the Committee on Pensions.

A bill (S. 4639) for the relief of Henry Top; to the Committee on Naval Affairs.

By Mr. SHEPPARD:

A bill (S. 4640) to amend the act entitled "An act to establish a uniform system of bankruptcy throughout the United States", approved July 1, 1898, and acts amendatory thereof and supplementary thereto; to the Committee on the Judiciary.

By Mr. LA FOLLETTE:

A bill (S. 4641) for the relief of P. S. Everest; to the Committee on Claims.

By Mr. MURRAY:

A bill (S. 4642) to confer jurisdiction upon the Court of Claims to hear, determine, and render judgment upon the claim of the Waterton Oil, Land & Power Co., of Butte, Mont., against the United States; to the Committee on Public Lands and Surveys.

By Mr. BULOW:

A bill (S. 4643) authorizing the Secretary of War to lend certain Army equipment to the Diamond Jubilee Committee, Yankton, S. Dak., for the accommodation of persons attending the celebration to be held by such committee during June 1936; to the Committee on Military Affairs.

By Mr. OVERTON:

A bill (S. 4644) to authorize a preliminary examination and survey of the Mermentau River, La.; to the Committee on Commerce.

By Mr. BONE, Mr. McNARY, Mr. SCHWELLENBACH, and Mr. STEIWER:

A bill (S. 4645) to authorize completion, maintenance, and operation of certain facilities for navigation on the Columbia River, and for other purposes; to the Committee on Commerce.

By Mr. WALSH:

A bill (S. 4646) for the relief of Emile Beaudoin; to the Committee on Claims.

By Mr. FLETCHER:

A bill (S. 4647) authorizing a preliminary examination of the intracoastal waterway throughout Broward County, Fla.; to the Committee on Commerce.

By Mr. COPELAND:

A bill (S. 4648) to promote safety at sea in the neighborhood of ice and derelicts, and for other purposes; to the Committee on Commerce.

By Mr. HATCH:

A bill (S. 4649) for the relief of the estate of Alice W. Miller, deceased; to the Committee on Claims.

By Mr. WAGNER:

A bill (S. 4650) for the relief of dependents of James B. Kiley; to the Committee on Claims.

By Mr. SHIPSTEAD:

A bill (S. 4651) for the relief of Jacob N. Lahr and others; to the Committe on Claims.

By Mr. SHEPPARD:

A bill (S. 4652) to provide for the administration of the United States Soldiers' Home; to the Committee on Military Affairs.

By Mr. COPELAND:

A joint resolution (S. J. Res. 267) authorizing the President to invite foreign countries to participate in the New York World's Fair 1939, Inc., in the city of New York during the year 1939; to the Committee on Foreign Relations.

INTERNAL-REVENUE TAXATION—AMENDMENT

Mr. CAPPER submitted an amendment intended to be proposed by him to the bill (H. R. 12395) to provide revenue, equalize taxation, and for other purposes, which was referred to the Committee on Finance and ordered to be printed.

RIVER AND HARBOR FLOOD CONTROL—AMENDMENTS

Mr. BILBO, Mr. BYRNES, and Mr. SHEPPARD each submitted an amendment intended to be proposed by them, respectively, to the bill (H. R. 8455) authorizing the construction of certain public works on rivers and harbors for flood control, and for other purposes, which were referred to the Committee on Commerce and ordered to be printed.

THE AMERICAN MERCHANT MARINE—AMENDMENTS

Mr. COPELAND, Mr. GUFFEY, and Mr. GIBSON jointly submitted amendments intended to be proposed by them to the bill (H. R. 8555) to develop a strong American merchant marine, to promote the commerce of the United States, to aid national defense, and for other purposes, which were ordered to lie on the table and to be printed.

AMENDMENT OF THE GRAIN FUTURES ACT—AMENDMENTS

Mr. MURPHY submitted amendments intended to be proposed by him on behalf of the Committee on Agriculture and Forestry to the bill (H. R. 6772) to amend the Grain Futures Act to prevent and remove obstructions and burdens upon interstate commerce in grains and other commodities by regulating transactions therein on commodity futures exchanges, to limit or abolish short selling, to curb manipulation, and for other purposes, which were ordered to lie on the table and to be printed.

EXPENSES OF FUNERAL COMMITTEE FOR THE LATE SENATOR TRAMMELL

Mr. FLETCHER submitted the following resolution (S. Res. 297), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, the actual and necessary expenses incurred by the committee appointed by the Vice President in arranging for and attending the funeral of Hon. Park Trammell, late a Senator from the State of Florida, upon vouchers approved by the Committee to Audit and Control the Contingent Expenses of the Senate.

INVESTIGATION OF MOVEMENT OF INDIGENT PERSONS ACROSS STATE LINES

Mr. POPE submitted the following resolution (S. Res. 298), which was referred to the Committee on Education and Labor:

Resolved, That a special committee consisting of five Senators, to be appointed by the Vice President, is hereby authorized and

directed to study, survey, and investigate the movement of indigent persons across State lines, obtaining all facts possible in relation thereto which would not only be of public interest but which would aid the Senate in enacting remedial legislation. The committee shall report to the Senate, with recommendations for legislation.

SEC. 2. For the purposes of this resolution the committee, or any duly authorized subcommittee thereof, is authorized to hold hearings, to sit and act at such times and places during the sessions, recesses, and adjourned periods of the Senate, during the Seventy-fourth and succeeding Congresses, to employ such experts and clerical, stenographic, and other assistants, to require by subpena or otherwise the attendance of such witnesses and the production of such books, papers, and documents, to administer such oaths, and to take such testimony and to make such expenditures as it deems advisable. The cost of stenographic services to report such hearings shall not be in excess of 25 cents per hundred words. The expense of the committee, which shall not exceed ———, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

TESTIMONY OF ADMINISTRATOR HOPKINS (S. DOC. NO. 226)

On motion by Mr. HAYDEN, it was

Ordered, That the summary of testimony by Works Progress Administrator Harry L. Hopkins before the subcommittee of House Committee on Appropriations in charge of deficiency appropriations, Wednesday, April 8, 1936, be printed as a document.

REORGANIZATION OF CORPORATIONS UNDER BANKRUPTCY LAW—RETURN OF BILL

Mr. ASHURST. Mr. President, I ask unanimous consent that the House be requested to return to the Senate the bill (H. R. 8940) to amend an act entitled "An act to establish a uniform system of bankruptcy throughout the United States", approved July 1, 1898, and acts amendatory thereof and supplementary thereto. The bill passed the Senate last Wednesday.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

Mr. JOHNSON. Mr. President, owing to confusion in the Chamber, I did not understand the request of the Senator from Arizona.

The VICE PRESIDENT. The Senator from Arizona asked unanimous consent that the House be requested to return a certain bill, passed by the Senate last Wednesday.

Mr. JOHNSON. What was the bill?

Mr. ASHURST. Mr. President, if I may answer the inquiry of the Senator from California, the bill related to bankruptcy matters. Inasmuch as some serious differences of opinion exist as to the meaning or the construction which might be applied to the Senate amendment, and in order that all parties may have opportunity to discuss it, I have asked that the House be requested to return the bill to the Senate.

Mr. JOHNSON. I have no objection.

Mr. ASHURST. The Senator from Indiana [Mr. VAN NUYS], who was chairman of the subcommittee, and who was in charge of the bill when it was before the Senate, will, when the bill shall have been returned, move to reconsider the vote by which it was passed. If the Senator from Indiana should be unable to be present, I shall take the liberty of making the motion to reconsider the vote by which the bill was passed.

Mr. ASHURST subsequently said: Mr. President, about an hour since, on my motion, the Senate requested the House of Representatives to return House bill 8940. I wish to give notice that tomorrow, or as soon thereafter as may be in accordance with the rule, I shall move that the Senate reconsider its action on this bill, and that it be restored to the Senate Calendar.

Let me say that a widespread disagreement as to the meaning and purposes of the amendments adopted by the Senate seems to be extant; and at the request of a number of Senators, including the Senator from Indiana [Mr. VAN NUYS], and expressing my own personal view, I think the action of the Senate on the bill should be reconsidered, and it should be restored to the calendar. I do not make the motion at this time, however, but give notice that tomorrow I shall make the motion.

Mr. McNARY. Mr. President, have the papers been messaged to the House?

Mr. ASHURST. Yes; the House has the papers, but the Senate an hour ago sent to the House a respectful request for the return of the papers. I do not believe the papers have returned at the moment; but in order to be within the rule I feel that I should give the notice at this time, because a Senator has only two actual session days within which to give such a notice. I therefore give notice that tomorrow, or as soon thereafter as may be, I shall move that the Senate reconsider its action on House bill 8940.

There seems to be some dispute as to whether or not a notice of a motion would preserve the right. I think it would; but, to be on the safe side, I move that the Senate reconsider the vote by which the bill was passed. The Senator from Alabama [Mr. BLACK] is of the opinion that the notice may not be sufficient, and I have profited by his judgment.

The PRESIDING OFFICER. The motion to reconsider will be entered.

Mr. ASHURST. I inquire of the Chair if the action just taken protects the situation?

The PRESIDING OFFICER. In the opinion of the Chair, it does.

Mr. ASHURST. The opinion of the Chair is that the mere entry of the motion protects the situation, so that tomorrow I may actually move to reconsider?

The PRESIDING OFFICER. That is the opinion of the Chair.

Mr. ASHURST. I thank the Chair.

A PLATFORM OF PROGRESS, BY DAVID LAWRENCE

Mr. BYRD. Mr. President, I have been requested to ask, and I do ask, that there be inserted in the RECORD a statement from the United States News.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

[From the United States News of May 4, 1936]

A PLATFORM OF PROGRESS—SUGGESTIONS OF THE TWO MAJOR PARTIES BASED UPON A NONPOLITICAL DESIRE OF THE PEOPLE FOR EFFICIENT GOVERNMENT AND FOR THE DEVELOPMENT OF OUR ECONOMIC SYSTEM SO AS TO REGAIN 10,000,000 JOBS

By David Lawrence

Political timidity usually writes the platforms of our two major parties at the national conventions.

To draft a platform that really represents the best interests of the people is one thing and to expect for one moment that such a pronouncement would ever be adopted at either national convention this year is perhaps a forlorn hope.

Public opinion must, however, some day assert itself.

Here is a platform of progress for both parties, submitted with the conviction that these principles represent today a nonpolitical effort to point the way to national recovery and to a desirable evolution of the American constitutional system.

CUT AWAY THE OBSTACLES TO REEMPLOYMENT

1. We believe that the 10,000,000 of our fellow citizens who are unemployed deserve the opportunity to regain their jobs in private industry and that this can be attained by removal of artificial barriers imposed by Government, such as

(a) The closing of the capital markets.
(b) The confiscation of private property by punitive policies.
(c) The waste of public funds.
(d) An unproductive and demoralizing system of taxation.
(e) Price fixing in agriculture which has curtailed our world market in cotton and other commodities and has increased unemployment in rural areas.
(f) High tariffs.

2. We believe that the 38,000,000 of our fellow citizens gainfully employed deserve to be assured of security in their present positions and to be freed from the threats of uncontrolled inflation made inevitable by a continuance of unbalanced Budgets. We believe the employed must be protected against a decrease in the purchasing power of their pay envelopes through the decline in the amount of goods the dollar may buy.

This protection can be given by establishing a sound fiscal policy and a sound system of taxation, as well as by the removal of all subsidies to inefficiency, and by the repeal of those various New Deal measures which tend toward unjust enrichment and monopoly.

3. We believe that exchange of goods and services, both nationally and internationally, is essential to recovery, and that an enlargement of the volume of transactions is possible only by the removal of restrictions and barriers now fostered by our own Government and by other governments devoted to the suicidal policies of economic nationalism, with its quotas and high tariffs.

PROPER USES OF RIGHT REGULATION

4. We believe in a government that is honestly administered for the people and does not grant special privileges in the form of financial subsidies and does not distribute graft to its political

henchmen in the form of public offices paid for with the people's money.

5. We believe that the regulatory powers of our National Government are rightly used when seeking to remove from the field of competition those monopolistic or other trade practices which are acknowledged by modern society to be dishonest, fraudulent, or unfair.

6. We believe that regulatory powers of government are wrongly used when seeking to correct those natural inequalities in economic life which arise from the genius or varying talents of management or the prudent application of savings to sound investments.

7. We believe in a useful balance between the function of government as an administrator of even-handed justice and as a moral leader properly urging a constant improvement in our social standards through constitutional processes or by voluntary acts. We favor the moral suasion of an enlightened public opinion rather than the present-day coercion reminiscent of medievalism.

8. We recognize the value of collective bargaining so conducted as to promote the general welfare of workers. Due recognition should be given to the rights and interests of all workers to bargain collectively or individually without coercion from any source.

9. We believe in the merit system in government and in private business. Existing penal codes should be revised to forbid any recommendations or endorsements by any Members of the Congress for any appointive positions within the power of the executive branch of the Government, either with respect to offices requiring or not requiring confirmation by the Senate.

10. We believe in a single term of 6 years for the President and Vice President of the United States and neither shall be eligible for election at any time thereafter.

NEED STRICT BUDGETING OF EXPENDITURES

11. We believe in the establishment of a budget system in which each party in Congress at the beginning of every session shall assume responsibility for an estimate of expenditures and receipts. We oppose any disbursements outside of the final budget adopted unless the increase or decrease is approved by a two-thirds vote of both Houses.

12. We favor giving the President the power to veto any single item in an appropriation bill without invalidating the entire measure, and when such item is vetoed it shall not be restored except with the approval of two-thirds of the membership of both Houses of Congress.

13. We favor the development of a system of taxation which shall coordinate the tax agencies of Federal, State, and city governments to the end that each shall occupy a particular field of taxation without overlapping.

14. We favor the establishment of a nonpartisan commission of seven members, appointed for life, who shall make a continuous check on the necessity of continuing various governmental agencies and an annual report on the efficiency or effectiveness of each governmental establishment in terms of moneys spent.

A TRUE BLEND OF POWERS OF GOVERNMENT

15. We favor the exercise of existing Federal and State power within the Constitution to the end that those national problems requiring it shall have unified treatment by Government in cooperation with business and agriculture. We oppose any restriction of production either in industry or agriculture, preferring instead the enlargement of America's domestic and foreign markets.

16. We favor the development by Government of natural resources and the sources of power whenever private industry is unable to furnish adequate service or whenever an undeveloped area necessitates Government aid because private capital is unavailable. When such facilities are fully developed, we favor the leasing of such projects to private agencies through competitive bids and under contracts guaranteeing rates in the public interest, such contracts to be approved by State commissions in the areas affected.

17. We favor such amendments of the present Securities and Exchange Act as are necessary to permit reopening the capital markets. We favor the exercise of the Federal police power in the marketing of securities only to the extent of preventing fraud and misrepresentation, but we condemn any effort to use the power of the Securities and Exchange Commission to control the management of American enterprises under the pretext of regulating security sales.

CHANGES THAT WOULD BRING REAL EFFICIENCY

18. We favor the removal of the Bureau of Internal Revenue from the Treasury Department and the establishment of the Bureau as an independent agency with an auditor general appointed for a 15-year term with the approval of two-thirds of both Houses of Congress.

19. We favor the conversion of the Department of Justice into an independent agency with a Solicitor General similarly appointed so that law enforcement may be removed from the domain of politics or political pressure, and so that advisory opinions on the constitutionality of proposed legislation may be rendered to Congress without regard to political influence or the effect of such opinions on the political aims or maneuvers of an administration in power or of the opposition party.

20. We favor an aggressive policy of international cooperation looking to the removal of such trade barriers and impediments to currency stabilization as threaten the future safety of civilization. We condemn the present tendency toward "self-containment" and economic isolation which, unless checked, will drive the world into another era of war.

21. We believe that social improvement with real opportunities for old-age pensions, unemployment insurance, shorter hours of work, and higher wages can best be attained by electing a Congress consisting of independent-minded representatives who will permit the American economic system to function in order that the charges of such a social program, whether enacted by the States or by the States in cooperation with the Federal Government, may be paid out of the fruits of an increasing prosperity and a sound economic growth.

22. We believe in the gradual retirement of Government from all activities in competition with private business and the withdrawal of the Government from lending operations just as soon as adequate machinery can be set up by private agencies to take over emergency functions.

DEALING WITH PROBLEMS OF THE JOBLESS

23. We believe in human rights as superior to all others. Among these paramount rights are human rights in property, human rights in savings, and human rights in the preservation of decent standards of living. A high purchasing power and a substantial increase in employment are essential to these standards.

24. We believe that reemployment will best be fostered, first, by an occupational survey; and, second, by a reclassification of all the unemployed, together with the establishment of committees in industry and business so that as rapidly as jobs are created by the removal of Government interferences employment may be given to those who are fitted for work.

25. We believe that relief for the unemployed should be administered by nonpartisan committees in local communities, and that funds shall be granted by the Federal Government only in the form of loans repayable by the States on a 30-year basis.

26. We believe in the establishment of an administrative service to include all executive positions below the rank of a Cabinet portfolio, and the establishment of a personnel commission of seven members appointed for life to review every 5 years the tenure of such administrative officials based on the effectiveness of their service.

SAFEGUARDS TO PRESERVE CONSTITUTION

27. We favor the freedom of the radio from Government intimidation or influence. This can be achieved by issuing 3-year licenses for wave lengths, with terms of renewal based only on the quality of mechanical reception, standards of which should be established by a commission of competent engineers.

28. We favor legislation which will make it a penal offense for any Member of Congress to approach any person in the executive establishment with respect to the disbursement of any public moneys or to appear before any executive department or commission on behalf of any constituents or anybody else to obtain contracts or agreements for said constituents or to influence the award of any projects involving the expenditure of public funds.

29. We believe in maintaining the integrity of our system of constitutional law. To this end we favor a pledge by Presidential candidates that any appointments to vacancies in the Supreme Court of the United States shall be filled from panels suggested by members of the American Bar Association, and that in the event any names not suggested by the American Bar Association are considered by the Executive he shall pledge himself to require endorsement by the bar association of the State in which the proposed member of the Court shall have spent the major part of his law practice. Similar procedure should be followed in the appointment of all other Federal judges.

30. We believe, as did the founders of our Republic, that our representatives in government should be the agents of the people and not their masters, and that the Constitution is a compact between the people and their agents, to be amended or modified only by the will of the people and only in the manner provided by the Constitution itself.

SOLUTION OF PROBLEMS BY COLLECTIVE EFFORT

Mr. BENSON. Mr. President, I ask unanimous consent to have printed in the RECORD an article entitled "Meet Problems by Collective Effort", written by E. J. Prochaska, secretary of the Minnesota State Board of Pharmacy, and published in the North Western Druggist for May 1936.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the North Western Druggist for May 1936]

MEET PROBLEMS BY COLLECTIVE EFFORT

By E. J. Prochaska, Minnesota board secretary

Independent merchants in all trade groups—the retail druggists, hardware retailers, grocers, general merchants, implements dealers, tobacco dealers, and other retail distributors—are today more conscious of their problems, the necessity for collective effort, than at any time in the history of business. Educational campaigns among the consumers, better support of manufacturers and wholesalers, collective buying, advertising, and merchandising efforts will be of tremendous value. Another very important factor too long neglected by independent merchants as far as real effective cooperative efforts is that of legislation.

The necessity of this legislative protection is well demonstrated by the reading of our trade journals. We read in practically every issue of legislation being introduced and passed by legislative bodies

signed or vetoed by State executives. And in our National Congress the Patman investigation, bills introduced to eliminate unjust discriminatory price practices, also for price stabilization.

Minnesota druggists and hardware dealers at their annual conventions this year well demonstrated that they are giving thought to these problems by some of the resolutions passed. Among those passed at the retail hardware dealers' convention are the following:

1. Unalterable opposition to sales tax, on the grounds that it would relieve large companies and trusts of a large amount of taxes, would not be a replacement tax, would work a hardship on small-salaried people and farmers, would increase expenses of hardware merchants, and would make dealers tax collectors.

2. Definite opposition to constitutional amendment to be submitted to voters in 1936, which would abolish State real-estate taxes. "This would strike a serious blow at present tax system and would cause substitution of unfair and discriminatory tax system."

3. Advocating increase in chain-store taxes.

4. Urging passage by legislature of fair-trade bill, "which has for its main purpose the establishment of a fair-price merchandise distribution system and the prevention of selling below cost."

5. Favoring principles of Patman bill and other legislation in Congress designed to strengthen Clayton Act, to prevent discriminations against independent merchants.

The Minnesota State Pharmaceutical Association, in its meeting February 1936, passed resolutions as follows: (1) Opposition to the sales tax; (2) support of a chain-store tax; (3) support of the Patman-Robinson antidiscrimination bill; and (4) a fair-trade act. No doubt other trade groups have the same problems and will support the same type of legislative program.

Today is the time for action! This is the year we are going to elect members of the lower house in the Minnesota Legislature. Every merchant should contact the candidates for these legislative positions as to their position on the resolutions passed by these retail groups. Every independent merchant should study the record of those who have served in the last session of the Minnesota Legislature. Legislators must be judged in terms of their vote, support, and leadership in a program to our interests or support of a program to our detriment.

The regular session of the Minnesota Legislature of 1935, unfortunately, was not very friendly to our needs and demands. A sales tax was passed which, no doubt, would have been detrimental to the interests of the masses of consumers as well as the independent merchants; and no doubt the best break we had during this session was the veto of this bill. Let us support for the house men who will work and vote against the passage of a sales tax, a program of taxation that is unfair, unscientific, and of benefit to only a small percentage of our population. * * *

An improved chain-store tax bill was introduced in the 1935 session. It had the support of trade organizations representing thousands of retailers. It would have aided the State treasury, but unfortunately, this worth-while legislation received very little consideration. Contact your candidates on their position for an improved chain-store tax, and again support the men who will support our program.

The next legislature should also memorialize Congress to pass legislation to outlaw discriminatory price practices, also to aid in price stabilization.

PHILIPPINE CURRENCY RESERVES ON DEPOSIT IN THE UNITED STATES

The VICE PRESIDENT. Under the unanimous-consent agreement entered into on Friday last the Chair lays before the Senate Senate bill 3486.

The Senate proceeded to consider the bill (S. 3486) to repeal the act entitled "An act relating to Philippine currency reserves on deposit in the United States, which was read, as follows:

Be it enacted, etc., That the act entitled "An act relating to Philippine currency reserves on deposit in the United States", approved June 19, 1934, is hereby repealed.

Mr. ADAMS. Mr. President, this bill, so far as I know, is the only bill that is pending in Congress which really proposes to produce or make money for the Treasury of the United States. The situation which is responsible for the bill coming before the Senate was called to my attention as a member of the Appropriations Committee. During the preceding session there came before the subcommittee of the Appropriations Committee considering the deficiency bill, of which subcommittee I happened to be chairman, a request for an appropriation of some $24,000,000 for the Philippine Islands. This appropriation was sought to be sustained by an act which was passed during the preceding session. The request for this appropriation had been made to the House Appropriations Committee and rejected. It was made to the Senate Committee on Appropriations and, after careful study, was there rejected.

The bill which is before the Senate is to repeal the act authorizing taking from the Treasury of the United States $24,000,000 and turning it over to the Philippine government.

Mr. President, by an act approved June 19, 1934, the Congress provided:

That the Secretary of the Treasury is authorized and directed, when the funds therefor are made available, to establish on the books of the Treasury a credit in favor of the treasury of the Philippine Islands for $23,862,750.78, being an amount equal to the increase in value (resulting from the reduction of the weight of the gold dollar) of the gold equivalent at the opening of business on January 31, 1934, of the balances maintained at that time in banks in the continental United States by the government of the Philippine Islands for its gold standard fund and its treasury certificate fund, less the interest received by it on such balances.

The act provided further as follows:

There is hereby authorized to be appropriated, out of the receipts covered into the Treasury under section 7 of the Gold Reserve Act of 1934, by virtue of the reduction of the weight of the gold dollar by the proclamation of the President on January 31, 1934, the amount necessary to establish the credit provided for in section 1 of this act.

After quite extensive investigation, it is my judgment that the bill was passed as a result of mistakes of facts and mistakes of law. I think the House committee and the Senate committee, which in the Seventy-third Congress reported favorably upon the bill which became the act of June 19, 1934, did not fully understand the Philippine statutes or the congressional statutes or the facts upon which the legislation was based.

The effect of the statute would be to take from the pockets of the American taxpayer some $24,000,000 and give it to the Philippine Islands. The theory of the gift was that the Philippine Islands had on deposit in the United States certain funds; that those funds constituted a gold reserve, were to be treated as if they were gold, and, so treated, there should be a profit to the Philippine Islands in the same proportional amount that the United States Government took upon its books when it devalued the gold dollar.

The Philippine Islands had on deposit in some 41 banks in the United States $56,000,000, in round numbers. Those who supported the original bill said if we translated the $56,000,000 of bank deposits into gold at the rate of $35 an ounce, those bank deposits would be worth $95,000,000, and that the Philippine Islands were therefore entitled to a profit of $39,000,000, using round numbers. In other words, the profits which the act sought to give to the Philippine government were 69.3 percent upon its bank deposits. The Government of the United States by that act was giving to the Philippine government a profit of 69 percent upon its bank deposits.

There were 50,000,000 American individuals and business organizations which had on deposit in the banks of this country $40,000,000,000. Those deposits did not differ in character from the deposit of the Philippine Islands, but Congress, misunderstanding and believing that the deposit of the Philippine Islands was to be treated as if it were gold, and that being treated as if it were gold, should be given this augmentation in value, said, "We will single out the Philippine Islands from the 50,000,000 depositors and pay them a profit of 69 percent, while we will take away from our American depositors the depreciation of some 40 percent upon their deposits, because the purpose of the gold devaluation was to reduce the purchasing value of the dollar." That was the purpose of the act.

Mr. NORRIS. Mr. President——

The VICE PRESIDENT. Does the Senator from Colorado yield to the Senator from Nebraska?

Mr. ADAMS. I am glad to yield.

Mr. NORRIS. For information I wish the Senator would tell the Senate whether the act which the pending bill seeks to repeal contained anything except the one matter to which the Senator has referred?

Mr. ADAMS. That was all that was in the original act.

Mr. NORRIS. It was not a part of some other measure?

Mr. ADAMS. It was a separate measure which was never discussed and never explained by a single word upon the floor of the Senate.

Mr. NORRIS. I am wondering, while listening to the Senator's discussion, why it was that the Committee on Banking and Currency reported that kind of bill.

Mr. ADAMS. I can explain that to the Senator. The bill was referred to the Committee on Banking and Currency. Then, on the floor of the Senate, the Senator from Maryland [Mr. TYDINGS], chairman of the Committee on Territories and Insular Affairs, without a word of explanation, moved that the bill be recalled from the Banking and Currency Committee and referred to his committee; and it was so referred, without any discussion. The Committee on Banking and Currency never passed upon the bill, although it related to legislation which had been considered by the Banking and Currency Committee, which has exclusive jurisdiction over measures dealing with banking and currency matters.

Mr. ROBINSON. Mr. President, will the Senator from Colorado yield?

Mr. ADAMS. Gladly.

Mr. ROBINSON. The Senator from Maryland [Mr. TYDINGS] has just reentered the Chamber. This bill was made the unfinished business last Friday by unanimous consent, and the understanding was that a motion would be made to refer the bill to the Committee on Territories and Insular Affairs of which the Senator from Maryland is chairman. The act which it is sought to repeal by the pending measure was considered by the Committee on Territories and Insular Affairs.

Mr. FLETCHER. Mr. President, will the Senator from Colorado yield?

Mr. ADAMS. I am glad to yield to the Senator from Florida.

Mr. FLETCHER. The Committee on Banking and Currency has considered the bill which is now before the Senate. That committee acted favorably on the bill, reported it to the Senate, and it is here for consideration. However, the Banking and Currency Committee never had anything to do with the original bill. That was referred to the Committee on Territories and Insular Affairs, I believe, by mistake, because clearly the Banking and Currency Committee has jurisdiction over the subject matter, which related not only to the Philippine Islands, but to the monetary policy of the United States. Therefore, in my judgment, the original bill should have been referred to the Committee on Banking and Currency and should have been considered by that committee. However, the bill was referred to the Committee on Territories and Insular Affairs because it dealt with the Philippine Islands.

The Appropriation Committees of the House and the Senate have refused to appropriate the money provided for in the act. The Senator from Colorado has introduced the pending bill to repeal that act.

A motion is to be made, I believe, by the Senator from Maryland to refer the pending bill to his committee, the Committee on Territories and Insular Affairs. I think that should not be done, but we shall no doubt hear from him on that point. That will be the question to be submitted to the Senate.

Mr. TYDINGS. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. CLARK in the chair). Does the Senator from Colorado yield to the Senator from Maryland?

Mr. ADAMS. I am very glad to yield to the Senator. I understand that he desires recognition in order to make a motion to refer the bill.

Mr. TYDINGS. Mr. President, I move that the bill now before the Senate be referred to the Committee on Territories and Insular Affairs.

I do not wish to take the time of the Senator from Colorado, but I should like to take just a couple of minutes to say why I make the motion.

This bill involves a good many millions of dollars. It would be complicated and difficult to discuss all the history of Filipino fiscal affairs so that everyone might be conversant with them. I may say, however, that I have consulted the Parliamentarian, and I do not know of another bill touching a subject matter like this, dealing with a possession of the United States, which has been considered by a committee other than the Committee on Territories and Insular Affairs. All the original legislation touching the bond issues which brought this matter into being was passed upon by that committee. The currency bill itself was passed upon by that committee. It is my judgment that if we pass this bill without the Committee on Territories and Insular Affairs going thoroughly into it, many features of the matter which deserve consideration will not be considered.

This motion is not made with any disposition on my part to delay what the Senator from Colorado has in mind, a reconsideration of the former policy of Congress. It is based upon the belief and the conviction that we are now in no position to act upon the bill; that it should be referred to the Committee on Territories and Insular Affairs, where it should have gone in the first place.

There is not a phase of Filipino legislation, or that touching any other legislation having to do with the Territories, which we in the committee could deal with were each separate matter to be given to some other committee of Congress. If that were done, there would not be any use in having the committee.

The original bill, passed at the last session of Congress unanimously, I believe, was considered by the Committee on Territories and Insular Affairs. Therefore, I ask, what harm can be done by having the bill of the Senator from Colorado referred to that committee? The actual transfer of the money will not take place for some time. There is no shortage of time for discussion or consideration by the Senate, because many years will intervene before the bill can reach the climax of action. Therefore, without attempting to argue with the Senator from Colorado about the merits or demerits of the bill—he thinks the contention he makes is a sound one, but I do not agree with him—I simply move that the appropriate committee may consider the bill before the Senate acts on a matter involving many million dollars, because if it is decided wrongly, if the policy is changed, we shall have other legislation on the subject here in succeeding Congresses.

I therefore ask the Senate and the Senator from Colorado if they will not accede to the reasonable motion of the chairman of the committee, and let this bill go to the Committee on Territories and Insular Affairs, which first considered the subject matter, so that the Senate may have the whole picture before it and may legislate wisely.

Mr. ADAMS. Mr. President, addressing myself directly to the motion, it involves the statement that the bill was improperly before the Banking and Currency Committee. That is the implication of the motion—the declaration that this bill should not have been considered by the Banking and Currency Committee.

Mr. President, this bill proposes no legislative change, no new legislation in reference to the Philippine government, the administration of the islands, or their currency or financial policies. It is not a bill relating to the government of the Philippine Islands. The act we are seeking to have repealed was based upon the Gold Devaluation Act, a measure which was passed by the Senate after consideration by the Banking and Currency Committee. Every aspect of legislation involved in this measure was considered by the Banking and Currency Committee. It is an interpretation of the Gold Devaluation Act. It is not an interpretation of any act relating to the government of the Philippine Islands. The only thing which brings the Philippine Islands into the matter is that they happen to be a claimant under the act.

If the contention of the Senator from Maryland is sound, then if a farmer who had a deposit in a bank should come in with a bill and say that he was entitled to a profit on his deposit, I suppose, under the theory that is now announced, the bill ought to go to the Agricultural Committee. If a college whose endowment funds were involved in the devaluation should have a bill introduced, that bill, on the same theory, should go to the Committee on Education and Labor. If a soldier should come in with a claim, according to the argument which is made, the bill should go to the Military Affairs Committee. If a sailor should come in and have a bill introduced asking for profit because of his deposit, it ought to go to the Naval Affairs Committee; and so on as to miners and others. Every committee would have

jurisdiction over these respective matters according to the status or occupation of the claimant.

Only one committee in the Senate has jurisdiction over currency and banking legislation, and that is what is involved in this action. The Philippine government merely happens to be a claimant which, in my judgment, by reason of omission to have presented to Congress the statutes and the facts, has been fortunate in having enacted a bill authorizing an appropriation to it. The act which is sought to be repealed makes a charge of $24,000,000 upon the Treasury of the United States. I do not believe there is any justification for saying that the Banking and Currency Committee had no jurisdiction of the subject matter. I think the original bill was improperly referred to the Insular Affairs Committee; and in the House, when the original bill was up for consideration, the chairman of the House Committee on Insular Affairs stated in the hearing that the bill should have gone to the House Committee on Banking and Currency.

Mr. VANDENBERG. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Michigan?

Mr. ADAMS. I yield to the Senator from Michigan.

Mr. VANDENBERG. There is just one fundamental question which interests me upon which I should like to be enlightened. As I understand, the Philippine Islands are seeking to collect their deposits from us in the old value of the gold dollar. It is my understanding that the Philippine government in turn owes American citizens a large amount, perhaps sixty or seventy million dollars of debt.

Mr. ADAMS. Seventy-five million dollars.

Mr. VANDENBERG. Do they propose to pay that money back to our citizens in the old dollars or in the new dollars?

Mr. ADAMS. They propose to pay it back in the new dollars, the lawful currency.

Mr. VANDENBERG. It would seem, just abstractly, as a matter of theoretical equity, that it is a poor rule that does not work both ways.

Mr. ADAMS. I will say to the Senator from Michigan that what it means is that the Philippine government would make 40 percent, or $30,000,000, by paying their $75,000,000 in bonds with a depreciated dollar, and would get $24,000,000 profit upon their deposits. That has seemed to me utterly without warrant and without justification.

Let me give the details which will show that the Philippine government is not entitled to a preference over other depositors. As I have said, there were 50,000,000 individual deposits in the banks amounting to $40,000,000,000 at the time of the gold devaluation. We sought at that time to cut down the value of our dollars roughly 40 percent. That operated to reduce the purchasing power of every dollar in the banks of the United States. That was our purpose, with a view of raising prices.

That was one method Congress adopted to raise prices, by reducing the purchasing power of the dollar; and the dollars in the banks, of course, were directly affected. Here is a workman who has struggled and saved all his life for a little competency, perhaps barely enough to tide him through his old age. We are not restoring to him any depreciation, let alone giving him a profit on his account. Here are the colleges, whose endowment funds for education were devalued. We are not giving them any special consideration. Here are the pension funds that have gone into the banks. Here are the insurance moneys that have gone to the widow and the orphan. They are cut down in their purchasing power; but we single out one depositor out of the fifty million, and to that depositor we propose to pay a profit of 69 percent upon his deposits.

Mr. FLETCHER. Mr. President, will the Senator yield for a moment?

Mr. ADAMS. Yes, sir.

Mr. FLETCHER. It is conceded by the Philippine government and by everyone else that they have not lost a dollar of the money deposited in the banks here. There is no claim that they have lost it. They have received back everything they deposited. They had no gold reserve to begin with.

Mr. ADAMS. The Senator from Florida points out one of the very vital points connected with this matter.

I was illustrating that among the deposits in the banks were those which were to be used in the purchase of the necessities of life, but those of the Philippine government were in the banks for different purposes. The Philippine deposits made up two separate funds, and it is the failure to grasp the character and source and purpose of those funds that has led to the error.

One was the Treasury certificate fund, so-called. What was that based upon? Let me call attention to the statute which provided for it. The Philippine currency is a silver currency. The money which circulates in the Philippine Islands is a silver currency. It is based upon a gold unit of value. In 1903 Congress provided that the gold peso should be the unit of value and should contain a definite number of grains of gold, equal to one-half of the then weight of the American gold dollar. But not one gold peso or other gold coin was ever coined by the government of the Philippine Islands. There is not even a sample of a Philippine gold peso.

The act of Congress then provided that the silver peso should be the legal tender in the Philippine Islands. Congress drew the distinction between the unit of value, the gold peso, a mere weight of gold, and the silver peso, which should be the circulating medium of the islands. They fixed the weight of the silver peso at something greater than the American silver dollar. The silver peso was equivalent to 50 cents, but they fixed its weight in silver at 4 grains more than the weight of the American silver dollar. In other words, there was more than twice as much silver in the peso as in our proportionate American coinage. All the coinage of the Philippine Islands was silver.

Then, by reason of the fact that in business dealings paper currency might be desirable, rather than transporting bulky silver, Congress passed an act in which they provided for the issuance of certificates. It is an act almost identical in its purpose and plan with the old Gold Certificate Act of this country, under which, if one took a definite amount of gold to the Treasury, he received a gold certificate for the full amount, which, if desired, he could again exchange for gold.

The Philippine Islands, having only a silver coinage, Congress provided, in section 1153 of the United States Code, title 48:

> The treasurer of the Philippines is authorized, in his discretion, to receive at the treasury of the government of the said islands, or any of its branches, deposits of the standard silver coins of 1 peso authorized by this chapter to be coined, in sums not less than 20 pesos, Philippine currency, and to issue certificates therefor in denominations of not less than 2 pesos nor more than 500 pesos, and the coin so deposited shall be retained in the treasury and held for the payment of such certificates on demand, and used for no other purpose.

Then followed provision as to such certificates being received for customs and taxes, and so forth.

So they created a hundred-percent coin-redemption fund. If one wished to exchange pesos for certificates, he could go to the Philippine treasury and get them. He could also go back with his certificate and get pesos. The requirement was that this fund should be kept 100 percent in silver coin. These are the certificates which were to be redeemed and paid by the Treasury deposit fund.

After a time the large size of the Philippine peso and using silver pieces brought its commercial value above its coin value, and the silver peso began to go out of circulation. Then Congress authorized the Philippine government to devalue its peso, and the Philippine government devalued its peso 34 percent. There is no controversy over that.

By reason of the shortage of silver, which was occasioned by the increase in silver prices, Congress was asked to add an amendment to the law by which gold to a limited extent could replace the silver temporarily, but providing always not to exceed 60 percent. That was provided by an amend-

ment adopted in 1905 and subsequently another adopted in 1906. The section as amended is as follows:

TITLE 48. TERRITORIES AND INSULAR POSSESSIONS (P. 1171, CH. 5)

SEC. 1153. Silver certificates; redemption: The treasurer of the Philippine Islands is authorized, in his discretion, to receive at the treasury of the government of the said islands or any of its branches deposits of the standard silver coins of 1 peso authorized by this chapter to be coined, in sums of not less than 20 pesos, Philippine currency, and to issue certificates therefor in denominations of not less than 2 pesos nor more than 500 pesos, and coin so deposited shall be retained in the treasury and held for the payment of such certificates on demand, and used for no other purpose. Such certificates shall be receivable for customs, taxes, and for all public dues in the Philippine Islands, and when so received may be reissued, and when held by any banking association in said islands may be counted as a part of its lawful reserve: *Provided*, That the treasurer of the Philippine Islands, with the approval of the Governor General, may substitute for any part of such silver pesos deposited, gold coin of the United States legally equivalent in value, and redeem the certificates issued in either silver pesos or such gold coin of equivalent value at the option of the treasurer: *Provided further*, That the amount of gold coin held in such reserve shall not at any time exceed 60 percent of the total amount of certificates outstanding (Mar. 2, 1903, c. 980, sec. 8, 32 Stat. 954; Feb. 6, 1905, c. 453, sec. 10, 33 Stat. 697; June 23, 1906, c. 3521, sec. 2, 34 Stat. 453).

See sections 315b, 446, 462, and 463 of title 31.

The original provision exacted the retention in the Philippine treasury of coin to the extent of 100 percent. Subsequently the Philippine Islands asked permission of our Government for a larger measure of autonomy, and in 1916 that was granted. Following that, the Philippine Legislature authorized the opening of deposit accounts in the United States, in variance from the policy which Congress had laid down. The result was that they opened in this country a Treasury certificate fund for the specific purpose of redeeming these outstanding silver certificates.

Then, in order that they might cure any possible lack of parity between the silver coin and the theoretical gold peso, they established what they denominated a gold-standard fund. The money which went into the gold-standard fund was raised by the sale of bonds to citizens of the United States. These bonds were payable in American dollars, so that one of these funds, the so-called gold-standard fund, the name of which has led to confusion, came from the purchase by American citizens of Philippine bonds, and represented a mere bank deposit. The other fund represented the silver deposits in the Philippines, transferred to this country. So that the Philippine Islands had absolutely no occasion for a gold reserve, they had no currency which required redemption in gold, they never had a gold coin, and yet the theory upon which the bill passed was that there was a gold reserve.

Mr. ROBINSON. Mr. President, will the Senator yield for a question?

Mr. ADAMS. Certainly.

Mr. ROBINSON. When the subject matter of the pending bill was before the Senate in 1934, it was somewhat carefully considered by the Committee on Territories and Insular Affairs, and a report was made to the Senate on the bill by the Senator from Arizona [Mr. HAYDEN]. The report contains the conclusions of the President of the United States, the Secretary of War, the Secretary of the Treasury, the Chief of the Insular Bureau, and others, all of whom, substantially, took the position that the major portion of the currency reserves of the Philippine monetary system was held and regarded as the equivalent of a gold reserve. That was the theory of the legislation which passed Congress and which is now sought to be repealed by the bill of the Senator from Colorado.

I find in the letter to the Senator from Florida [Mr. FLETCHER], the chairman of the Committee on Banking and Currency, the following statement by the President:

With the approval of the United States, the government of the Philippine Islands has for many years maintained in banks in this country the major portion of the currency reserves of its monetary system and has always considered these deposits the equivalent of a gold reserve.

The effect of my proclamation of January 31, 1934, was not only to reduce, in terms of gold, the value of these currency reserves, but indirectly to devalue, in terms of gold, the entire currency circulation of the Philippine Islands. The United States enjoyed an increase in the value of its currency reserves corresponding to the decrease in the value of the dollar.

As the Philippine currency is interlocked with the United States gold dollar under laws enacted by the United States Congress, it would be equitable to reestablish the Philippine currency reserves on deposit in the United States at their former gold value as of January 31, 1934.

I am advised that S. 3530, now under consideration before your committee, is designed to accomplish this purpose.

I recommend its enactment.

Very sincerely yours,

FRANKLIN D. ROOSEVELT.

Then I find also a statement from the Director of the Bureau of the Budget, a statement from the Secretary of the Treasury, and a statement from the Secretary of War, as well as a communication from the Chief of the Bureau of Insular Affairs, all proceeding on the theory that the Philippine currency is interlocked with the United States gold dollar under laws enacted by the Congress of the United States.

It appears that as far back as March 2, 1903, the Congress passed an act providing:

That the unit of value in the Philippine Islands shall be the gold peso consisting of 12$\frac{9}{10}$ grains of gold, nine-tenths fine, said gold peso to become the unit of value when the government of the Philippine Islands shall have coined and ready for, or in, circulation not less than 5,000,000 of the silver pesos hereinafter provided for in this act, and the gold coins of the United States at the rate of $1 for P2 hereinafter authorized to be coined shall be legal tender for all debts, public and private, in the Philippine Islands.

The Secretary of War in his communication, among other things, said:

At the suggestion of the War Department the major portion of the currency reserves of the Philippine monetary system has been maintained in the form of United States currency deposited in banks in the continental United States. The Philippine government has always considered these deposits as the equivalent of a gold reserve.

The proclamation of the President issued on January 31, 1934, reduced the gold content of the dollar. The effect of this proclamation was not only to reduce in terms of gold, the value of the Philippine currency reserve funds, but indirectly to devalue, in terms of gold, the entire currency circulation of the Philippine Islands. The United States, on the other hand, enjoyed an increase in the value of the currency reserves corresponding to the decrease in the value of the dollar. As the Philippine currency is interlocked with the United States gold dollar under laws enacted by the United States Congress, it is equitable that any change in the dollar which produces a profit on the currency reserves of the general government should produce a corresponding profit on the currency reserves of this dependency.

There is other language supporting that statement.

Mr. President, there is a similar statement in the message communicated to the Senate through the Secretary of War by the Chief of the Bureau of Insular Affairs.

I make no complaint that the Committee on Banking and Currency considered the bill. It is a subject of interest to the fiscal affairs of the Government. But I point out the further consideration that it also has a very direct and powerful bearing on the relations between the United States and the Philippine Islands and the Philippine people.

Mr. ADAMS. Mr. President, I should like to discuss the letters referred to by the Senator from Arkansas, while the matter dealt with in the letters is fresh in my mind.

Mr. ROBINSON. Mr. President, will the Senator from Colorado permit me to finish my brief statement?

Mr. ADAMS. I did not mean to interrupt the Senator. I simply meant to say that there were certain things in my mind respecting the first part of the Senator's remarks.

Mr. ROBINSON. The Philippine people and their official spokesmen feel that it would be an act of bad faith on the part of the Government of the United States to repeal this statute, and thus, while taking the advantage for ourselves of the increase in the amount of the currency reserves, deny a similar benefit to a dependent government.

The Senator from Colorado argues this matter very forcefully, as he does everything else concerning which he speaks, but, in view of the fact that underlying this proposal is one which involves the question of good will, and which in the

minds of many who represent the dependent Philippine people is of very great importance, it seems to me that the bill should receive further consideration by the Committee on Territories and Insular Affairs. I apprehend that no consideration was given by the Committee on Banking and Currency to that phase of the question.

The brilliant man who is the president of the new Philippine Commonwealth, Mr. Quezon, has expressed, through proper channels, his views concerning this proposed legislation. I have not the slightest doubt that there should be very careful consideration of the measure, whatever may be the conclusion of the Senate and of the body at the other end of the Capitol as to its merits.

As suggested by the Senator from Maryland [Mr. TYDINGS] it would seem to be a desirable thing, to which the Senator from Colorado might find himself able to contribute, to permit a further consideration of the matter by the committee which does have jurisdiction of the other phase of the subject which was not brought forward before the Committee on Banking and Currency.

I thank the Senator for yielding, and recall that he wished to make some comment on the documentary evidence to which I have called attention, and which is to be found in the report submitted by the Senator from Arizona [Mr. HAYDEN] on May 28, 1934.

Mr. ADAMS. Mr. President, referring to the document submitted by the Senator from Arizona, I wish to say that no Member of the Senate has a more affectionate regard for the Senator from Arizona and more admiration for his ability and his industry than have I. However, I should say that there are perhaps some things to which the Senator from Arizona has not devoted the same diligent attention which he has devoted to some others. The report which the Senator from Arizona filed is identical with the report filed some 10 days before in the House. It is in substance a copy of the House report, merely changing the letters; that is, the letters which the Senator from Arkansas read were sent to the Senator from Florida [Mr. FLETCHER], chairman of the Committee on Banking and Currency, and sent to Mr. DOUGHTON, in the House, chairman of the Committee on Ways and Means. The only difference between the House report and the Senate report is the substitution of one set of identical letters for the other.

Mr. HAYDEN. Mr. President, will the Senator yield?

Mr. ADAMS. I yield.

Mr. HAYDEN. The report was made more than 2 years ago, and I have no recollection as to how that happened. I do recollect very distinctly that the Committee on Territories and Insular Affairs of the Senate assumed, as it properly should from the representations made by the President and the various departments interested in the matter, that the Philippine peso and the American dollar were so tied together that anything which happened to the dollar would automatically be reflected on the peso. We assumed further that the Philippine reserve in the United States was exactly the same as our own Treasury reserves, and when devaluing the dollar and the consequent devaluation of the peso, if that credit was not extended to the peso, then the American Government gained and the Philippine government lost.

Mr. ADAMS. I will say to the Senator from Arizona that the House committee held hearings. I have copies of the hearings here. I have never been able to obtain any copies of hearings before the Senate committee, if they were held.

Mr. HAYDEN. I do not believe a reporter was present when the hearings were held.

Mr. ADAMS. Let me call the Senator's attention to the statement of the Chairman of the House Committee on Territories. Referring to the bill, he said:

> No doubt the Committee on Banking and Currency has proper control over this subject.

He himself declared that. Then he said again:

> I really think this bill should be before the experts on Banking and Currency rather than before this committee.

It was the viewpoint in the House that the bill really had been sent to the wrong committee in the House.

Mr. HAYDEN. I am sure the Senate Committee on Territories and Insular Affairs took no such view in this instance, because we felt that probably the committee had jurisdiction, inasmuch as the subject vitally affects the relationship between our Government and the Philippine government.

Mr. ADAMS. As between the American citizen and the Philippine citizen, does the Senator think that the Philippine citizen should be given the preference?

Mr. HAYDEN. Not at all. But he should be given an even break.

Mr. ADAMS. I will say to the Senator that the $24,000,000 which he seeks to give will come out of the pockets of the American taxpayers and will go to the Philippine government. Let me go beyond that. The Philippine officials themselves never asked for the passage of the original bill. In the letter with which they have circularized Congress they make the point clear that they did not ask for its passage, but that it originated with officers of the United States Government. That is the fact, and it leads into the explanation of the documents which the Senator from Arkansas has just read, and with which I am familiar.

I had always supposed that the Bureau of Insular Affairs, made up of officers commissioned and drawing pay from the United States Government were interested in the welfare of the United States. I did not understand that they regarded it as their obligation and their duty to represent the Philippine government in opposition to the people under whose employment and pay they were.

The Bureau of Insular Affairs proceeded to conduct a series of negotiations. Cablegrams were passed back and forth. They drew the bill, they advocated its passage, they drew the letters which the Secretary of War has signed. They proceeded throughout the whole course to be the advocates and the representatives not of their Government but of the Philippine Government. That is what I am trying to point out. The statutes passed by Congress and which really laid the foundation for these funds, were never called to the attention of Congress; the very vital and essential basic factors were concealed and kept away from or at least not presented to the members either of the Senate or the House committees. So there was concealment, and, in my judgment, misrepresentations both of law and fact; and the misrepresentation misled the Secretary of War, it misled the Secretary of the Treasury, it misled the President, and it misled the committees of the Congress.

It is somewhat presumptuous, Mr. President, perhaps, to come here and to suggest errors, and I would not do so, but, after careful study of every line of the debate in the House and every line of the discussion in the committees, and every word in the letters and the statutes involved, I say that the reports that are made, both in the House and the Senate, do not set forth the true nature, origin, and purpose of the two funds which make up these deposits; one came from the sale of dollar bonds to American citizens and the other represented a silver redemption fund.

Mr. HAYDEN. The Senator has just mentioned the sale of bonds to American citizens. What will be the effect on the Filipino people with respect to the payment of bonds, such as the Manila railroad bonds, which are, in effect, government bonds, and which were issued in Swiss francs and Dutch guilders? So long as the dollar was on the old gold standard and had the same backing behind it that a Swiss franc or a Dutch guilder had, it made very little difference to the Filipino people in the payment of a debt due in guilders or francs what the status of their money was. When we devalued and went off gold, of course, any debt due in the United States would be paid in American dollars, and the account would balance. But I am told, and I so stated in the report, that there are Filipino bonds, for which the Filipino people are responsible, issued in Swiss francs and in Dutch guilders, and if Congress had not given them this relief it would cost them at least $10,000,000 more to pay the bonds than it would if we had not gone off the gold standard. What does the Senator say to that?

Mr. ADAMS. I will tell the Senator a part of that story. In the first place, there are less than $15,000,000 altogether of Manila railroad bonds outstanding. There were $75,000,000 of bonds payable in dollars held in the United States.

Mr. HAYDEN. But the Senator will admit that there would be a loss placed upon the Filipino people?

Mr. ADAMS. The Senator from Colorado will say something else. There are hundreds of millions of bonds issued by American corporations payable in British pounds and guilders abroad that our people are going to have to pay, but we do not propose to make our citizens whole because of that situation. We passed the Gold Devaluation Act, and it is my contention that everybody under the American flag should be treated equally, and that we should not make an exception of one group.

Mr. HAYDEN. So long as the Filipinos were under the American flag, and so long as there had been no change in their governmental status, that argument might be sound; but Congress passed an act creating the Philippine Commonwealth, and it went into effect after Congress had acted with respect to this matter. That new government, now being established, in good faith took into consideration what the Congress had done and that they were to receive the benefit of the devaluation; and now, of course, it utterly changes their plans and their prospects. So there is a political consideration involved, and the bill ought to go to the Committee on Territories and Insular Affairs.

Mr. ADAMS. If the Senate of the United States wants to make a good-will donation to the Philippine Islands, that is one thing; but to make it under a false understanding of law and fact and as due and owing is something else. That is where I differ with my friend from Arizona. We have been pretty liberal with the Philippine Islands. The Senator knows that we have given to the Philippine Islands all our properties there; we gave them our public buildings; and only in the last session the Senator and I sat upon the committee which recommended an appropriation of $750,000 to erect buildings to replace some of those we had given away.

The Filipinos themselves made no request for the appropriation of $24,000,000, but it was initiated at the instance of American officers. The Filipinos say so. If they are not entitled to it they should be the first to say so. If the Congress should pass an act to award the Senator from Arizona a million dollars to which he was not entitled I know he would be the first to say, "Of course, I will not accept an award or an appropriation which is not justly mine."

The existing statute, Mr. President, was passed upon a certain theory that it was necessary in order to restore the Philippine currency reserves. What does the attorney for the Philippine government tell the committee? Does he say that they are going to use this money to add to the reserves? No; he told the committee that they are going to use it to pay the operating expenses of the government. In other words, they admit that they do not need it for the purpose for which it was sought to be appropriated.

Mr. TYDINGS. Mr. President, will the Senator yield?

Mr. ADAMS. Certainly.

Mr. TYDINGS. I should like to call the attention of the Senator from Colorado and others who are interested to some of the fiscal matters touching the Philippine government which the Committee on Territories and Insular Affairs has heretofore passed upon. That committee has passed upon legislation including the coinage and currency of the Philippines, the establishment of a mint in Manila, the determination of the parity between the dollar and the Filipino peso.

Mr. ADAMS. May I ask the Senator to tell me where the statute is that establishes the parity between the peso and the dollar?

Mr. TYDINGS. I will be glad to do that.

Mr. ADAMS. I refer to the act which was passed by Congress.

Mr. TYDINGS. Let me first summarize, and then I will give the Senator the information in my own time.

The issuance of bonds has continually remained under the jurisdiction of the Committee on Territories and Insular Affairs, running to $30,000,000 or more.

The first act to provide for temporary administration of the civil government of the islands, dated July 1, 1902, was passed on by the Committee on Territories and Insular Affairs. The Jones Act, which was the first step toward autonomy for the islands, was passed on by that committee. That act, providing the limitations upon the Philippine government and providing also for municipal and railroad bonds, and all subsequent amendments to it were presented by the Committee on Territories and Insular Affairs.

Why should not the question of bond issues and measures affecting the currency situation in the Philippines have gone to the Committee on Banking and Currency?

I have had it looked up, I will say to my colleagues of the Senate, and there has not been a single measure touching the Philippines in either the House or the Senate that has not come out of the Committee on Territories and Insular Affairs.

Mr. ADAMS. Mr. President, of course it may be that every one of those measures was properly before that committee, but here is a proposed law which has to do with a statute of the United States, the gold devaluation statute, and with its effect or its interpretation, to which the Philippine claim is merely an incident. The Philippine government had $56,000,000 on deposit when there were $40,000,000,000 on deposit belonging to other people. In other words, it is like a tax bill and other bills which incidentally affect the Philippine government. As the Senator knows, no tax bill has been referred to his committee merely because among other things it proposed a tax on oil, which would affect the Philippines. Bills affecting the sugar industry have not been referred to the Senator's committee merely because the Philippines were incidentally affected.

This is merely a bill which, in its greater aspects, affects this country and merely in part does it affect the Philippines.

Mr. TYDINGS. Mr. President, will the Senator yield?

Mr. ADAMS. I will ask the Senator to wait just a second. As a matter of fact, if we lay down and stand by this principle that the Philippine government is entitled to a profit upon its deposits, no sound answer can be made to the depositors of the other $40,000,000,000, if they should claim that they should have an equal profit.

Mr. TYDINGS. Mr. President, I wish to say to the Senator that I do not care at this time to discuss the merits of the bill; but, if his contention is sound, there is no reason in the world why the Committee on Territories and Insular Affairs will not agree with his contention and report a bill which will carry out the philosophy which he expresses. All that we are asking for here is not to contradict or take issue at this juncture with the Senator from Colorado, but that the measure shall go to the committee which has considered and acted upon all legislation affecting every phase of the Filipino government from the time it was born down to its ultimate demise, when it will be a free and independent nation. I am not taking issue at this juncture with anything the Senator says as to whether or not the money should be transferred or should not be transferred. I am trying to point out to him that he himself and the Treasury experts may come before the committee, where he and they will be given courteous attention; we will be impressed I know by the arguments he offers and will give the best judgment we can. All that I am asking is that the Committee on Territories and Insular Affairs, singularly equipped to deal with the subject, be entrusted with this proposed legislation.

Mr. ADAMS. I would not say that the Senator's committee is not well equipped, but I do say, with the exception of myself, the Banking and Currency Committee is better equipped to deal with questions of banking and currency. They have made a study of them; they are familiar with the legislation that relates to the subject. I would not in any way disparage the capacity and ability of the Senator's committee, but I know, if this bill shall be referred to the Committee on Territories and Insular Affairs, the taxpayers of the United States will have the pleasure of paying the $24,000,000.

Mr. TYDINGS. The Senator cannot fairly say that.

Mr. ADAMS. I will say, then, that it will not be possible to pass the bill at this session by any chance.

Mr. ROBINSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Arkansas?

Mr. ADAMS. I yield.

Mr. ROBINSON. During the interruption of his remarks by the Senator from Maryland the Senator from Colorado made inquiry as to the statute fixing the parity—I believe that was the word used——

Mr. TYDINGS. Yes.

Mr. ROBINSON. Between the United States gold dollar and the Philippine currency. I think the statute of March 2, 1903, which I read to him, was enacted for that purpose.

Mr. ADAMS. I am familiar with it. If I am not mistaken, that section of the statute provided for the establishment of a theoretical gold peso and fixed its weight.

Mr. ROBINSON. Yes; but it provided more than that.

Mr. ADAMS. Yes; it provides not for parity but that United States gold coins shall be legal tender in the Philippines.

Mr. ROBINSON. But it does fix the ratio at 2 to 1. Here is a case where we were establishing the unit of value of the Philippine currency by an act of Congress. We fixed it by the gold peso, and the statute then further provided:

> Said gold peso to become the unit of value when the government of the Philippine Islands shall have coined and ready for, or in, circulation not less than 5,000,000 of the silver pesos hereinafter provided for in this act, and the gold coins of the United States at the rate of $1 for 2 pesos hereinafter authorized to be coined shall be legal tender for all debts, public and private, in the Philippine Islands.

Mr. ADAMS. It provides that American gold coins shall be legal tender. If we go back in American history, we find that this Government for some 40 or 50 years enacted statutes making the Spanish milled dollar legal tender, and certain other European coins legal tender, but they certainly did not intertwine our monetary system with those of Europe. This is a provision as to what shall be legal tender. The next section provides that the Philippine silver pesos authorized by that section shall be legal tender for all debts.

Mr. TYDINGS. Between the United States and the Philippines.

Mr. ADAMS. No; it is just a declaration that certain coins shall be accepted as legal tender.

Mr. TYDINGS. Yes; 2 Philippine pesos for 1 American gold dollar. Then, the Senator does know that the act establishing the parity, which was read by the Senator from Arkansas, making Filipino money tie into our own system as to value, was not passed upon by the Banking and Currency Committee, but was reported by the Committee on Territories and Insular Affairs.

Mr. ADAMS. Of course.

Mr. TYDINGS. There is not a case in the whole history of 38 years of Filipino contact where any legislation touching money or anything else has come out of any other committee except the Committee on Territories and Insular Affairs.

I do not want to argue the merits. I have told the Senator privately that I have been impressed by many observations based on research he has made affecting the question. I shall be glad to give him the best hearing possible and shall go into the matter with an open mind. I want to hear what the Senator has to say.

I would not want to have the measure having to do with battleships dealt with by the Committee on Finance, and I do not want a bill affecting insular affairs dealt with by any other committee of the Senate than the Committee on Territories and Insular Affairs. If that committee could establish a parity in the first place between Filipino and United States money and set up their whole fiscal system, if it could establish their mint for the coinage of money, if it could handle all legislation affecting their bond issues and their deposits, it seems to me it is competent to handle this matter, and that it is the proper authority to do it.

When the Senator from Colorado introduced his bill, I immediately consulted the Parliamentarian of the Senate. The Senator introduced his bill and specified that it should go to the Committee on Banking and Currency, which he had a right to do. He wanted it to go to that committee. The Parliamentarian informed me that if the Senator had not done that—and it is normal to make the commitment to the committee designated by the introducer of a bill—he, the Parliamentarian, would have automatically referred it to the Committee on Territories and Insular Affairs as the proper committee.

Mr. GLASS. Mr. President, may I interrupt at that point?

Mr. ADAMS. I am glad to yield to the Senator from Virginia.

Mr. GLASS. If the bill should properly have gone to the Committee on Territories and Insular Affairs, it should have gone to that committee. I do not recognize the right of an individual Senator to have his bill referred to any committee to which he may please to have it referred. Too much of that sort of thing has been done. Purely banking and currency measures have been referred by request to the Committee on Agriculture and Forestry or to any other committee from which the proponent of the bill happened to think he could get a favorable report. I protest against that practice.

Mr. ADAMS. So far as I am concerned, I suggested that the bill go to the Committee on Banking and Currency because it belonged to that committee. I am here maintaining it does belong to that committee. I am unable to follow an argument which says that because the regulation of internal affairs of the Philippine Islands is handled by the Committee on Territories and Insular Affairs great problems which affect the whole financial structure of the United States, its banking and its currency and its gold, should go to that committee, because indirectly it affects the Philippine Islands.

Mr. HAYDEN. Mr. President, will the Senator yield?

Mr. ADAMS. I am always glad to yield to the Senator from Arizona.

Mr. HAYDEN. There can be no dispute that the legislation devaluing the gold dollar properly belonged to the Committee on Banking and Currency. When that legislation was under consideration no one gave a thought to what repercussions its enactment might have upon the Philippine Islands. A new set of facts have developed. It is found that it does have a very detrimental effect upon a dependent people, and, that being the case, certainly the committee of the Senate charged with the care of that people with respect to any legislation should pass upon the question and have opportunity to study and understand its full effects, one of which I illustrated a moment ago with respect to Philippine bonds issued and payable in Swiss francs or Dutch guilders. The Senate never thought of that when the gold devaluation bill was passed.

The proper authority to whom a measure of this kind should be referred is the Committee on Territories and Insular Affairs, and I am sure that committee will be happy to have the advantage of the study made by the Senator from Colorado and by the Committee on Banking and Currency.

Mr. ADAMS. Mr. President, I may say that I made a suggestion which perhaps was not proper; at least it was rejected. I said I would like to go before the Committee on Territories and Insular Affairs and discuss the matter. The Senator from Maryland said that if the bill was referred to that committee that would be all right, but if the bill was not referred to that committee there would be no meeting. I was anxious to discuss the matter with the committee, to have the benefit of their information, even though believing the bill should not go to that committee. The bill has been pending before the Banking and Currency Committee since early in January.

Mr. TYDINGS. Mr. President, will the Senator yield further?

Mr. ADAMS. Certainly.

Mr. TYDINGS. I think the Committee on Territories and Insular Affairs would profit greatly, not only by having the

Senator come before it, he having made a study of this bill, but by having the report of the Committee on Banking and Currency, which, in my judgment, would receive as much consideration as human beings could give to it. We would be impressed by its observations.

I do not want to transgress on the Committee on Banking and Currency. I appeal to the Senator from Colorado that perhaps a matter of this kind having dual relationship, one touching the internal financial problems of our Government and the other the Filipino side, it would not hurt the proposed legislation if it were considered by both committees. If the Senator will accede to that suggestion, I will call the Committee on Territories and Insular Affairs within the next 2 or 3 days, to suit his convenience. I will try to have all the membership present. I will try to conclude the meetings this week and report the bill to the Senate without amendment, if the committee deems it wise to so report it, or with amendment if any facts should be developed subsequently making an amendment desirable.

I ask the Senator if he will not let the Committee on Territories and Insular Affairs, which feels that it does have some information and background that is very pertinent to proposed legislation, have the benefit of the views of the Committee on Banking and Currency as well as its own views, so that a complete picture may be given to the Senate.

Perhaps the Senator from Arizona [Mr. HAYDEN] has already touched upon it, but the Senator knows that the holders of Filipino bonds have the option of demanding payment in any one of four or five different kinds of currency. Those bond issues were placed as a result of acts of Congress. We have a moral responsibility if we do not have a legal one. The holders of those bonds can demand payment in Dutch guilders, in Swiss francs, in English pounds, or in American dollars. Such is the tenor of those bonds. They have been outstanding for a long while and will become due in the next 2 or 3 years. Therefore there are certain aspects of the question which I believe the Committee on Banking and Currency did not have before it when it considered the matter. Rather than make a mistake and enact legislation which may come home to plague us, will not the Senator accede to a quick reference to the Committee on Territories and Insular Affairs, and a quick hearing, and a quick rereporting of the bill with the complete picture, so that we may take the sound course when we do finally pass upon the bill?

I am glad to have the Committee on Banking and Currency consider the bill. I do not reflect on that committee in the slightest degree. I think it is one of the finest committees we have; but I do think there is a side to this matter which might with profit be offered to the Senate for its consideration.

Mr. GLASS. Mr. President, if I may intervene, I should like to know what side there is to this question that the Banking and Currency Committee did not consider. We had the Philippine Commissioner before our committee. We had the selected attorney of the Philippine government before our committee repeatedly. We gave the utmost attention and the most detailed attention to every conceivable aspect of this question; and I should like to have somebody point out what is involved that the Banking and Currency Committee did not hear patiently.

Mr. ADAMS. I do not know of anything that was not heard.

Mr. TYDINGS. Mr. President, I renew my request to the Senator from Colorado. I do not wish to interrupt him continually, and I shall not do so any more; but to this extent I should like to repeat:

If the Senator will accede to the reference of the bill as requested in the motion, I pledge him my word, and I believe that of the members of the committee on the floor and elsewhere, that we will not delay the matter, and will cooperate with him in an endeavor to give him action upon the bill at this session of Congress. It may be that when we are more fully informed the Senator's views will prevail and we shall take his own bill. It may be, on the other hand, that we shall have a viewpoint which the Senator himself would like to have. If he will consent to this reference I promise him that we will cooperate with him in every way for dispatch of the proposed legislation at this session of Congress.

Mr. GLASS. Mr. President, may I intervene again to make just one remark? The fundamental question involved, as it seemed to me and as it seemed to members of the Banking and Currency Committee, is whether or not different treatment should be accorded to the Filipinos from the treatment to be accorded to our own citizens.

Senators talk about a moral obligation. There has been a destitution of moral sensibility in dealing with our own people on the question of devaluation, and the profit that the Federal Government derived from devaluation. If it was desired to "go the whole hog", why not wipe out the value of the gold dollar, and get that much more "profit"? It may be called "profit" with as much propriety as Ali Baba's Forty Thieves might have called "profit" the plunder in their cave that they derived from highwaymanship.

Mr. FLETCHER. Mr. President, may I ask the Senator a question?

Mr. ADAMS. Certainly; I yield to the Senator from Florida.

Mr. FLETCHER. What the Senator from Virginia has said with reference to the hearings is entirely true. I cannot conceive of any difference between the hearings held by the Committee on Territories and Insular Affairs inviting in the Committee on Banking and Currency, and the hearings held by the Banking and Currency Committee inviting in the other committee and the members of the Philippine Commission. We did that, as the Senator from Virginia has pointed out. The attorney, the representative of the Philippine government, and all persons interested were invited to the hearings, and were given unlimited time; so the Banking and Currency Committee has considered the very questions which the Committee on Territories and Insular Affairs proposes to consider.

I think the report of the committee, particularly paragraphs 9 and 10, shows the reasons why this matter belongs in the hands of the Banking and Currency Committee. We are not particularly seeking work to do, but we wish to discharge our duties in the field of operations which is entrusted to us.

Paragraph 9 of the report says:

> The statute sought to be repealed gave an unwarranted profit to the Philippine government upon its bank deposits which was denied to the similar deposits of the American States, other public bodies, and to other American citizens, and unless repealed will impose an unjust burden upon the taxpayers of the United States. If the Philippine Islands are entitled to a profit upon its bank deposits, there is even greater reason why States, counties, cities, and individual United States citizens should be given an equal profit upon their deposits.

Mr. TYDINGS. Mr. President, will the Senator yield there in order to permit me to ask the Senator from Florida a question?

Mr. ADAMS. I yield.

Mr. TYDINGS. I think the Senator from Florida has interpreted the report of the Senator from Colorado slightly different from the intention of the Senator from Colorado. I do not wish to argue the merits of the matter, but all we are asking for here is not to give anybody a profit, but merely to give back the property deposited with us.

Mr. FLETCHER. The Philippine government has all that, with $15,000,000 of interest on the deposits besides.

Mr. TYDINGS. The banks paid that for the use of the money.

Mr. FLETCHER. Exactly. They were time deposits.

Mr. TYDINGS. There was no profit involved.

Mr. ADAMS. Mr. President, if I may interrupt, the Secretary of War specifically asked for profit for the Filipinos. Profit is what the Filipino representatives asked for. They concede that there is no loss. It is profit that they ask. They say the United States Government made a profit by devaluing its gold, and that they are entitled to a proportion of the

profit; and the word "profit" occurs throughout their testimony.

Mr. FLETCHER. Precisely.

Mr. TYDINGS. Mr. President, will the Senator yield so that the record may be complete?

Mr. ADAMS. I yield.

Mr. TYDINGS. At this juncture I should like to put in the RECORD a statement of the currency reserves of the Philippine monetary system on deposit in the United States at the opening of business January 31, 1934.

Mr. ADAMS. I will say to the Senator that it is all in the report of the hearings, on page 71.

Mr. TYDINGS. I think it ought to be in the RECORD, anyway.

Mr. FLETCHER. What statement is it? What department gives it out?

Mr. TYDINGS. This is a statement of the money the Filipinos have. The statement was put out by the Treasury Department.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Maryland? The Chair hears none, and the statement will be printed in the RECORD.

The statement is as follows:

Statement of the currency reserves of the Philippine monetary system on deposit in the United States at the opening of business Jan. 31, 1934

Federal Reserve district	Name of depositary	Treasurer of the Philippine Islands	
		Treasury certificate fund	Gold-standard fund
	A. Time deposits:		
First	First National Bank, Boston, Mass.	$1,750,000.00	
	National Shawmut Bank, Boston, Mass.	5,000,000.00	
	New Haven Bank, N. B. A., New Haven, Conn.	300,000.00	
	Old Colony Trust Co., Boston, Mass.	1,000,000.00	$500,000.00
Second	Bankers Trust Co., New York, N. Y.	1,000,000.00	
	Bank of the Manhattan Co., New York, N. Y.		500,000.00
	Chase National Bank, New York, N. Y.		525,000.00
	Grace National Bank, New York, N. Y.		500,000.00
	Guaranty Trust Co., New York, N. Y.	406,250.00	168,750.00
	Marine Midland Trust Co., New York, N. Y.	750,000.00	
	New York State National Bank, Albany, N. Y.	1,000,000.00	
	United States Trust Co., New York, N. Y.	500,000.00	
Third	Camden Safe Deposit & Trust Co., Camden, N. J.		250,000.00
	Central Penn National Bank, Philadelphia, Pa.	1,000,000.00	
	First National Bank, Philadelphia, Pa.	500,000.00	
	Market Street National Bank, Philadelphia, Pa.	3,000,000.00	
	The Pennsylvania Co., etc., Philadelphia, Pa.	1,000,000.00	
	Philadelphia National Bank, Philadelphia, Pa.	1,000,000.00	
	Tradesmens National Bank & Trust Co., Philadelphia, Pa.	1,000,000.00	
Fourth	Central United National Bank, Cleveland, Ohio.	500,000.00	500,000.00
	Farmers Deposit National Bank, Pittsburgh, Pa.	750,000.00	250,000.00
	First National Bank, Pittsburgh, Pa.	2,000,000.00	
	Huntington National Bank, Columbus, Ohio.	500,000.00	
	Mahoning National Bank, Youngstown, Ohio.		200,000.00
	Mellon National Bank, Pittsburgh, Pa.	1,500,000.00	
Fifth	First National Bank, Baltimore, Md.	500,000.00	
	Riggs National Bank, Washington, D. C.	1,500,000.00	
	Second National Bank, Washington, D. C.	500,000.00	
Sixth	East Tennessee National Bank, Knoxville, Tenn.[1]	16,363.06	
	First National Bank, Atlanta, Ga.	1,000,000.00	
	First National Bank, Birmingham, Ala.	500,000.00	
	Fulton National Bank, Atlanta, Ga.	500,000.00	
	Whitney National Bank, New Orleans, La.		500,000.00

[1] East Tennessee National Bank, Knoxville, Tenn., closed Jan. 19, 1933, claim filed with receiver.

Statement of the currency reserves of the Philippine monetary system on deposit in the United States at the opening of business Jan. 31, 1934—Continued

Federal Reserve district	Name of depositary	Treasurer of the Philippine Islands	
		Treasury certificate fund	Gold-standard fund
	A. Time deposits—Continued.		
Eighth	Mercantile Commerce Bank & Trust Co., St. Louis, Mo.	$1,100,000.00	$900,000.00
	Mississippi Valley Trust Co., St. Louis, Mo.	250,000.00	1,500,000.00
Tenth	Exchange National Bank of Tulsa, Okla.[1]	500,000.00	500,000.00
	First National Bank & Trust Co., Tulsa, Okla.		750,000.00
	Omaha National Bank, Omaha, Nebr.	500,000.00	
Twelfth	American Trust Co., San Francisco, Calif.	500,000.00	
	Bank of America N/T and S/A, San Francisco, Calif.	4,250,000.00	750,000.00
	Pacific National Bank, Seattle, Wash.	500,000.00	
	Peoples Bank & Trust Co., Seattle Wash.		350,000.00
	Security First National Bank, Los Angeles, Calif.	500,000.00	1,500,000.00
	United States National Bank, Portland, Oreg.		500,000.00
	Wells Fargo Bank & Union Trust Co., San Francisco.		500,000.00
	Total	37,072,613.06	11,143,750.00
	B. Demand deposits: Chase National Bank, New York, N. Y.	91,190.44	7,968,503.42
	Aggregate time and demand deposits.	37,163,803.50	19,112,253.42

[1] Deposit assumed by National Bank of Tulsa, Okla., Apr. 25, 1933.

The total deposits in the gold standard and Treasury certificate funds are $56,276,056.92.

Mr. FLETCHER. Mr. President, paragraph 10 of the report shows the fundamental reason why the Banking and Currency Committee ought to have and does have jurisdiction over this matter, and why it should not go to the Committee on Territories and Insular Affairs:

There is therefore involved in this statute a principle the application of which is not limited to the Philippine Islands.

That is the question which is involved here—a principle, the application of which is not limited to the Philippine Islands.

There is involved the interpretation and application of the various legislative enactments of the United States Congress affecting gold clauses and gold coinage in the United States.

Those are matters entirely within the jurisdiction of the Banking and Currency Committee.

Mr. TYDINGS. Mr. President, at the expense of being contradictory of my own observation, may I ask the Senator one more question? According to his own logic, if we had completely devalued the dollar to 1 cent of its former value, there would be only one-hundredth of the deposits turned back to the Philippine government, and all the rest would be profit.

Mr. GLASS. A gold dollar is not worth 1 cent, because if you are caught with it in your pocket you are put in jail and fined. There have been repeated references here to "reserves." There is no such thing as a reserve. What is a reserve?

Mr. TYDINGS. There is none.

Mr. GLASS. A reserve is something that a bank holds to pay its depositors. They have not any gold to pay, and if they had any gold the person who got it would be put in the penitentiary.

Mr. TYDINGS. I am in thorough accord with what the Senator from Virginia says; and my point is that if the gold dollar had been completely devalued we would simply have said to the Filipinos, "You are not entitled to get any money back, because what you put up with us is worth nothing. We will give you 1 cent on the dollar; and if you do not take that, the whole thing will be wiped out."

Mr. GLASS. We would be more honest than that. We would give them back our paper currency, our printing-press currency. That is all we have.

Mr. FLETCHER. The report further says:

The application of the principle underlying the statute sought to be repealed to all deposits to which logically applicable would involve many billions of dollars.

That is the reason why this subject matter belongs in the Banking and Currency Committee, and not in the Committee on Territories and Insular Affairs.

Mr. ADAMS. Mr. President, the Senator from Maryland asked to have inserted in the RECORD a list of the banks where deposits were made in this country. I wish to state in that connection that the acts passed by Congress did not permit deposits of Philippine funds in any American bank. They were permitted to be so made only after the enactment of the 1916 automony act and by virtue of the provisions of the acts of the Philippine Legislature. So that any deposits in American banks were by direct authorization of the Philippine government.

The Philippine Commissioner, Mr. PAREDES, was asked about this matter, and I read from his testimony, on page 23 of the hearings:

Senator MCADOO. Did the Bureau of Insular Affairs designate the banks in this country in which those deposits should be made?

Mr. PAREDES. They suggested that we should deposit with certain banks.

Senator MCADOO. But they did not require you to deposit with those particular banks?

Mr. PAREDES. No.

Senator ADAMS. You have not lost a dollar out of those deposits?

Mr. PAREDES. I do not complain of that.

Senator ADAMS. But there is not one of those deposits on which you have suffered a loss, is there? Every single one of those deposits has been paid in full?

Mr. PAREDES. I will have to qualify my answer.

Senator ADAMS. I mean in dollars.

Mr. PAREDES. Well, if you ask me if we have the same number of dollars as we had before, I will say, "Yes, we do have."

* * * * * * *

Senator ADAMS. Let us understand this matter clearly: What are the facts about the losses in dollars from those deposits?

Brig. Gen. CREED F. COX. There has been no loss in dollars at all. The only unsettled item is a small item in one bank, of about $1,000. It is all in the possession of the Philippine Treasury now, except that small amount.

Senator MCADOO. $1,000?

Brigadier General COX. Yes. There has been no loss for the Philippine government in the transaction as yet, but there are some items in litigation.

Senator ADAMS. But the greatest possible loss is $1,000?

Brigadier General COX. No; that is just one item.

Senator ADAMS. But all those deposits were secured by deposited collateral?

Brigadier General COX. Yes; they were all secured by deposited collateral, and have been made good by the disposal of that collateral.

* * * * * * *

Senator MCADOO. There is no earmarked gold behind any of these deposits? There is no specific gold behind them?

Brigadier General COX. No.

I have read from the testimony before our committee to the effect that not one dollar of loss has been occasioned to the Philippine government by virtue of these deposits. But that is not all. I read further, from page 31 of the hearings:

Senator ADAMS. Mr. Paredes, you concede that there was no actual loss?

Mr. PAREDES. I am willing to grant that, for the sake of argument, Senator.

Senator ADAMS. Now, the gold-standard fund was created almost entirely from funds derived from the sale of bonds in this country, was it not? At one time some $23,000,000 of Philippine bonds was sold.

Mr. PAREDES. In a way it was so, but not exactly.

Senator ADAMS. Well, substantially it was so, was it not?

Mr. PAREDES. Substantially; yes.

Senator ADAMS. Those bonds were paid in American dollars?

Mr. PAREDES. Yes.

Senator ADAMS. The proceeds were placed in the banks in dollar deposits?

Mr. PAREDES. Yes, sir.

Senator ADAMS. So that there was no gold deposit in the creation of the gold-standard fund, but it all came, or substantially all, from the proceeds of bonds sold in this country and payable in American dollars?

Mr. PAREDES. It seems to me that way.

Senator ADAMS. That is correct, is it not?

Mr. PAREDES. It seems so to me.

Senator ADAMS. Now, your other fund, your treasury certificate fund, had its origin, did it not, in the issuance of certificates upon deposits of silver pesos?

Mr. PAREDES. I believe you are right, Senator.

Senator ADAMS. Those certificates were redeemable in silver pesos?

Mr. PAREDES. Just as much as they were redeemable in gold dollars.

Senator ADAMS. In fact, they could be redeemed in silver pesos at anytime, could they not?

Mr. PAREDES. Yes; but I add that they could have been redeemed just as well also in gold dollars.

Senator ADAMS. Yes; but you could have redeemed them in silver pesos?

Mr. PAREDES. Yes.

Senator ADAMS. But they were issued upon deposit of an equivalent amount of silver pesos?

Mr. PAREDES. Yes—and which were equivalent to an equal amount of dollars in gold.

Senator ADAMS. And no certificates could be issued by the Treasury Department unless an equal amount of silver deposits was made?

Mr. PAREDES. One hundred percent.

Senator ADAMS. The Treasury transfer was for the purpose of redeeming these Treasury certificates?

Mr. PAREDES. Yes, sir.

Senator ADAMS. And they were redeemable in silver?

Mr. PAREDES. Yes; that was the purpose of it.

Senator ADAMS. The Philippine government never issued any gold pesos?

Mr. PAREDES. No.

This testimony shows that no certificates could be issued by the treasury department of the Philippine Islands until an equal amount of silver deposits were made, and they were redeemable in silver. In other words, we get back to this fundamental, that the deposits in United States banks were made up of two funds, one for the specific and sole purpose of redeeming certificates issued to the Philippine government upon deposit of silver dollars, redeemable in silver. There was no gold reserve, no requirement for gold, no occasion for it either on account of acts of Congress, or because of legislation of the Philippine Islands. The other fund, the so-called gold-standard fund, was created to maintain the parity between the silver peso and the theoretical gold peso. It was a commercial fund used in the sale and purchase of exchange with the ultimate objective of protecting parity of Philippine coin, if necessary, and being largely increased from profits from the exchange operations.

In reference to that the Philippine representative also testified as follows:

Senator ADAMS. The Philippine peso is today at par, is it not, substantially, with the American dollar?

Mr. PAREDES. Yes; two to one.

Senator ADAMS. It has been at par?

Mr. PAREDES. Yes; two to one.

Senator ADAMS. I mean that the Philippine peso is equivalent to 50 cents?

Mr. PAREDES. Yes.

Senator ADAMS. And that has continued, substantially, right along?

Mr. PAREDES. Not only substantially but absolutely.

Senator ADAMS. Absolutely. So that the money in the bank deposits in the United States, if you deposited $1,000,000 in 1929, would redeem 2,000,000 silver peso certificates at that time, and it would redeem 2,000,000 silver peso certificates today?

Mr. PAREDES. Yes.

Senator ADAMS. The $56,000,000 on deposit in December 1934 would redeem today as many silver pesos as it would at that time?

Mr. PAREDES. Oh, yes.

In other words, the funds of the Philippine government in the banks lost absolutely nothing of their value, of their efficacy, while the deposits of American depositors were perhaps devalued and reduced in purchasing power. The Philippine deposits had a specific purpose, namely, to redeem certificates, and there was not the shading off of a cent in their capacity to perform their original function. There was no impairment of the parity between the silver peso and the American dollar.

Mr. President, that is not all. Fifty-six million dollars in Filipino money was put into the banks of this country because by reason of experiences in the Philippine Islands in 1919 and 1920, the Philippine government discovered that its funds were not safe in the Philippine banks, and the Philippine Legislature, when it authorized deposits in banks, prohibited strictly the deposit of any of these funds in Philippine banks, but provided that they should be deposited in American banks. They could not be deposited in Philippine banks or in banks owned by Filipinos.

Mr. CONNALLY. Mr. President, if I understand the Senator from Colorado correctly, this has no relation to the deposit of Philippine funds in the United States Treasury, but this has reference to funds in banks deposited as any other deposits were made.

Mr. ADAMS. The Philippine government deposited $56,000,000 in 41 separate banks, and drew interest on that amount to the extent of over $15,000,000. They were all time deposits except one. They stood like every deposit of an American citizen. The American citizen took the consequences of the gold devaluation, which by the act is sought to be repealed. The Philippine government has been given a 69-percent profit upon its deposits.

Mr. CONNALLY. Why is the Philippine government entitled to any more consideration than any other depositor in the banks under the same or similar circumstances?

Mr. ADAMS. I have been unable to see that the Philippine government should have any better treatment than an American citizen receives.

Mr. CONNALLY. It seems to me the Senator is eminently correct in his position. If the Government of the United States itself had had deposits in banks, it would have had no advantage over other depositors.

Mr. ADAMS. The Government had $1,600,000,000 in banks at that hour, and, in addition to that, my State and the Senator's State, my city and the Senator's city, the school districts in my State and the school districts in the Senator's State, and the various governmental agencies of the United States, had $4,700,000,000 on deposit; yet they received no advantage from Congress.

Mr. CONNALLY. The Senator is contending for the same treatment to the Philippine government that it received by our Government under the same circumstances.

Mr. ADAMS. Yes. In my State the constitution provides that the school funds of the State shall be inviolate. We had on deposit in American banks many million dollars. Whatever consequences came to those deposits we have had to take. If the purchasing power of our school deposits has gone down, we have accepted the result. But I am unable to see why any advantage should be given to Philippine deposits, which have not suffered at all, I will say to the Senator from Texas, because they were made for a particular purpose, and they continue to have the same efficacy, the same force, the same effect, that they had at any time, because they were to redeem certain certificates, and the representative of the Philippines says they will redeem as many certificates as they would have redeemed before.

How much monetary circulation did the Philippine government have; how much silver was in circulation in the Philippine Islands? There were circulating in the Philippine Islands only $9,000,000 of silver coins, including the pesos and the fractional coins, or, roughly, ₱18,000,000. There were only forty-four and one-half million dollars of treasury certificates. In other words, the aggregate of Philippine currency, silver and paper, was $53,000,000, and they had back of it $56,000,000 in American banks. Now it is proposed that we should give them $24,000,000 under the guise of preserving and protecting their currency reserves, when they had behind them $56,000,000, or more than dollar for dollar in deposits in American banks, and every deposit they had in an American bank was backed up by collateral. They did not lose one nickel. However, they ask the taxpayers of America to give them a profit, and they use the term "profit." They say there was no loss, but they say that our Government, having made a profit on gold, therefore they are entitled to a profit on their bank deposits. I do not mind their getting a profit, but I do mind their getting it at the expense of the American taxpayer.

They had other moneys in their vaults. The Philippine peso is now at parity, and has been. Philippine bonds are selling at a premium of anywhere from 106 to 114.

Mr. President, another thing in connection with this matter, if the request for the so-called profit which the Philippine government now asks were granted, it could only accrue on the 31st day of January 1934. They claim they should have it accrue because of the devaluation of the gold dollar which took place on that day. There could have been no profit to them prior to that day. In other words, until the gold devaluation took place, by no process of finance or imagination could they work out a profit.

On that day it was not legally possible for them to have had any gold. On the 5th of April 1933 our Government stopped the use of gold in commercial transactions. On the 28th of December 1933 they made these orders applicable in the Philippine Islands. In other words, at the very time when they say they are entitled to get the gold, to have a profit on it, they could not legally have had the gold. The banks in which they had their deposits had no gold. The banks could not have paid them if they had made agreements to pay the gold, because Congress said such agreements are invalid. If they had gotten the gold they could not have used it for the purposes for which these funds were created and existed. The two funds existed to redeem silver certificates and to maintain parity, and no citizen in the United States or the Philippine Islands could have accepted the gold. It would have been perfectly useless in their hands.

Mr. President, it is a matter of natural inquiry as to how this bill we are seeking to repeal ever passed both Houses of Congress. Acts of Congress are naturally entitled to every consideration, but they are not beyond question or inquiry. I have endeavored to point out that they have overlooked the various statutes upon which these deposits are based. Let me read a few statements from the debate on the floor of the Senate indicating what was understood to be the nature of the bill. Page 11524 of the CONGRESSIONAL RECORD of the last session, Mr. BANKHEAD, the majority leader, said of this bill:

> This is, as I understand, a bookkeeping transaction, between the government of the Philippine Islands as such and the Government of the United States as such; and I have been further advised that from the standpoint of the equity the Government of the United States and the Treasury of the United States will not lose any money by virtue of this transaction.

That is, the leader of the majority thought that it was a bookkeeping transaction which would not cost the United States Government anything. It is not a bookkeeping transaction, and it is going to cost this Government $24,000,000.

Then, Mr. PATMAN, at page 11531 of the CONGRESSIONAL RECORD, said:

> Therefore, the Philippine people wanted gold in the Treasury of the United States as a backing for the currency of the Philippine government, and in this country they had $95,000,000 the equivalent of gold.

It was the notion that they had gold when they did not have a dollar of gold. Mr. President, the deposits in the banks were not gold. They could not demand gold upon them. The deposits in a bank is payable in lawful money. Most Members of the Senate, as lawyers, know that when a deposit is made in a bank the title to the money itself passes to the bank and there takes the place of it a credit obligation; the relationship of debtor and creditor arises, and there is no specific item in the assets of the bank which can be identified by the depositor as his.

More than that, in this case practically every deposit was a time deposit, not even subject to payment on demand without notice, and all drawing interest.

That is not all. These deposits were made upon written contracts of deposit which specifically provide for their repayment in accordance with law in lawful money. So that they were not payable in gold as a matter of law or as a matter of contract. Yet the letters which have been read here coming from administration circles state that this deposit was regarded by the Philippine government as the equivalent of gold. I do not think it was so regarded, and the reason I say it was not so regarded is that these deposits had been in the banks for various periods, some running back 15 years, most of them perhaps 10 years. When our banking structure was shaken in the early thirties the Philippine Commissioners and the Philippine Governor General then made an inquiry as to whether or not they could have

a change made in the contracts. They said their contracts were payable in lawful money and they wondered if they could not get them changed so they would be payable in gold. This inquiry was repudiated, as unauthorized by the Governor General and the head of the Bureau of Insular Affairs and they were told, of course, "You cannot have your contracts changed. Banks will not make an agreement to pay you in gold and still pay you 2½ to 3 percent interest." That ended the inquiry. The Government took care of these deposits by seeing that they were adequately secured by collateral. The care which our Government took of the deposits is evidenced by the fact that not $1 of loss has taken place in any one of the 41 deposits.

Mr. President, following that, there came some word that perhaps we were going to devalue the gold dollar. Inquiry was then made and the Filipinos asked, "What will be the situation if we have bonds payable in gold and you devalue the dollar?" The answer to that was made by the Congress of the United States and the Supreme Court in which they said that the gold clause was invalid and that bonds payable by their terms in gold are payable in any lawful currency.

Mr. SCHWELLENBACH. Mr. President, will the Senator yield so that I may ask him a question?

Mr. ADAMS. I yield.

Mr. SCHWELLENBACH. Is there any other instance in which our Government assumed a similar responsibility toward any other government, or any other individual, or any other corporation in the matter of the devaluation of the dollar?

Mr. ADAMS. Absolutely none.

Mr. SCHWELLENBACH. This is the only instance in which it has been done?

Mr. ADAMS. I will say to the Senator from Washington that the great funds in his own State, their school funds in the banks to buy textbooks, to erect buildings, to pay teachers, have suffered in their purchasing power by devaluation. They have not been restored in any way. In the case of the great insurance companies with their funds in the banks with which to pay widows and orphans in case of disasters in families, there is no restoration to those insurance companies. As a matter of fact, as the Senator knows, the purpose of the devaluation was really to reduce the purchasing power. Whether rightly or wrongly, that is what we sought to do as the means of restoring prices of commodities and products throughout the country.

We sought in the bill which we are seeking to repeal to give to the Philippine government a preference which is not given to any other one of the 50,000,000 depositors in American banks; although as we all know, the Philippine deposits were not damaged, because those funds were deposited for specific purposes, for specific obligations, and they were equally effective after devaluation as before.

The Filipinos come in and their complaint is, "We are entitled to the profit." They admit there is no loss; they admit there is no damage; but they say, "Your Government realized $2,000,000,000 in profit on your gold, and, therefore, we, having $56,000,000 on deposit which we might in some way have converted into gold, are entitled to our share." The bill provides that they shall have their $24,000,000 taken off the Treasury credit by reason of the gold devaluation. That is, we pick out one bank depositor whom we have looked after by seeing that his deposits were secured by collateral so that he lost not one nickel upon his deposits.

There were a number of other items showing the attitude of the House. On page 11533, Mr. Keller said:

> The Filipinos had in the United States at the time we devalued the dollar 2,800,000 ounces of gold that belonged to the Philippine people, and nobody else. That was worth at that time about $56,000,000. That was Philippine money and belonged to the Philippine people. When we devalued gold in the United States we also devalued the gold belonging to the Philippine people.
>
> It, therefore, became a fact that the 2,800,000 ounces of Philippine gold became worth about $79,000,000. That is the long and short of the whole story.

Then Mr. Frear said:

> They—
>
> Referring to the Philippines—
>
> had placed their money with American trustees on the gold basis. They wanted their money back on the same basis. Read the report; the Treasury refused it; refused it repeatedly.

As a matter of fact, the Treasury never refused it, for the only request ever made upon the Treasury for gold by the Philippine government—and I make the statement from the record and in defiance of some reports—was after it became legally and physically impossible to give gold, on June 29, 1933. Prior to that there were mere inquiries. So there never was a demand, and the American Government had no responsibility.

We passed an act, Mr. President, in 1934, to enable the Treasury to accept these deposits. The Treasury could not legally accept the Philippine deposits until that time. Under the act passed, all these bank deposits, except one operating deposit, have been placed in the Treasury, and they are now drawing 2 percent from the United States Government. So this $56,000,000, or whatever amount it may be at this time, is now in our Treasury drawing 2 percent interest from our Government.

Now I am going to ask permission, Mr. President, to incorporate in the RECORD, without reading, certain sections of the revised Filipino Code which I will have to designate. Following 1916, the Philippine government took over this matter, and they made provision for it in section 1626, a portion of which I will read, and all of which I will ask to have incorporated in the RECORD. I read this much to show what this whole situation rests upon:

> The treasurer of the Philippine Islands is hereby authorized, in his discretion, to receive at the insular treasury or at any of its branches, deposits of silver pesos or half pesos authorized herein, in sums of not less than ₱20, and to issue therefor treasury certificates of an equivalent face amount, in denominations of not less than ₱1, nor more than ₱500. Coin so received shall be retained in the treasury and held for the payment of such certificates, on demand, and used for no other purpose, and shall constitute a separate and trust fund in the insular treasury to be known as the treasury certificate fund.
>
> The treasury certificate fund shall at all times be equivalent in amount to 100 percent of all treasury certificates in circulation and available for circulation, and shall be constituted of silver coins received in exchange for the treasury certificates, and shall be held in the vaults of the insular treasury in Manila, and not elsewhere.

I ask to have the entire section printed in the RECORD at this point.

There being no objection, the section was ordered to be printed in the RECORD, as follows:

> SEC. 1626. Issuance of treasury certificates: The treasurer of the Philippine Islands is hereby authorized, in his discretion, to receive at the insular treasury or at any of its branches, deposits of silver pesos or half pesos authorized herein, in sums of not less than ₱20, and to issue therefor treasury certificates of an equivalent face amount, in denominations of not less than ₱1 nor more than ₱500. Coin so received shall be retained in the Treasury and held for the payment of such certificates, on demand, and used for no other purpose, and shall constitute a separate and trust fund in the insular treasury, to be known as the treasury certificate fund.
>
> The treasury certificate fund shall at all times be equivalent in amount to 100 percent of all treasury certificates in circulation and available for circulation, and shall be constituted of silver coins received in exchange for the treasury certificates, and shall be held in the vaults of the insular treasury in Manila, and not elsewhere: *Provided, however,* That when the government's supply of silver coin is insufficient to meet the demands of trade, gold coin of the United States may be substituted temporarily for silver pesos in the fund to such an extent as may be found necessary to release silver coins for circulation, pending the purchase of silver bullion for the coinage of silver coins, which silver coins shall immediately be substituted for the gold placed in the fund: *And provided further,* That as first set up and established by the provisions of this act and until such time as the Governor General in writing may direct the purchase of silver bullion for the coinage of additional silver coins, the treasury certificate fund, instead of being constituted wholly of silver coins held in the vaults of the insular treasury in Manila, may be constituted in part of currency issued by and/or under the authority of the United States held in Manila and on deposit which such Federal Reserve banks or member banks of the Federal Reserve System in the United States as may from time to time be designated by the Governor General to be branches of the Philippine treasury for receiving such deposits. The treasury certificate fund shall be segregated physically from all other funds in the insular treasury, and it shall be held under the joint custody of the reserve vault committee.

Treasury certificates shall be receivable for customs, taxes, and for all public dues in the Philippine Islands, and when so received may be reissued, and when held by any banking association in said islands, may be counted as part of its lawful reserve.

Mr. ADAMS. In other words, the only thing they contemplated was silver coinage and certificates payable in silver; and yet the legislation which it is sought to have repealed was enacted upon the theory that the certificates were based upon a gold reserve and that the deposits in American banks were regarded as gold. That is a fiction, pure and simple, a misunderstanding into which the Congress fell, and which, unless corrected, will cost the taxpayers of your country and mine, Mr. President, $24,000,000.

This bill is not a matter of special concern to me. It is not like many other bills that have come before the Congress that affect the locality of an individual Senator or a particular interest. It was called to my attention as a member of the Appropriations Committee when a request was made for an appropriation. I asked for information as to why the bill passed. I asked for a brief. I received a statement from the Filipino representative which led to some doubt on my part; and so I undertook a study of it simply because, it having been called to my attention, as a Member of the Senate I felt my obligation. I investigated the question and I submitted the bill to the Banking and Currency Committee. From that committee it has been unanimously reported after several hearings, after taking testimony from all those interested. So my interest, Mr. President, is merely that of a citizen who is unwilling, without protest, to have a discrimination made against citizens of his own country in favor of the residents of foreign islands.

The PRESIDING OFFICER. As the Chair understands, the Senator from Colorado desires to have certain matter printed in the RECORD?

Mr. ADAMS. Yes. Matter which I will furnish.

The PRESIDING OFFICER. Without objection, the matter will be printed in the RECORD.

The matter referred to is as follows:

UNITED STATES CODE—TITLE 48

SEC. 1142. Gold peso; unit of value; legal tender. The unit of value in the Philippine Islands shall be the gold peso consisting of 12 $\frac{9}{10}$ grains of gold, nine-tenths fine, said gold peso to become the unit of value when the government of the Philippine Islands shall have coined and ready for, or in, circulation not less than 5,000,000 of the silver pesos provided for under section 1143 of this title, and the gold coins of the United States at the rate of $1 for 2 pesos hereinafter authorized to be coined shall be legal tender for all debts, public and private, in the Philippine Islands. (Mar. 2, 1903, c. 980, sec. 1, 32 Stat. 952.)

SEC. 1143. Silver peso; legal tender. The government of the Philippine Islands is authorized to coin to an amount not exceeding 75,000,000 pesos, for use in said islands, a silver coin of the denomination of 1 peso and of the weight of 416 grains, and the standard of said silver coins shall be such that of 1,000 parts, by weight, 900 shall be of pure metal and 100 of alloy, and the alloy shall be of copper.

The silver Philippine peso authorized by this section shall be legal tender in the Philippine Islands for all debts, public and private, unless otherwise specifically provided by contract: *Provided*, That debts contracted prior to the 31st day of December 1903 may be paid in the legal-tender currency of said islands existing at the time of the making of said contracts, unless otherwise expressly provided by contract. (Mar. 2, 1903, c. 980, secs. 2, 3, 32 Stat. 953.) See section 1152 of this title.

SEC. 1153. Silver certificates; redemption: The treasurer of the Philippine Islands is authorized, in his discretion, to receive at the treasury of the government of the said islands or any of its branches deposits of the standard silver coins of 1 peso authorized by this chapter to be coined, in sums of not less than 20 pesos, Philippine currency, and to issue certificates therefor in denominations of not less than 2 pesos nor more than 500 pesos, and coin so deposited shall be retained in the treasury and held for the payment of such certificates on demand, and used for no other purpose. Such certificates shall be receivable for customs, taxes, and for all public dues in the Philippine Islands, and when so received may be reissued, and when held by any banking association in said islands may be counted as a part of its lawful reserve: *Provided*, That the treasurer of the Philippine Islands, with the approval of the Governor General, may substitute for any part of such silver pesos deposited, gold coin of the United States legally equivalent in value, and redeem the certificates issued in either silver pesos or such gold coin of equivalent value at the option of the treasurer: *Provided further*, That the amount of gold coin held in such reserve shall not at any time exceed 60 percent of the total amount of certificates outstanding. (Mar. 2, 1903, c. 980, sec. 8, 32 Stat. 954; Feb. 6, 1905, c. 453, sec. 10, 33 Stat. 697; June 23, 1906, c. 3521, sec. 2, 34 Stat. 453.) See sections 315b, 446, 462, and 463 of title 31.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its reading clerks, communicated to the Senate the intelligence of the death of Hon. WILLIAM D. THOMAS, late a Representative from the State of New York, and transmitted the resolutions of the House thereon.

AMENDMENT OF FEDERAL AID HIGHWAY ACT

The PRESIDING OFFICER (Mr. POPE in the chair) laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 11687) to amend the Federal Aid Highway Act, approved July 11, 1916, as amended and supplemented, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. McKELLAR. I move that the Senate insist on its amendments, agree to the conference asked by the House on the disagreeing votes of the two Houses thereon, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. McKELLAR, Mr. HAYDEN, and Mr. FRAZIER conferees on the part of the Senate.

PROTECTION AGAINST LOSS OF CHECKS IN THE MAILS—CONFERENCE REPORT

Mr. McKELLAR submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9496) to protect the United States against loss in the delivery through the mails of checks in payment of benefits provided for by laws administered by the Veterans' Administration, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate, and agree to the same.

KENNETH McKELLAR,
CARL HAYDEN,
LYNN J. FRAZIER,
Managers on the part of the Senate.

JAS. M. MEAD,
DONALD C. DOBBINS,
PHILIP A. GOODWIN,
Managers on the part of the House.

The report was agreed to.

PHILIPPINE CURRENCY RESERVES ON DEPOSIT IN THE UNITED STATES

The Senate resumed the consideration of the bill (S. 3486) to repeal the act entitled "An act relating to Philippine currency reserves on deposit in the United States."

Mr. TYDINGS. Mr. President, I am reluctant to go into the merits of this controversy at this time, if it can be avoided. I have two reasons for my attitude. The first is that if the Congress is to adjourn within the next month, it is doubtful whether this bill, if passed by the Senate, can be enacted into law anyway. The second season is that, in my judgment, the bill ought never to have gone to the Committee on Banking and Currency in the first instance. Let me see if I cannot by sheer logic support that assertion.

Senators, this bill has nothing to do with the banking and currency system of the United States. If it did have to do with that system, I would be the last one to interpose any objection. This bill deals with the banking and currency system and the fiscal relations of the Philippine Islands with the United States of America.

There is nothing in this measure which even remotely affects, alters, or changes in any respect the banking and currency system of the United States. What this measure does is to deal with the Filipino currency as removed entirely from American currency or banks.

Mr. NORRIS. Mr. President——

Mr. TYDINGS. I yield to the Senator from Nebraska.

Mr. NORRIS. I take it from what the Senator has said, he being opposed to the bill, that if his motion should prevail and the bill should be referred to the Committee on Territories and Insular Affairs, it never would be reported back to the Senate. In other words, the success of the Senator's motion would be the same as the defeat of the bill, would it not?

Mr. TYDINGS. No. While the Senator was out of the Chamber I stated to the Senator from Colorado that I thought the bill should have been referred to the Committee on Territories and Insular Affairs in the first place, but that we would be very glad to have the views of the Senator from Colorado and those of anyone else with relation to this measure; and that if the Senator would consent to the reference of the bill to the Committee on Territories and Insular Affairs, I would attempt, and I thought I could so promise before the week had passed, to have the bill back on the Senate floor with a very comprehensive report. I shall live up to that statement in the event the Committee on Territories and Insular Affairs shall be charged with a reconsideration of the bill; and if the course I have indicated should not be followed, I can assure the Senate that it will be through no fault of mine. I do not want to postpone the bill. I recognize the merits of the argument of the Senator from Colorado. I think, however, there is a side of the matter which he has not touched; and, although I am reluctant to get into a debate on the merits of the measure, may I just draw a few instances which will indicate my position in the event I should go fully into its merits?

First of all, if there had been no devaluation of the American dollar there would have been no question about the amount of money that the Philippine government would have had when independence became an actuality. Everyone concedes that; even the Senator from Colorado concedes it. Therefore if there had been no legislation the Philippines would have received in gold the sum which they have deposited in the banks of this country, or, if the devaluation of the dollar, had it happened the day after they acquired independence, they would have gotten their full amount in gold. Keep that fact in mind.

Mr. NORRIS. Mr. President, may I ask the Senator a question there?

Mr. TYDINGS. I yield to the Senator.

Mr. NORRIS. I think I have an open mind; I am trying to ascertain what are the facts. As I understand, this money was not payable in gold? Am I wrong about that?

Mr. TYDINGS. I could not answer that question yes or no, because there are so many elements that have to be considered. For example, in 1902 or 1903—I have forgotten the year—the Congress passed an act fixing the value of Filipino currency. That act provided that two Filipino gold pesos should be equivalent to one gold American dollar. We established a parity; we placed a value on their money; and that value has been maintained through all of the intervening 33 years.

To make a rather flamboyant illustration of what such a policy as we are about to adopt would lead to, let us suppose that at the next session of Congress we devalued the dollar again to, we will say, half of its present value, and that in a Congress 3 years from now and before Philippine independence we should revalue it again. In each case the amount of gold which the Filipino people would receive would be reduced, not because of any change in the value of what they have external of the United States, but because of the value of what they have internal of the United States.

I am sure the Senator from Nebraska and other Senators will appreciate this observation. All international balances, trade balances, credit balances, all sorts of debts are payable in gold. Even the Filipino bonds are payable in gold. Therefore, while a Filipino expending money in this country might receive the same amount for potatoes or wheat or machinery in the devalued money which he would have received in the old money, yet when he attempts to circulate that money in other countries, it does not now have the value which it had 2 or 3 or 4 years ago, because the Congress has reduced the gold content of the dollar.

Keep in mind the fact that after 36 or more years of American sovereignty, American guardianship, if you please, of the Filipino people, they are to be turned loose as a new nation. The parity which exists between Filipino money and American money will be dissipated instantly. They will be "out on their own", so that the amount of money which they then have which can be used to settle balances all over the world will determine to a large extent the financial worth and responsibility of the Philippine government.

If they were to continue to deal only with us, that would be a simple matter, but they will then be an independent nation, and, therefore, there are certain sides to this question, certain equities, if you please, certain matters of justice, certain matters of obligation, certain matters of morality, certain matters of finance, which we cannot dispose of by the sheer statement that the money they are to receive is the same money that they put up here or that the money they are to receive is less than the money they sent over here.

Mr. NORRIS. Mr. President, may I ask the Senator a question?

Mr. TYDINGS. Certainly. I hope I have answered the Senator's first question, although I may have answered at considerable length.

Mr. NORRIS. I am interested to know if I am correct as to another question involved, as I see it. The money the Philippine government had over here, as I understand, was deposited in banks?

Mr. TYDINGS. That is correct.

Mr. NORRIS. Then, how did this money come to be on deposit with the Treasury of the United States?

Mr. TYDINGS. At the time our currency system was established and at the time certain Filipino obligations were incurred it became necessary to fix the standard of money by which those obligations would be discharged inasmuch as they were obligations for improvements and betterments in the Philippine Islands. The Bureau of Insular Affairs of our Government supervised the sale of those securities in pursuance of an act of Congress. We actually sold the bonds in some cases. Therefore, in order to insure the repayment of the bonds and to settle the question of the worth of Filipino currency, it became necessary to fix its value in relation to the then value of our dollar.

In 1903 the law fixing the value of Filipino money in relation to the then value of our money was enacted. At the same time a system was set up requiring large deposits of Filipino money in this country. Those deposits were not made in the banks of our country by the Filipinos themselves. The Filipinos sent the money to our Government, and our Bureau of Insular Affairs determined where it should go and how long it should stay there and fixed the terms of the deposit.

The consequence is that there was scattered through many of our national banks the money which the Filipinos had sent here to stabilize the worth of their bonds and to stabilize and fix the parity of their money with reference to ours.

Mr. NORRIS. Was this practice or custom, or whatever it may be called, brought about by any law that Congress enacted, or was it brought about by an act of the Philippine Legislature?

Mr. TYDINGS. It was brought about as a result of laws enacted by Congress, first of all by the law fixing the value of our money and their money in gold. Laws authorizing many of their bond issues were enacted by our Congress. The deposits which were made with the Bureau of Insular Affairs were made in pursuance of an act of our Congress. The bonds given by the banks to the Bureau of Insular Affairs for the safekeeping of this money were given as the result of an act passed by the Congress. So that always we have been the adult, the guardian, having more or less complete say in the matter, and the Filipino has been the ward who has been the minor in the whole transaction.

Mr. ADAMS. Mr. President, will the Senator yield?

Mr. TYDINGS. Certainly.

Mr. ADAMS. I believe the distinguished Senator from Maryland is quite in error as to the facts. The situation, as I understand, is that in 1903 the United States Government set up the Philippine financial system. It provided that all Filipino money should be kept within the Philippine Islands. It made no provision for money to be deposited elsewhere. The Philippines had two kinds of money, one the silver peso and the other a certificate, like a warehouse receipt, issued

against deposits of silver pesos. No money, under the act of Congress, could be taken out of the islands or deposited in American banks.

In 1916 the autonomy act was passed, and pursuant to that act the Philippine Legislature authorized the deposit of some of its moneys in American banks, but provided first they must be designated as branches of the Philippine treasury. Of course, the act of the Philippine Legislature was subject to veto on our part, if we saw fit, I believe, although I may be mistaken about that. In any event the deposits of Filipino money in American banks were made in this country pursuant to a Philippine statute. The Bureau of Insular Affairs acted in many ways for them without legal authority. The officers of the Bureau of Insular Affairs have said definitely they had no legal control over those funds. That appears in the hearings before the House committee. Neither the Secretary of War nor his subordinate could determine the location of the funds.

Mr. TYDINGS. The Senator from Colorado is misinformed. At the time our Gold Act was pending devaluing the gold dollar the Filipinos made demand upon this Government, knowing that their money was here and that the value of it was going to be made less in gold after our dollar was devalued than it was then. They made representations to our Government asking for the return of that money. Our Government assured them that they need have no fear, that they were in good hands and would receive fair treatment.

Mr. ADAMS. May I express my disagreement with that statement? The fact, as I recall, is that at the time when our banks encountered difficulties, inquiry was made as to whether or not the deposit contract made between the banks and the Philippine government, and which provided that the bank deposits should be paid in lawful money, could be changed so as to have the deposits payable in gold. There were various reasons given why that could not be done. There was no demand for the payment of the money at any time.

Subsequently, when devaluation of the gold dollar was under consideration, inquiries came as to what would be the situation where the Philippine government had bonds payable in gold if they could not get gold out of the banks to pay their bonds. They made the inquiry under those circumstances. The only time they ever asked for their gold or for any gold was on the 29th of June 1933, after the act had passed making it unlawful to pay out gold.

Mr. TYDINGS. The Senator is misinformed, I believe. There is no way of settling the issue here, however.

Mr. ADAMS. I have the documents here.

Mr. TYDINGS. So have I the documents, but the point I want to make, before leaving the question, is that there can be no adequate debate, in my judgment, upon this matter as it now stands, and I do not want to be drawn into a discussion of its merits while a motion to refer the bill is pending.

Mr. DAVIS. Mr. President——

Mr. TYDINGS. I yield to the Senator from Pennsylvania.

Mr. DAVIS. Will the Senator tell me the total amount of funds on deposit here by the Philippine government?

Mr. TYDINGS. Around $50,000,000. I have not the exact figures. I put them in the RECORD earlier in the day.

Mr. DAVIS. What is the total amount of the bond issue?

Mr. TYDINGS. In the report of the committee the total amount of money is shown, and where it is in each of the banks of the country.

Mr. DAVIS. I mean the amount of bonds.

Mr. TYDINGS. The amount of bonded debt, I think, is stated in the report, too.

The point is that there is another side of this matter which ought to be presented. I do not wish to delay the consideration of this bill, and I shall not delay its consideration if I can avoid doing so. If the bill goes to the Committee on Territories and Insular Affairs, of which I am chairman, I shall deal with it as promptly as the circumstances will permit and the committee will permit, and I hope to have it back on the Senate floor before the week is over. I feel that there is information which the entire Senate should listen to, and which ought to be considered, in dealing with a subject such as this. It is my belief that if the bill is referred to the Committee on Territories and Insular Affairs, a more complete picture of the whole history of all the banking and bond and fiscal transactions will be had. There certainly will be more righteousness in further consideration before we act than in less consideration before we act.

I conclude with the statement that the bills fixing the parity of Filipino money with our own, setting up the mint in the Philippine Islands, establishing their currency system, having to do with all their indebtedness problems, and all other pieces of Philippine legislation, without one exception, have been acted upon by the Committee on Territories and Insular Affairs. This is the first time a bill having to do with Filipino currency and having no connection at all with American currency has been taken from our committee.

Mr. NORRIS. Mr. President, may I ask the Senator another question?

Mr. TYDINGS. Yes; I yield.

Mr. NORRIS. Again I am under the impression, and I wish to know whether or not I am correct, that the Philippine government has no gold currency.

Mr. TYDINGS. The Philippine Government, of course, has no gold currency. Does the Senator mean that it has no gold reserves or no gold currency?

Mr. NORRIS. My understanding is that they have neither one.

Mr. TYDINGS. Oh, yes.

Mr. NORRIS. Have they a gold reserve?

Mr. TYDINGS. Yes, sir.

Mr. NORRIS. Have they provided by law for the payment of their obligations in gold?

Mr. TYDINGS. Some of their obligations are payable in gold; yes, sir. I may say to the Senator, before he leaves the question, because I know he would want this information, that the Philippine bonds are among the most peculiar bonds of which perhaps the Senator has ever heard. At the option of the bondholder he may demand that the Philippine government pay the bonded debt in Swiss francs, in American dollars, or in gold. The bondholder may pick out the highest-priced money he desires the bond paid in, and demand that it be paid in that money. That is written in the bond. So if we give the Filipinos dollars that are of less value than the old gold dollars, and they had to pay their debts with those dollars, they will be able to pay only about 60 percent of as much debt as they would have been able to pay if they had established their gold fund before the enactment of the devaluation act.

Mr. NORRIS. Since the Senator has given that information, this inquiry comes into my mind: Can the Senator tell us whether, under the Philippine Constitution the Philippine Legislature have the right that is given by our Constitution to Congress to coin money and to fix its value?

Mr. TYDINGS. They have.

Mr. NORRIS. They have the same right?

Mr. TYDINGS. Yes, sir.

Mr. NORRIS. Then, assuming that what we did was right—and I always thought it was; I thought we had a constitutional right to do it—the Philippine government now would have the same right to devalue their dollar or to change the obligation in any way they saw fit?

Mr. TYDINGS. That is true.

Mr. NORRIS. They could provide as we did, I presume, that notwithstanding payment in gold was nominated in the bond, it would be a full liquidation of the debt if paid in lawful money as fixed by the Philippine Legislature?

Mr. TYDINGS. No; I may say to the Senator that in my judgment that would not be true, because, as I recall, both the Independence Act and the Philippine Constitution provide that contracts existing prior to their adoption shall receive a certain preferred status. Therefore, as these debts were incurred in the Philippine Islands, under the direction of acts of Congress, in my judgment, there might be a case,

if that were done, where the bondholder could come to the American Government and say, "You permitted a situation to exist which has cost me so much money"; and for that reason there was written into the Independence Act and into the Philippine Constitution a provision that debts then existing for which the United States had stood sponsor should be paid off without any devaluation taking place therein. I hope that answers the Senator's question.

If the views of the Senate should support my motion, I should hope to prepare a complete history of all this matter in chronological order for whatever use the Senate wishes to make of it when there is more opportunity for consideration and when there are more Senators present to hear it and to have it put in the RECORD. Not all the information that should be considered is now available; but, in my judgment, the report of the Committee on Territories and Insular Affairs would make all that information available, so that the Senate would have more information at this session upon which to predicate its judgment than it has at the present time. There is much in the point made by the Senator from Colorado, but I do not believe he paints the complete picture; and I make the assertion that if we shall act on this matter now, and it shall become law, in the next session of Congress we will have a bill to straighten it out. I may be wrong, but that is my prediction.

Mr. BENSON. Mr. President——

Mr. TYDINGS. I yield to the Senator from Minnesota.

Mr. BENSON. I have not heard the entire debate, but I should like to ask a question. Was the $50,000,000 that was deposited here deposited in the form of gold?

Mr. TYDINGS. No; it was not, but it could have been deposited in the form of gold, because it was worth that much in gold at the then existing rate of exchange at the time it was brought here. Now, the question is, Shall we give these people back the amount of property they brought over here and deposited in our banks, or, because we have said that the measurement of property is only 24 inches to the yard instead of 36, shall we given them back less than that? My contention is that we ought to give them back in international measurements exactly what they left here, and nothing less, because I may point out to the Senator that if, by the sheer force of devaluing the dollar, we could return in gold less money than they brought here measured in gold, we could still further devalue the dollar down to 1 cent of its old value, and give them one one-hundredth part of what they brought here, measured in gold; and then they would have no basis for international currency, if we were to follow the matter to its logical conclusion.

Mr. BENSON. Do I understand that the credit which the Philippine government formerly had with New York banks is now with the United States Treasury?

Mr. TYDINGS. The Federal Government has jurisdiction over it, because the Bureau of Insular Affairs designated the banks and fixed the conditions under which deposits were made, and the Filipinos had no say whatsoever about it.

Mr. BENSON. Where is the credit now? Is it with the New York banks, or is it with the Treasury?

Mr. TYDINGS. There is in the RECORD a list of the banks in which the money was deposited, and the amount in each bank. It was put in the RECORD by me a little while ago.

Mr. ADAMS. Mr. President, the situation is that all these deposits, with the exception of the one in the Chase National Bank, have been withdrawn from the banks and are now in the Treasury of the United States, drawing 2-percent interest, under an act of Congress passed during the last session of Congress making it possible to do that.

Mr. TYDINGS. That is true; but the Senator from Minnesota was not directing his attention, as I understood, to the existing status of the money.

Mr. ADAMS. As I understood, he was.

Mr. BENSON. Yes; I was, Mr. President.

Mr. TYDINGS. Oh, well, that is where it now is, but it was scattered among different banks up to 1934, when it was withdrawn. There is in the record a list of the banks in which the money was placed, and the amount of money formerly in each bank. At the last session of Congress, in pursuance of an act passed providing for its return, the money was withdrawn from the banks and deposited where it now is, on interest, pending being turned over to the Philippine government.

Mr. BENSON. If his money originally had been deposited by the Philippine government in this country, with the Treasury or with New York banks, in the form of gold, and later had been transferred to the United States Treasury in the form of gold, who now would be the owner of the gold? Would the United States Government be the owner?

Mr. TYDINGS. No; in my judgment, in that case it would be foreign gold brought here, which under an act of Congress would have been exempted.

May I ask the Senator from Minnesota a question? Sometimes the point of a matter may be brought out by making it personal, and I make it personal in this case only because it may serve the illustration. Let us suppose that the Senator from Minnesota should enter into an agreement, we will say, with the Swiss Government to deposit $25,000,000 in Switzerland. Let us suppose that about that time an agreement should be executed between the Swiss Government and the Senator's own Government establishing the relationship of money at, we will say, 2 Swiss francs for 1 American gold dollar. Let us assume that the Senator should take over and physically deposit $25,000,000 in Switzerland, and that subsequent to that time the Swiss Government should alter the value of its money. If the Senator should go to Switzerland to live, he could take the same amount of devalued Swiss money and perhaps buy just as much with it in Switzerland as he could buy before the devaluation act took place; but if he were to bring that money back to the United States, he would bring back to our country only twelve and a half million dollars in value, whereas he would have sent $25,000,000 in value to the Swiss Government.

Substantially that would be the state of the Filipino people in regard to this currency. If they should leave it all in this country and spend it all in this country, they would probably, with some modification, have as much money as they had before. But the minute it should become, per se, Filipino money, they could only make into Filipino money the devaluated status of it, rather than the original value.

I think we have no right to return less in physical value, in gold, if you please, than we received in gold at the time we entered into the contract. That is the position of the Treasury of the United States, written to us at the last session. Without going into business detail about it, they said, in effect, that we should return to the Filipinos the exact physical property they deposited with us as their guardian.

Mr. BENSON. Mr. President, I think I understand that. If the Philippine government deposited in this country gold to the amount of $50,000,000, and that money found its way into the New York banks, and later, as the Senator has indicated, into the United States Treasury, what I want to know before I vote is, does the United States Government now own that gold which they obtained from the New York banks in liquidation of the debt they owed the Philippine government, or does a New York bank, or a Federal Reserve bank, or some other private institution or individual own the gold which is now in the United States Treasury?

Mr. TYDINGS. Mr. President, that is a rather difficult question for me to answer accurately, but I think I see what the Senator is driving at.

Mr. BENSON. Does not the Senator think we ought to know the answer to that?

Mr. TYDINGS. So far as my information is worth anything, I will attempt to answer the question.

Mr. ADAMS. Mr. President, will the Senator yield?

Mr. TYDINGS. Let me answer the question first.

Mr. ADAMS. I thought I could help the Senator answer it.

Mr. TYDINGS. I should like to answer it in my own way.

I have in my pocket, let us say, a $10 gold certificate. That gold certificate says that the Government will pay me $10 in gold. The Government has the gold, but it will not

give out the gold to anyone. Yet that gold in the Treasury is actually mine, although the Government will not let me have it. It gives me something I can circulate which is equal to the value of the gold, we will say, for the sake of the argument. In the case of the Filipino government we are going to give them, for the value of the gold behind it, something which they cannot circulate except in this country. Do I make it clear to the Senator?

Mr. BENSON. That part of the story is clear. I should like to hear the Senator from Colorado.

Mr. ADAMS. Mr. President, there are two things which ought to be understood. In the first place, no gold was ever brought from the Philippine Islands and put into the banks.

Mr. TYDINGS. Of course not. I have said that 15 times.

Mr. ADAMS. The next point is that the Filipinos are getting interest on the money. We do not retain the title to that which we have loaned. That is, if we get interest, it means that we have loaned the money. We cannot have interest on our money and keep the currency at the same time. The Filipinos are getting 2-percent interest from the United States Government, when the United States Government never got the gold from them.

Mr. TYDINGS. Mr. President, it is a matter of no personal concern to me whether we give them back $30,000,000 or whether we give them back $50,000,000. It is a matter of concern to me as a Senator, insofar as I have a vote, that we treat these people 100 percent fairly. It is a matter of concern that the Government of the United States shall keep its obligations to the people of the Philippine Islands.

When the Philippine government sent that property here and deposited it with our Government it was worth so much money in gold, and I am not going to cast my vote, no matter what the business aspects may be, to give them back a value less than the amount of money which they sent here and left with us in good faith, because the minute the Philippine government becomes a sovereign nation its money must go into international trade; and if we give the Filipinos less in gold than they brought to us measured in gold, we have cheated them, defrauded them, and robbed them of the value of their property in international trade and business relationships.

Mr. President, I think that in the first place this bill should have been referred to the Committee on Territories and Insular Affairs. The first fiscal bill relating to the Philippines went to that committee, the measure establishing parity between the United States and the Filipino currency systems was referred to that committee. That is the committee to which the bill for the minting of the money in the Philippines was referred. The committee on Territories and Insular Affairs is the one to which all the indebtedness bills were referred. The pending bill has nothing to do with the policy of the United States touching banking and currency. There is not a reference to national policy in the bill. It relates entirely to our relationship with the Philippine Islands and does not alter one mite the banking and currency policy of the United States of America.

Mr. President, the bill should never have gone to the Committee on Banking and Currency; and if the Senator who introduced it had not written his own reference on the bill, the parliamentarian states that he would have referred it to the Committee on Territories and Insular Affairs.

In conclusion, I predict that if the pending measure shall be enacted, it will not be more than a year or two before we will have before us a bill to correct the mistake which the enactment of this bill in its present form, in my judgment, at least, would be.

For these reasons, Mr. President, I ask for the yeas and nays on the motion to refer the bill to the Committee on Territories and Insular Affairs, with the statement that if it is sent to that committee, so far as lies in my power, I will try to have the bill reported to the Senate before the end of the week, with comment and information which I believe that committee better than any other can furnish to throw light on this subject.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Maryland [Mr. TYDINGS].

Mr. FLETCHER. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Adams	Clark	Johnson	Overton
Austin	Connally	Keyes	Pittman
Bachman	Copeland	King	Pope
Barkley	Couzens	La Follette	Radcliffe
Benson	Davis	Lonergan	Reynolds
Bilbo	Donahey	McGill	Robinson
Bone	Fletcher	McKellar	Schwellenbach
Borah	Frazier	McNary	Sheppard
Brown	George	Maloney	Shipstead
Bulkley	Gerry	Metcalf	Smith
Bulow	Gibson	Moore	Steiwer
Burke	Glass	Murphy	Townsend
Byrd	Guffey	Murray	Truman
Capper	Hale	Neely	Tydings
Caraway	Hatch	Norris	Vandenberg
Carey	Hayden	Nye	Walsh
Chavez	Holt	O'Mahoney	

The PRESIDING OFFICER. Sixty-seven Senators having answered to their names, a quorum is present.

The question is on the motion of the Senator from Maryland [Mr. TYDINGS] that the pending bill be referred to the Committee on Territories and Insular Affairs.

Mr. TYDINGS. Mr. President, a vote in the affirmative is a vote to refer the bill to the Committee on Territories and Insular Affairs, and a vote in the negative is a vote not to refer it to that committee?

The PRESIDING OFFICER. The statement of the Senator is correct.

The Senator from Maryland has asked for the yeas and nays. Is the request seconded?

The yeas and nays were ordered, and the legislative clerk proceeded to call the roll.

Mr. BARKLEY (when his name was called). I have a general pair with the senior Senator from Delaware [Mr. HASTINGS]. Not knowing how he would vote on this question, I withhold my vote.

Mr. DAVIS (when his name was called). I have a general pair with the junior Senator from Kentucky [Mr. LOGAN]. I do not know how he would vote on this question, so I withhold my vote.

Mr. KING (when his name was called). I have a general pair with the senior Senator from New Jersey [Mr. BARBOUR]. Not knowing how he would vote on this question, I withhold my vote.

Mr. McNARY (when his name was called). I have a pair with the senior Senator from Mississippi [Mr. HARRISON]. Not knowing how he would vote on this question, I withhold my vote.

The roll call was concluded.

Mr. BILBO. I have a pair with the senior Senator from Iowa [Mr. DICKINSON]. Not knowing how he would vote on this question, I withhold my vote.

Mr. ROBINSON. I announce that the Senator from Alabama [Mr. BANKHEAD], the Senator from Colorado [Mr. COSTIGAN], and the Senator from Nevada [Mr. McCARRAN] are detained from the Senate on account of illness.

The Senator from Arizona [Mr. ASHURST], the Senator from North Carolina [Mr. BAILEY], the Senator from Alabama [Mr. BLACK], the Senator from South Carolina [Mr. BYRNES], the Senator from Mississippi [Mr. HARRISON], the Senator from Illinois [Mr. LEWIS], and the Senator from California [Mr. McADOO] are detained in important committee meetings.

The Senator from Illinois [Mr. DIETERICH], the Senator from Oklahoma [Mr. GORE], the Senator from Kentucky [Mr. LOGAN], the Senator from Louisiana [Mrs. LONG], the Senator from Oklahoma [Mr. THOMAS], the Senator from Indiana [Mr. VAN NUYS], and the Senator from Montana [Mr. WHEELER] are unavoidably detained.

The Senator from New York [Mr. WAGNER] is detained at a conference at the White House.

The Senator from Massachusetts [Mr. COOLIDGE], the Senator from Wisconsin [Mr. DUFFY], the Senator from Indiana [Mr. MINTON], and the Senator from Utah [Mr. THOMAS] are members of the Board of Visitors to the United States Military Academy at West Point, and are therefore necessarily detained.

The Senator from Indiana [Mr. MINTON] is paired with the Senator from Wisconsin [Mr. DUFFY]. If present and voting, the Senator from Indiana would vote "yea", and the Senator from Wisconsin would vote "nay."

Mr. GEORGE. I wish to announce that my colleague [Mr. RUSSELL] is detained at the White House.

Mr. AUSTIN. I announce the absence of the Senator from Maine [Mr. WHITE] on official business. He has a general pair with the Senator from Oklahoma [Mr. THOMAS].

The result was announced—yeas 20, nays 42, as follows:

YEAS—20

Bachman	Frazier	McKellar	Radcliffe
Brown	Gerry	Metcalf	Reynolds
Chavez	Gibson	Nye	Robinson
Clark	Hayden	Overton	Truman
Copeland	La Follette	Pittman	Tydings

NAYS—42

Adams	Carey	Johnson	Pope
Austin	Connally	Keyes	Schwellenbach
Benson	Couzens	Lonergan	Sheppard
Bone	Donahey	McGill	Shipstead
Borah	Fletcher	Maloney	Smith
Bulkley	George	Moore	Steiwer
Bulow	Glass	Murphy	Townsend
Burke	Guffey	Murray	Vandenberg
Byrd	Hale	Neely	Walsh
Capper	Hatch	Norris	
Caraway	Holt	O'Mahoney	

NOT VOTING—32

Ashurst	Costigan	Lewis	Thomas, Okla.
Bailey	Davis	Logan	Thomas, Utah
Bankhead	Dickinson	Long	Van Nuys
Barbour	Dieterich	McAdoo	Wagner
Barkley	Duffy	McCarran	Wheeler
Bilbo	Gore	McNary	White
Black	Harrison	Minton	
Byrnes	Hastings	Norbeck	
Coolidge	King	Russell	

So Mr. TYDINGS' motion to refer the bill to the Committee on Territories and Insular Affairs was rejected.

The PRESIDING OFFICER (Mr. MCGILL in the chair). The bill is still before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read three times, the question is, Shall it pass?

Mr. TYDINGS. I ask for the yeas and nays on the passage of the bill.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. BARKLEY (when his name was called). I have a general pair with the senior Senator from Delaware [Mr. HASTINGS]. Not knowing how he would vote on this question, I withhold my vote.

Mr. KING (when his name was called). Making the same announcement as on the former roll call, I withhold my vote.

Mr. MCNARY (when his name was called). Again referring to my pair with the senior Senator from Mississippi [Mr. HARRISON], I am advised that if the Senator from Mississippi were present he would vote as I am about to vote, and therefore I feel at liberty to vote. I vote "yea."

The roll call was concluded.

Mr. DAVIS (after having voted in the affirmative). I have a general pair with the junior Senator from Kentucky [Mr. LOGAN]. If he were present, I understand that he would vote as I have voted. Therefore I shall permit my vote to stand.

Mr. BARKLEY. I announce the unavoidable absence of my colleague [Mr. LOGAN].

Mr. LEWIS. I announce the absence of my colleague the junior Senator from Illinois [Mr. DIETERICH], in attendance upon a conference at the Conservation Department.

I announce further that the Senator from Alabama [Mr. BANKHEAD], the Senator from Colorado [Mr. COSTIGAN], and the Senator from Nevada [Mr. MCCARRAN] are detained from the Senate on account of illness.

The Senator from Arizona [Mr. ASHURST], the Senator from North Carolina [Mr. BAILEY], the Senator from Alabama [Mr. BLACK], the Senator from South Carolina [Mr. BYRNES], the Senator from Mississippi [Mr. HARRISON], and the Senator from California [Mr. MCADOO] are detained in important committee meetings.

The Senator from New York [Mr. WAGNER] is detained at a conference at the White House.

The Senator from Massachusetts [Mr. COOLIDGE], the Senator from Wisconsin [Mr. DUFFY], the Senator from Indiana [Mr. MINTON], and the Senator from Utah [Mr. THOMAS] are members of the Board visiting the United States Military Academy at West Point, and are therefore necessarily detained.

The Senators from Oklahoma [Mr. THOMAS and Mr. GORE], the Senator from Louisiana [Mrs. LONG], the Senator from Indiana [Mr. VAN NUYS], and the Senator from Montana [Mr. WHEELER] are unavoidably detained.

Mr. GEORGE. My colleague [Mr. RUSSELL] is detained at the White House.

Mr. AUSTIN. I announce the absence of the Senator from Maine [Mr. WHITE] on official business. He has a general pair with the Senator from Oklahoma [Mr. THOMAS].

The result was announced—yeas 56, nays 11, as follows:

YEAS—56

Adams	Chavez	Hatch	Norris
Austin	Connally	Holt	O'Mahoney
Benson	Couzens	Johnson	Pope
Bilbo	Davis	Keyes	Radcliffe
Bone	Dickinson	Lewis	Reynolds
Borah	Donahey	Lonergan	Schwellenbach
Brown	Fletcher	McGill	Sheppard
Bulkley	Frazier	McKellar	Shipstead
Bulow	George	McNary	Smith
Burke	Gerry	Maloney	Steiwer
Byrd	Gibson	Moore	Townsend
Capper	Glass	Murphy	Truman
Caraway	Guffey	Murray	Vandenberg
Carey	Hale	Neely	Walsh

NAYS—11

Bachman	Hayden	Nye	Robinson
Clark	La Follette	Overton	Tydings
Copeland	Metcalf	Pittman	

NOT VOTING—28

Ashurst	Coolidge	King	Russell
Bailey	Costigan	Logan	Thomas, Okla.
Bankhead	Dieterich	Long	Thomas, Utah
Barbour	Duffy	McAdoo	Van Nuys
Barkley	Gore	McCarran	Wagner
Black	Harrison	Minton	Wheeler
Byrnes	Hastings	Norbeck	White

So the bill was passed.

OPINIONS OF SUPREME COURT ON COAL CONSERVATION ACT (S. DOC. NO. 225)

Mr. GUFFEY. Mr. President, I ask permission to have printed as a Senate document the three opinions of the Supreme Court Justices on the Coal Conservation Act.

The VICE PRESIDENT. Without objection, it is so ordered.

RELIEF OF OFFICERS AND SOLDIERS OF VOLUNTEER SERVICE

Mr. ROBINSON. Mr. President, some days ago a unanimous-consent agreement was entered into by which the motion of the Senator from Kansas [Mr. CAPPER] to proceed to the consideration of the motion of the Senator from Utah [Mr. KING] to reconsider the vote whereby House bill 9472 was passed should be proceeded with on this day. I am advised by the Senator from Utah and the Senator from Kansas that the information which was called for during the course of the debate and which it was agreed should be available for the use of the Senate has not as yet been supplied. Therefore I ask unanimous consent that the agreement be rescinded.

Mr. MCNARY. Mr. President——

Mr. ROBINSON. I yield.

Mr. MCNARY. I think, however, that statement might be qualified by the understanding on the part of the Senator

from Kansas that the information will be supplied during the week. In other words, it is not the purpose of the Senator from Arkansas to have the matter go beyond the present session?

Mr. ROBINSON. Oh, no. It is my expectation that the motion will be proceeded with as soon as the information can be made available for the use of the Senate.

Mr. McNARY. But with that statement there should be some understanding about when the report will be available.

Mr. ROBINSON. I did not specify the time, because I have no information as to when the matter can be disposed of, but I will say to the Senator from Oregon, if that will be satisfactory to him, that when the information reaches the Senate, I will attempt to see that the motion is then taken up.

Mr. McNARY. I have been advised by the Senator from Kansas that the information will be available by Wednesday of this week.

Mr. KING. Mr. President, will the Senator from Arkansas yield?

Mr. ROBINSON. I yield.

Mr. KING. I talked with General Connally last evening, Sunday; and I talked with him again this morning. I had also talked with him the same day the motion was before the Senate. He said he would proceed with the greatest expedition to obtain the information. He told me this morning it would take him 2 or 3 days more and that he was using all the force at his command; that is, the clerical assistance, and would have the information at the earliest possible date. I feel sure that it will be here not later than Wednesday or Thursday of this week.

Mr. McNARY. Very well.

Mr. ROBINSON. That is the reason I am not asking the Senate to fix a definite time to proceed with the subject. It is impracticable to do so unless we wish to be constantly rescinding the arrangement.

Mr. McNARY. I was not seeking a definite time, but I wanted it specified that we are not going to let this matter run throughout the session.

Mr. ROBINSON. No; I do not wish to do that. I have said that I shall be glad to contribute to the decision of the matter as soon as it is ready. I ask unanimous consent that the order be rescinded.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the order is rescinded.

EXECUTIVE SESSION

Mr. ROBINSON. Mr. President, on Friday last it was announced that in all probability the Senator from Nevada [Mr. PITTMAN], chairman of the Committee on Foreign Relations, would desire to proceed today with the consideration of the naval treaty. I now move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE MESSAGES REFERRED

The VICE PRESIDENT laid before the Senate messages from the President of the United States submitting sundry nominations (and withdrawing a nomination), which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

EXECUTIVE REPORTS OF A COMMITTEE

The VICE PRESIDENT. Reports of committees are in order.

Mr. McKELLAR, from the Committee on Post Offices and Post Roads, reported favorably the nominations of sundry postmasters.

The VICE PRESIDENT. The reports will be placed on the Executive Calendar.

DAVID E. LILIENTHAL

Mr. NORRIS. Mr. President, there is a nomination which came in today from the President. I was authorized by the Committee on Agriculture and Forestry to report the nomination favorably, but it has not as yet been announced from the desk in the message of the President, which I thought came first in the order of business.

The VICE PRESIDENT. The reports of committees come first, and then, of course, the calendar is called for. If a message from the President has not been referred, that comes first, but the Executive message has already been referred.

Mr. NORRIS. That was my understanding, but the Presiding Officer called for reports of committees. Of course, I cannot report from a committee until the message from the President has been laid before the Senate.

The VICE PRESIDENT. The message has been laid before the Senate and referred to the proper committee.

Mr. NORRIS. The President nominated in a message today Mr. David E. Lilienthal for reappointment as one of the directors of the Tennessee Valley Authority. His term of office expires today. Last Friday I was authorized by the committee to report the nomination with a favorable recommendation when it came in.

The VICE PRESIDENT. The Senator can make report at the present moment, if he so desires.

Mr. NORRIS. I have just made it.

The VICE PRESIDENT. Without objection, the report will be received.

Mr. NORRIS. Now, Mr. President, I ask unanimous consent, inasmuch as the term of office expires today, for the present consideration of the nomination.

The VICE PRESIDENT. Is there objection? The Chair hears none, and, without objection, the nomination is confirmed.

Mr. NORRIS. Now I ask unanimous consent that the President be notified.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the President will be notified.

Are there any further reports of committees? If there be none, the clerk will state the first business in order on the calendar.

POSTMASTERS

Mr. McKELLAR. Mr. President, I am called out of the Chamber, and I ask unanimous consent that the nominations of postmasters on the calendar may be confirmed en bloc.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the nominations of postmasters are confirmed en bloc.

IN THE ARMY

Mr. SHEPPARD. Mr. President, I make the same request as to the Army nominations, that they may be confirmed at this time en bloc.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the nominations in the Army are confirmed en bloc.

THE LONDON NAVAL TREATY OF 1936

The VICE PRESIDENT. The clerk will state the first business in order on the calendar.

The Senate, as in Committee of the Whole, proceeded to the consideration of Executive F (74th Cong., 2d sess.), a treaty for the limitation of naval armament and the exchange of information concerning naval construction, together with the protocol of signature and an additional protocol, signed in London on March 25, 1936, which had been reported from the Committee on Foreign Relations without amendment.

The treaty is as follows:

The President of the United States of America, the President of the French Republic and His Majesty the King of Great Britain, Ireland and the British Dominions beyond the Seas, Emperor of India;

Desiring to reduce the burdens and prevent the dangers inherent in competition in naval armament;

Desiring, in view of the forthcoming expiration of the Treaty for the Limitation of Naval Armament signed at Washington on the 6th February, 1922, and of the Treaty for the Limitation and Reduction of Naval Armament signed in London on the 22nd April, 1930 (save for Part IV thereof), to make provision for the limitation of

naval armament, and for the exchange of information concerning naval construction;

Have resolved to conclude a Treaty for these purposes and have appointed as their Plenipotentiaries:—

The President of the United States of America:
The Honourable Norman H. Davis;
Admiral William H. Standley, United States Navy, Chief of Naval Operations;

The President of the French Republic:
His Excellency Monsieur Charles Corbin, Ambassador Extraordinary and Plenipotentiary of the French Republic at the Court of St. James;
Vice-Admiral Georges Robert, Member of the Supreme Naval Council, Inspector-General of the Naval Forces in the Mediterranean;

His Majesty the King of Great Britain, Ireland and the British Dominions beyond the Seas, Emperor of India:
for Great Britain and Northern Ireland and all parts of the British Empire which are not separate Members of the League of Nations:
The Right Honourable Anthony Eden, M. C., M. P., His Principal Secretary of State for Foreign Affairs;
The Right Honourable Viscount Monsell, G. B. E., First Lord of His Admiralty;
Lieutenant-Colonel the Earl Stanhope, K. G., D. S. O., M. C., D. L., Parliamentary Under Secretary of State for Foreign Affairs;
for the Dominion of Canada:
The Honourable Vincent Massey, High Commissioner for the Dominion of Canada in London;
for the Commonwealth of Australia:
The Right Honourable Stanley Melbourne Bruce, C. H., M. C., High Commissioner for the Commonwealth of Australia in London;
for the Dominion of New Zealand:
The Honourable Sir Christopher James Parr, G. C. M. G., High Commissioner for the Dominion of New Zealand in London;
for India:
Richard Austen Butler, Esquire, M. P., Parliamentary Under Secretary of State for India.

Who, having communicated to one another their full powers, found in good and due form, have agreed as follows:

PART I. DEFINITIONS

ARTICLE 1

For the purposes of the present Treaty, the following expressions are to be understood in the sense hereinafter defined.

A. *Standard Displacement.*

(1) The standard displacement of a surface vessel is the displacement of the vessel, complete, fully manned, engined, and equipped ready for sea, including all armament and ammunition, equipment, outfit, provisions and fresh water for crew, miscellaneous stores and implements of every description that are intended to be carried in war, but without fuel or reserve feed water on board.

(2) The standard displacement of a submarine is the surface displacement of the vessel complete (exclusive of the water in non-watertight structure), fully manned, engined and equipped ready for sea, including all armament and ammunition, equipment, outfit, provisions for crew, miscellaneous stores and implements of every description that are intended to be carried in war, but without fuel, lubricating oil, fresh water or ballast water of any kind on board.

(3) The word "ton" except in the expression "metric tons" denotes the ton of 2,240 lb. (1,016 kilos).

B. *Categories.*

(1) *Capital Ships* are surface vessels of war belonging to one of the two following sub-categories:—

(*a*) surface vessels of war, other than aircraft carriers, auxiliary vessels, or capital ships of sub-category (*b*), the standard displacement of which exceeds 10,000 tons (10,160 metric tons) or which carry a gun with a calibre exceeding 8 in. (203 mm.);

(*b*) surface vessels of war, other than aircraft-carriers the standard displacement of which does not exceed 8,000 tons (8,128 metric tons) and which carry a gun with a calibre exceeding 8 in. (203 mm.).

(2) *Aircraft-Carriers* are surface vessels of war, whatever their displacement, designed or adapted primarily for the purpose of carrying and operating aircraft at sea. The fitting of a landing-on or flying-off deck on any vessel of war, provided such vessel has not been designed or adapted primarily for the purpose of carrying and operating aircraft at sea, shall not cause any vessel so fitted to be classified in the category of aircraft-carriers.

The category of aircraft-carriers is divided into two sub-categories as follows:—

(*a*) vessels fitted with a flight deck, from which aircraft can take off, or on which aircraft can land from the air;

(*b*) vessels not fitted with a flight deck as described in (*a*) above.

(3) *Light Surface Vessels* are surface vessels of war other than aircraft-carriers, minor war vessels or auxiliary vessels, the standard displacement of which exceeds 100 tons (102 metric tons) and does not exceed 10,000 tons (10,160 metric tons), and which do not carry a gun with a calibre exceeding 8 in. (203 mm.).

The category of light surface vessels is divided into three sub-categories as follows:—

(*a*) vessels which carry a gun with a calibre exceeding 6.1 in. (155 mm.);

(*b*) vessels which do not carry a gun with a calibre exceeding 6.1 in. (155 mm.) and the standard displacement of which exceeds 3,000 tons (3,048 metric tons);

(*c*) vessels which do not carry a gun with a calibre exceeding 6.1 in. (155 mm.) and the standard displacement of which does not exceed 3,000 tons (3,048 metric tons).

(4) *Submarines* are all vessels designed to operate below the surface of the sea.

(5) *Minor War Vessels* are surface vessels of war, other than auxiliary vessels, the standard displacement of which exceeds 100 tons (102 metric tons) and does not exceed 2,000 tons (2,032 metric tons), provided they have none of the following characteristics:—

(*a*) mount a gun with a calibre exceeding 6.1 in. (155 mm.)
(*b*) are designed or fitted to launch torpedoes;
(*c*) are designed for a speed greater than twenty knots.

(6) *Auxiliary Vessels* are naval surface vessels the standard displacement of which exceeds 100 tons (102 metric tons), which are normally employed on fleet duties or as troop transports, or in some other way than as fighting ships, and which are not specifically built as fighting ships, provided they have none of the following characteristics:—

(*a*) mount a gun with a calibre exceeding 6.1 in. (155 mm.);
(*b*) mount more than eight guns with a calibre exceeding 3 in. (76 mm.);
(*c*) are designed or fitted to launch torpedoes;
(*d*) are designed for protection by armour plate;
(*e*) are designed for a speed greater than twenty-eight knots;
(*f*) are designed or adapted primarily for operating aircraft at sea;
(*g*) mount more than two aircraft-launching apparatus.

(7) *Small Craft* are naval surface vessels the standard displacement of which does not exceed 100 tons (102 metric tons).

C. *Over Age.*

Vessels of the following categories and sub-categories shall be deemed to be "over-age" when the undermentioned number of years have elapsed since completion:—

(*a*) Capital ships	26 years.
(*b*) Aircraft-carriers	20 years.
(*c*) Light surface vessels, sub-categories (*a*) and (*b*):	
(i) if laid down before 1st January, 1920	16 years.
(ii) if laid down after 31st December, 1919	20 years.
(*d*) Light surface vessels, sub-category (*c*)	16 years.
(*e*) Submarines	13 years.

D. *Month.*

The word "month" in the present Treaty with reference to a period of time denotes the month of thirty days.

PART II.—LIMITATION

ARTICLE 2

After the date of the coming into force of the present Treaty, no vessel exceeding the limitations as to displacement or armament prescribed by this Part of the present Treaty shall be acquired by any High Contracting Party or constructed by, for or within the jurisdiction of any High Contracting Party.

ARTICLE 3

No vessel which at the date of the coming into force of the present Treaty carries guns with a calibre exceeding the limits prescribed by this Part of the present Treaty shall, if reconstructed or modernised, be rearmed with guns of a greater calibre than those previously carried by her.

ARTICLE 4

(1) No capital ship shall exceed 35,000 tons (35,560 metric tons) standard displacement.

(2) No capital ship shall carry a gun with a calibre exceeding 14 in. (356 mm.); provided however that if any of the Parties to the Treaty for the Limitation of Naval Armament signed at Washington on the 6th February, 1922, should fail to enter into an agreement to conform to this provision prior to the date of the coming into force of the present Treaty, but in any case not later than the 1st April, 1937, the maximum calibre of gun carried by capital ships shall be 16 in. (406 mm.).

(3) No capital ship of sub-category (*a*), the standard displacement of which is less than 17,500 tons (17,780 metric tons), shall be laid down or acquired prior to the 1st January, 1943.

(4) No capital ship, the main armament of which consists of guns of less than 10 in. (254 mm.) calibre, shall be laid down or acquired prior to the 1st January, 1943.

ARTICLE 5

(1) No aircraft carrier shall exceed 23,000 tons (23,368 metric tons) standard displacement or carry a gun with a calibre exceeding 6.1 in. (155 mm.).

(2) If the armament of any aircraft carrier includes guns exceeding 5.25 in. (134 mm.) in calibre, the total number of guns carried which exceed that calibre shall not be more than ten.

ARTICLE 6

(1) No light surface vessel of sub-category (*b*) exceeding 8,000 tons (8,128 metric tons) standard displacement, and no light surface vessel of sub-category (*a*) shall be laid down or acquired prior to the 1st January, 1943.

(2) Notwithstanding the provisions of paragraph (1) above, if the requirements of the national security of any High Contracting Party are, in His opinion, materially affected by the actual or authorised amount of construction by any Power of light surface vessels of sub-category (*b*), or of light surface vessels not conforming to the restrictions of paragraph (1) above, such High Contracting Party shall, upon notifying the other High Contracting Parties of His intentions and the reasons therefor, have the right to lay down or acquire light surface vessels of sub-categories (*a*) and (*b*) of any standard displacement up to 10,000 tons (10,610 metric tons) subject to the observance of the provisions of Part III of the present Treaty. Each of the other High Contracting Parties shall thereupon be entitled to exercise the same right.

(3) It is understood that the provisions of paragraph (1) above constitute no undertaking expressed or implied to continue the restrictions therein prescribed after the year 1942.

ARTICLE 7

No submarine shall exceed 2,000 tons (2,032 metric tons) standard displacement or carry a gun exceeding 5.1 in. (130 mm.) in calibre.

ARTICLE 8

Every vessel shall be rated at its standard displacement, as defined in Article 1A of the present Treaty.

ARTICLE 9

No preparations shall be made in merchant ships in time of peace for the installation of warlike armaments for the purpose of converting such ships into vessels of war, other than the necessary stiffening of decks for the mounting of guns not exceeding 6.1 in. (155 mm.) in calibre.

ARTICLE 10

Vessels which were laid down before the date of the coming into force of the present Treaty, the standard displacement or armament of which exceeds the limitations or restrictions prescribed in this Part of the present Treaty for their category or sub-category, or vessels which before that date were converted to target use exclusively or retained exclusively for experimental or training purposes under the provisions of previous treaties, shall retain the category or designation which applied to them before the said date.

PART III. ADVANCE NOTIFICATION AND EXCHANGE OF INFORMATION

ARTICLE 11

(1) Each of the High Contracting Parties shall communicate every year to each of the other High Contracting Parties information, as hereinafter provided, regarding His annual programme for the construction and acquisition of all vessels of the categories and sub-categories mentioned in Article 12 (*a*), whether or not the vessels concerned are constructed within His own jurisdiction, and periodical information giving details of such vessels and of any alterations to vessels of the said categories or sub-categories already completed.

(2) For the purposes of this and the succeeding Parts of the present Treaty, information shall be deemed to have reached a High Contracting Party on the date upon which such information is communicated to His Diplomatic Representatives accredited to the High Contracting Party by whom the information is given.

(3) This information shall be treated as confidential until published by the High Contracting Party supplying it.

ARTICLE 12

The information to be furnished under the preceding Article in respect of vessels constructed by or for a High Contracting Party shall be given as follows; and so as to reach all the other High Contracting Parties within the periods or at the times mentioned:—

(*a*) Within the first four months of each calendar year, the Annual Programme of construction of all vessels of the following categories and sub-categories, stating the number of vessels of each category or sub-category and, for each vessel, the calibre of the largest gun.

The categories and sub-categories in question are:—

- Capital Ships—
  - sub-category (*a*)
  - sub-category (*b*)
- Air-craft-Carriers—
  - sub-category (*a*)
  - sub-category (*b*)
- Light Surface Vessels—
  - sub-category (*a*)
  - sub-category (*b*)
  - sub-category (*c*)
- Submarines.

(*b*) Not less than four months before the date of the laying of the keel, the following particulars in respect of each such vessel:—

- Name or designation;
- Category and sub-category;
- Standard displacement in tons and metric tons;
- Length at waterline at standard displacement;
- Extreme beam at or below waterline at standard displacement;
- Mean draught at standard displacement;
- Designed horse-power;
- Designed speed;
- Type of machinery;
- Type of fuel;
- Number and calibre of all guns of 3 in. (76 mm.) calibre and above;
- Approximate number of guns of less than 3 in. (76 mm.) calibre;
- Number of torpedo tubes;
- Whether designed to lay mines;
- Approximate number of aircraft for which provision is to be made.

(*c*) As soon as possible after the laying-down of the keel of each such vessel, the date on which it was laid.

(*d*) Within one month after the date of completion of each such vessel, the date of completion together with all the particulars specified in paragraph (*b*) above relating to the vessel on completion.

(*e*) Annually during the month of January, in respect of vessels belonging to the categories and sub-categories mentioned in paragraph (*a*) above:

(i) Information as to any important alterations which it may have proved necessary to make during the preceding year in vessels under construction, in so far as these alterations affect the particulars mentioned in paragraph (*b*) above.

(ii) Information as to any important alterations made during the preceding year in vessels previously completed, in so far as these alterations affect the particulars mentioned in paragraph (*b*) above.

(iii) Information concerning vessels which may have been scrapped or otherwise disposed of during the preceding year. If such vessels are not scrapped, sufficient information shall be given to enable their new status and condition to be determined.

(*f*) Not less than four months before undertaking such alterations as would cause a completed vessel to come within one of the categories or sub-categories mentioned in paragraph (*a*) above, or such alterations as would cause a vessel to change from one to another of the said categories or sub-categories: information as to her intended characteristics as specified in paragraph (*b*) above.

ARTICLE 13

No vessel coming within the categories or sub-categories mentioned in Article 12 (*a*) shall be laid down by any High Contracting Party until after the expiration of a period of four months both from the date on which the Annual Programme in which the vessel is included, and from the date on which the particulars in respect of that vessel prescribed by Article 12 (*b*), have reached all the other High Contracting Parties.

ARTICLE 14

If a High Contracting Party intends to acquire a completed or partially completed vessel coming within the categories or sub-categories mentioned in Article 12 (*a*), that vessel shall be declared at the same time and in the same manner as the vessels included in the Annual Programme prescribed in the said Article. No such vessel shall be acquired until after the expiration of a period of four months from the date on which such declaration has reached all the other High Contracting Parties. The particulars mentioned in Article 12 (*b*), together with the date on which the keel was laid, shall be furnished in respect of such vessel so as to reach all the other High Contracting Parties within one month after the date on which the contract for the acquisition of the vessel was signed. The particulars mentioned in Article 12 (*d*), (*e*) and (*f*) shall be given as therein prescribed.

ARTICLE 15

At the time of communicating the Annual Programme prescribed by Article 12 (*a*), each High Contracting Party shall inform all the other High Contracting Parties of all vessels included in His previous Annual Programmes and declarations that have not yet been laid down or acquired, but which it is the intention to lay down or acquire during the period covered by the first mentioned Annual Programme.

ARTICLE 16

If, before the keel of any vessel coming within the categories or sub-categories, mentioned in Article 12 (*a*) is laid, any important modification is made in the particulars regarding her which have been communicated under Article 12 (*b*), information concerning this modification shall be given, and the laying of the keel shall be deferred until at least four months after this information has reached all the other High Contracting Parties.

ARTICLE 17

No High Contracting Party shall lay down or acquire any vessel of the categories or sub-categories mentioned in Article 12 (*a*), which has not previously been included in His Annual Programme of construction or declaration of acquisition for the current year or in any earlier Annual Programme or declaration.

ARTICLE 18

If the construction, modernisation or reconstruction of any vessel coming within the categories or sub-categories mentioned in Article 12 (*a*), which is for the order of a Power not a party to the present Treaty, is undertaken within the jurisdiction of any High Contracting Party, He shall promptly inform all the other High Contracting Parties of the date of the signing of the contract and shall also give as soon as possible in respect of the vessel all the information mentioned in Article 12 (*b*), (*c*) and (*d*).

ARTICLE 19

Each High Contracting Party shall give lists of all His minor war vessels and auxiliary vessels with their characteristics, as enumerated in Article 12 (*b*), and information as to the particular service for which they are intended, so as to reach all the other High Contracting Parties within one month after the date of the coming into force of the present treaty; and, so as to reach all the other High Contracting Parties within the month of January in each subsequent year, any amendments in the lists and changes in the information.

ARTICLE 20

Each of the High Contracting Parties shall communicate to each of the other High Contracting Parties, so as to reach the latter within one month after the date of the coming into force of the present Treaty, particulars, as mentioned in Article 12 (*b*), of all vessels of the categories or sub-categories mentioned in Article 12 (*a*), which are then under construction for Him, whether or not such vessels are being constructed within His own jurisdiction, together with similar particulars relating to any such vessels then under construction within His own jurisdiction for a Power not a party to the present Treaty.

ARTICLE 21

(1) At the time of communicating His initial Annual Programme of construction and declaration of acquisition, each High Contracting Party shall inform each of the other High Contracting Parties of any vessels of the categories or sub-categories mentioned in Article 12 (*a*), which have been previously authorized and which it is the intention to lay down or acquire during the period covered by the said Programme.

(2) Nothing in this Part of the present Treaty shall prevent any High Contracting Party from laying down or acquiring, at any time during the four months following the date of the coming into force of the Treaty, any vessel included, or to be included, in His initial Annual Programme of construction or declaration of acquisition, or previously authorized, provided that the information prescribed by Article 12 (*b*) concerning each vessel shall be communicated so as to reach all the other High Contracting Parties within one month after the date of the coming into force of the present Treaty.

(3) If the present Treaty should not come into force before the 1st May, 1937, the initial Annual Programme of construction and declaration of acquisition, to be communicated under Articles 12 (*a*) and 14 shall reach all the other High Contracting Parties within one month after the date of the coming into force of the present Treaty.

PART IV. GENERAL AND SAFEGUARDING CLAUSES

ARTICLE 22

No High Contracting Party shall, by gift, sale or any mode of transfer, dispose of any of His surface vessels of war or submarines in such a manner that such vessel may become a surface vessel of war or a submarine in any foreign navy. This provision shall not apply to auxiliary vessels.

ARTICLE 23

(1) Nothing in the present Treaty shall prejudice the right of any High Contracting Party, in the event of loss or accidental destruction of a vessel, before the vessel in question has become over-age, to replace such vessel by a vessel of the same category or sub-category as soon as the particulars of the new vessel mentioned in Article 12 (*b*) shall have reached all the other High Contracting Parties.

(2) The provisions of the preceding paragraph shall also govern the immediate replacement, in such circumstances, of a light surface vessel of sub-category (*b*) exceeding 8,000 tons (8,128 metric tons) standard displacement, or of a light surface vessel of sub-category (*a*), before the vessel in question has become over-age, by a light surface vessel of the same sub-category of any standard displacement up to 10,000 tons (10,160 metric tons).

ARTICLE 24

(1) If any High Contracting Party should become engaged in war, such High Contracting Party may, if He considers the naval requirements of His defence are materially affected, suspend, in so far as He is concerned, any or all of the obligations of the present Treaty, provided that He shall promptly notify the other High Contracting Parties that the circumstances require such suspension, and shall specify the obligations it is considered necessary to suspend.

(2) The other High Contracting Parties shall in such case promptly consult together, and shall examine the situation thus presented with a view to agreeing as to the obligations of the present Treaty, if any, which each of the said High Contracting Parties may suspend. Should such consultation not produce agreement, any of the said High Contracting Parties may suspend, in so far as He is concerned, any or all of the obligations of the present Treaty, provided that He shall promptly give notice to the other High Contracting Parties of the obligations which it is considered necessary to suspend.

(3) On the cessation of hostilities, the High Contracting Parties shall consult together with a view to fixing a date upon which the obligations of the Treaty which have been suspended shall again become operative, and to agreeing upon any amendments in the present Treaty which may be considered necessary.

ARTICLE 25

(1) In the event of any vessel not in conformity with the limitations and restrictions as to standard displacement and armament prescribed by Articles 4, 5 and 7 of the present Treaty being authorised, constructed or acquired by a Power not a party to the present Treaty, each High Contracting Party reserves the right to depart if, and to the extent to which, He considers such departures necessary in order to meet the requirements of His national security;

(*a*) during the remaining period of the Treaty, from the limitations and restrictions of Articles 3, 4, 5, 6 (1) and 7, and

(*b*) during the current year, from His Annual Programmes of construction and declarations of acquisition.

This right shall be exercised in accordance with the following provisions:—

(2) Any High Contracting Party who considers it necessary that such right should be exercised, shall notify the other High Contracting Parties to that effect, stating precisely the nature and extent of the proposed departures and the reasons therefor.

(3) The High Contracting Parties shall thereupon consult together and endeavour to reach an agreement with a view to reducing to a minimum the extent of the departures which may be made.

(4) On the expiration of a period of three months from the date of the first of any notifications which may have been given under paragraph (2) above, each of the High Contracting Parties shall, subject to any agreement which may have been reached to the contrary, be entitled to depart during the remaining period of the present Treaty from the limitations and restrictions prescribed in Articles 3, 4, 5, 6 (1) and 7 thereof.

(5) On the expiration of the period mentioned in the preceding paragraph, any High Contracting Party shall be at liberty, subject to any agreement which may have been reached during the consultations provided for in paragraph (3) above, and on informing all the other High Contracting Parties, to depart from His Annual Programmes of construction and declarations of acquisition and to alter the characteristics of any vessels building or which have already appeared in His Programmes or declarations.

(6) In such event, no delay in the acquisition, the laying of the keel, or the altering of any vessel shall be necessary by reason of any of the provisions of Part III of the present Treaty. The particulars mentioned in Article 12 (*b*) shall, however, be communicated to all the other High Contracting Parties before the keels of any vessels are laid. In the case of acquisition, information relating to the vessel shall be given under the provisions of Article 14.

ARTICLE 26

(1) If the requirements of the national security of any High Contracting Party should, in His opinion, be materially affected by any change of circumstances, other than those provided for in Articles 6 (2), 24 and 25 of the present Treaty, such High Contracting Party shall have the right to depart for the current year from His Annual Programmes of construction and declarations of acquisition. The amount of construction by any Party to the Treaty, within the limitations and restrictions thereof, shall not, however, constitute a change of circumstances for the purposes of the present Article. The above mentioned right shall be exercised in accordance with the following provisions:—

(2) Such High Contracting Party shall, if He desires to exercise the above mentioned right, notify all the other High Contracting Parties to that effect, stating in what respects He proposes to depart from His Annual Programmes of construction and declarations of acquisition, giving reasons for the proposed departure.

(3) The High Contracting Parties will thereupon consult together with a view to agreement as to whether any departures are necessary in order to meet the situation.

(4) On the expiration of a period of three months from the date of the first of any notifications which may have been given under paragraph (2) above, each of the High Contracting Parties shall, subject to any agreement which may have been reached to the contrary, be entitled to depart from His Annual Programmes of construction and declarations of acquisition, provided notice is promptly given to the other High Contracting Parties stating precisely in what respects He proposes so to depart.

(5) In such event, no delay in the acquisition, the laying of the keel, or the altering of any vessel shall be necessary by reason of any of the provisions of Part III of the present Treaty. The particulars mentioned in Article 12 (*b*) shall, however, be communicated to all the other High Contracting Parties before the keels of any vessels are laid. In the case of acquisition, information relating to the vessel shall be given under the provisions of Article 14.

PART V. FINAL CLAUSES

ARTICLE 27

The present Treaty shall remain in force until the 31st December, 1942.

ARTICLE 28

(1) His Majesty's Government in the United Kingdom of Great Britain and Northern Ireland will, during the last quarter of 1940, initiate through the diplomatic channel a consultation between the Governments of the Parties to the present Treaty with a view to holding a conference in order to frame a new treaty for the reduction and limitation of naval armament. This conference shall take place in 1941 unless the preliminary consultations should

the limitation of naval armament and the exchange of information concerning naval construction, together with the protocol of signature and additional protocol, signed in London on March 25, 1936.

Mr. PITTMAN. Mr. President, the treaty is quite simple. It contains really only two important provisions. One provides that the contracting parties shall not construct any war vessels outside the present type of such vessels. Those types are described in the treaty. That provision is designed to prevent the possibility of there being invented and constructed some new character of war vessel probably far more efficient than any comparative vessel of the present types.

We have heard something with regard to the German "pocket" warship. While that particular vessel has not been given any special weight in considering this provision, yet it leads to the possibility that there may be designed and constructed some vessel with armament that will be much lighter and yet stronger, and that there may be types of guns invented that will stand a great deal heavier charge of explosives and will therefore be able to fire a heavier charge. If that should take place, then exactly the same thing would happen as happens in industry when some inventor discovers a machine that is far more efficient than the similar machines in existence. The result is that there is a scrapping of the old machines and the building of the new. So it might be with regard to battleships and with regard to all categories of warships. The provision limiting until 1942 the construction of warships to those of the present type is for the purpose of preventing a naval race along that line with great expense to all governments involved.

In this connection I must say that there is no limitation as to the number of war vessels that may be constructed within the types, with the exception of what are known as 8-inch-gun cruisers.

For that reason the treaty has a limitation of armament which is admittedly disappointing to those who negotiated the treaty and to all who favor the limitation of armaments. The question was, in the present condition of the world, particularly of Europe, whether we should have no treaty, not being able to get those nations to agree to a limitation on the quantity of armaments. The negotiators of this treaty felt that at least it would maintain the structure of a limitation of armament.

It must be remembered that the Washington Convention on the Limitation of Armaments ends on the 31st of December of this year, because under its terms, when any one of the high contracting parties gives 2 years' notice of withdrawal from that convention, it ceases to exist the 31st day of December 1936 as to all contracting parties. Japan gave that notice in 1934, so that treaty, which did have a quantitative limitation, actually and absolutely expires the 31st day of December 1936.

In 1930 there was another convention at London on the limitation of armament as a supplemental treaty to the Washington Treaty of 1912. The 1930 treaty attempted to place and did place quantitative limits upon cruisers, destroyers, and submarines, which were not carried in the Washington Treaty; but the 1930 treaty by its terms also expired with the Washington Treaty on December 31, 1936. Therefore, we either must have this treaty which is now proposed, or on the 31st of December 1936 we have no treaty looking to any limitation of armament.

While this treaty does not go far, it does maintain the thought, the principle, the desire that limitation of armament shall be accomplished at some time.

Mr. KING. Mr. President——

The PRESIDING OFFICER (Mr. POPE in the chair). Does the Senator from Nevada yield to the Senator from Utah?

Mr. PITTMAN. I yield.

Mr. KING. I inquire of the Senator if this treaty does not tie the hands of only Great Britain and the United States—and may I say parenthetically that Great Britain is one of our best friends—and leaves Italy, Japan, and Germany free to embark upon a navalistic policy which might upset our plans and injure our policies and militate against a universal treaty? When I say "universal" I mean a treaty among all the powers after the present treaty shall have expired.

Mr. PITTMAN. That is not the opinion of the Senator from Nevada, because in the very nature of things and for the very reasons the Senator from Utah has suggested it was essential to place in this treaty a clause that if by reason of any of the powers outside of this treaty continuing with building to any extent that threatened the national security of either of those powers in its opinion alone, it should have the right immediately to release itself from all limitations under this treaty simply by giving notice to the other high contracting parties of such fact and stating to what extent it felt it was necessary for it to depart from such limitation.

Then it is provided that, one government having done that, the other high contracting parties have the same right, if they see fit, to release themselves from any or all limitations under the treaty. Therefore, of course, the success of this treaty to the narrow extent to which it goes, in the long run depends on whether other governments outside of the treaty feel the necessity and the desire to conform to the limitations provided therein.

As I said, in the condition of the world at this time it was impossible to limit the number of ships that should be built. Let us take Japan, for instance. Japan has refused to enter into this treaty because at the time of the negotiating the treaty Japan insisted that it should contain a provision with regard to quantitative construction, and that that provision should guarantee to Japan a top limit the same as for the United States and Great Britain. As was testified before our committee by Admiral Standley and Mr. Davis, to grant a top limit to Japan, taking into consideration the territory she had to defend by comparison with the territory Great Britain and the United States would have to defend, her top limit would in reality grant a superiority to Japan and, therefore could not be inserted in the treaty.

Coming back to the question of whether some other country refuses to accept such limitation. If it does exceed the treaty limit, then the whole treaty fails. Let us take Japan and see what might happen. Why should not Japan adhere to this treaty? She gave her reasons for not adhering to the treaty previously because she demanded an equal top limit. This treaty has no reference whatever to a top limit. It has no reference to a limitation as to the numbers of ships except that they be limited as to type.

Japan may now adhere to this treaty unless she wants to start on a race of discovery and invention in the building of new types of destructive naval vessels, or unless she is unwilling to do what the treaty provides the contracting parties shall do, and that is at the beginning of every year to give 4 months' notice of the entire naval program of that country, the types of ships intended to be constructed, tonnage, displacement, and character of armaments. Of course, if Japan or France or Italy should desire to be secretive with regard to these matters, then we could not expect her to adhere to this treaty. If she has no objection to that provision, then all these countries would adhere to the treaty, because we really place only two limitations upon them: No. 1, that they will not build outside of present types; no. 2, that they will give to each other full information in advance every year of the types of ships, the number of ships, armament, and so forth, which they intend to construct.

I see a great advantage in that. I think it is of more advantage than anything else in the treaty. I understand the danger of a naval race through new discoveries, but the thing which causes more suspicion, more uneasiness, more hasty action with regard to naval building, is false information with regard to other navies. Japan hears, for instance, that we are going to build four new battleships or eight new 8-inch cruisers. We hear the same thing with regard to her. We know it is not true with regard to ourselves. We do not know whether it is true with regard to a foreign country. Most countries can find out what we are doing. Under our

have shown that the holding of such a conference at that time would not be desirable or practicable.

(2) In the course of the consultation referred to in the preceding paragraph, views shall be exchanged in order to determine whether, in the light of the circumstances then prevailing and the experience gained in the interval in the design and construction of capital ships, it may be possible to agree upon a reduction in the standard displacement or calibre of guns of capital ships to be constructed under future annual programmes and thus, if possible, to bring about a reduction in the cost of capital ships.

ARTICLE 29

None of the provisions of the present Treaty shall constitute a precedent for any future treaty.

ARTICLE 30

(1) The present Treaty shall be ratified by the Signatory Powers in accordance with their respective constitutional methods, and the instruments of ratification shall be deposited as soon as possible with His Majesty's Government in the United Kingdom, which will transmit certified copies of all the *procès-verbaux* of the deposits of ratifications to the Governments of the said Powers and of any country on behalf of which accession has been made in accordance with the provisions of Article 31.

(2) The Treaty shall come into force on the 1st January, 1937, provided that by that date the instruments of ratification of all the said Powers shall have been deposited. If all the above-mentioned instruments of ratification have not been deposited by the 1st January, 1937, the Treaty shall come into force so soon thereafter as these are all received.

ARTICLE 31

(1) The present Treaty shall, at any time after this day's date, be open to accession on behalf of any country for which the Treaty for the Limitation and Reduction of Naval Armament was signed in London on the 22nd April, 1930, but for which the present Treaty has not been signed. The instrument of accession shall be deposited with His Majesty's Government in the United Kingdom, which will transmit certified copies of the *procès-verbaux* of the deposit to the Governments of the Signatory Powers and of any country on behalf of which accession has been made.

(2) Accessions, if made prior to the date of the coming into force of the Treaty, shall take effect on that date. If made afterwards, they shall take effect immediately.

(3) If accession should be made after the date of the coming into force of the Treaty, the following information shall be given by the acceding Power so as to reach all the other High Contracting Parties within one month after the date of accession:—

(*a*) The initial Annual Programme of construction and declaration of acquisition, as prescribed by Articles 12 (*a*) and 14, relating to vessels already authorised, but not yet laid down or acquired, belonging to the categories or sub-categories mentioned in Article 12 (*a*).

(*b*) A list of the vessels of the above-mentioned categories or sub-categories completed or acquired after the date of the coming into force of the present Treaty, stating particulars of such vessels as specified in Article 12 (*b*), together with similar particulars relating to any such vessels which have been constructed within the jurisdiction of the acceding Power after the date of the coming into force of the present Treaty, for a Power not a party thereto.

(*c*) Particulars, as specified in Article 12 (*b*), of all vessels of the categories or sub-categories above-mentioned which are then under construction for the acceding Power, whether or not such vessels are being constructed within His own jurisdiction, together with similar particulars relating to any such vessels then under construction within His jurisdiction for a Power not a party to the present Treaty.

(*d*) Lists of all minor war vessels and auxiliary vessels with their characteristics and information concerning them, as prescribed by Article 19.

(4) Each of the High Contracting Parties shall reciprocally furnish to the Government of any country on behalf of which accession is made after the date of the coming into force of the present Treaty, the information specified in paragraph (3) above, so as to reach that Government within the period therein mentioned.

(5) Nothing in Part III of the present Treaty shall prevent an acceding Power from laying down or acquiring, at any time during the four months following the date of accession, any vessel included, or to be included, in His initial Annual Programme of construction or declaration of acquisition, or previously authorised, provided that the information prescribed by Article 12 (*b*) concerning each vessel shall be communicated so as to reach all the other High Contracting Parties within one month after the date of accession.

ARTICLE 32

The present Treaty, of which the French and English texts shall both be equally authentic, shall be deposited in the Archives of His Majesty's Government in the United Kingdom of Great Britain and Northern Ireland which will transmit certified copies thereof to the Governments of the countries for which the Treaty for the Limitation and Reduction of Naval Armament was signed in London on the 22nd April, 1930.

In faith whereof the above-named Plenipotentiaries have signed the present Treaty and have affixed thereto their seals.

Done in London the 25th day of March, nineteen hundred and thirty-six.

PROTOCOL OF SIGNATURE

At the moment of signing the Treaty bearing this day's date, the undersigned, duly authorised to that effect by their respective Governments, have agreed as follows:—

1. If, before the coming into force of the above-mentioned Treaty, the naval construction of any Power, or any change of circumstances, should appear likely to render undesirable the coming into force of the Treaty in its present form, the Powers on behalf of which the Treaty has been signed will consult as to whether it is desirable to modify any of its terms to meet the situation thus presented.

2. In the event of the Treaty not coming into force on the 1st January, 1937, the above-mentioned Powers will, as a temporary measure, promptly communicate to one another, after the laying down, acquisition or completion of any vessels in the categories or sub-categories mentioned in Article 12 (*a*) of the Treaty, the information detailed below concerning all such vessels laid down between the 1st January, 1937 and the date of the coming into force of the Treaty, provided, however, that this obligation shall not continue after 1st July, 1937:—

Name or designation;
Classification of the vessel;
Standard displacement in tons and metric tons;
Principal dimensions at standard displacement, namely length at waterline and extreme beam at or below waterline;
Mean draught at standard displacement;
Calibre of the largest gun.

3. The present Protocol, of which the French and English texts shall both be equally authentic, shall come into force on this day's date. It shall be deposited in the archives of His Majesty's Government in the United Kingdom of Great Britain and Northern Ireland which will transmit certified copies thereof to the Governments of the countries for which the Treaty for the Limitation and Reduction of Naval Armament was signed in London on the 22nd April, 1930.

In faith whereof the above-named Plenipotentiaries have signed the present Protocol and have affixed thereto their seals.

Done in London the 25th day of March, nineteen hundred and thirty-six.

ADDITIONAL PROTOCOL

The undersigned Plenipotentiaries express the hope that the system of Advance Notification and Exchange of Information will be continued by international agreement after the expiration of the Treaty bearing this day's date, and that it may be possible in any future Treaty to achieve some further measure of reduction in naval armament.

Done in London the 25th day of March, nineteen hundred and thirty-six.

Mr. PITTMAN. I offer the resolution of ratification.

The VICE PRESIDENT. The resolution of ratification will be read.

The legislative clerk read as follows:

Resolved (*two-thirds of the Senators present concurring therein*), That the Senate advise and consent to the ratification of Executive F, Seventy-fourth Congress, second session, a treaty for

with the limitations as to airplane carriers and battleships, and they have all done that so far.

Now I come to one other point.

There is provided in this treaty a naval holiday on what we ordinarily call 8-inch-gun cruisers. The kind of vessel in contemplation is defined a little differently here, but it means that. Until 1943 there will be no more building by the high contracting parties of 8-inch-gun cruisers. There will be no limitation, however, on the smaller cruisers under 8,000 tons and carrying 6-inch guns or less.

I asked the direct question of Admiral Standley why it was that we had agreed to this naval holiday. "Well," he said, "because we do not want any more 8-inch-gun cruisers. We may need some more 6-inch-gun cruisers." And he gave as another reason for it the fact that we have obtained the tonnage in 8-inch-gun cruisers provided under the London agreement of 1930, including the ships that are building and the keels that are laid down. In other words, we shall have either built or building by the 31st of December 1936 our 18 cruisers. Further, neither Great Britain nor Japan has exceeded the limit of their 8-inch-gun cruisers provided in the 1930 treaty. Admiral Standley stated to us very frankly that when they went over to London in 1934 for the purpose of negotiating the present treaty, and found it impossible, at that time their naval board had given consideration to this question.

Mr. GERRY. Mr. President, I should like to ask the Senator from Nevada another question. As I understand, the three Governments of France, Great Britain, and the United States are agreeing to this treaty?

Mr. PITTMAN. That is true.

Mr. GERRY. Under the treaty they have to state, 4 months in advance in each year, what their building program is. Suppose another nation not signatory to the treaty should, in the middle of the year, start a very heavy building program. Would we be bound to continue on the program we had outlined?

Mr. PITTMAN. What we would do then would be to turn to the treaty, in which the Senator will find provisions that at any time such occasion arises as the Senator suggests, either one of the contracting parties may, by simply notifying the others of such a fact and to what extent it desires to depart, immediately depart from it as it sees fit.

I was speaking of the 8-inch-gun cruisers. In 1935 our representatives again went over to London for the purpose of negotiating a treaty. They went back in 1936 after having gone over the whole problem with the Department of State and with the General Naval Board here. The General Naval Board had determined before our representatives went to London in 1936 that we did not want any more 8-inch-gun cruisers until 1942 if we could keep the other nations from building such cruisers; but if the others start to building such cruisers, then out of necessity we will have to build vessels of that type. We limit ourselves solely on the theory that the other nations will not build that kind of vessels.

Admiral Standley said that he had changed his opinion with regard to the efficiency of the 8-inch-gun cruisers in every case; that he had charge of the 8-inch-gun cruiser fleet at one time, and from his experience with it he had found that certain naval work had to be done which could not be done as effectively with the 8-inch-gun cruiser as with the small cruiser, such as a 6-inch-gun cruiser, particularly inshore work and in shallow waters. At one time, before he had personal charge of these cruisers, he had had the idea that 8-inch-gun cruisers could perform the work of 6-inch-gun cruisers, and, of course, with more efficiency.

Mr. President, I feel that this statement covers the substance of the treaty.

Mr. ROBINSON. Mr. President, will the Senator yield?

Mr. PITTMAN. I yield.

Mr. ROBINSON. It is recalled that at the time of the London Naval Conference the subject matter which the Senator is now discussing was quite an issue, Great Britain insisting on stopping the construction of 8-inch-gun cruisers, our naval experts insisting that the 8-inch-gun cruiser was peculiarly adapted to our needs.

The fact is that the naval authorities now recognize that a well-balanced navy may require an additional number of 6-inch-gun cruisers, and that there are certain kinds of service which the 6-inch-gun cruiser can perform better than it can be performed by the 8-inch-gun cruiser.

We have now 18 such cruisers, as I remember, to 15 for Great Britain, and we would not build any more even if we had liberty under the treaty to do so.

Mr. PITTMAN. The Senator is correct. Admiral Standley said we would not build any more prior to 1942 unless other nations started building, and therefore he hoped they would not build any more. It might be necessary for us to have some additional 6-inch-gun cruisers, or, if some nation like Great Britain, by reason of its shore lines, desired more 6-inch-gun cruisers than we had, we might make up the difference in airplane carriers or something we needed more. The whole theory was, however, that the other nations would not, unless they were forced to do so, build any more, so far as they could avoid it. They had an agreement that they would actually try to hold down construction of ships of the present type, battleships and big cruisers. That is as far as the convention could possibly go.

I believe the Senator from Utah has stepped out of the Chamber. He wanted to know whether or not this treaty did not place the United States and the other contracting parties at a disadvantage with those governments which do not sign the treaty, by enabling them to obtain notice as to what we were doing, and those governments not giving us notice as to what they were doing.

The notice provided for in the treaty is a mutual and confidential notice, not a public notice. It is a notice from one contracting power to another contracting power. It is not to be published to the world. It is to be private information.

I say that secret information on the part of some governments gives an advantage. Secret information on the part of our Government never gives us any advantage, because by reason of our habits and customs we do not keep things secret, and we do not seek the secrets of other nations.

The form of notice provided, this form of publicity with regard to a naval building program, in my opinion, is one of the best things that could possibly be adopted to prevent naval races.

Senators have transcripts of the hearings before them, containing the testimony of Mr. Davis and the testimony of Admiral Standley. Admiral Standley testified before the committee, and brought conviction to all of us that he would not allow anything to go into the treaty, with his knowledge, which could in the slightest degree be against the interests of our Government. He said there never was a time when he did not consult the naval board in the United States with regard to any material thing before he considered including it in any tentative treaty.

For the reasons I have stated, I feel that our country has, in this treaty, as strong protection as could be given it by our naval board. I think this is a step in the right direction in an attempt to prevent the building of any more large cruisers at the present time. I think it is a step in the right direction in an effort to keep one nation from threatening some other nation by a surprise movement.

I note that the Senator from Utah has now returned to the Chamber. I will repeat to him that the notice we provide for is notice to signatories of the treaty, and not to the public. No one would get any information as to what we were doing in regard to our program 4 months hence, except the contracting powers. But, as I have said before, as far as the United States is concerned, we have never been able to conceal anything, and have never tried to. We rarely try to find out anything any other nation is doing in regard to its naval program until after it is completed.

In the opinion of the committee, this treaty is one of the best things we could have in the way of an agreement between the nations, one of the fairest agreements to us. At least, we are maintaining the spirit of peace among nations; we are not allowing all treaties with regard to the limitation of armaments to die. We are keeping the spirit alive, as attenuated as it is. We are entering into a treaty which

system of government, having a very small intelligence department, very much smaller than any other government with regard to espionage in foreign countries, we are the last to find out what other governments are doing.

If, for instance, some foreign country which feels that it may have a naval race with us should enter this treaty, in which it promises to give us at the beginning of every year, as we do to it in the case of our Navy, a full exposition with regard to its navy and its plans for next year, and we should find that that country was laying down an extraordinary number of capital ships, a very large number of battleships and cruisers, at least it would give us the opportunity of going to that government and saying, "Here, why start this naval race? Why attempt to increase your large cruisers by five or six and your battleships by three? If you do, it is absolutely inevitable that the United States will do the same thing. We have all the resources you have, and you cannot accomplish anything by attempting that character of naval race"; and in most cases, I think, in the 4 months' time that there would be to consider that matter, it would have a very beneficial effect in keeping down naval races.

Mr. GERRY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Rhode Island?

Mr. PITTMAN. I do.

Mr. GERRY. I should like to ask the Senator if the nation laying down the ships has to give that information when she first lays them down or each year, stating the progress of the ships.

Mr. PITTMAN. In the first place, they must give notice at the beginning of the year, or at whatever time they make out their budgets; and that notice must be given 4 months in advance of laying down any keel under that program.

Mr. GERRY. Then, are they to report the next year, 4 months in advance, how far the vessel has progressed?

Mr. PITTMAN. They are, because each year they are to make a full report as to their ships, the ages of the ships, replacements, and new ships.

Mr. GERRY. And when they will be launched or how far their construction has progressed?

Mr. PITTMAN. From the list of information required in the treaty, I take it that that information would have to be given. In fact, the questionnaire is set out in detail in the treaty, which undoubtedly would require that information.

Mr. VANDENBERG. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Michigan?

Mr. PITTMAN. I yield to the Senator.

Mr. VANDENBERG. Would it be fair to say that the only conclusive and definite obligation under the treaty upon any signatory is the obligation to which the Senator now refers respecting exchange of information; that otherwise, under justified circumstances, there is always an escape clause in respect to every other obligation? Would that be a fair statement?

Mr. PITTMAN. I should say "yes." I should say that the clause in the treaty which allows each one of the governments to determine for itself if and when it thinks its national security is threatened by the act of some other government, would permit it, upon stating those facts to the other high contracting parties and stating to what extent it desires to depart from these limitations, to do so.

Mr. KING. Mr. President, will the Senator yield again?

Mr. PITTMAN. I yield.

Mr. KING. This is somewhat a repetition of what I said a moment ago. Notwithstanding the very able and fair presentation made by the Senator from Nevada, it seems to me that we are tying the hands of the two large nations of the world which most desire peace; namely, the United States and Great Britain. We are placing, so to speak, our cards upon the table, and telling Germany and Italy and Japan just exactly what we are going to do in the matter of naval construction. They are not telling anybody else. They will utilize any information we make available to them for their advantage and for the disadvantage, particularly, of Great Britain, if not of the United States.

It seems to me that unless Japan and Italy and Germany are parties to this treaty—and I assume that they would not join—we are placing ourselves, as well as Great Britain, at more or less of a disadvantage.

I shall be very glad to have the Senator explain that matter a little further, because it seems to me that the treaty is not founded upon a proper recognition of the rights of the United States and of Great Britain.

Mr. PITTMAN. Mr. President, it was testified before our committee by Admiral Standley and by Mr. Davis that there were parties to the London agreement and also to the Washington Treaty who were unwilling to have governments outside of those treaties enter into this treaty. In other words, the negotiation of this treaty was called in accordance with the Washington Naval Limitations Treaty; and it provided that it should be called among the parties to the Washington or London Naval Treaties. At the present time there are some governments which are not parties to the 1930 London Treaty, which treaty placed limitations upon the numbers and tonnage of cruisers, destroyers, and submarines, which were parties to the Washington Treaty. They were unwilling, for instance, to have such other governments taken into the negotiations; but they hoped, as the testimony shows, to bring about joining in these treaties by the very governments the Senator now speaks of through bilateral treaties.

It is very easily conceivable that some party to this treaty would not desire to treat at the present time with some of the governments the Senator has in mind, by reason of a view that they hold with regard to actions of such governments with regard to certain other treaties. Nevertheless, none of them would object, possibly, to the United States or Great Britain entering into a bilateral treaty covering exactly the same subjects that are covered in this treaty with any government in the world. So they are hopeful of bringing into this treaty eventually all of those governments and states through bilateral treaties.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Idaho?

Mr. PITTMAN. I do.

Mr. BORAH. I do not ask this question by way of controversy, but in view of the history of competitive naval building in the past, just how far may we rely upon any information given us by another nation as to what it is actually doing?

Mr. PITTMAN. That depends exactly on how far the Senator feels we have been deceived in the past.

Mr. BORAH. I do not know that we have been deceived.

Mr. PITTMAN. I do not know. It is very difficult for me to say how far we can rely on those matters. I am not able to say, for many governments seem to hold it honorable to violate a treaty if such act is in their interest; but I doubt if any government would misrepresent a fact under a treaty while a party thereto.

Mr. BORAH. I do not know that it is an argument against the treaty, because perhaps it is the very best that can be done. I know of no way to remedy it, but when we consider the naval competitive building which took place between Germany and Great Britain prior to the World War we know that there was positively and affirmatively deception upon both sides. It is true there was no treaty, but in all probability under similar circumstances a treaty would not make much difference.

Mr. PITTMAN. There has been some compliance with some of our treaties. We recollect that the Washington Limitation of Armaments Treaty had no limitation as to quantity except upon what were called capital ships or battleships at that time and airplane carriers. As I recollect, that was all. There was no limitation on cruisers of 10,000 tons or less, and there was no limitation upon submarines, and there was no limitation upon airplanes. All that any government had to do to comply with that treaty was to comply

will exist until 1942, one based on the broad principles of full and complete notice to each of the signatory powers, providing plenty of time for discussion of any proposed program before the keels of the vessels shall be laid.

Mr. President, to my mind this treaty will do much in the future toward the limitations of navies.

Mr. LEWIS. Mr. President, I have listened to the able Senator from Nevada [Mr. PITTMAN], the chairman of the Committee on Foreign Relations of the Senate, ably present the matter which naturally we reviewed as the testimony was given us before the committee as basis for ratification of the treaty. The treaty before us in many respects confessedly does not meet the aspirations of the committee, of the Navy Department, or of our citizens. The question confronting us is how far its contents justify us in adopting it.

Mr. President, it is unfortunate that the past history of treaties, and of the dealings of the signatory parties to treaties, have not much encouraged us to attach great weight to the fidelity of treaties or of the methods in which they have been administered. We do not indulge in mere metaphor of speech when we may say that the vitality of a treaty can best be described as something not more durable than a decree carved upon a snowbank by the point of a sunbeam, so melting and evanescent it ever develops.

Yet we have in this treaty, sir, a lesson which I trust may serve as a guide in future dealings with foreign nations.

At a moment such as that to which the able chairman of the committee has referred, a crisis such as the condition of the world presents, when we all note the nations at the throats of each other, and those who formerly pledged friendship now in open league of death against each other, and seemingly pledged to any policy of utter demolition of their people and destruction of their nation, it is well that some evidence be given on the part of nations such as our own of a desire to fix and pursue some other method that may lead to some different result.

Mr. President, I wonder if Senators have had time to contemplate that this is the first gesture of confidence and friendship that has passed between our Nation and the nations formerly designated in the World War as its rivals since the war ceased and the treaty which we speak of as the affair of the peace of Versailles was consummated. If this shall serve as a revival of faith between nations, without which civilization would lapse, if not descend to a barbaric depth; if it shall serve to bring us back, sir, to where, in something of the spirit of brotherhood of man, we may be assured of a new life of confidence among nations and respect for the will and honor of mankind, that which shall have been achieved and agreed on such terms is its own reward. If it is conferred on such basis that it may be executed faithfully, we shall have achieved handsomely.

There is in the treaty at present before us, sir, a method which, if followed and pursued by other nations, may lead to the way of peace, and may inaugurate a system, sir, of friendships among these nations that may prevent in after days that crash of nations and that demolition of mankind which we designate as war. We have given to the world in the little substance now before us an evidence that the United States of America seeks some method by which every discussion may be in the atmosphere of friendship and every result lead and tend to peace. If this treaty offers that, sir, as an example and tenders it as something of an emblem for guidance in future courses, we shall then have had much compensation in general result, if lacking it may be in some detail that we may have sought.

Mr. President, let us be frank to say that the treaty does not consummate what was the highest wish of those connected with it—the limitation of armament. There is nothing in the treaty that assures our fellow citizens that by its operations and its automatic conclusions we shall save our people from the expense of the heavy and multiplied burdens of war; but as we enter the portals of hope and move through the mansion of desires we may reach the end of the multiplication of force as a method of settling the disputes of mankind. We, at least, sir, may be said to infuse some trust for a nobler course. Mr. President, this treaty adventures upon that policy. For myself, let it be said, unkind as seems to be the utterance, that I do not attach much weight to the promise of what will be done for us in the future, either as imparting accurate information or as deterring and obstructing future destructions. The very provisions of the treaty in utter frankness, as well as the conduct of the past of nations, display and disclose to our country how little we may rely upon the mere written promise made to us by other nations, especially by that which we call a compact or treaty. However, if the relationship disclosed in the making of this document, and that which at present governs us in the dealings with the signatory nations, can give us confidence so that by virtue of that relationship we shall have something upon which in the future we may depend, then, sir, that of itself is a security that rewards our ratification of this treaty.

Mr. President, there is a view to the treaty, however, which appeals to me in a very individual manner. I have, with the consent of the Senate, and oftentimes at the expense, perchance, of its patience, intruded the question of the debts which foreign nations owe us. Fourteen billions of dollars are long owing and are due upon this day. Such treatment of default and faithfulness to this, our America, must by all honor be deplored, and Senators who have gathered to hear me now have, many of them, joined in protest against that treatment of our Nation by these, our debtors.

Fortunately, we are able to point to the fact that it is some of our debtors—I may say the principal debtors—who have joined in the present arrangement which we speak of as a treaty. The demonstration of their intent to harmonize with us upon the courses of nations, and the indication of willingness on their part to come to terms which in some degree will be mutually satisfactory to us all, serves to promote good will, and is of itself a prospect, as I see it, of better things in the future.

We are on the eve, as I behold it, of some arrangement looking to a satisfactory adjustment of the foreign debts. I cannot, from the spirit shown, see ahead of me the complete payment of the debts. I cannot anticipate from late events the discharge of the debts in money. However, I see in the ratification of this treaty the immediate prospect of some new relation looking to the discharge of the obligation in some manner which this country can accept and which will revive our confidence in these, our debtors, and will return them to confidence in and friendship with ourselves, their creditors.

Mr. President, we have observed the conduct of nations abroad. May I be so bold, sir, even at the expense of an expressed vanity, to say that my efforts here in this body, in the Senate, joined to the support of eminent Senators on both sides of this Chamber, have served to arouse the world to note the wrong which was being done our Nation and to recount the injustices of certain nations toward us and the manifest frauds which we felt they were perpetrating upon us. These evidences have done a great deal to move our debtors to reflect that they were on the eve of losing the respect of mankind and that of the whole earth, which had witnessed how in their travail and in the hour of their despair and when threatened with helplessness and death this Nation came to their rescue, without which there would have been no refuge and through which alone they were preserved.

Surely these debtor nations could not fail to see that all the world beheld that truth; and apparently it was this that has shamed these nations in their attitude of ignoring the debts and by their conduct defying the efforts on the part of this land to collect its just claims.

Thus we gather, sir, that in France the leader of the Socialists, Mr. Blum, and the leader of the joint front, Mr. Herriot, make an issue before their people in behalf of the payment or adjustment of the debts due the United States. Each in revealing spirit calls attention to the benefits to be gained by the new friendship between these lands. Each urges that their nation discharge their obligations in such a manner as

to meet the approval of this their friend. To use the words of one of the French statesmen in Paris, "Where would this country have been," says he, as his words echo out to the multitude which he confronts, "Where would this country have been were it not for the friendship of the United States?"

And now, sir, we are pleased to note that the Chancellor of the Exchequer, Mr. Chamberlain, of England, at his country home only on the Saturday which has just passed, had occasion to remark this hope, to use his exact phrase as given us in the cables, that—

> Something may be done again to bring us closer together with the United States, and that the United States would no longer doubt the fairness on the part of England or question the honor of her officials.

Mr. President, there is no desire on the part of this Government to divorce itself from the friendship of other nations worthy of our friendship. Indeed, there is willingness on our part to do that which will make us worthy of their continued confidence. We know, sir, that in England, where heretofore they have refused to acknowledge the debt in their budget in anywise whatever, or to pay any of its interest in the past, there comes forth the statement that though they need all their present cash for their defenses in the construction of armament, and for such other reasons as they have pointed out, still their will is to find a way, apart from that of the past, by which other obligations may be met, this meaning the debts due the United States.

Mr. President, I have noted since these observations were made that one of England's great spokesmen, speaking through one of her other statesmen, says that it was not their intent to take from the shelf what had been previously considered and disposed of—the hope of any land to pay money, or, to use his word, lest I do him injustice, "gold."

Here I take the liberty of returning to my first expression on this subject, and I hope the honorable Members of the Senate will indulge me when I refer to it. It is evident to my mind, sir, that there is a proposition now before our Government, and I may be pardoned if I assert that I have reason to know that it takes on a concrete form, whereby small bonds may be issued by our debtors, and thus there may be a circulation of securities which may be passed from generation to generation in our own land, and which assure a compensation and contribution on our debts due, the nature of which our people can wholeheartedly accept.

In addition thereto there may be, and I dare say and assert there should be, some arrangement concerning interchanges of treaties of trade. We speak of them, sir, as reciprocal treaties. I do not in principle concur with them all. I belong rather to that school of men called Democrats who believe in the doctrine of necessary protection by an adjusted tariff instead of a profitable and monopoly tariff. However, I feel in connection with and following this treaty that there will come forth some suggestion that will bring to our people materials and goods of a kind that we do not produce sufficient for ourselves, and in that respect another form of contribution and payment to be added, which, taken all in all, let me conclude, is evidence of a further and new revival of mutual confidence between nations, and a return once again to the standard where they will deal with each other on the basis of national pride and international honor.

Mr. President, I can but say, sir, that I am greatly interested in this subject upon a phase so personal that I should not disguise it before this body. I should wish to see brought about some settlement respecting the debts due the United States by foreign governments so the proceeds could at once be applied to the demand of taxes that are soon to be laid upon our people out of the necessity of conditions of which we are all aware. I feel that the adjustments, as I understand them, in prospect, even if I am mistaken, to a great degree, if not wholly, will contribute heavily to ameliorate these taxes and relieve our people of great burdens which just now shadow them. Some of our people are suffering fear; some are taught that they have a burden approaching that would crush them; some, not realizing the limitations that will be provided, feel, nevertheless, that it is an offense to put this burden of taxes upon them, however great the necessity that justifies it. Therefore, sir, let me not withhold that my anxiety as to the debts takes on two forms, one of which is my constant insistence that they be paid in some form or adjusted to some sum as a matter of justice to us. The other is my desire that the money come forth early, in order that it may be applied to the obligations of this Government, and rescue it from putting further weight of taxation upon the shoulders of our own people.

Mr. President, the Senate has indulged me at greater length than I expected to impose upon it. I have now but this to say, sir: This treaty, while not serving all that I desire, is better than many ever hoped for. It is an expression antagonistic to old hostilities and envy and indicative of a kindly spirit of a welcoming brotherhood. It gratifies me to say that we may give it our approval on this basis as a lesson for other governments dealing with us and dealing with other nations in the world. Here it is that we have entered upon an era where, sitting around the table as friends, we may admonish the world, in the words of the great Cardinal Richelieu:

> Take away the sword; states can be saved without it.

I gratify myself in supporting the motion of the able chairman of the committee for ratification of the treaty; and I thank the Senate for its indulgence.

Mr. WALSH. Mr. President, I should like to make a very brief statement with respect to the treaty. My observations will be more in the nature of an analysis of the treaty and particularly as to how it leaves the problem of international naval disarmament.

Mr. President, the naval treaty, which is now before the Senate for ratification, is an agreement with respect to naval armaments entered into between representatives of Great Britain, France, and the United States at the naval conference held in London from December 7, 1935, to March 25, 1936.

In considering this treaty we should recall the fact that the Washington Naval Treaty of 1922 and the London Naval Treaty of 1930 both expire on December 31, 1936.

The London Treaty contained a mandatory provision requiring the holding of a conference during the year 1935 of the representatives of governments who were signatories to that treaty. Also the denunciation of the Washington Treaty by Japan required a conference on that treaty as provided in its terms.

Attending the conference, in addition to the three countries who signed the treaty now before the Senate for ratification, were Japan and Italy. The representatives of these countries did not join in signing this treaty. It will be recalled that Japan withdrew from the conference because the other countries refused to agree to her demands for naval parity with Great Britain and the United States. Representatives of Italy remained and participated in the conference until the end. Though the representatives of Italy did not sign the treaty, it is understood that the technical features of the treaty are acceptable. Undoubtedly the Ethiopian war was a factor in preventing Italy from attaching her signature to the treaty at the time.

Naturally the Senate is interested in knowing just what this treaty does, not necessarily the details of naval armaments that are permitted or curtailed but the fundamental question of whether or not the treaty is moving in the direction of further naval armament limitations.

Speaking personally, the treaty is disappointing in that it sets aside the slight restrictions and limitations that were established in the Washington and London Treaties on the naval armaments permitted each signatory. Our people have been sincerely interested in making real agreements for limitation of naval armaments. We did not expect radical reductions in naval armaments through treaty negotiations with conditions as they are in the world, but we did hope and desire a gradual and steady movement in the direction

of reduced and continued limitation of naval armaments. This treaty is disappointing, for it is a recession, as quantitative naval armament limitations are now to end.

By quantitative limitation is meant a limitation on the number or total tonnage of ships that can be built by one of the great powers. The Washington Treaty provided a limitation upon the number and total tonnage of battleships and on the total tonnage of aircraft carriers. The London Treaty contained a limitation on the total tonnage of cruisers, destroyers, and submarines. The limitations of these two treaties expire in December 1936, and the new treaty contains no limitation on the number and the tonnage of battleships, cruisers, submarines, destroyers, and aircraft carriers.

One qualification should perhaps be made to this general statement, namely, that this treaty contains or provides for a building holiday for 6 years on 8-inch-gun cruisers and 6-inch-gun cruisers whose displacement exceeds 8,000 tons. This prohibition applies only to ships to be laid down after December 31, 1936. In other words, there is a restriction against cruisers of this particular type for 6 years. However, the number of 6-inch-gun cruisers of less than 8,000 tons is unlimited. Other than this, the treaty contains no limitation on the number of naval craft, but does place restriction on the kind—i. e., the size and gun caliber of individual ships. In other words, opportunity for a race in numbers of naval craft is left open, but opportunity for a race in kind of naval craft, meaning size of ships and size of guns, is stopped.

Attention should be called to one other feature, namely, the provision for advance notification of building programs upon the part of the signatories of the treaty and exchange of information as to the detailed characteristic of each naval craft that is to be built. Between January and April of each year each signatory nation must notify the other nation as to the number of each type of naval craft it agrees to limit its construction to during the ensuing year; also, 4 months before the date of the laying of the keel of any naval craft the signatories are to be notified in respect to the name, category, horsepower, speed, number, and caliber of guns, et cetera, et cetera.

There is no mention or reference in this or previous naval treaties to the number or kind of naval aircraft. I assume that the reason why there has never been any effort made to place limitation upon naval aircraft construction is due to the fact that some countries, as Great Britain, do not separate their aircraft defense into army and navy units, but have a combined aircraft defense.

Another reason is that the building of airplanes has become so comparatively easy, that in event of war or threatened war any nation could increase its aircraft with great rapidity, and further, it would be difficult to determine whether commercial planes were being built with military features. This would give rise to constant dissension and suspicion.

Mr. CAPPER. Mr. President, I intend to vote for ratification of the pending London Naval Treaty, although without any particular enthusiasm. It does not seem to me it will have any great effect, if indeed any at all, in reducing armaments. I am not even strongly hopeful that it will lessen the world competition in the great armament building race that in the end threatens the destruction of civilization as we know it.

But those who have negotiated this pact very likely have done the best that could be done. It is regrettable, of course, that two of the Washington Treaty powers, Italy and Japan, have not signed the new pact, nor indicated they would do so. I sincerely hope Mr. Norman H. Davis is right in the hope he expressed that later Italy will sign the treaty, and perhaps even Japan.

As I understand, only this country and Great Britain were willing to continue the provisions of the Washington Treaty in regard to ratios and limitations on war vessels. Japan insists upon her right to have a naval force equal to that of the United States and Great Britain if and when she feels that her national security demands it. In the very mild form in which limitation is attempted in the pending treaty, it may be that Japan will see fit to become signatory later.

As I understand, there at least is nothing objectionable in this treaty. There are some limitations on naval armaments left out which I, of course, would be very glad to see included in such an agreement. It is very distressing to me to see our Nation and the other leading nations striving to outdo each other in preparations for war. It does seem to me that the excessive preparations for war of themselves engender the war spirit and lead toward war, not away from it.

Also these huge expenditures for war purposes tend to impoverish the nations making them. They greatly increase tax burdens and throw the economic machinery out of gear. Too often in history have huge preparations for war caused so much suffering and discontent among the people of a nation that its leaders have felt impelled to make war in order to divert attention of their peoples from their internal troubles.

Mr. President, I felt compelled to vote against both the huge Army and Navy appropriation measures in this session of Congress because I believed they were extravagant and inherently dangerous in their probable effects on the peace of the world. I feel that a vote for this treaty is, at least, an expression of a sincere desire on the part of the people of the United States to limit our own armaments to the lowest point consistent with an adequate national defense.

There is no question in my mind of the sincerity of our people in desiring to live at peace with the world. Nor is there any question that the people of this country do not intend to be called again to the colors to fight other nations' battles.

This treaty, in contrast to the appropriation bills this Congress has passed, at any rate is a step in the direction of preserving world peace. So I am glad to support it for that reason.

As I understand, there are two main objectives in the pending treaty:

First, it attempts to preserve the foundation, in principle at least, of general naval limitation.

Second, it attempts to discourage, if not to prevent, a naval armament race.

It provides also for a full exchange of information among signatories as to projected and actual construction. This feature alone, if carried out in good faith and among enough nations, may be helpful in allaying the fears of what other nations are doing, which enables those interested to bring about larger expenditures in the name of national security than are necessary.

Mr. President, I cannot close without saying that I believe the national defense policy should be shaped on the basis of defense of our own Nation and in line with our obligations under the Kellogg-Briand Pact. That policy should include control of the munitions industry to take the profit out of war and out of preparations for war.

Mr. President, I shall support this treaty, in which we again, in effect, make profession of our desire for world peace. I can only express regret that our actions in trying to keep up with other nations in preparations for war seem to me sadly out of line with the professions which we make.

Mr. JOHNSON. Mr. President, at this late hour I do not rise to express any particular objection to the treaty that is before us, nor to object to its ratification now; but I wish to make plain to those people for whom I speak, few in number, and those to whom I speak, that I do not regard this treaty either as a naval limitation treaty nor a disarmament treaty in any respect whatsoever. It is a treaty, sir, that has its escape clauses, and will be known always by virtue of the fact that it has so many escape clauses to preclude the doing of anything the parties do not wish to do; and under it, sir, there never can be limitation of naval building nor disarmament.

Mr. President, treaties are the only mode by which we may have our international relations set upon paper and agreed to, just as contracts between human beings as to their future conduct and as to those things which may be important to them in their grave concerns. It is a sad thing—a very sad thing, indeed—that treaties of late have not been observed as we are accustomed to observe the particular agreements that we make as individuals, and the contracts that we make

for those things of consequence to us. That, I concede, is no reason why treaties should not be made, because they are the only mode that is accorded us of writing agreements between nations.

Nevertheless, sir, when we see what has transpired in the past few years in the world, the utter disregard of treaties, it leads to a bit of skepticism as to the sort of thing that will be accomplished by any treaty of any kind or of any character. The thing that I wish to impress upon the people of the United States, if I have the power—which I do not by any means claim—is that this treaty is not accomplishing the purposes which we desire accomplished when we enter into obligations with foreign governments regarding disarmament and regarding naval limitations. It has nothing of either, and it has so many modes by which escape may be had under any contingencies that if we are endeavoring to make our people believe we have accomplished something by the treaty that has just been made, we are doing something which is without warrant.

The very excellent résumé of the treaty by the Senator from Massachusetts [Mr. WALSH] conclusively demonstrates just exactly what it is and what it will not do, and principally what it fails to do. The very lack of enthusiasm upon the part of those who present the treaty to us makes it perfectly plain that here we are simply ratifying an agreement that was made because our friends who went across the water wanted "an agreement" and made "an agreement."

On a historic occasion in this body concerning another treaty, which, in the language of the distinguished Senator from Illinois [Mr. LEWIS], led us into the portals of hope and made possible that millenium that we all trust may come to us and the peace that we all seek in days that are to come, I spoke of that treaty then before this body that was lauded all over the world as the beginning of the end of fratricidal strife, the beginning of the end of internecine warfare, the beginning of the end of any conflict between peoples after its execution, and the beginning with us of the glory and the hope of peace on earth and good will to men—a treaty more honored since in the breach than in observance—I spoke concerning that treaty in the language of Francois Villon, who wrote concerning a "friend" of his thus:

> To Messire Noel, named the neat
> By those who love him, I bequeath
> A helmless ship, a houseless street,
> A wordless book, a swordless sheath,
> An hourless clock, a leafless wreath,
> A bed sans sheet, a board sans meat,
> A bell sans tongue, a saw sans teeth,
> To make his nothingless complete.

And I vote for this treaty, sir, with that description in mind.

Mr. ROBINSON. Mr. President, no one advances this treaty as indicative of great progress toward the effective limitation of armament. It is well that Senators should understand that the terms of the treaty are not highly gratifying to those who patricipated in its negotiation. If there is one subject in which mankind generally has been disappointed since the close of the World War, it is that which is now being discussed and which is relevant to the issues involved in this treaty, namely, the limitation of armaments.

There are more armed men on earth now than there were before the storm broke in its fury in 1914; and the state of mind demonstrated by the various peoples who constitute the population of the world does not inspire great confidence in the hope for the future.

It would have been pleasing to everyone who hears me, and encouraging to millions scattered throughout this country, and indeed to millions in other lands, if it had been found possible to work out at the recent naval conference an arrangement by which the burdens incident to large naval establishments might have been substantially diminished. The fact that the treaty does not contemplate a large measure of limitation on naval armaments is chargeable to the conditions under which it was negotiated.

One who may claim some measure of familiarity with such problems found difficulty when the conference convened in feeling the hope that its efforts would be successful. That they have been only partially successful has been made clear by the terms of the treaty itself and by the statements that have been made here during the time of its consideration.

As to quantitative limitations, the treaty contains no provision; and that fact undoubtedly is disappointing to the friends of naval armament limitation. There are some circumstances connected with that phase of the subject that should be pointed out in this connection.

The nations that signed the treaty could not have been expected to forego the right of self-defense or to abandon the means of accomplishing it. No method for the effective limitation of armaments that promises to be successful has been proposed save through international arrangements and agreements; and one, two, or three nations necessarily will be slow to abandon their right to equip themselves for defense if it appears that rivals, or even other friendly nations who may become rivals, are unwilling or unable to enter into an agreement. Japan in the conference demanded the right of naval equality with Great Britain and the United States. When that was not granted or recognized, she withdrew from the conference.

The United States would have been perfectly willing, and other nations members of the conference were perfectly willing, to make limitations and even substantial reductions on the basis of agreements entered into at Washington in 1922 and at London in 1930, on the 5–5–3 ratio or any basis similar to that.

Japan having announced her intention to terminate the Washington Treaty and having withdrawn from the conference, the question arose as to what could be accomplished properly and safely by those who continued in its labors.

To me it is regrettable that after January 1, 1937, unless something unexpected occurs, there may be a revival of competition in what is called quantitative naval construction. If any plan could have been found to avoid it or to avert it, that plan would have been resorted to. No nation which has interests of its own and of its own citizens to safeguard on the seas may be expected to abandon and discontinue naval construction on the theory that every other power will follow the wholesome example.

Regrettable as it is that the treaty makes no arrangement for quantitative limitation, it is gratifying to observe that, in spite of the difficulties under which the conference labored, it did accomplish results which are well worth preserving, and which may be of advantage in the future when we come again to deal with the limitation or reduction of naval armaments. Those advantages have been pointed out by the chairman of the committee, and they consist in part of the unqualified obligation assumed by the signatories to the treaty to keep one another advised as to the annual naval-construction program, notice of the same to be given 4 months in advance.

In entering into this undertaking the nations signing the treaty surrender no right. They merely in good will seek to encourage a continuance of efforts to limit or to restrict armaments.

If a nation not a party to the treaty refuses to give its assent to that proposal and to carry out the plan for notice, and embarks upon a policy of construction which indicates to one of the signatories to the treaty that its safety is imperiled, the signatory may, through the escape clause, begin construction not theretofore intended, or resume construction which had been suspended.

There has been much criticism of the treaty because it contains clauses of the character to which reference is now being made, but I am wondering whether any loyal person would want to place his Government in the position that it could not arm if it were felt and realized that to do so was necessary for the safety of the Nation.

Reference has been made to the fact that the only conclusive obligation in the treaty is the undertaking to give

notice, that when a nation has its fears aroused it may begin or resume construction by giving notice and full information to other signatories of its intention to do so. Whether such a clause were in this treaty or not, history discloses that when the fears of a people are aroused they exercise the right to prepare for their defense.

It is of value to have information of the plans and programs of other powers, and it is of value to have the qualitative limitations which are agreed to in this treaty.

Admittedly it is not satisfactory, it is disappointing to be unable to secure a fair measure of quantitative limitation or reduction.

Just now "the earth is filled with anger and the seas are dark with wrath." Just now there are such conditions that it is difficult in safety to pursue a course which will make certain the reduction of our own armaments. But these days, however long, will end. The nights that follow them will break into other days; and it is the hope that before the limitation in this treaty shall expire, by the year 1942, if not before, the state of public opinion in the world will be such as to permit quantitative reduction in a very large and gratifying measure.

Mr. NYE. Mr. President, I share very largely the regret which has been repeatedly voiced this afternoon that the treaty pending before the Senate was rather completely divorced from any thought of limitation of naval armaments. Perhaps there is something to be said in favor of the treaty as respects the clause dealing with warning or notice by nations respecting their building program; but that, and that quite alone, is the substance of the pending treaty.

The Senator from California [Mr. JOHNSON] has intimated that the treaty was only an agreement in response to an expectation that something would come out of the negotiations at London. The Senator from California was not guessing when he spoke of the desire in those words.

I have before me the testimony of Admiral Standley, one of our delegates to the London Conference, in which he says:

> We were sent over to London to negotiate agreements to take the place of the Washington and London Treaties. The Washington and London Treaties both were to expire on the 1st day of January. We were sent over there to negotiate agreements. The idea of our country—apparently of our administration—and our instructions were we were to negotiate agreements. In other words, it was the desire that we bring back agreements.

If one desires to do so, I suppose it is fair to assume that Admiral Standley went to London anticipating that he would be expected to return home with an agreement.

Mr. President, one who has followed the negotiations from year to year looking to the accomplishment of some measure of disarmament, must have grown exceedingly distrustful of all arms limitation or disarmament conferences. Starting 14 or 15 years ago, when hopes were high, we have seen conference follow conference, each conference a little weaker and a little further from the hopes that were entertained than was the preceding one. However, I do not know why we should anticipate very different results than those which have been attained. A naval conference is called. Nations choose their delegates. One nation which took part in the last conference virtually loaded a ship with admirals and other officers of her naval establishment as her representatives at the so-called naval disarmament or limitation conference. The interest of these men was not in disarmament; it was not at all in limitation. Their future careers were dependent upon a continuation of the present naval pace, and they were not going to be fully satisfied unless by chance there could be even more ships than there now are.

That was the delegation representing one nation alone. Other nations have sent as delegates, among others, men whose interest was in the naval establishment. We, too, have participated and shared in that kind of program. Some nations also have been known in the past to send to limitation conferences men who were stockholders in the business of building ships and building armament—men who would be absolutely out of pocket if limitation of disarmament in any degree were to be accomplished.

Now that we shall have this treaty, I suppose we may hope during the year only for developments that will prevent a continuation of what just now is very positively an armament race. Let us hope that during the year sanity shall be brought home to nations, if through no other channel than through the channel of the tremendous burden of cost that is being occasioned by these armament races. It seems to me that in the United States, if we wished to contribute in a substantial way to the accomplishment of some degree of disarmament, or to the accomplishment of a limitation of naval armament, we could proceed in a way which would remove some of the very positive causes that enter into armament races. We could proceed first by eliminating the cause which is involved by reason of the fact that some men and some institutions find tremendously large profits in armament and in armament races. The madder the race, the greater the profits. The Senate's Munitions Committee has recommended that our Government shall undertake the nationalization of a part of our munitions industry, and has recommended that the United States produce all its requirements of ships, of guns, of powder, of gas, and of armor plate.

Some few weeks ago leading newspapers of the country engaged in the conduct of a poll, feeling out the people respecting their wishes concerning the nationalization issue. No doubt the result of that poll was most surprising to one and all. I know it was to me. While I had been aware that there was much sentiment for it, it had never dawned upon me that the odds would be such as were shown as the result of the poll. It revealed 82 percent of the people as favoring nationalization, and 18 percent as being opposed to nationalization.

The result of his poll, conducted by Dr. George Gallup, was published, among other newspapers in this country, in the Washington Post. I have before me a copy of the review of that result; and I ask unanimous consent that it may be printed in the RECORD following my remarks.

The PRESIDING OFFICER (Mr. O'MAHONEY in the chair). Without objection, it is so ordered.

(See exhibit A.)

Mr. NYE. If the United States shall choose this course of eliminating what is a very positive cause for entering into armament races, we shall find most emphatically that we are not alone in our thinking, and that it is altogether probable that were we to lead, to set the example, or to set the pace in that direction, we very soon should have company from other nations.

Great Britain conducted a far more thorough poll than the poll in the United States of which I have spoken. The result of the poll in Great Britain revealed that 93 percent of the people favored nationalization, as against 7 percent who were opposed to nationalization.

During the debate this afternoon the Senator from Idaho [Mr. BORAH] made reference to the probability that there would be deception under the treaty; that nations would not fully reveal their plans and their preparations as they involved naval construction. The Senator from Idaho made very direct reference to the deception that was practiced in the years preceding the outbreak of the World War. I have before me a page from the London Evening Standard of May 6, 1936, quoting David Lloyd George as respects the deception of those years preceding the outbreak of the World War. I quote:

> Mr. Lloyd George, as an illustration, spoke of the "pre-1914 dreadnaught panic."
>
> The naval program of Germany, he said, was exaggerated in the press and on the platform. There was an exaggeration as to the number of ships being built and the size of the guns. The advice given the Cabinet as to the importance of small craft rather than monster ships was deprecated.
>
> There was a great agitation in this country for an immense program for the building of huge battleships and battle cruisers. The Cabinet was divided about the need for building so many of these costly ships because some of them took the view that what we stood most in need of was small craft.
>
> A Cabinet committee was appointed to investigate all the facts with regard to German shipbuilding and German guns. The armament firms tendered evidence in their possession based on

secret information which they had received—all of the most alarmist character. They had already passed it on to the Admiralty.

This demonstrated that the Germans were laying down ships considerably in excess of their published statutory naval plan. There is no doubt that this evidence considerably influenced the Cabinet.

It turned out to be completely inaccurate, but it diverted the Admiralty from the building of the small craft essential for our commerce into constructing the biggest of big ships.

So we find those who were profiting from the gains of so-called preparation for war were the ones who were engaged in deception which ultimately led to war.

I do not say on my own authority that that armament race did lead to the World War. Rather I am quoting none other than that same authority, David Lloyd George, wartime premier of Great Britain, who early this month was giving testimony before the royal commission investigating the manufacture of munitions in Great Britain. In his testimony before that commission the gentleman said he "had no doubt that naval competition between this country and Germany was a contributory cause to the Great War." Of interest to anyone studying the hearings held in England was the information revealed growing out of the testimony of a captain and former inspector of naval operations in Great Britain, who testified before the commission as follows:

Private makers worked foreign and British contracts side by side, and it was impossible to preserve entire secrecy.

That remark had reference to the years just preceding the World War. He mentioned cases to show that in 1913 guns of the same type were being made in the same shops for the British, for the Japanese, and for the Turkish Governments, and similar work was being done for Chile and Brazil at one and the same time.

All of which, Mr. President, makes most convincing to me the expressed thought that if the United States really desired to be a sincere contributor toward the accomplishment of a reasonable degree of disarmament in the world she would set the example and show the way by eliminating the influence of the private manufacturer of munitions of war.

Mr. President, because it is of such interest, I ask unanimous consent that the quotation from the testimony of David Lloyd George, as published in the London Times of May 7 of this year, may be printed in the RECORD.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

[From the London Times of May 7, 1936]

MANUFACTURE OF ARMS—MR. LLOYD GEORGE'S VIEWS—STATE MONOPOLY URGED

Mr. Lloyd George, M. P., gave evidence before the Royal Commission on the Private Manufacture of and Trading in Arms at a public sitting at the Middlesex Guildhall, Westminster, yesterday. He said that the Great War had taught us the importance of being ready for all contingencies to the extent of being in a position to put all our manufacturing resources into operation as soon as war was declared. "When in 1914 it came to the need for increasing our supply or munitions on an enormous scale", he said, "private firms broke down completely."

Sir John Eldon Bankes presided, and there was a fair attendance of the public. Dame Margaret Lloyd George and Miss Megan Lloyd George, M. P., were seated immediately behind Mr. Lloyd George.

Mr. Lloyd George, before reading a prepared statement of evidence, said that he was in full agreement with the view that the manufacture of arms ought to be a Government monopoly.

In his statement he dealt first with political reasons for forbidding private manufacture of arms. It would, he said, avoid the creation of powerful vested interests whose prosperity depended on war and preparations for war. The enormous increase, amounting to tens of millions in a few weeks, in the value of the properties of the armament firms in this country, on the intimation of a program of rearmament on a great scale by the Government, was in itself a startling demonstration of this peril. These concerns were no longer the property of a limited number of partners; but thousands, maybe scores of thousands, of shareholders spread all over the country either held or dealt in their shares. Rearmament doubled the value of the holding of every shareholder. Disarmament would either halve it or reduce it to nothing. It was not a healthy state of things when a large and, on the whole, influential body of men scattered all over the kingdom should have a direct pecuniary interest in war or agitations which led to war.

THE DREADNOUGHT PANIC

There was a good deal of direct, and even more indirect, propaganda conducted by these enterprises. Sometimes it took the subtle form of inculcating the horrors of war with suggestions that people must prepare to protect themselves against them. It more often took the form of an exaggeration of preparations made by other countries, with more than a hint that they were directed against our security. The pre-1914 Government had an illustration of the latter method. They would remember the dreadnought panic. The naval program of Germany was exaggerated in the press and on the platform. There was an exaggeration as to the number of ships being built and the size of the guns. The advice given the Cabinet as to the importance of small craft rather than monster ships was deprecated. There was a great agitation in this country for an immense program for the building of huge battleships and battle cruisers. The Cabinet was divided about the need for building so many of these costly ships because some of them took the view, held by so many admirals, that what we stood most in need of was small craft.

A Cabinet committee was appointed to investigate all the facts with regard to German shipbuilding and German guns. The armament firms tendered evidence in their possession, based on secret information which they had received—all of the most alarmist character. They had already passed it on to the Admiralty. This demonstrated that the Germans were laying down ships considerably in excess of their published statutory naval plan. There was no doubt that this evidence considerably influenced the Cabinet. It turned out to be completely inaccurate, but it diverted the Admiralty from the building of the small craft essential for our commerce into constructing the biggest of big ships. There was much more profit in the building of these gigantic ships with their monster guns. A torpedo-boat destroyer would only cost about one-twentieth of a battleship.

INSIDIOUS PROPAGANDA

This kind of propaganda was very insidious. The public had no protection against it. In the case he quoted the public did not even know that the information on which we proceeded was largely, if not entirely, supplied by representatives from armament firms who were pecuniarily interested in the panic which was created. He had no doubt at all that the information given to them as Ministers was also communicated to politicians outside and to the press. From all he heard the armament interests in France were just as active on the same lines today, although the methods they adopted were even more pernicious. To what extent German armament interests influenced German opinion he had no information, but he had no doubt they were equally mischievous there.

Coming to practical reasons, from the point of view of the efficiency of national defense, why the present system was a bad one, he said there must always be a minimum of armaments below which it was not safe for us to sink in an armed world. If they underinsured they were taking unjustifiable risks in an incalculable international situation, a situation, which, judged from reports in the press, was aggravated by the fact that peace was disturbed by the capable and defended by the feeble-minded. On the other hand, if they overinsured they were incurring unnecessary expenditure which was unproductive insofar as it was not essential to protection, and they were also provoking a competition in armaments which led to fresh expenditure and endangered universal peace. But past experience demonstrated that they could not altogether rule out of account sinister contingencies, however improbable they might be at the time. In 1914 few anticipated a world war. He could not recall one who ever thought it possible we should have to send an army of several millions across the seas to fight in three continents. We levied and trained millions of men, but they were not fully equipped for battle for nearly 2 years.

The war had taught them the importance of being ready for all contingencies to the extent to be in a position to put all manufacturing resources into operation as soon as war was declared. When they contemplated the possibility of another great war, what mattered most were the facilities for speedy expansion on the most effective lines. Here nationalization of armaments had an enormous advantage over a system of private firms. When in 1914 it came to the need for increasing the supply of munitions on an enormous scale, private firms broke down completely. And in war, time was often decisive. If war came there should be no delay beyond what was inevitable in the provision of all the necessary equipment for carrying it on effectively.

CAUSES OF DELAY

"What", he asked, were the principal causes of the delay in the Great War? (1) Designs, patterns, and specifications of essentials were not ready; (2) even when the designs were there we had not sufficient gages for accurate manufacture, and that is all important. The shortage of gages alone accounted for months of delay; (3) we had no survey of the available machine tools in this country, and, if we had, there was nothing like a sufficient number to meet the demand. They took months to manufacture even with the aid of America."

"I am blaming no one", Mr. Lloyd George's statement continued. "No one had contemplated a war in which we would be called upon to play so vast a part. Had we possessed such an organization as Sir Eric Geddes indicates in his evidence, if our designs, patterns, and specifications had been prepared, ready to hand out to the producers, we should have saved several months—not far from a year. You may say that it would involve heavy expenditure in peacetime. Not at all. For a few hundred thousands, it is wonderful what you could accomplish on these lines. These

essential preliminaries did not cost us much in money—not directly. But their absence cost us immense sums—and many hundreds of thousands of casualties. All this important question of design involves constant research and experiment. The question may be asked, Why cannot private firms prepare designs, patterns, and specifications, and engage in research and elaborate experiments just as well as the state? One reason is that it would land them in expenditure on a great scale with only problematical commercial results. It is only a war or a war panic that would pay them for efforts which alone would in practice prove equal to the need. They are trading concerns for profit. The state has to take precautions for contingencies that it is doing its best to avert and to prevent from ever arising without reference to trading profits."

With regard to the cost of experiments, Mr. Lloyd George referred to tanks, and said that in the final stages of the war they played almost as great a part in insuring victory as any other weapon. Those used in 1918 were a wonderful invention, but they were crude and clumsy in comparison with their successors of today. The casualties among the machines in 1918 were exceptionally heavy. At the famous battle of August 8, 1918, 60 percent of them were put out of action, and antitank devices had then hardly had time to develop. Constant experimentation was essential if they were ultimately to work up a machine that would overcome traps or antitank guns and other countermeasures. To carry out these experiments large tracts of land of every kind and conformation must be available. It would not be possible for private firms to command sizable and suitable terrain. The Government were equipped with the necessary powers—and where necessary the capital—to provide the necessary ground for experimenting.

LABOR DIFFICULTIES

If war ensued and expansion became necessary, there were serious labor difficulties to overcome when manufacture was in the hands of private firms, in dilution of skilled labor with unskilled, and the training of unskilled men and women. For expansion of production on a great scale the number of skilled workers was quite inadequate. There must therefore be, in the unfortunate event of war, a dilution of skilled with the unskilled and a training of men and women for jobs hitherto undertaken by skilled craftsmen organized into powerful unions. During the war the unions were prepared to suspend their privileges for the country's needs, but they were most reluctant to make the same concession to private firms whose profits were swollen by the transactions. He would not pass any comment on their attitude. There was much to be said for it. But he was stating a fact with which they had to deal in the Great War. The adjustment occupied a great deal of valuable time and gave recurrent trouble.

America was an admirable illustration of the system of private manufacture in the event of war. The manufacture of munitions was left largely in the hands of private firms. After 18 months of war the Americans had no guns, heavy or light, of their own, and their airplanes only came in 2 or 3 months before the armistice. And yet America was the greatest manufacturing country in the world. They wasted their time on devising new patterns which could have been instituted and perfected without very much cost by State arsenals before the war and could have been put in immediately after war began and turned out in great numbers, had the specification been ready.

Private manufacture completely broke down in the war. Orders were given and accepted, but not fulfilled. It was a lamentable story of failure. Dr. Addison had given the figures of the promises and performances of the first few months of the war. No one who perused them would fail to realize why we were not only unable for nearly 2 years to make any attack upon the German trenches without appalling losses due to lack of artillery and high explosives, but our troops had not enough ammunition to defend themselves in their own trenches by retaliating upon the enemy's guns.

THE CASE OF RUSSIA

"While promises of this kind were given to us, heedless of any reckoning as to the possibility of executing them", Mr. Lloyd George's statement went on, "similar undertakings were given to the Russians with even worse results. Enormous orders for every kind of ammunition were booked by Russia with our armament firms, notably one firm. Not even an appreciable percentage of the obligations undertaken was ever discharged. The Russians depended upon them and found themselves with no means of defending their lives against the terrible German attack. The feeling against the British firms was exceedingly bitter in the Russian Army. The failure was attributed to breach of faith, and there is no doubt that it contributed partly to the Russian collapse and the Russian disgruntlement with the Allies.

"I have no doubt at all that the contracts which were accepted were entered into in perfect good faith, both with our Government and the Russian Government. The armament firms depended upon a system of peddling out part of the work to engineering concerns engaged on civilian work which had to be suspended owing to the war. But they had not the authority which a government had of securing the cooperation of these firms. And, moreover, it is no use pretending that a great armament firm is particularly anxious to encourage other firms to start to do profitable business which might result in the establishment of formidable rivals. When the Government took in hand the organization of all our engineering resources for the production of munitions, we had no difficulty in securing the fullest cooperation and the largest output under complete Government control."

AGITATION FOR WAR

The chairman asked Mr. Lloyd George if he would extend state monopoly to all branches of arms and munitions; for instance, to battleships, airplane engines; to all classes of manufacture; or only to limited classes.

Mr. LLOYD GEORGE. I would go as far as it is practicable. The less you leave to private manufacture, the less is the incentive to promote agitation for war.

The CHAIRMAN. To make a monopoly effective you must go as far as complete nationalization not only of the manufacture but of the raw material?—No; I should not say that. In the war we had practically to assume control of all raw material and distribute it.

You had to do that in the war in order to make your monopoly complete. Does not the same argument apply to these times?—I do not think so, because you are not working at the same pressure.

Replying further to questions by the chairman, Mr. Lloyd George said the greatest danger was that there were firms who owed their existence to war preparations, and those were the firms here, in France, and elsewhere which were taking part in these agitations. With regard to what was known as "the dreadnaught incident", he said that the evidence given before the cabinet committee by Mr. Mulliner was inaccurate. The impression given by him was that the Germans were going to build ships at a greater rate than that which was laid down in their naval program, and that we should be confronted with so many German ships that we should be in a minority. As it turned out it was untrue.

The CHAIRMAN. The experience of the Great War has wholly altered the view with regard to national defense of what is necessary to be done by way of preparation?—Undoubtedly. The two main factors are the quantity of arms, etc., and the necessity for rapid expansion.

The CHAIRMAN. Would it not be of great assistance to the state to have private manufacturers ready with the necessary personnel?—I do not see why the state cannot train personnel just as much as private manufacturers. In the war we had to depend a great deal on Woolwich.

In answer to Sir Philip Gibbs Mr. Lloyd George said he thought the inclusion in the Covenant of the League of Nations of article 8, which condemns the private manufacture of arms, was based on a general feeling of all who took part in the peace conference. There was a feeling that Krupps had had a very pernicious influence. He had no doubt that naval competition between this country and Germany was a contributory cause to the Great War. He was not hostile to the export of arms from a moral point of view. He would have exported arms to Abyssinia and not put an embargo on, as had been done. That was a matter for the League of Nations to thresh out; there must be some international thought. If there were no private trade in arms, he could understand that there might be conditions in which it would be desirable for the state to export arms.

Professor GUTTERIDGE. Is it not possible to abolish the export of arms altogether?—I think it would be undesirable.

A NAVAL VIEW

Capt. Ll. E. H. Llewellyn, R. N. (retired), a former inspector of naval ordnance, also gave evidence. He said that in 1914 armament plant held by private makers did not lend itself to rapid mechanical development, and had expansion and development been left to private enterprise the war would have been lost by 1916. Private makers, he said, worked foreign and British contracts side by side, and it was impossible to preserve entire secrecy. He mentioned cases in which, in 1913, guns of the same type were being made in the same shops for the British, the Japanese, and the Turkish Governments, and similar work was being done for Chile and Brazil. He personally saw a Japanese endeavor to take measurements of British drawings.

In reply to questions, Captain Llewellyn said that, roughly, his view was that he was not in favor of state monopoly unless it was protected by international agreement. It would be futile to try to restrict in this country if other countries were going to take what would have been our export trade.

The commission adjourned till today.

EXHIBIT A

[From the Rochester (N. Y.) Democrat and Chronicle of Mar. 8, 1936]

NATION OVERWHELMINGLY AGAINST PRIVATE MUNITIONS MUNUFACTURE—SHOULD MANUFACTURE AND SALE OF MUNITIONS OF WAR FOR PRIVATE PROFIT BE PROHIBITED? YES, 82 PERCENT; NO, 18 PERCENT—GOVERNMENT CONTROL ASKED BY 82 PERCENT OF COUNTRY—18 PERCENT FOR PRESENT SYSTEM—2 PARTIES JOIN IN OPPOSITION

By Dr. George Gallup

While the representatives at Washington have been extending the temporary neutrality bill to 1937 and appropriating funds toward the largest peacetime Army and Navy budget in history, American voters have recorded their opinions on another national defense proposal—manufacture by the Government of its own war materials—in a Nation-wide poll conducted by the Democrat and Chronicle and the American Institute of Public Opinion.

They favor the proposal by more than 4 to 1.

"Take the private profit out of war munitions", is a typical voter's comment, "and you lessen the incentives for war."

"The profit system in munitions has been leading us to war for generations", is the way a grocer in western Pennsylvania expresses it. "Maybe a Government system would break the cycle."

"The Government could do it cheaper", submits a third.

All those opinions have their part in creating one of the greatest majorities that have been reflected in the Democrat and Chronicle polls since they were first made public last October. Only the principle of old-age pensions wins a higher proportion of votes.

Today's poll shows how public opinion rises and falls on the munitions question from section to section. The strongest sentiment for nationalization of armaments obtains in the West, the weakest in States like Connecticut and Delaware, where great volumes of the country's armaments have been produced. But in the total national picture public opinion expresses itself:

	Percent
For Government manufacture	82
For private manufacture	18

The issue is one Congress must inevitably face, either in this session or in succeeding sessions, if public opinion continues in its present trend.

ENGLISH PEACE BALLOT PARALLELED

Virtually word for word, the question asked American voters corresponds with the question that was put to English voters a year ago. The Democrat and Chronicle ballot asked:

"Should the manufacture and sale of war munitions for private profit be prohibited?"

The English peace ballot, which began its patient, door-to-door canvass of 11,000,000 Englishmen more than 14 months ago, used the word armaments in place of war munitions. After a half year of balloting Lord Robert Cecil announced the results of the English poll, including the question on government manufacture of armaments. When the votes of those who reported "no opinion" in the English poll have been removed from the standings, opinion in the two English-speaking nations compares as follows:

	Percentage favoring Government manufacture	Percentage favoring private manufacture
United States	82	18
Great Britain	93	7

Infinitely swifter than the English ballot, the Democrat and Chronicle and Institute poll reported today is based on 102,120 ballots distributed to a cross-section of the American electorate. Whereas the British poll recorded the opinion of every voter who could be reached by the canvassers during the 6 months, the American poll selected more than 100,000 representative Americans to cast ballots. Farmers and city dwellers, Virginians and Kansans, breadwinners and persons on relief—voters of every group cast their ballots in the same proportions as they would in a national election. The two polls remain roughly comparable, however, for though the English peace ballot is lacking as a cross-section of British opinion, it is still impressive for the volume of its replies.

REPUBLICANS AND DEMOCRATS AGREE

The nationalization of munitions, like old-age pensions, is a subject on which Republicans and Democrats stand virtually together. Although Republicans have recorded themselves in previous polls as violently opposed to Government control of private industry, here is an industry most Republicans think the Government ought to own and operate. The votes of the major party members compare as follows:

	Percentage favoring Government manufacture	Percentage favoring private manufacture
Republicans	79	21
Democrats	85	15

Unlike the old-age-pensions issue, for which Congressmen of both parties seem eager to claim credit, munitions nationalization has not yet gained the official support of either party, notwithstanding its potential popularity. The present temper of Congress is to solve the problem of national defense with sharply increased appropriations.

The greatest variance of opinion in today's poll is between voters in New England and voters in the coast States. Among individual States, Nevada, with 99 percent, is most in favor of Government manufacture, while Delaware, home State of the Du Pont industries, is least in favor—63 percent.

SENATE CHALLENGE LOOMING FOR PRIVATE ARMS INDUSTRY—MUNITIONS COMMITTEE AT WORK ON LEGISLATIVE RECOMMENDATIONS

"(d) To inquire into the desirability of creating a government monopoly in respect to the manufacture of armaments and munitions and other implements of war and to submit recommendations thereon"

When Senator Chairman GERALD P. NYE banged down his gavel September 17, 1934, to open the first session of the special Senate committee investigating the munitions industry, there were few in the big paneled room who gave much thought to "section d" (above) of the Senate resolution that had authorized the investigation.

Excepting Soviet Russia, no country in the world operated its own munitions monopoly. If a monopoly existed at all, it was alleged, such a monopoly was eminently private, like the mysterious and picturesque "armaments ring" of Europe, typified by the equally mysterious and picturesque supersalesman, Sir Basil Zaharoff.

Even Chairman NYE, who had sponsored the Senate resolution along with Senator ARTHUR VANDENBERG, was peeling his eye for the other phases of the investigations.

"I thought", he admitted later, "that nationalization of munitions manufacturers was about the wildest idea we had under consideration."

PART OF AMERICAN THOUGHT

But when the chairman's gavel banged down 17 months later—last February 20—to bring the hearings of the committee to an end, "the desirability of creating a government monopoly" had become established in the thinking of American citizens all over the country, as shown in today's poll.

It is debatable whether the munitions investigation created the desire for Government ownership, or whether the desire for Government ownership was not, indeed, one of the forces that created the munitions investigation. This much is certain: The two arguments advanced for Government ownership during the sessions of the committee are the same that voters in today's poll advance:

1. Government ownership would make national defense less costly to the taxpayer.

2. Government ownership would prevent private munitions manufacturers in this country from involving the United States in a foreign war.

ONE GUN STILL LOADED

As this is written secretaries for the Senate Munitions Committee are preparing a final report, presumably with recommendations Senator NYE and other members of the committee will urge Congress to pass. Expected within a fortnight, this report remains the one big gun the committee has left to fire.

What will be the likely proposals for legislation growing out of it? Probably resolutions asking for complete or partial Government monopolies.

Almost alone on the committee in favoring "complete" nationalization is Senator HOMER T. BONE (Democrat, Washington). It is Senator BONE's idea that the Government should buy partly finished war materials like steel and potash and fabricate them in final form for combat purposes. This, the Senator believes, would "bottle-neck the munitions traffic in the responsible hands of the United States Government." It would prevent the irresponsible "private huckstering" of munitions—by Americans to governments abroad—which the Senator believes helped drag this country to war in 1917.

"We need buy no iron mines, for instance", he said. "We can buy all those materials in the open market. But these things the Government—and the Government alone—should fabricate in final form for combat purposes—war vessels, guns, ammunition, poison gas, and military and naval fighting planes."

* * * * * * *

FEDERAL SHIPBUILDING FAVORED

Some members of the Munitions Committee, including Senator NYE, believe the Navy can build good ships in the navy yards at costs considerably less than those charged by the private builders. They point to the jump in unit cruiser costs from about eight and one-half millions in 1932 to about sixteen and one-half million in 1934, as unnecessary burdens on the taxpayer under the private building system.

"Although the evidence is not all in," a preliminary report of the committee said last June, "the indications are that the private yards cost the Government from one to two million dollars more a cruiser than the navy yards."

This preliminary report which leaned in the direction of the Government monopoly in naval shipbuilding, is likely to be confirmed in the forthcoming final report. For one thing, the research department of the Interstate Commerce Commission last month piled up in front of the Munitions Committee a series of reports and a great stack of blue prints purporting to show that the Government could begin making all its own ships, aircraft, small arms, and powder by means of a total investment of less than $50,000,000.

PUBLIC OPINION REFLECTED

Obviously measures such as that favored by Senator BONE and that suggested by the Interstate Commerce Commission reflect the force of public opinion. In a plebiscite today American voters would probably authorize any system of Government munitions manufacture, so strong is the sentiment they record in the Democrat and Chronicle and the institute poll.

But it is extremely doubtful that Congress will enact any such legislation at this session.

Deeply pigeonholed in a Senate subcommittee already is the Nye war-profits bill, the first magnum opus of the Munitions Committee. The bill proposes a 100-percent tax in time of war on corporation profits in excess of 6 percent. Its purpose is to force the Nation, through high taxes and the conscription of industry, to pay for war while it goes on instead of piling up a debt burden for the future.

Lacking the support of the Roosevelt administration, as well as the support of most Senate Republicans, the Nye bill has languished

on the desk of Senator TOM CONNALLY (Democrat, Texas), chairman of the subcommittee of the Military Affairs Committee.

In a Congress committed to just two things now—a painless tax bill and a speedy adjournment—the same fate might befall further resolutions arising from the munitions investigation.

Moreover, the Nye committee gave mortal offense recently to southern Democrats like Senator CARTER GLASS, of Virginia, and Senator CONNALLY by its references to President Wilson and the secret treaties. Senator NYE will receive no concessions from either of these colleagues for a long time to come.

How long can Congress pigeonhole a matter that has the support of 82 percent of the voters, including majorities in both the major parties? That, in company with the trend of public opinion itself regarding munitions, will be interesting to watch in the months to come. And meanwhile there has been a handwriting on the wall.

"ARMS MAKERS WAR MAKERS", CRY MONOPOLISTS; "BUT THEY HAVE RIGHT TO LIVE", SAYS DEFENSE—PEACE SURE IF PROFIT GOES, FEDERAL RULE FRIENDS ARGUE—FOES CITE DANGER OF UNEMPLOYMENT AND UNITED STATES IN BUSINESS

It's been a long, long way from 1917 to 1936 and the dragging years—as Charles M. Schwab was moved to comment on his recent birthday—have forged a new fable around the men who make the world's munitions. Public opinion made them demigods in the days of the war and public opinion tends to make them personal devils today.

In Schwab's words, "the so-called munitions makers were the most prized people in the country." Now the popular label, "sinister figures", is considered almost too good for them.

Today's poll does not show the whole transition by any means. That would involve a review of munitions investigations, official and unofficial, here and abroad, of books and moving-picture melodramas over the last score of years. What today's poll does show unmistakably is the present state of mind of American voters in respect to the munitions traffic.

In addition to the raw "yes" and "no" votes reported above, the comments many voters attach to their ballots are especially illuminating.

TRAFFIC CALLED CAUSE

The largest number of voters who ask for an end to the system of armaments for profit label the traffic a direct cause of war. They picture a devil's cauldron of ships and guns and ammunition, that explodes to the stirring of the international munitions salesmen.

"The munitions makers promote wholesale slaughter", one voter contends.

"Munitions profiteers promote wars for their own benefit", charges another.

A man on a ranch in the Southwest argues, "They are profiteers in blood."

If the United States Government manufactured its own munitions, similar voters believe, the incentives for war would be reduced. Then:

"Young people would not have to fight."

"All of us women's sons wouldn't have to go to war, because nobody would profit by war."

"There would be peace for good."

Ranked in order, the most frequent comments boil down to four:

1. Private munitions means war.
2. Let's get rid of the profiteers.
3. Take the profit out of war.
4. Let the Government make the big money.

FOR THE DEFENSE

Staunchly in defense of the private manufacture and sale of munitions are voters who say:

"Making guns is just as much a private right as making soap."

Their opinions elaborate four basic ideas:

1. Like any other businessmen, munitions manufacturers have a right to make a living.
2. Government manufacture would be just so much more Government control of business.
3. It would throw a lot of people out of work at the old factories.
4. Private industry is more efficient than Government industry.

Many such voters nevertheless ask for Government regulation of the munitions industry, provided it stops short of control of Government ownership.

Most interesting comment of all is the one submitted by a man in Bridgeport, Conn. Whether he realized it or not, Government manufacture might mean dilemma for him:

"Munitions makers? Phooey! Look at the way they exploited the common soldiers in the World War. Every man killed meant more money in their pockets.

"Where do I work? In that firearms factory over there. Business is great."

SOCIALISTS ADD WEIGHT

Not only Republicans and Democrats, but the citizens who will vote for the Socialist candidate next November manage to stand together on the same platform in today's poll.

A frail 2 percent in the Presidential election of 1932, Socialists would poll no greater number today, according to political polls reported by the Institute and the Democrat and Chronicle every fourth Sunday.

On social issues and on Government control of industry they ordinarily stand to the left of the Democrats and far from the G. O. P. Today they lump their votes with the big major-party majority. Votes of the three parties compare:

	Percentage favoring Government manufacture	Percentage favoring private manufacture
Socialists	91	9
Democrats	85	15
Republicans	79	21

WOMEN'S VOTE STRONG

Reputedly the United States Senate undertook its investigation of the munitions industry because a woman persuaded a group of Progressive Senators that there ought to be one.

An active national secretary for the Women's International League for Peace, Miss Dorothy Detzer, has watched the investigation cover 17 months and spin out 5-foot shelf of data in little brown-covered books.

In today's poll other women record a strong majority for Government operation—one of the subjects the munitions committee was authorized to investigate. With 87 percent for and 13 percent against they rank as a group between Democratic voters and Socialists.

On the other hand, persons on relief pile up a sentiment slightly more conservative than even the generality of Republican voters. Ordinarily voters in this class take sides with the majority of Democrats. Not so today. As their comments frequently show, they retain hope of being employed in private industry.

"Would the Government build battleships with work-relief labor?" one unemployed voter asks.

Their vote comes to:

	Percentage favoring Government manufacture	Percentage favoring private manufacture
Persons on relief	78	22
Republicans	79	21
Democrats	85	15

200,000 BALLOTS USED FOR POLL

Every time the mail train pulls away from Princeton, N. J., it carries along another consignment of ballots to American voters from the Institute of Public Opinion—every time the mail comes in the postman rings at 116 Nassau Street, the institute's research office.

Normally between 100,000 and 200,000 ballots have to be sent out before the institute is satisfied with its cross section. They go into every State. They are directed to people who live in cities, to people who live on farms, to people on relief, and to people with two cars in the garage, to people like the man down the street, and to people like you.

Statisticians at Princeton office make sure that ballots come back from all 48 States and from all those classes of people in the correct proportions—in other words, in proportion to their numbers in the whole voting population of the United States. The research office keeps sending out ballots until the right number comes back from each group. Then they commence the job of tabulating the thousands of check marks and comments by which voters have indicated their opinions.

A tabulating machine in the office more rapidly and more infallibly than the cleverest statistician shuffles special reproductions of each ballot and produces tabulated results.

Mr. COPELAND. Mr. President, I should like to ask one question about the treaty. Under the existing arrangement, as I understand the matter, no fortifications, fuel stations, or naval bases can be built or established west of Hawaii. Am I correct in that statement?

I do not see the Senator from Nevada [Mr. PITTMAN] in the Chamber at the moment. Can the Senator from Arkansas answer my inquiry?

Mr. ROBINSON. Mr. President, my attention was diverted. Will the Senator kindly repeat his question?

Mr. COPELAND. Is it not true that under the present treaty arrangements, we are prohibited from establishing any fortifications or fuel stations west of Hawaii?

Mr. ROBINSON. It is my understanding that under the Washington Conference treaty of 1922 we obligated ourselves, during the period of that treaty, not to further fortify our possessions in the Pacific Ocean. That did not apply, as the Senator knows, to fortifications at Hawaii.

Mr. COPELAND. With the adoption of this treaty that arrangement would go into the discard, would it not?

Mr. ROBINSON. I hardly think that is an accurate statement. This treaty does not deal with that subject. One of the signatories to the Washington Conference having announced its purpose not to be bound beyond the 31st of December 1936, by certain provisions in the Washington Treaty, it follows that if the United States chooses to do so, it could, of course, treat the treaty as having been abrogated by that party and could then proceed to fortify its possessions without regard to treaty limitations.

Mr. COPELAND. I am not at all in disagreement with what the Senator has said. I think it is a correct statement. As a matter of fact, release for this prohibition is the only thing which reconciles me to the limitation placed upon the size of cruisers. There is a material limitation in the pending treaty upon cruiser size. And, of course, the questions of fuel stations and cruiser tonnage go hand in hand. If we were to undertake any offensive or defensive work in the Far East under the treaty which is now in existence, with the denial of our right to build fortifications west of Honolulu and no right to build 10,000-ton, 8-inch-gun cruisers, we should be absolutely helpless in the event of any disturbance that might take place in the central or western Pacific; I mean west of Hawaii.

So that is the one thing about the pending treaty which reconciles me to voting for it. We never lose a war or win a treaty. From what the Senator from California [Mr. JOHNSON] so eloquently said today, it is very apparent that we lost this particular treaty. But we at least have gained the privilege I have just mentioned, which, to my mind, is a very important one, in case of eventualities which might take place.

Mr. ROBINSON. Mr. President, will the Senator yield?

Mr. COPELAND. I yield.

Mr. ROBINSON. I wish merely to say that I do not believe the statement that we have lost this treaty is justified, unless it be on the theory that the treaty fails to provide quantitative limitations.

With respect to the cruiser question, I have some familiarity with that, and recall that in 1930 it was the position of the experts in our Navy that practically all our cruisers should be of the type the Senator has described, the 8-inch-gun 10,000-ton cruisers, and they argued very forcefully and continuously to that effect. That was the position taken at the London Naval Conference of 1930 as a result of the contention of the naval experts of the United States.

In that treaty we secured a very satisfactory arrangement from the then standpoint of the naval experts. We now have 18 of those large cruisers, 3 in process of construction; and when they shall have been completed, it is the opinion and has been for some time the opinion of the naval experts that we shall have all the cruisers of that type we would need or could use, unless some other nation should begin a program of construction that would change the relationship as to the large 8-inch-gun 10,000-ton cruisers.

The naval experts have very materially changed their attitude on that question. They find that for the defense of commerce, and for certain strategic purposes in coast service, the 6-inch-gun cruiser is far preferable to the 8-inch-gun cruiser. They find that the 8-inch-gun cruiser is not adapted to certain features of the service that it is necessary to have performed; and in consequence they feel that we now have quite as many of the large-gun cruisers as are essential, and that if we need more cruisers we need them of the smaller type. They have changed their attitude on the question; but in addition, of course, the theory was that the 8-inch-gun cruiser, the large 10,000-ton cruiser, had a wider cruising radius and, therefore, was better suited to our needs, we having only few naval bases in our island possessions.

Mr. COPELAND. I thank the Senator for what he has said. The thing that brought the matter to my attention was the very thing referred to by the Senator from Arkansas. As a member of the Naval Subcommittee of the Committee on Appropriations, I was quite amazed when I found the change of position which the Navy Department has taken relative to the size of cruisers.

It was pointed out when we argued the 1930 treaty that because we could have no naval bases in the western Pacific it was essential for us to have the large 10,000-ton cruisers in order that there might be sufficient cruising radius to take us over toward the Philippines and get home again. But I found that the naval experts had changed their position.

Of course, I should like to remind my friend from Arkansas that unless we pass a subsidy bill we shall not have any commerce to protect, so it will not make much difference, after all, what size cruisers we have. But I pray that we may even yet pass a subsidy bill, and then I shall be happy to know that with these speedy 6-inch-gun cruisers our commerce will be protected.

The PRESIDING OFFICER. If there be no amendment to be proposed, the treaty will be reported to the Senate.

The treaty was reported to the Senate without amendment.

The PRESIDING OFFICER. The resolution of ratification will be read.

The legislative clerk read as follows:

Resolved (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of Executive F, Seventy-fourth Congress, second session, a treaty for the limitation of naval armament and the exchange of information concerning naval construction, together with the protocol of signature and additional protocol, signed in London on March 25, 1936.

The PRESIDING OFFICER. The question is on agreeing to the resolution of ratification. [Putting the question.] Two-thirds of the Senators present concurring therein, the resolution is agreed to, and the treaty is ratified.

The clerk will state the first nomination in order on the calendar.

DIPLOMATIC AND FOREIGN SERVICE

The legislative clerk read the nomination of George Orr, of New Jersey, to be secretary in the Diplomatic Service.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

The legislative clerk read the nomination of Earl L. Packer, of Utah, to be Foreign Service officer of class 4, a consul, and a secretary in the Diplomatic Service.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

The legislative clerk read the nomination of Vinton Chapin, of Massachusetts, to be Foreign Service officer of class 6, a consul, and a secretary in the Diplomatic Service.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

CORNELIUS VAN H. ENGERT AND WILLIAM M. CRAMP

Mr. ROBINSON. Mr. President, there are two names in the calendar to which I ask the privilege of briefly calling attention—that of Mr. Cornelius Van H. Engert and that of Mr. William M. Cramp.

These officers are being promoted. As Senators will recall, they were in Addis Ababa as representatives of the Government of the United States during the recent bombardment of the city and also during the riots that occurred there after the bombardment. Their painstaking, courageous, and diligent performance of duty have been commended by the press and are worthy of special mention here.

The legislative clerk read the nomination of Cornelius Van H. Engert, of California, to be Foreign Service officer of class 1.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

The legislative clerk read the nomination of William M. Cramp, of Pennsylvania, to be Foreign Service officer of class 8 and a consul.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

Mr. VANDENBERG. Mr. President, as a further mark of the Senate's respect for the two individuals of whom the Senator from Arkansas has spoken, I ask unanimous consent that the President may be notified of the confirmation of their nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

COLLECTOR OF INTERNAL REVENUE

The legislative clerk read the nomination of Harry M. Hickey, of Albany, N. Y., to be collector of internal revenue for the fourteenth district of New York.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

That completes the calendar.

LEGISLATIVE SESSION

Mr. ROBINSON. I move that the Senate return to legislative session.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

COLLECTION OF REVENUE FROM INTOXICATING LIQUORS

Mr. KING. I move that the Senate proceed to the consideration of House bill 9185, to insure the collection of the revenue on intoxicating liquor, to provide for the more efficient and economical administration and enforcement of the laws relating to the taxation of intoxicating liquors, and for other purposes.

The PRESIDING OFFICER. The question is on the motion of the Senator from Utah.

The motion was agreed to; and the Senate proceeded to consider the bill, which had been reported from the Committee on Finance, with amendments.

Mr. McNARY. Mr. President, now that the bill has been taken up, I understand that the Senator is willing to have it go over until tomorrow, as the Senator from Iowa [Mr. DICKINSON] desires the floor.

Mr. KING. I should be glad to proceed with the bill; but I understand that the Senator from Iowa desires to speak, and, of course, I must yield.

FEDERAL RELIEF EXPENDITURES

Mr. DICKINSON. Mr. President, the whole country is full of rumors and open charges of the expenditure of Federal relief funds for political purposes. Particularly here in Washington there is an undercurrent of gossip which I conceive to be dangerous to the purposes of good government unless dealt with candidly. For instance, what is behind this recurring talk which all of us have heard about the designs and the ambitions of Works Progress Administrator Hopkins?

Perhaps these whispers may be merely more emanations from the largest whispering forum on earth, the District of Columbia. Nevertheless, I think they should be dragged out into the light of day, where they can be examined for what they are, true or false, just or unjust.

The issue is vitally and immediately important. In a few days we will have before us a deficiency bill under the terms of which there is committed into Mr. Hopkins' care approximately a billion and a half dollars of the people's money. These funds, we are told, are to be spent for "useful" public projects "to continue to provide relief and work relief." But which one of us has been permitted to study this proposal sufficiently to be able to answer any of the most elemental questions about it? What, for example, is the meaning of the word "useful" as it appears in this bill? The phrase is entirely too indefinite to satisfy me. It may mean only "useful" to buy an election. Complaints that that is the meaning have been registered, and many citizens credit them.

Consider, my friends, this editorial which appeared in a Washington paper on Thursday last. It is from the Washington Star and is headed "Coadjutor President." The text is as follows:

The public in recent years has heard of "acting" and "assistant" Presidents, but the phrase "coadjutor President" is new. It has appeared in the current debate about P. W. A. versus W. P. A., and has certain merit as a dramatization of one of the principal objections to the allotment of $1,425,000,000 to Harry Hopkins for "miscellaneous projects."

Few may be supposed to have read the actual language of the deficiency bill. Like other omnibus measures, it is a hodgepodge of unrelated items running to a hundred pages of printed type and including provision for approximately a score of branches of the Government. That portion which concerns Mr. Hopkins' request for funds, however, is briefer than might be expected. It may be perused in 2 minutes.

Designed, according to the preamble, "to continue to provide relief and work relief on useful projects * * * by the Works Progress Administration", it gives Mr. Hopkins $413,250,000 for highways, roads, and streets; $156,750,000 for public buildings; $156,750,000 for parks and other recreational facilities; $171,000,000 for public utilities; $128,250,000 for flood control and other conservation; $85,500,000 for white-collar projects; $71,250,000 for National Youth Administration; $71,250,000 for miscellaneous work projects; and $85,500,000 for rehabilitation and relief to farmers—altogether a very considerable amount of money to be committed into the personal management of any individual.

The President, it is worthy of notice, has no responsibility save that of requiring "to be paid such rates of pay * * * as will * * * accomplish the purposes of such appropriation." With that specific exception, "the Works Progress Administrator is authorized to prescribe such rules and regulations as may be necessary." He will proceed under no management save that of his own conscience until the funds have been disbursed and then will report to Congress what he has done.

Not even in wartime has any other official ever been accorded such power as Mr. Hopkins will have if the bill is passed in its original form. Hence the epithet "coadjutor President"—an unkind but not inaccurate appellation.

This responsible paper desires to know whether Congress intends to set up a rival in power to the President himself. Whether the individual so elevated be Mr. Hopkins, or some other favorite, does not matter. The question is: Are we now to set up a precedent for further grants of power and funds to any official or group of officials who happen to ask for such endowments? I know that there are those who still plead the necessities of a grave national emergency—the great depression. But their cry of "Wolf!" does not ring true; for, in the next breath, they insist that the emergency has passed, and that the New Deal has brought to us a wonderful prosperity which they "planned that way." But can they have it both ways?

Just now they are preferring to frighten themselves and the voters, as they are represented here in the National Legislature, with the bogey of a crisis which they contend cannot be met in any other way than by enormous spending.

Not even genuine panic can excuse any of us for trusting such power to unchecked management, even though it have good intent. For the sake of all concerned this thing should not be done. I doubt the need, I doubt the wisdom, I doubt the sanity of handing over to anybody so vast a sum of money to be spent at the discretion of none but the spender. This is not our money; if it were, we might be more careful with it; but it is certainly our responsibility to protect it, our duty to see that it is spent wisely and honestly.

Read the bill itself. Where in its content can we find anything to restrain Mr. Hopkins in the exercise of any personal whims or prejudices he may entertain? Where is there anything to govern or control him in the distribution of these funds? The language of this document is a classic example of hazy generalities. It should be clarified so there would be no shadow of doubt as to its specific meaning.

Even when that has been done, however, it will still remain an issue as to whether Mr. Hopkins or any other officer or group of officers of the Government should be permitted to assume such vast power. If we left it to a vote of the people, they would reject the proposal with a shout that would be heard throughout the country. The Nation is jealous of its freedom from dictation, and I say to my colleagues with all the seriousness of which I am capable that not even the best, the most honorable of administrators possesses strength of character enough to resist the temptation to be a dictator when the chance is thrown in his way. It is my sober judgment that if we pass this deficiency bill as it stands, we will be raising up an American Caesar in our midst.

Those are strong words, but they are justified. Consider the danger while there yet is time to consider it. It is

whispered, and it has been spoken openly, that this tremendous sum of money is to be only the first of three of such demands which Mr. Hopkins proposes to make upon us. I am informed that he expects eventually to ask for a total of nearly $5,000,000,000 for work relief. And if he is given the primary slice, how are we to deny him the rest? We shall have established a rule which we cannot break. We shall have set up a pattern, founded a habit.

There is peril in any such procedure. The Roman emperors discovered that, but too late. They fed the multitudes with food and festivals, and the multitudes became accustomed to being supported in generous fashion. In the end those multitudes had to be denied, and then in anger they wrecked the state. Yet the Roman mob originally was only a minority. It grew great and powerful and anarchistic, because it was subsidized. Mr. Hopkins is probably not a superman. He, too, would be in hazard of emulating the Caesars if we were to give him the unrestricted financial power so to do. We must, therefore, protect him from himself.

It already is said—and I mention it because it is one of the whispers we all have heard—that he nourishes in his heart the dream of one day being Mr. Roosevelt's successor. I suppose he sets his sights for 1940—provided his Chief is willing to terminate his tenure at the end of the traditional two terms which a delusion of grandeur may have already accorded him.

Of course, it is an honorable ambition to become President, and no one objects to Mr. Hopkins nourishing that dream. But are the taxpayers of the country to pay for building up a political machine to be used by Mr. Hopkins for the attainment of the White House? The suggestion is shocking, I know. However, it is not nearly so disturbing as the indifference with which some of us have viewed our duty to see that no such thing shall ever happen. The partisan influence of public money already is a Nation-wide scandal. Why should we feed that fire?

His friends assure us that Mr. Hopkins is a paragon of all the virtues. He has the reputation of being a prince charming. But so had Claude Duvall, the notorious French "Robin Hood." While he awaited hanging at Tyburn thousands of his victims and their friends petitioned King Charles II for a reprieve for Duvall because he was "so romantic." Well, romance may be all right in its place. My fear, however, is that we have had rather too much romance in high places in Washington recently.

For instance, there was the romance of getting millions of men back to work. I have lost track of the number of times Mr. Hopkins promised to have 3,000,000 or 4,000,000 of the unemployed in jobs. He and the President changed the date, altered the deadline, so often that not even professional newspapermen could keep up with them. Yet the solemn fact is that there are now eleven or twelve million persons in this country able and willing to work but not fortunate enough to find the promised employment. The problem is not solved, despite the rosy picture painted by Harry Hopkins and other New Deal orators.

It is about Hopkins' rival, Public Works Administrator Harold L. Ickes, that another of these intriguing whispers is being circulated. I speak of it solely that my associates on the other side of the aisle may deny it, if it can be truthfully denied. He has been shut out of the pending bill. It is common knowledge that President Roosevelt has objected to any money being allotted for P. W. A. Indeed, it is rumored that he has declared that he will veto any attempt to earmark any part of Mr. Hopkins' billion and a half for Mr. Ickes' use. But still more serious is the arresting report that Mr. Ickes has said he will resign his office rather than permit the public to understand that by his continued presence in the Cabinet he is giving tacit consent to the extravagance and waste of Mr. Hopkins' boondoggling operations. I do not know the facts, nor do I care much about them. The rumor is enough to give us pause.

Look at the picture. Mr. Roosevelt is a candidate for reelection. Naturally he wishes Mr. Ickes to go on the stump for him; yet, by refusal to give further support to them, he repudiates the things Mr. Ickes has done. The contradiction is enough to make even a bronze effigy laugh. I am informed that it is true, nonetheless. The situation has been discussed even in the public prints. On Friday last Mr. Roosevelt went so far as to tell his press conference that P. W. A. is to be allowed to survive, though in a dwarfed and mutilated form.

If we are interested in knowing why Mr. Ickes is being gradually eased out of the New Deal organization, we may recall the time when his intelligence force investigated Mr. Farley's connection with P. W. A. awards in New York City.

The President has used the phrase "I do not care who signs the checks." That is not a profound observation. In my humble estimation it is a rather stupid one. It suggests that Mr. Roosevelt does not realize, or believes we do not realize, that whoever pays the piper commonly calls the tune. The fact is that whoever signs the checks will be spending the money. If Mr. Hopkins signs them, we are in for another spasm of political boondoggling. If Mr. Ickes signs them, the people may be granted what generally is considered "a break" in getting a certain amount of permanent value for the taxpayer's money.

The difference is worth studying. Resisting as I do the demand for a billion and a half dollars at a time when the administration is claiming that prosperity has returned, I am skeptical of the need of turning over any such amount of money to any one person. But if this appropriation is forced upon us, I favor applying it to public works which will be undertaken with some regard for practical feasibility and durable advantage—public works that will some day return at least a portion of the funds spent and lent. I am weary to death of hearing about the leaf that was raked all the way from Mount Vernon to Washington and back again. I am confident that our citizens would rather have for the money a bridge, or a road, or some other sound development.

That suggests to my mind another example of Mr. Hopkins' venturesome temperament. We all remember, I hope, how he was planning to eliminate all the dangerous grade crossings. Even the President talked extravagantly about the proposal, following a frightful accident at Rockville, Md., in which 14 school children were killed. I should like to challenge Mr. Hopkins to name a single grade crossing which has been eliminated by him since that accident and since he broadcast his plan more than a year ago.

We should be entitled to estimate the future by the past. I say to the Senate that we have no accurate information about what W. P. A. has been doing. We have demanded it, but Senators on the other side of the aisle have promptly laid our demands on the table. When Republicans were in power in the Senate, Tom Walsh was never denied. We cooperated with him. Now, with the need for legislative information at its highest point in history, we meet nothing but suppression. Where is General Hugh Johnson's report on the W. P. A. in New York City? Locked up in Mr. Hopkins' desk. Under former administrations, Republican or Democratic, any United States Senator got information when he asked for it. Under Roosevelt, Hopkins, and Wallace, even my friends on the other side of the aisle take their orders and remain in ignorance. General Johnson can hardly be said to be a Republican partisan. That report, said to be temperate and scientific, would be helpful to all of us in determining our action on this bill. Where is it? Why can we not see it?

In 1937, when we shall have returned to real and sensible party government, when business and our citizens shall once again have returned to normal existence, then, I suppose, the Johnson report will see the light of day. It will make interesting historical reading, but I should like to have it right now as a guide in my consideration of the pending bill.

Apparently, there is little hope that we ever shall have any accurate information about what the W. P. A. designs to do in the next few months. I doubt if Mr. Hopkins is the kind of person who keeps careful accounts. He promises easily, and perhaps sincerely, but I doubt if he himself

actually knows much about what is happening. He certainly has shown me nothing to make me believe he does. His appetite remains unabated. Like the municipalities to which he caters and from which he solicits business, he has the "get all you can" habit, and that is dangerous. For one thing, it encourages irresponsibility among other Government officers; for another, it stimulates municipalities to expect the Federal Government to do for them what they should do for themselves. It institutionalizes mendicancy. It promotes thriftlessness. It is criminal to encourage such attitudes at this time or any other time.

We are told over and over again by the President, Hopkins, and Farley that there is no politics in relief; but at least two of my Democratic brothers on the other side of the aisle have insisted that there is—the Senator from Indiana [Mr. VAN NUYS] and the Senator from West Virginia [Mr. HOLT]. Apparently, there is politics in relief only when the money is being used against you. In June 1934, upon the occasion of his acceptance of a degree from Yale University, the President stated that he knew nothing about the politics of the men to whom he gave appointment. The President, in his declared ignorance of W. P. A. politics, has allowed Mr. Hopkins to plug in the Senators from Indiana and West Virginia on "busy" wires. But Mr. Hopkins, who is operating the Work Relief exchange, through his opportunity for "listening in", has more intimate knowledge than his chief. He has amazing canniness for knowing just when a relief situation develops in a State. For some unexplained reason, he knows that there is a serious relief situation in Pennsylvania at the present time. The Hopkins temperament is not to let persons suffer, and so he is seeing to it that funds are being poured into the State. It so happens that the New Dealers are turning heaven and earth in an effort to carry Pennsylvania this fall. As a result, it is difficult for a motorist to move along the roads of Pennsylvania. W. P. A. workers are as thick as fleas.

No politics in relief! The following two letters, of which I have photostatic copies in my possession, give a final, emphatic answer to that question.

Letter no. 1 is under date of March 31, 1936. This letter is from a gentleman who holds one of the highest offices in the Federal Government, and is addressed to one who sought his influence. The signer is not on the lower rungs of the political ladder, as were the Democratic ward and county leaders of West Virginia and Pennsylvania whose letters have been exposed. They were shocking enough. This writer is a highly placed Federal officeholder.

MY DEAR MR. BLANK:

I have received your letter of the 27th, contents of which I have very carefully noted.

In reply, I beg to state that if you will furnish this office with a letter of recommendation from the Democratic chairman of your county * * *, I will be more than glad to take your case up with the Works Progress Administration in * * * county and do everything I can in an effort to help you. This procedure is followed in all instances.

With kindest regards, I am.

Letter no. 2 is under date of March 30, 1936. The second letter was written by another powerful Washington figure to the same addressee.

DEAR MR. BLANK: Yours of March 26 has been received. I note your desire to secure a position with the W. P. A. I am taking this matter up with Mr. —— today, requesting him, if possible, to find some place for you.

Of course, I do not control these appointments, but I am glad to render my Democratic friends any assistance I can.

With best wishes, I am.

It will be noted that the second writer is much more cautious than the open and frank individual who wrote the first letter. The second writer happens to have held office in Washington for a very long time.

No politics in relief! Perhaps my friends across the aisle will at least admit that there is some "relief" in politics.

American citizens have great sympathy for the man who is willing to work. The whole Nation is solicitous of the welfare of the unemployed man and his family. In a land of plenty no one must go hungry. It is clear that the New Deal program of scarcity eliminates jobs and causes poverty.

What this country needs today is real jobs at real wages for all workers. Let us encourage capital to provide these jobs. Government restrictions and Federal competition with private interests must be eliminated. Confidence must be restored to business. Industry must expand so that money will go into investments, so that men will be called back to their jobs. So long as Government bullies business the unemployment question will not be settled.

Until that time arrives, I am in favor of giving assistance to those in distress. No family must suffer. But the pittance from Federal relief gives no man the comforts and enjoyments to which he is entitled. It is the program of abundance, rather than the program of scarcity, which will bring the greatest happiness to all men.

Relief should be administered through State agencies. The Federal and State Governments should cooperate in financing that program. Waste must be eliminated. No longer should hungry people be intimidated by political puppets. No longer should an American citizen be required to trade his vote for bread.

The need to keep thousands of workless men and women and their children from starving, through no fault of their own, is a need which is with us always.

It is not only an occasional duty. But no good purpose is served by dividing the crust with the professionally unworthy. By that I mean the grafters who have robbed the poor—sometimes with the unprotesting consent of those charged to defend them. W. P. A. has been a stamping ground for fakers and frauds. Against P. W. A., however, I have heard no such criticism leveled. Mr. Ickes may have faults, but he holds firm to the principles of honest, decent, cautious, and candid administration. If that be "slow", I pray Providence for more of that kind of tardiness.

In conclusion, I plead for thorough, informed, sympathetic, and intelligent consideration of this bill. The bill, as it has been introduced in this Senate, should be redrafted, revised, reformed, reconstructed. It represents a blank check such as we should not give to any individual for any purpose. I object to it because I am convinced that it is unwise, unsound, unreasonable, and unlikely to help the people whom it is supposed to benefit.

Indeed, I believe that the time has come when our whole policy of relief should be corrected. And I have faith that in the event Mr. Roosevelt does not move in that direction, and should this Congress fail to investigate existing conditions and then act in that direction, the people of the land—at the polls—will take the matter into their own hands and dispose of it in line with their traditions, their needs, and their ideals as they are, not merely as some ambitious tyro, thirsty for political power, supposes them to be.

Mr. President, I invite attention to certain of the provisions of the deficiency appropriation bill under the heading of "Works Progress Administration" which are affected by the decision of the court today. Appropriation is made of $1,425,000,000 for certain classes of projects, and among these I find the following:

Public buildings, an authorized project.

Parks and other recreational facilities, another authorized project.

Public utilities, including sewer systems, water supply and purification, airports, and other transportation facilities, all authorized projects.

Flood control and other conservation, an authorized project.

White-collar projects, for which there is no authorization.

Women's projects. There is nothing anywhere authorizing any such projects.

National Youth Administration, an authorized project.

Rural rehabilitation and relief to farmers, for which there is no authorization.

The question I wish to bring to the attention of the Senate at this time is the decision of the court today, which is only

the decision of the Court of Appeals of the District of Columbia, as to which the Washington Star says:

Three of the five judges decided the $4,880,000,000 law was void because of improper delegation of powers to the President, invasion of States' rights, and lack of definite authorizations.

Possible effects of the opinion on the pending relief-deficiency bill was the subject of immediate study by administration leaders.

Like the $4,880,000,000 relief appropriation of last year, the $1,425,000,000 relief fund now before the Senate Appropriations Committee would be allotted only by broad classifications.

I ask that three paragraphs referring to which I have indicated in the Star, referring to the decision of the court, may be included as a part of my remarks.

There being no objection, the three paragraphs were ordered to be printed in the RECORD, as follows:

"The fundamental question involved is the total lack of constitutional power on the part of Congress to put into operation through legislation a project such as is here contemplated", stated the opinion, which was written by Associate Justice Josiah A. Van Orsdel. "And this can be ascertained, not from any possible determination of fact, but from the very terms of the statute itself."

* * * * * * *

"The Constitution will likewise be scanned in vain for a power conferred upon the Federal Government to regulate 'housing' or to 'resettle' populations. Those words are not explicit there nor do we think they are implicit in any power which that instrument confers upon Congress; and unless the power exists, any effort by Congress to assert it, at once transcends the scope and limitation of section 8 of article I and violates the tenth amendment."

Refusing to accept the administration's contention that the act is an appropriation for the general welfare of the United States Justice Van Orsdel again quoted the United States Supreme Court in the A. A. A. case to the effect that "the attainment of a prohibited end may not be accomplished under the pretext of the exertion of powers which are granted."

DEATH OF REPRESENTATIVE WILLIAM D. THOMAS, OF NEW YORK

The PRESIDING OFFICER. The Chair lays before the Senate resolutions from the House of Representatives, which will be read.

The legislative clerk read the resolutions (H. Res. 517), as follows:

IN THE HOUSE OF REPRESENTATIVES OF THE UNITED STATES,
May 18, 1936.

Resolved, That the House has heard with profound sorrow of the death of Hon. WILLIAM D. THOMAS, a Representative from the State of New York.

Resolved, That a committee of four Members of the House, with such Members of the Senate as may be joined, be appointed to attend the funeral.

Resolved, That the Sergeant at Arms of the House be authorized and directed to take such steps as may be necessary for carrying out the provision of these resolutions and that the necessary expenses in connection therewith be paid out of the contingent fund of the House.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased.

Resolved, That, as a further mark of respect, this House do now adjourn.

Mr. COPELAND. Mr. President, as the Senate has just been advised, one of the honored Members of the New York delegation in the House of Representatives, Hon. WILLIAM D. THOMAS, died yesterday. Mr. THOMAS took the place of former Representative Parker, who was a Member of the House for many years. We of the New York delegation are all regretful because of Mr. THOMAS' death.

I send to the desk resolutions which I ask to have read and immediately considered.

The resolutions (S. Res. 300) were read, considered by unanimous consent, and unanimously agreed to, as follows:

Senate Resolution 300

Resolved, That the Senate has heard with profound sorrow the announcement of the death of Hon. WILLIAM D. THOMAS, late a Representative from the State of New York.

Resolved, That a committee of two Senators be appointed by the Vice President to join the committee appointed on the part of the House of Representatives to attend the funeral of the deceased Representative.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

Under the second resolution the Presiding Officer appointed as the committee on the part of the Senate the Senators from New York [Mr. COPELAND and Mr. WAGNER].

Mr. COPELAND. Mr. President, as a further mark of respect to the memory of our deceased friend, I move that the Senate take a recess until 12 o'clock noon tomorrow.

The motion was unanimously agreed to; and (at 5 o'clock and 38 minutes p. m.) the Senate took a recess until tomorrow, Tuesday, May 19, 1936, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate May 18 (legislative day of May 12), 1936

DIPLOMATIC AND FOREIGN SERVICE

Harold M. Collins, of Virginia, now a Foreign Service officer of class 6 and a consul, to be also a secretary in the Diplomatic Service of the United States of America.

Stuart Allen, of Minnesota, now a Foreign Service officer of class 8 and a consul, to be also a secretary in the Diplomatic Service of the United States of America.

TENNESSEE VALLEY AUTHORITY

David E. Lilienthal, of Wisconsin, to be a member of the Board of Directors of the Tennessee Valley Authority for the term expiring 9 years after May 18, 1936. (Reappointment.)

BOARD OF TAX APPEALS

Samuel B. Hill, of Washington, to be a member of the Board of Tax Appeals for a term of 12 years from June 2, 1936.

APPOINTMENTS IN THE REGULAR ARMY

MEDICAL CORPS

To be first lieutenants with rank from date of appointment

First Lt. Charles Harden Schutt, Medical Corps Reserve.

First Lt. Walter Richard Cook, Medical Corps Reserve.

APPOINTMENTS, BY TRANSFER, IN THE REGULAR ARMY

TO JUDGE ADVOCATE GENERAL'S DEPARTMENT

Capt. Claude Bayles Mickelwait, Infantry, with rank from January 13, 1930.

TO QUARTERMASTER CORPS

Capt. Thomas Russell Howard, Infantry, with rank from August 1, 1935.

Capt. Eggleston Westley Peach, Infantry, with rank from June 13, 1931.

Capt. Willis Arthur Platts, Infantry, with rank from January 19, 1924.

TO CAVALRY

First Lt. Whitside Miller, Infantry, with rank from March 1, 1935, effective June 25, 1936.

PROMOTIONS IN THE REGULAR ARMY

TO BE LIEUTENANT COLONEL

Maj. Albert Whitney Waldron, Field Artillery, from May 9, 1936.

TO BE MAJOR

Capt. William Oliver Reeder, Signal Corps, from May 9, 1936.

CONFIRMATIONS

Executive nominations confirmed by the Senate May 18 (legislative day of May 12), 1936

DIPLOMATIC AND FOREIGN SERVICE

George Orr to be secretary in the Diplomatic Service.

Earl L. Packer to be Foreign Service officer of class 4, a consul, and a secretary in the Diplomatic Service.

Vinton Chapin to be Foreign Service officer of class 6, a consul, and a secretary in the Diplomatic Service.

Cornelius Van H. Engert to be Foreign Service officer of class 1.

William M. Cramp to be Foreign Service officer of class 8 and a consul.

TENNESSEE VALLEY AUTHORITY

David E. Lilienthal to be a member of the Board of Directors of the Tennessee Valley Authority.

COLLECTOR OF INTERNAL REVENUE

Harry M. Hickey to be collector of internal revenue for the fourteenth district of New York.

APPOINTMENTS IN THE REGULAR ARMY

Bertrand Thomas Fitzmaurice to be first lieutenant, Medical Corps.

Maurice Crawford Davidson to be first lieutenant, Medical Corps.

Howard Hansen to be first lieutenant, Medical Corps.

Raymond Edward Duke to be first lieutenant, Medical Corps.

Robert Stuart Nelson to be first lieutenant, Medical Corps.

PROMOTIONS IN THE REGULAR ARMY

John Stephen Sullivan to be colonel, Infantry.

James Lawton Collins to be colonel, Field Artillery.

William Caldwell McChord to be colonel, Air Corps.

William Rudicil Henry to be colonel, Field Artillery.

Edwin Coit Kelton to be lieutenant colonel, Corps of Engineers.

James Allen Lester to be lieutenant colonel, Field Artillery.

Mason James Young to be lieutenant colonel, Corps of Engineers.

Layson Enslow Atkins to be lieutenant colonel, Corps of Engineers.

Edwin Albert Zundel to be lieutenant colonel, Field Artillery.

Clinton Wilbur Howard to be lieutenant colonel, Air Corps.

Charles Manly Busbee to be lieutenant colonel, Field Artillery.

David Grove to be major, Quartermaster Corps.

James Horace Barbin to be major, Quartermaster Corps.

Wiley Hubbard O'Mohundro to be major, Infantry.

Herman Henry Pohl to be major, Corps of Engineers.

Kenneth Mason Moore to be major, Corps of Engineers.

Edmond Harrison Levy to be major, Corps of Engineers.

Thomas Dodson Stamps to be major, Corps of Engineers.

Bartley Marcus Harloe to be major, Corps of Engineers.

Girard Blakesley Troland to be major, Corps of Engineers.

William Herschel Allen to be colonel, Medical Corps.

Larry Benjamin McAfee to be colonel, Medical Corps.

Adam, Edward Schlanser to be colonel, Medical Corps.

Joseph Edward Bastion to be colonel, Medical Corps.

Alexander Taylor Cooper to be colonel, Medical Corps.

Taylor Edwin Darby to be colonel, Medical Corps.

Harry Reber Beery to be colonel, Medical Corps.

Royal Reynolds to be colonel, Medical Corps.

Ralph Godwin DeVoe to be colonel, Medical Corps.

Wibb Earl Cooper to be colonel, Medical Corps.

Thomas Ludlow Ferenbaugh to be colonel, Medical Corps.

George William Cook to be colonel, Medical Corps.

William Lloyd Sheep to be colonel, Medical Corps.

Edgar Clyde Jones to be colonel, Medical Corps.

Floyd Kramer to be colonel, Medical Corps.

William Frederick Rice to be lieutenant colonel, Medical Corps.

Edward Allen Noyes to be lieutenant colonel, Medical Corps.

Charles Woodward Riley to be lieutenant colonel, Medical Corps.

Charles George Sinclair to be lieutenant colonel, Medical Corps.

Charles George Hutter to be lieutenant colonel, Medical Corps.

Frederick Hensel Petters to be lieutenant colonel, Medical Corps.

Robert Parvin Williams to be lieutenant colonel, Medical Corps.

Edwin Brooks Maynard to be lieutenant colonel, Medical Corps.

Harvard Clayton Moore to be lieutenant colonel, Medical Corps.

Arden Freer to be lieutenant colonel, Medical Corps.

Paul Adolph Schule to be lieutenant colonel, Medical Corps.

Frank Wiley Wilson to be lieutenant colonel, Medical Corps.

Paul Ashland Brickey to be major, Medical Corps.

James Willis Howard to be captain, Medical Corps.

James Sherwood Taylor to be captain, Medical Corps.

Jenner Garnett Jones to be captain, Medical Corps.

Eaton Wesley Bennett to be captain, Medical Corps.

Tom French Whayne to be captain, Medical Corps.

Burt Held to be captain, Medical Corps.

Joseph Garber Cocke to be captain, Medical Corps.

Alfonso Michael Libasci to be captain, Medical Corps.

Ralph Torrey Stevenson to be captain, Medical Corps.

Frank Owings Alexander to be captain, Medical Corps.

John Benson Grow to be captain, Medical Corps.

Daniel John Waligora to be captain, Medical Corps.

Byron Ludwig Steger to be captain, Medical Corps.

Louie Render Braswell to be captain, Medical Corps.

Dean Stirling Beiter to be captain, Dental Corps.

Elmer Emil Tiedt to be chaplain with the rank of captain, United States Army.

Reappointment in the Officers' Reserve Corps

Howard Seymour Borden to be brigadier general, Inactive Reserve, from July 13, 1936.

POSTMASTERS

MISSISSIPPI

Viola E. Pentecost, Doddsville.

NEW JERSEY

Raymond J. Hughes, Sr., Beachwood.

Walter MacPherson, Bridgeton.

Winifred E. Lindstedt, Helmetta.

Charles V. L. Booream, Milltown.

WASHINGTON

Otto N. Sorensen, Edmonds.

William A. Bauman, Lynden.

Edward N. Blythe, Vancouver.

WITHDRAWAL

Executive nomination withdrawn from the Senate May 18 (legislative day of May 12), 1936

POSTMASTER

MASSACHUSETTS

Thomas A. O'Connor to be postmaster at North Easton, in the State of Massachusetts.

HOUSE OF REPRESENTATIVES

MONDAY, MAY 18, 1936

The House met at 12 o'clock noon.

Rev. Dr. Clough A. Waterfield, of the Methodist Episcopal Church South, of Memphis, Tenn., offered the following prayer:

O eternal Spirit, our Heavenly Father, soul of our souls and safeguard of the world, we ought to thank Thee, and we do thank Thee, for the heritage which here is ours. For the share we have, each and all, in the incomparable work in building the great democracy of the west, in the achievement of the American dream. Touch us all again and again to the great issues. Grant to these, Thy servants, the gentleness which makes men great; the spirit of truth for their minds; the spirit of justice for their souls; and in their hearts the high courage of the old inextinguishable hope. May the Congress and the courts, the President and the people in all the swift and sweeping changes, confusions, and perplexities which beset our time look with confidence and with great blessing for light and stability to that—

> One face which, far from vanish, rather grows,
> Or decomposes but to recompose,
> Becomes our universe that feels and knows.

Amen.

The Journal of the proceedings of Thursday, May 14, 1936, was read and approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Latta, one

of his secretaries, who also informed the House that on the following dates the President approved and signed a joint resolution and bills of the House of the following titles:

On May 8, 1936:

H. J. Res. 567. Joint resolution to provide an additional appropriation for expenses of special and select committees of the House of Representatives for the fiscal year 1936; and

H. R. 3673. An act for the relief of Bernard V. Wolfe and the Dixon Implement Co.

On May 13, 1936:

H. R. 11098. An act to provide for terms of the United States District Court for the Middle District of Pennsylvania to be held at Wilkes-Barre, Pa.; and

H. R. 11994. An act to provide for the establishment of a term of the District Court of the United States for the Western District of Oklahoma at Shawnee, Okla.

On May 15, 1936:

H. R. 3823. An act for the relief of the parents of Albert Thesing, Jr.;

H. R. 11035. An act making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1937, and for other purposes; and

H. R. 12098. An act making appropriations for the Departments of State and Justice and for the judiciary, and for the Departments of Commerce and Labor, for the fiscal year ending June 30, 1937, and for other purposes.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Horne, its enrolling clerk, announced that the Senate had passed without amendment bills of the House of the following titles:

H. R. 8784. An act to authorize withholding compensation due Government personnel;

H. R. 9995. An act to grant a renewal of patent no. 59560, relating to the emblem of the Disabled American Veterans of the World War;

H. R. 10194. An act granting a renewal of patent no. 40029, relating to the badge of the Holy Name Society; and

H. R. 10934. An act to authorize the transfer of the customhouse at Salem, Mass., from the jurisdiction of the Treasury Department to the Department of the Interior.

The message also announced that the Senate had passed, with amendments, in which the concurrence of the House is requested, a bill of the House of the following title:

H. R. 10104. An act to aid in providing the people of the United States with adequate facilities for park, parkway, and recreational-area purposes, and to provide for the transfer of certain lands chiefly valuable for such purposes to States and political subdivisions thereof.

The message also announced that the Senate had ordered that the Secretary be directed to request the House to return to the Senate the bill H. R. 8940, an act to amend an act entitled "An act to establish a uniform system of bankruptcy throughout the United States", approved July 1, 1898, and acts amendatory thereof and supplementary thereto, with the Senate amendments and all papers pertaining thereto.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 3841. An act to amend an act entitled "An act to establish a uniform system of bankruptcy throughout the United States", approved July 1, 1898, and acts amendatory thereof and supplementary thereto;

S. 4457. An act authorizing the appointment of an additional circuit judge for the third circuit;

S. 4594. An act to supplement the act of June 25, 1929 (ch. 41, 46 Stat. L. 41), which authorized and directed the Attorney General to institute suit against the Northern Pacific Railway Co. and others; and

S. 4609. An act to correct the description of certain land granted to the University of Utah.

The message also announced that the Senate insists upon its amendments to the bill (H. R. 9496) entitled "An act to protect the United States against loss in the delivery through the mails of checks in payment of benefits provided for by laws administered by the Veterans' Administration", disagreed to by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. McKELLAR, Mr. HAYDEN, and Mr. FRAZIER to be the conferees on the part of the Senate.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3483) entitled "An act to provide for rural electrification, and for other purposes."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3789) entitled "An act authorizing the Secretary of Commerce to convey the Charleston Army Base Terminal to the city of Charleston, S. C."

The message also announced that the Senate insists upon its amendments to the bill (H. R. 12527) entitled "An act making appropriations for the Navy Department and the naval service for the fiscal year ending June 30, 1937, and for other purposes", disagreed to by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. BYRNES, Mr. COPELAND, Mr. WALSH, Mr. HALE, and Mr. KEYES to be the conferees on the part of the Senate.

CONTROL OF FLOODS ON MISSISSIPPI RIVER

Mr. DRIVER, from the Committee on Rules, submitted the following resolution, which was referred to the House Calendar and ordered printed:

House Resolution 516

Resolved, That immediately upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of S. 3531, an act to amend the act entitled "An act for the control of floods on the Mississippi River and its tributaries, and for other purposes", approved May 15, 1928, and all points of order against said bill are hereby waived. That after general debate, which shall be confined to the bill and continue not to exceed 2 hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Flood Control, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the reading of the bill for amendment the Committee shall rise and report the same to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit, with or without instructions.

AIR CORPS TECHNICAL SCHOOL

Mr. LEWIS of Colorado, from the Committee on Rules, submitted the following resolution, which was referred to the House Calendar and ordered printed:

House Resolution 515

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of S. 3398, an act to establish the Air Corps Technical School and to acquire certain land in the State of Colorado for use as a site for said Air Corps Technical School and as an aerial gunnery and bombing range for the Army Air Corps. And all points of order against said bill are hereby waived. That after general debate, which shall be confined to the bill and continue not to exceed 1 hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Military Affairs, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the reading of the bill for amendment, the Committee shall rise and report the same to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit, with or without instructions.

BUREAU OF NAVIGATION AND STEAMBOAT INSPECTION—CONFERENCE REPORT

Mr. BLAND. Mr. Speaker, I present a conference report and statement for printing, under the rule, on the bill (H. R. 8599) to provide for a change in the designation of the Bureau of Navigation and Steamboat Inspection, to create a marine casualty investigation board, and increase efficiency in administration of the steamboat inspection laws, and for other purposes.

CHARLESTON ARMY BASE TERMINAL

Mr. BLAND. Mr. Speaker, I present a conference report and statement upon the bill (S. 3789) authorizing the Secretary of Commerce to convey the Charleston Army Base Terminal to the city of Charleston, S. C., which is submitted for printing under the rule.

CHANGE OF REFERENCE

Mr. RAYBURN. Mr. Speaker, I ask unanimous consent for reference of the bill (H. R. 12722) to aid the several States in making certain toll bridges free bridges, to authorize an appropriation for such purpose, to make such appropriation available for matching with funds apportioned under the Federal Highway Act, and for other purposes, from the Committee on Interstate and Foreign Commerce to the Committee on Roads.

The SPEAKER. Is there objection?

There was no objection.

WHY THE WAGNER-ELLENBOGEN HOUSING BILL SHOULD BE PASSED AT THIS SESSION OF CONGRESS—THE DEMAND FOR ITS ENACTMENT GROWS STRONGER DAILY

Mr. ELLENBOGEN. Mr. Speaker, I ask unanimous consent to extend my own remarks in the RECORD.

The SPEAKER. Is there objection?

There was no objection.

Mr. ELLENBOGEN. Mr. Speaker, few measures which have been proposed in the Seventy-fourth Congress have received the enthusiastic endorsement and support accorded the Wagner-Ellenbogen housing bill.

Almost daily, newspapers and magazines throughout the country have been commenting on the features of this bill, on its soundness, and on its worth as a recovery measure and as a social need.

THE SCRIPPS-HOWARD NEWSPAPERS CONTINUE THEIR CAMPAIGN FOR THE BILL

Within the past few days two more editorials have appeared in the Scripps-Howard chain of newspapers asking for action on the bill at this session.

On Saturday, May 9, and Sunday, May 10, under the respective headings "England did it" and "Unfinished business", the Pittsburgh Press and other members of the Scripps-Howard chain continue their active campaign for the bill.

Calling this measure "a sound, sensible, and moderate approach to the problem"—of rehousing the country's city and rural slum dwellers—the first editorial demands enactment of the bill as one of the primary steps in "social reconstruction."

NO REASON FOR DELAY

It also points out again the excellent features of the bill whereby the costs of dwelling construction are spread over 4 years and adds that since much of it would be returned to the Federal Government by the localities there is no reason for its delay.

ENGLAND DID IT

In the second of the two editorials, that of May 10, it is pointed out that:

The Wagner-Ellenbogen bill, now backed as an administration measure, does not appear before Congress as just another New Deal experiment. It aims to profit by our own American mistakes, and it takes for its guide the British rehousing plans that appear to have worked exceedingly well.

Citing as its authority Mr. Coleman Woodbury, director of the National Association of Housing Officials, the Press remarks:

We learn that subsidized low-rent housing (in England) not only has provided decent homes for millions of British working people but has proved a powerful stimulant to private enterprise.

As the editorial points out, subsidized housing in England was begun right after the World War, and the results of this project are truly amazing.

Between the armistice and April 1, 1935, 2,655,902 housing units were built, of which 1,230,172 received subsidy. The interesting thing is that, while at the beginning the bulk of the work was subsidized, private building was so stimulated that in 1934 it accounted for 85 percent of the units built.

IT WOULD REVIVE THE BUILDING INDUSTRY

I call particular attention to the last sentence of the quotation above. It is a direct refutation of the charge that the type of housing undertaken in the Wagner-Ellenbogen bill would discourage private capital from participating in home construction.

This program, more than anything else, according to Herbert Morrison, chairman of the London County Council, "kept England's heavy industries stabilized until private building took up the task about 2 years ago."

IT BROUGHT PROSPERITY TO ENGLAND

Other advantages also accrued in England, directly as a result of this program.

Mr. Woodbury found that under the British program the assets of British thrift societies increased 800 percent; that losses from uncollected rents from London's 70,000 new subsidized units were less than one-eighth of 1 percent; that the public and private building financing gave needed outlets for safe capital investments; the new low-rental homes did not depress wages or reduce buying power, but, on the contrary, raised living standards and stabilized families in decent quarters.

"As it worked in England", the editorial rightly concludes, "it should work here."

PASS THE WAGNER-ELLENBOGEN HOUSING BILL

Mr. Speaker, such a program will work here. It is embodied specifically in the Wagner-Ellenbogen bill. I am convinced that such a bill, enacted 4 or 5 years ago, would have been our outstanding and most successful recovery measure. We did not do it then, and the loss has been ours.

To continue to do nothing would be the height of folly. Now that our great mistake has been so clearly made evident to us, we can make up our minds that it can be rectified, and quickly.

We can do it by passing the Wagner-Ellenbogen bill.

H. R. 12659

Mr. FERNANDEZ. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting a statement from the National Federation of Federal Employees and my reply thereto in connection with a bill which I introduced.

The SPEAKER. Is there objection?

There was no objection.

Mr. FERNANDEZ. Mr. Speaker, under the leave to extend my remarks in the RECORD I include the following statement from the National Federation of Federal Employees and my reply thereto, in connection with a bill introduced by me:

NATIONAL FEDERATION OF FEDERAL EMPLOYEES,
Washington, D. C., May 1936.

Another "typical blow at the merit system" was revealed today by Secretary-Treasurer Gertrude M. McNally, of the National Federation of Federal Employees, in a bill just introduced in the House of Representatives to provide for court stenographers in the United States district courts and to fix their duties and compensation.

As pointed out by Miss McNally, the last paragraph of the bill (H. R. 12659) contains the following provisions:

"Stenographers may be engaged by the United States district courts regardless of the Civil Service Act, as amended: *Provided*, That such expert stenographers shall be entitled to leave under the leave statutes of 1935 and shall be entitled to annuity as provided in the Retirement Act, as amended, as applicable to civil-service employees in the United States."

"This blow is typical of unnumbered attacks upon the Federal merit system during recent years", Miss McNally declared. "However, it is interesting to note that while the bill provides that the appointees shall receive all the benefits under the civil-service system, it omits any demand upon the prospective employees for a qualifying test to prove fitness.

"Court stenography is specialized work of the highest importance. There is no possible excuse for excluding such positions from the civil-service system and tossing them to the spoilsmen for patronage distribution.

"This provision of H. R. 12659 is one of a seemingly endless succession of evasions and attempted evasions of the civil-service laws and regulations during the past 3 years. The result has been the most complete break-down of the Federal merit system in generations.

"When will the public, that pays the bills, call a halt to this work of destruction?"

Miss GERTRUDE M. MCNALLY,
Secretary-Treasurer, National Federation of Federal Employees, 10 Independence Avenue SW.,
Washington, D. C.

DEAR MISS MCNALLY: It has come to my attention that you gave out a release to the press criticizing that provision of my bill (H. R. 12659) introduced on May 11, 1936, and referred to the Committee on the Judiciary, calling for appointment of Federal district court stenographers regardless of civil-service examination.

Because of the special nature of such expert services, I thought it best to have the bill introduced in this manner. However, everyone familiar with legislation knows that any bill is subject to amendment to satisfy everyone concerned. I myself certainly would not object to an amendment to place such stenographers under the civil service completely.

I don't think anyone would care to cast any aspersions or insinuations upon the judges of the many Federal district courts, who, although they are appointed by the President, by and with the consent of the United States Senate, serve for a lifetime, or until removed for cause. I, for one, certainly would say that Federal judges in my district would name court stenographer regardless of my opinion or recommendation.

The very nature of such expert services itself suggests that just any ordinary stenographer could not perform this work; and these court stenographers would have to be experts, as you very well know. Therefore any talk or insinuation such persons would not be merited is nonsense.

On what ground do you make the statement, "There is no possible excuse for excluding such positions (referring to court stenographers) from the civil-service system and tossing them to the spoilsmen for patronage distribution"?

How are the law clerks of the United States district courts appointed? By the judge, of course, according to the provision of Public, No. 449, Seventy-fourth Congress, approved February 17, 1936. Have you checked with the United States Civil Service Commission to determine if United States courts are subject or not subject to their system? I am sure, if you had taken the trouble to do this, you would have determined that all the courts of the United States are not subject to the civil-service system.

I'm not going to ask you to issue a new release, but I am sending copies of this statement to all newspapers in my district in Louisiana so they will know the truth about this matter. But, as stated before, I have no objections to an amendment to place these court stenographers under the examination system of the Civil Service Commission of the United States, although it will be the first positions in the United States courts to be subjected to this system.

It might interest you to know that my record in Congress is favorable toward Federal employees, and that I would not want to be put in a position of tearing down the civil-service system of the United States. I could go on at length to talk about what you have on your mind—New Deal agencies—but that is uncalled for at this time.

Feel free to discuss openly or privately with me any matter you have on your mind. You will find I just want to be fair to everybody.

I appreciate your deep interest in these affairs.

J. O. FERNANDEZ,
Member of Congress, First District, Louisiana.

"BEATING THE LIVING WITH THE BONES OF THE DEAD"—JEFFERSON ADVISED AGAINST IT; AND NOW THE LIBERTY LEAGUERS TRY TO MISREPRESENT JEFFERSON'S VIEWS

Mr. MAVERICK. Mr. Speaker, I ask unanimous consent to extend my own remarks and include a book review on The Living Jefferson, by James Truslow Adams, that appeared in the New Republic, a national weekly, and certain excerpts from letters of Thomas Jefferson.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. RICH. Reserving the right to object, how much of the RECORD is that book review going to require?

Mr. MAVERICK. Not so much. It is a book review by me on a book by James Truslow Adams, and certain excerpts from letters of Jefferson.

Mr. RICH. How much space will the letters require?

Mr. MAVERICK. Not very much.

Mr. RICH. A page or two pages?

Mr. MAVERICK. It may be as much as that.

Mr. RICH. Not more than two pages?

Mr. MAVERICK. I am not sure, but I do not think so. The letters will be in small type.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. MAVERICK. Mr. Speaker, it has been the habit through ages to dig up ancestors and twist them around to meet the desires and aims of the diggers. It has always been the reactionaries, because they have had the money and the power. In America today the Liberty Leaguers and reactionaries have dug up Thomas Jefferson, trying to make him a model reactionary who ordered his descendants to keep forever the law exactly as it was immediately following the Revolution.

In Rome the hungry and suffering people were accused of being in the pay of Greece and indulging in obscene Greek orgies; in every country today absolutism, dictatorship, and misgovernment of all kinds is bolstered by a false interpretation of ancestors, and a denunciation of "foreigners." Groups who really have no respect for sacred writings or the true import of national figures in history always raise these as bogeymen to frighten the people.

Thomas Jefferson specifically warned future generations against "beating the living with the bones of the dead." But the Liberty Leaguers have stolen him for their hero, and have publicly paraded him before the American people in garments which he never wore.

JAMES TRUSLOW ADAMS GETS IN A FRENZY

James Truslow Adams recently wrote a book on Thomas Jefferson, and such a gross misinterpretation was never done before. Mr. Adams appears to be like a lot of the "liberals" I know. They are great on antiques, art, and Shakespeare, and such like, but when their prejudices about wealth are touched in any way they go into a frenzy. Thus, Mr. Adams, who has written many good books before, has gotten himself all excited and has twisted Jefferson around into something he never was.

In connection with this I have written a book review which I have entitled "Beating the Living with the Bones of the Dead", which appeared in the New Republic of May 13, 1936, and which is attached below. Also I attach below some letters and statements of Thomas Jefferson which are fairly representative of his ideas about politics and government. If some of the statements he made were made today by a modern public official he would undoubtedly be run out of the country. I append the statements without comment, but they are representative of his writings on various subjects of that day.

JEFFERSON INDIVIDUALIST—AND CONSERVATIONIST

It is very necessary in the interpretation of Jefferson to understand that he was in favor of laws beneficial to the people, whatever those laws were. He is held out as a great "individualist." I doubt if he believed in an individualism, which means a low standard of living for millions of people because of a false economic system, or by means of which a small group either by inheritance or power could exploit the millions.

In fact, his social philosophy as affecting the people as a whole seems to have been against monopolies owned by small groups; on the other hand, he favored the idea of cooperative effort. For instance, he advocated plowing of contours in order to save the soil and he was a proponent of conservation of natural resources, and believed that there should be farm cooperatives. However, he could not have foreseen the advance of science and industry, and time after time, as his letters will show, so stated. He had no idea of attempting to rule from the grave and said so many times. He wanted each generation to settle its own troubles.

And as for each generation settling its own affairs one of the most interesting letters is attached below, IV. Ancestor Worship, 8. Letter to du Pont de Nemours, 1811. It is hoped that many people will read this letter of 25 words, among them the descendants of Monsieur Du Pont, especially the Prize Twelve who attended the Liberty League dinner held a few weeks ago which was graced by the Honorable Alfred Emanuel Smith.

From his acts in life and from his letters we draw two or three conclusions:

First, that liberty of speech, religion, education, and knowledge are necessary in any civilized government.

Second, that each generation must solve its own affairs.

Third, that his social philosophy was far ahead of his day, particularly on conservation and cooperative effort. The resources at that time, however, were in a virgin state, and he could not have realized the necessities of the industrial age.

The book review which appeared in the New Republic is as follows:

"BEATING THE LIVING WITH THE BONES OF THE DEAD"

(The Living Jefferson, by James Truslow Adams. New York: Charles Scribner's Sons. 410 pages. $3.)

The title of this book is a misnomer. It should have been: "Jefferson Repainted: Pigments by Du Pont, Oils by Standard Oil, Canvas by Hoosac Mills, Scenery by Schechter Bros., Execution by James Truslow Adams." As an example of a very clever writer and historian at his worst, it is excellent. As camouflage for the author's true purpose—an attack upon the New Deal—it is crystal clear. As an attempt to reconcile Jeffersonian and rugged individualism it is ludicrous.

The living Jefferson is the thinker and statesman who warned us against using the yardstick of the past alone in measuring the problems of the present. Mr. Adams treats him simply as a man who hoped for development of an agrarian rather than an industrial civilization. Whether we like it or not, an industrial civilization now dominates our lives and presents us with the problem of fitting our institutions into it.

MR. ADAMS' MIND READS JEFFERSON—WRONG

In mind reading on Jefferson, in telling us what he thought and what he would have done, Mr. Adams loses sight of the fact that Jefferson's mind was many-faceted. It is true that he was highly individualistic, but at the moment intense individualism menaced the social good he was quick to warn that "the unwritten laws of necessity, of self-preservation, and of the public safety control the written laws of meum and tuum." This is what Mr. Adams completely ignores. If we read the entire body of Jefferson's writings and read them not in the hope of finding substantiation for some particular point of view, we get in full perspective the mind of a man who would never have sought "to beat the living with the bones of the dead", as Mr. Adams is attempting to do.

And Mr. Adams is impartial with his mind reading. Hence we find the bonus marchers getting it in the neck. George Washington, who would have "killed" the first veterans' organization had he but known, is brought in on that. There is vindication for the Supreme Court in the Schechter sick-chicken case. He says, "Government for Jefferson was a necessary evil." There is no mention of the fact that Jefferson hated the Supreme Court.

NO INTERPRETATION OF THE LIVING JEFFERSON

Jefferson's hatred of monopoly is portrayed, as well as his belief that property is subject to the regulation of the state, although such personal rights as freedom of speech and press must be unlimited. Mr. Adams is very careful to point out that "liberalism and liberty were not phases of his youth; they were the very fiber of his being." None of this is news.

And there is no interpretation of the living Jefferson at all. There is much of Jefferson's philosophy of individuality based on liberty and the use of land, but no application of it to the problems of a civilization based upon machines, industrial monopoly and central financial control. There is no analogy with the monopolies of today, no discussion of the inherent right of citizens to a means of livelihood and a participation in the means of production under the present method.

Mr. Adams makes much of Jefferson's dislike of paper money, of Jefferson's belief in a balanced budget, of the fact that Jefferson was neither demagogue nor a "mobocrat." He skips over the perfectly obvious facts that Jefferson could have known nothing of modern finance and industry; and "balancing the budget", far from being a Jeffersonian invention, is part and parcel of any form of government. There are assertions coming like heavily laden freight cars—that he believed in a civilization based on agriculture, was opposed to primogeniture, was neither "theorist" nor "doctrinaire", had no "moon-calf vision"—which seem like efforts to apologize for Jefferson and to paint him patronizingly, at this late date, as a "liberal" (but a respectable liberal, an example of "soundness" and "practicality"), a man who was out with a glittering but very safe sword to balance the budget for the bond boys of New York.

JUST ANOTHER ANTI-NEW DEAL BOOK RUSHED TO PRINTER

One reads Mr. Adams' portrayal with a sense of expectancy, of waiting for the inevitable denouement. True to his trust, Mr. Adams gathers the fluttering threads of his theme and ties them together with the essential clue in his last two chapters. Here at last his true purpose is revealed. Just another anti-New Deal propaganda book rushed to the printer. Jefferson's party is confounded out of the mouth of Jefferson. The Roosevelt administration has forsaken the true faith; it is about the business of tearing down the temple so laboriously erected by Jefferson. Down with Roosevelt.

Mr. Jefferson, speaking through Mr. Adams, does grudgingly and cautiously approve the vigorous action of Roosevelt in those dark days in March and April 1933. So long as the strong arm of government is extended to aid banks and railroads all is well, but any attempt to extend this aid to the ordinary citizen, the farmer, the unemployed, and the indigent aged is a frontal attack upon Americanism.

BOOK RECOMMENDED TO LIBERTY LEAGUE ET AL.

Yes, "institutions must advance and keep pace with the times", Jefferson said. "If the man has grown too large to fit the coat he wore as a boy, whittle him down until he fits it", Mr. Adams seems to say. That is Mr. Adams' philosophy. It wasn't Jefferson's.

This book is highly recommended to the Liberty League, the Union League Club, the National Manufacturers' Association, the United States Chamber of Commerce, and the better-class country clubs.

MAURY MAVERICK.

Representative letters, writings, and statements of Thomas Jefferson are as follows:

I. ON THE CONSTITUTION

1. LETTER TO W. S. SMITH, NOVEMBER 1787

There are very good articles in it, and very bad. I do not know which preponderate.

2. LETTER TO E. CARRINGTON, DECEMBER 1787

As to the new Constitution I find myself nearly a neutral. There is a mass of good in it in a very desirable form; but there is also to me a very bitter pill or two.

3. LETTER TO C. D. EBELING (1795) ON THE CONSTITUTIONAL CONVENTION

A convention being decided on, some of the monocrats got elected in the hope of introducing an English constitution. When they found that the great body of the delegates were strongly for adhering to republicanism they directed their efforts to the assimilation of all the parts of the new Government to the English constitution as nearly as was attainable. In this they were not altogether without success; inasmuch that the monarchical feature of the new Constitution produced a violent opposition to it from the most zealous republicans in the several States. For this reason * * * it is still doubted by some whether a majority of the people of the United States were not against adopting it. However, it was carried through all the assemblies of the States, though by very small majorities in the larger States.

4. LETTER TO COMTE DE MOUSTIER, MAY 1788

I see in this instrument a great deal of good. The consolidation of our Government, a just representation, an administration of some permanence, and other features of great value will be gained by it. There are, indeed, some faults which revolted me a good deal in the first moment; but we must be contented to travel on toward perfection, step by step. We must be contented with the ground which this Constitution will gain for us and hope that a favorable moment will come for correcting what is amiss in it.

5. LETTER TO GEORGE HAY, MAY 1823 (CONCERNING DIFFICULTY OF AMENDMENTS)

The States are now so numerous that I despair of ever seeing another amendment to the Constitution, although the innovations of time will certainly call, and now already call, for some. (In 1823, when this was written, there were 24 States.)

6. LETTER TO SAMUEL KERCHIVAL, MAY 1816 (FAMOUS LETTER)

Some men look at constitutions with sanctimonious reverence and deem them like the Ark of the Covenant, too sacred to be touched. They ascribe to the men of the preceding age a wisdom more than human, and suppose what they did to be beyond amendment. I knew that age well; I belonged to it and labored with it. It was very like the present, but without the experience of the present; and 40 years of experience in government is worth a century of book reading; and this they would say themselves, were they to rise from the dead * * * laws and institutions must go hand in hand with the progress of the human mind. As that becomes more developed, more enlightened, as new discoveries are made, new truths disclosed, and manners and opinions change with the change of circumstances, institutions must advance also and keep pace with the times.

We might as well require a man to wear still the coat which fitted him as a boy as civilized society to remain ever under the regimen of its barbarous ancestors. It is this preposterous idea which has lately deluged Europe in blood. Their monarchs, instead of wisely yielding to the gradual change of circumstances * * * have clung to old abuses, entrenched themselves behind steady habits, and obliged their subjects to seek through blood and violence rash and ruinous innovations, which, had they been referred to the peaceful deliberations and collected wisdom of the nation, would have been put into acceptable and salutary form.

Let us follow no such examples, nor weakly believe that one generation is not as capable as another of taking care of itself and of ordering its own affairs. * * * Each generation is as independent of the one preceding as that was of all which had gone before. It has, then, like them, a right to choose for itself the form of government it believes most promotive of its own happiness; consequently, to accommodate to the circumstances in which it finds itself, that received from its predecessors; and it is for the peace and good of mankind that a solemn opportunity of doing this every 19 or 20 years should be provided by the Constitution. * * *

This corporeal globe and everything upon it belong to its present corporeal inhabitants, during their generation. They alone have a right to direct what is the concern of themselves alone and to declare the law of that direction. * * * If this avenue be shut to the call of sufferance, it will make itself heard through that of

force, and we shall go on, as other nations are doing, in the endless circle of oppression, rebellion, reformation; and oppression, rebellion, reformation, again, and so on, forever.

II. REVOLUTION

1. LETTER TO W. S. SMITH, 1787 (ON SHAY'S REBELLION)

God forbid we should ever be 20 years without such a rebellion. The people cannot be all, and always, well informed. The part which is wrong will be discontented in proportion to the importance of the facts they misconceive. If they remain quiet under such misconceptions, it is lethargy, the forerunner of death to the public liberty.

2. LETTER TO JAMES MADISON, 1787

I hold it that a little rebellion now and then is a good thing, and as necessary in the political world as storms are in the physical.

3. IN ANOTHER LETTER TO MADISON, 1787

A little rebellion now and then is a medicine necessary for the sound health of government.

4. LETTER TO W. S. SMITH, 1787

What country can preserve its liberties if its rulers are not warned, from time to time, that the people preserve the spirit of resistance.

Let them take arms. The remedy is to set them right as to facts.

5. LETTER TO MRS. JOHN ADAMS, 1787

The spirit of resistance to government is so valuable on certain occasions that I wish it always to be kept alive. It will often be exercised when wrong, but better so than not to be exercised at all.

III. ON EDUCATION

1. NOTES ON VIRGINIA, 1782

Reason and free enquiry are the only effectual agents against error.

2. STATEMENT OF JEFFERSON

The Gothic (French) idea that we are to look backward * * * for all that is best in government and religion and science, is worthy of those bigots in government and religion who recommend it to you, and whose interest it so well serves.

3. ANOTHER STATEMENT

It is error alone which needs the support of government. Truth can stand by itself.

4. A FURTHER STATEMENT

There is not a truth on earth which I fear, or would disguise.

5. ON THE UNIVERSITY OF VIRGINIA

(It will be) based on the illimitable freedom of the human mind, to explore every subject susceptible to its contemplation. * * * here we are not afraid to follow truth wherever it may lead, nor to tolerate error so long as reason is left free to combat it.

6. FAMOUS SAYING

I have sworn upon the altar of God eternal hostility against every form of tyranny over the mind of man.

IV. ANCESTOR WORSHIP

1. LETTER TO DR. JOSEPH PRIESTLEY, MARCH 1801

What an effort of bigotry in politics and religion have we gone through! The barbarians really flattered themselves they should be able to bring back the times of Vandalish. * * * All advances in science were proscribed as innovations. They pretended to praise and encourage education, but it was to be the education of our ancestors. We were to look backwards, not forwards, for improvement.

2. TO JOHN TAYLOR, MAY 1816

Every generation comes equally, by the laws of the Creator of the world, to the free possession of the earth which He made for their subsistence, unencumbered by their predecessors, who, like them, were but tenants for life.

3. TO THOMAS EARLE, M., 1823

That our Creator made the earth for the use of the living and not of the dead; that those who exist not can have not use nor right in it, no authority or power over it; that one generation of men cannot foreclose or burthen its use to another, which comes to it in its own right and by the same divine beneficence; that a preceding generation cannot bind a succeeding one by its laws or contracts; these deriving their obligation from the will of the existing majority, and that majority being removed by death, another comes in its place with a will equally free to make its own laws and contracts; these are axioms so self-evident that no explanation can make them plainer; for he is not to be reasoned with who says that nonexistence can control existence, or that nothing can move something. They are axioms also pregnant with salutary consequences. And it is also found more convenient to suffer the laws of our predecessors to stand on our implied assent, as if positively reenacted, until the existing majority positively repeals them. But this does not lessen the right of the majority to repeal whenever a change of circumstances or of will calls for it. Habit alone confounds what is civil practice with natural right.

4. LETTER TO JOHN CATRWEIGHT, 1824

Can one generation bind another, and all others in succession, forever? I think not. The Creator has made the earth for the living, not the dead. Rights and powers can only belong to persons, not to things, not to mere matter unendowed with will. The dead are not even things. The particles of matter which composed their bodies make part now of the bodies of other animals, vegetables, or minerals of a thousand forms. To what, then, are attached the rights and powers they held while in the form of men? A generation may bind itself as long as its majority continues in life; when that has disappeared another majority is in place, holds all the rights and powers their predecessors once held, and may change their laws and institutions to suit themselves. Nothing, then, is unchangeable but the inherent and unalienable rights of man.

5. LETTER TO SAMUEL KERCHIVAL, 1816

My wish is * * * to leave to those who are to live under it the settlement of their own Constitution, and to pass in peace the remainder of my time.

6. LETTER TO JOHN H. PLEASANTS, 1824

I willingly acquiesce in the institutions of my country, perfect or imperfect, and think it a duty to leave their modifications to those who are to live under them and are to participate of the good or evil they may produce. The present generation has the same right of self-government which the past one has exercised for itself.

7. LETTER TO WILLIAM SHORT, 1825

I willingly leave to the present generation to conduct their affairs as they please.

8. LETTER TO DU PONT DE NEMOURS, 1811 (DESCENDANTS TAKE NOTICE)

Those who will come after us will be as wise as we are, and as able to take care of themselves as we have been.

9. LETTER TO SPENCER ROANE, 1819

I withdraw from all contests of opinion, and resign everything cheerfully to the generation now in place. They are wiser than we were, and their successors will be wiser than they, from the progressive advance of science.

10. LETTER TO MARQUIS LAFAYETTE, 1823

The daily advance of science will enable the existing generation to administer the Commonwealth with increased wisdom.

V. ON THE COURT

1. (1792)

I said to President Washington that if the equilibrium of the three great bodies—legislative, executive, and judiciary—could be preserved, if the legislature could be kept independent, I should never fear the result of such a government.

2. LETTER TO C. HAMMOND, 1821

It has long been my opinion * * * that the germ of dissolution of our Federal Government is in * * * the Federal judiciary—an irresponsible body, working like gravity by night and by day, gaining a little today and a little tomorrow, and advancing its noiseless step, like a thief, over the field of jurisdiction.

3. LETTER TO SPENCER ROANE, 1821

The great object of my fear is the Federal judiciary. That body, like gravity, ever acting, with noiseless foot and unalarming advance, gaining ground step by step, and holding what it gains, is engulfing insidiously the special governments into the jaws of that which feeds them.

4. LETTER TO WILLIAM C. JARVIS, 1820

It is a very dangerous doctrine to consider the judges as the ultimate arbiters of all constitutional questions. It is one which would place us under the despotism of an oligarchy. * * * The Constitution has erected no such single tribunal, knowing that to whatever hands confided, with the corruptions of time and party, its members would become despots. It has more wisely made all the departments coequal and cosovereign within themselves.

5. LETTER TO WILLIAM C. JARVIS, 1820

If the legislature fails to pass laws for a census, for paying the judges and other officers of government, for establishing a militia, for naturalization as prescribed by the Constitution, or if they fail to meet in Congress, the judges cannot issue their mandamus to them; if the President fails to supply the place of a judge, to appoint other civil or military officers, to issue requisite commissions the judges cannot force him. They can issue their mandamus or distringas to no executive or legislative officer to enforce the fulfillment of their official duties any more than the President or legislature may issue orders to the judges or their officers. Betrayed by English example, and unaware, as it should seem, of the control of our Constitution in this particular, they have at times overstepped their limit by undertaking to command executive officers in the discharge of their executive duties; but the Constitution, in keeping the three departments distinct and independent, restrains the authority of the judges to judiciary organs, as it does the executive and legislative to executive and legislative organs. The judges certainly have more frequent occasion to act on constitutional questions because the laws of meum and tuum and of criminal action, forming the great mass of the system of law, constitute their particular department. When the

legislative or executive functionaries act unconstitutionally, they are responsible to the people in their elective capacity. The exemption of the judges from that is quite dangerous enough.

6. LETTER TO ALBERT GALLATIN, 1810

At length we have a chance of getting a Republican majority in the Supreme Judiciary. For 10 years has that branch braved the spirit and will of the Nation after the Nation had manifested its will by a complete reform in every branch depending on them. The event is a fortunate one, and so timed as to be a godsend to me. I am sure its importance to the Nation will be felt, and the occasion employed to complete the great operation they have so long been executing, by the appointment of a decided Republican, with nothing equivalent about him.

7. LETTER TO CAESAR A. RODNEY, 1810

The death of (Associate Justice) Cushing is opportune, as it gives an opening for at length getting a Republican majority on the Supreme Bench. Ten years has the anticivism of that body been bidding defiance to the spirit of the whole Nation, after they had manifested their will by reforming every other branch of government. I trust the occasion will not be lost. * * * Nothing is more material than to complete the reformation of the Government by this appointment, which may truly be said to be putting the keystone into the arch.

8. LETTER TO GIDEON GRANGER, 1814

With respect to the dismission of the prosecutions for sedition in Connecticut, it is well known to have been a tenet of the Republican portion of our fellow citizens that the sedition law was contrary to the Constitution, and therefore void. On this ground I considered it as a nullity wherever I met it in the course of my duties; and on this ground I directed nolle prosequis in all the prosecutions which had been instituted under it, and as far as the public sentiment can be inferred from the occurrences of the day, we may say that this opinion had the sanction of the Nation.

The prosecutions, therefore, which were afterward instituted in Connecticut, of which two were against printers, two against preachers, and one against a judge, were too inconsistent with this principle to be permitted to go on. We were bound to administer to others the same measure of law, not which they had meted out to us but we to ourselves, and to extend to all equally the protection of the same constitutional principles. Those prosecutions, too, were chiefly for charges against myself, and I had from the beginning laid it down as a rule to notice nothing of the kind.

I believed that the long course of services in which I had acted on the public stage, and under the eye of my fellow citizens, furnished better evidence to them of my character and principles than the angry invectives of adverse partisans in whose eyes the very acts most approved by the majority were subjects of the greatest demerit and censure. These prosecutions against them, therefore, were to be dismissed as a matter of duty.

9. LETTER TO MRS. JOHN ADAMS, SEPTEMBER 1804

You seem to think it devolved on the judges to decide on the validity of the sedition law. But nothing in the Constitution has given them a right to decide for the executive, more than executive to decide for them. Both magistrates are equally independent in the sphere of action assigned to them. The judges, believing the law constitutional, had a right to pass a sentence of fine and imprisonment because the power was placed in their hands by the Constitution. But the executive, believing the law to be unconstitutional, were bound to remit the execution of it because that power has been confided to them by the Constitution. That instrument meant that its coordinate branches should be checks on each other. But the opinion which gives to the judges the right to decide what laws are constitutional and what not, not only for themselves in their own sphere of action but for the legislature and executive also, in their spheres, would make the judiciary a despotic law, remove all restraint from the overwhelming torrent of slander, which is confounding all vice and virtue, all truth and falsehood in the United States. The power to do that is fully possessed by the several State legislatures. It was reserved to them and was denied to the General Government by the Constitution of it.

SAVE AMERICA NOW

Mr. CHURCH. Mr. Speaker, I ask unanimous consent to extend my own remarks and include therein a radio address I made in Washington on last Friday.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. CHURCH. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include an address that I made over the National Broadcasting System from Washington, D. C., on Congress Speaks hour, Friday, May 15, as follows:

Within 6 weeks the two major political parties will meet in convention to construct their respective platforms and to select their standard bearers. Then the political guns will boom forth in a literal barrage of claims, charges, and countercharges in the most important Presidential campaign in the history of the United States. Behind the camouflage and smoke screen of half-truths and exaggerations, we will find the true facts and the fundamental issues.

The New Deal has brought us face to face with basic questions of economics and government. The issue is not whether you are a Democrat or a Republican. It is rather whether you believe in the principles of American democracy or in the Rooseveltian utopia built on regimentation, prosperity through scarcity, profligate Government spending, and devouring taxation. It is whether you believe in the time-honored principles of economics or in the New Deal experimentation—a hybrid of fascism and communism.

When Franklin D. Roosevelt, acting under the influence and advice of the "brain trust", discarded the Democratic platform of 1932, he broke his covenant with the people. As a candidate he pledged himself to a program of economy, but as a President he has pursued a program of wasteful spending. He pledged himself to the historic Jeffersonian principles of State rights, but he has pursued a program of national regimentation and control. He pledged himself to uphold the Constitution of the United States, but he has actually asked Congress to pass laws he admitted were of doubtful constitutionality.

One need only call to mind that several outstanding Democrats, such as Lewis W. Douglas, former Director of the Budget, resigned from this administration when it broke faith with the party and the people. One need only call to mind that many distinguished Democrats, such as ex-Gov. Alfred E. Smith and former Secretary of State Bainbridge Colby, to mention only two of an ever-increasing list, are outspoken opponents of the New Deal.

What actually did happen when Roosevelt came into power in 1933? A relatively small group of men, who represent the original New Dealers, took control of the Democratic Party. With the whip of patronage and the constantly exercised power to grant or withhold work-relief funds, this small group of untried "brain trusters" forced a supine Congress to yield to its every dictate. Surrendering to political expediency and with thoughts only of their own reelection, the Democratic Members of Congress did not have the statesmanlike courage to oppose and prevent this dictatorial coup d'etat within their own party. With an eye to the next election in November rather than to the next generation, they discarded the principles of their own party and the historic lessons of experience. By that process a Democratic Congress ceased to exist. We have rather a New Deal Congress masquerading under an old party name.

True Democrats, as distinguished from these New Dealers, believe with the Republicans in the American economy of abundance and the principles of a free democratic government. Both believe that the true objective is the maximum satisfaction of human economic needs and political freedom. That objective is to obtain for the people all the comforts of life by way of food, clothing, homes, radios, automobiles, electric refrigerators, sweepers, and all those things which our natural resources and national genius are capable of producing, and at the same time to preserve the blessings of liberty free from unreasonable governmental interference. While historically the two great parties have differed as to the means to that end, nevertheless throughout all our history until the advent of the New Deal both parties have zealously sought to advance the principles of democracy and to make America the land of plenty.

Because of strict adherence to the time-honored principles of thrift, industry, and self-sacrifice America rose from 13 struggling Colonies actually to become this land of plenty. While we have at times suffered from certain maladjustments, with want in the midst of plenty, on the whole no people anywhere enjoy the standard of living that we do in the United States. It is for us to labor within these time-honored principles to remedy the maladjustments and enable all our people to have full share in the abundance.

The New Dealers, on the other hand, believe in an economy of scarcity with a system of State capitalism whereby all of us are regulated, regimented, and controlled by the bureaucrats in Washington. Because this smacks of the Russian political-economic theory of controlled production and consumption, they will deny that they are giving adherence to a principle so entirely foreign to America. But "by their deeds ye shall know them."

As a remedy to the farm problem, which represents a disparity between farm prices and industrial prices, the New Deal inaugurated a program of crop destruction and limitation of production. At the same time thousands of families were wondering, and still are wondering, where to obtain their next loaf of bread. Supply and demand control prices, but to obtain the desirable objective of giving the farmer a better price for his products the New Deal emphasis was not upon the demand item of the price equation. On the contrary, rather than raise the price by increasing the demand they sought to limit the supply.

This same general philosophy of Government control of production has been applied to industry. No effective efforts have been made to encourage industry to increase production and to reemploy. In fact, there is pending in the Senate at the present time a tax bill proposed by the New Dealers which will hamper the growth of small corporations and impede the development of new enterprises. If enacted, it will drive capital out of productive enterprise into tax-exempt securities. All manner of political pressure has been put on the Senators to force them to accept the bill as proposed by the "brain trust."

These are only two of the many examples I could present as indicative of the fact that the New Deal is wholly un-American. Instead of encouraging thrift, it penalizes. Instead of encouraging self-sacrifice and industry, it encourages indolence and waste. Instead of encouraging economy, it encourages spending. In short, when you look beneath the camouflage and examine the true facts and the imponderable underlying realities, you readily see that the New Dealers are not only luring the people away from American principles of government but are leading them to bankruptcy and destruction. "By their deeds ye shall know them."

And by the results obtained you can concretely evaluate their deeds. The New Deal Congress vested in the President of the United States and his political appointees every imaginable power. He was made virtual dictator over almost every phase of American life. The appalling statement made by the Director of the Budget to the Ways and Means Committee shows that during the New Deal we shall have spent for recovery and relief alone $13,853,270,835.

Today we have a Federal public debt of $31,463,066,474.38. This is the largest public debt in the history of the United States, including the period of the last war. The total expenditures in excess of receipts for the present fiscal year are today $2,740,696,649.64. Each day this month the New Deal has spent eleven and one-quarter million dollars more than it has received. The total receipts of this month to May 9 are $121,620,349.14, the total expenditures $224,944,833.42. The New Deal is each day spending almost $2 for every dollar taken in. These are the figures in the daily statement of the United States Treasury of May 9, 1936. This debt, increasing daily, is the burden which the New Deal has already placed on our children and our children's children.

Professing until after the November election keen interest in the relief of the individual citizen, the New Dealers are actually giving the needy not relief but a veritable back-breaking burden of future taxes, at the same time that their attack on private industry continues to discourage any increase in employment. This is the reason why history will known the New Dealers not as Democrats but as "Hypocrats", as I dubbed them on the floor of the House last Friday (May 8, 1936).

It is true that despite this mammoth orgy of spending there has been no appreciable decrease in the number of unemployed. The American Federation of Labor has estimated that 12,184,000 people are still without jobs. The relief problem remains with us—nor can we expect to take our people off the relief rolls until industry revives. And we certainly cannot expect industry to revive as long as we force it to face the continued threat of ever-increasing taxes or inflation. Futurity and confidence are distinctive requisites of business revival, but with continued governmental experimentation and expenditures, and increasing taxes, no man can view the future with any confidence.

The choice which we have to make is not a choice between Democrats and Republicans. It is a choice between New Deal state capitalism in an economy of scarcity and Republican adherence to a free democracy in an economy of abundance. It is a choice between debts, taxes, inflation, and fear on the one hand, and on the other, industry, thrift, freedom, and true security.

I keenly appreciate the fact that a large percentage of those listening to me are women. To you women especially I appeal this afternoon.

Through all my political life I have actually tested the value of woman's political sagacity and her eagerness to follow a crusade for sound thinking in government and economics. I have never found you wanting. You by nature and experience recognize the values of thrift as against spending, industry as against indolence, economy as against waste, freedom as against regimentation. To you women, let me repeat, I appeal this afternoon. I also appeal to the Democrats who recognize the fallacies of the New Deal and who decry its betrayal of American principles. To all of you I appeal, "save America now."

COAT OF ARMS OF SWISS CONFEDERATION (H. DOC. NO. 494)

The SPEAKER laid before the House the following message from the President of the United States, which was read by the Clerk, and, together with the accompanying papers, referred to the Committee on Foreign Affairs and ordered printed:

To the Congress of the United States:

I transmit a report from the Secretary of State in regard to the obligation of this Government, under the Red Cross Convention of 1929, to take such measure as may be necessary to prohibit the commercial use in the United States of the coat of arms of the Swiss Confederation.

I recommend that, as proposed by the Secretary of State, the necessary legislation be enacted to fulfill the treaty obligation mentioned. A draft bill which is believed to be suitable for this purpose accompanies the Secretary's report.

FRANKLIN D. ROOSEVELT.

THE WHITE HOUSE, *May 18, 1936.*

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. WILCOX, for 3 weeks, on account of important business.

SENATE BILLS AND JOINT RESOLUTIONS REFERRED

Bills and joint resolutions of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 949. An act for the relief of R. R. Purcell; to the Committee on Claims.

S. 2041. An act for the relief of Charles E. Wilson; to the Committee on Military Affairs.

S. 2575. An act for the relief of Emma Gomez; to the Committee on Claims.

S. 2576. An act for the relief of Manuel D. A. Otero as administrator of the estate of Teresita S. Otero, deceased; to the Committee on Claims.

S. 3671. An act for the relief of Howard Hefner; to the Committee on Claims.

S. 3715. An act for the relief of Roscoe McKinley Meadows; to the Committee on Naval Affairs.

S. 3808. An act for the relief of R. D. Stephens and Vera Stephens; to the Committee on Claims.

S. 3844. An act for the relief of Mrs. M. N. Shwamberg; to the Committee on Claims.

S. 3921. An act authorizing the Secretary of War to bestow the Silver Star upon Michael J. Quinn; to the Committee on Military Affairs.

S. 4038. An act to amend an act of Congress approved March 3, 1863, entitled "An act to reorganize the courts in the District of Columbia, and for other purposes"; to the Committee on the Judiciary.

S. 4078. An act to authorize the award of a decoration for distinguished service to John C. Reynolds; to the Committee on Military Affairs.

S. 4082. An act to authorize the presentation of a Congressional Medal of Honor to Taliesin Waters; to the Committee on Military Affairs.

S. 4099. An act to authorize the award of the Congressional Medal of Honor for distinguished service to Pleas Sanders; to the Committee on Military Affairs.

S. 4105. An act authorizing the Secretary of Agriculture to convey certain lands to the Maryland-National Capital Park and Planning Commission of Maryland, for park, parkway, and playground purposes; to the Committee on Agriculture.

S. 4124. An act for the relief of the State of Connecticut; to the Committee on the Judiciary.

S. 4140. An act for the relief of Homer Brett, Esq., American consul at Rotterdam, Netherlands, as a result of money stolen from the safe of the American consulate; to the Committee on Claims.

S. 4252. An act to provide for the modification of the contract of lease entered into on June 12, 1922, between the United States and the Board of Commissioners of the Port of New Orleans; to the Committee on Military Affairs.

S. 4390. An act to amend the National Defense Act relating to the Medical Administrative Corps; to the Committee on Military Affairs.

S. 4425. An act to relinquish all right, title, and interest of the United States in certain lands in the State of Connecticut; to the Committee on Rivers and Harbors.

S. 4461. An act to extend the times for commencing and completing the construction of a bridge across the Missouri River at or near Brownville, Nebr.; to the Committee on Interstate and Foreign Commerce.

S. 4462. An act to extend the times for commencing and completing the construction of a bridge across the Missouri River between the towns of Decatur, Nebr., and Onawa, Iowa; to the Committee on Interstate and Foreign Commerce.

S. 4463. An act to extend the times for commencing and completing the construction of a bridge across the Missouri River at or near the cities of South Sioux City, Nebr., and Sioux City, Iowa; to the Committee on Interstate and Foreign Commerce.

S. 4487. An act to provide for a preliminary examination and survey of Smugglers Cove, Oreg.; to the Committee on Rivers and Harbors.

S. 4542. An act authorizing the Comptroller General of the United States to settle and adjust the claim of the Merritt-Chapman & Scott Corporation; to the Committee on Claims.

S. 4584. An act to amend the Migratory Bird Treaty Act of July 3, 1918 (40 Stat. 755), to extend and adapt its provisions to the convention between the United States and the

United Mexican States for the protection of migratory birds and game mammals concluded at the City of Mexico February 7, 1936, and for other purposes; to the Committee on Foreign Affairs.

S. J. Res. 200. Joint resolution to extend the period of suspension of the limitation governing the filing of suit under section 19, World War Veterans' Act, 1924, as amended; to the Committee on World War Veterans' Legislation.

S. J. Res. 235. Joint resolution authorizing the Secretary of Agriculture to expend funds of the Agricultural Adjustment Administration for participation by the United States in the 1936 Sixth World's Poultry Congress; to the Committee on Foreign Affairs.

S. J. Res. 242. Joint resolution authorizing and directing the Commodity Credit Corporation to facilitate the liquidation of loans to cotton producers; to the Committee on Agriculture.

S. J. Res. 250. Joint resolution extending thanks in appreciation of services rendered by Hayden W. Wren as superintendent of the docks of the port of New Orleans; to the Committee on Military Affairs.

S. J. Res. 257. Joint resolution authorizing the Secretary of War to receive for instruction at the United States Military Academy at West Point, Maximo Mariano Pruna y Hernandez, a citizen of Cuba; to the Committee on Military Affairs.

BILLS AND JOINT RESOLUTIONS PRESENTED TO THE PRESIDENT

Mr. PARSONS, from the Committee on Enrolled Bills, reported that that committee did on May 15, 1936, present to the President, for his approval, bills and joint resolutions of the House of the following titles:

H. R. 1398. An act to provide for the establishment of a Coast Guard station at or near Crescent City, Calif.;

H. R. 2119. An act for the relief of Mrs. E. L. Babcock, mother and guardian of Nelson Babcock, a minor;

H. R. 2467. An act for the relief of Holy Cross Mission Hospital;

H. R. 3340. An act for the relief of Jesse S. Post;

H. R. 5058. An act to convey certain lands to Clackamas County, Oreg., for public-park purposes;

H. R. 8089. An act for the relief of Joseph J. Baylin;

H. R. 8370. An act to provide for the establishment of a Coast Guard station at Port Washington, Wis.;

H. R. 8506. An act for the relief of Oliver Faulkner;

H. R. 9042. An act to provide for the sale of the Port Newark Army Supply Base to the city of Newark, N. J.;

H. R. 9370. An act for the relief of Frank Cordova;

H. R. 9373. An act for the relief of H. L. & J. B. McQueen, Inc., and John L. Summers, former disbursing clerk, Treasury Department;

H. R. 9455. An act for the relief of Robert J. Mann;

H. R. 10308. An act to amend article 3 of the "Rules Concerning Lights, etc.", contained in the act entitled "An act to adopt regulations for preventing collisions upon certain harbors, rivers, and inland waters of the United States", approved June 7, 1897;

H. R. 10321. An act to amend section 4 of Public Act No. 286, Seventy-fourth Congress, approved August 19, 1935, as amended;

H. R. 10589. An act to amend section 32 of the act entitled "An act to authorize the construction of certain bridges and to extend the times for commencing and/or completing the construction of other bridges over the navigable waters of the United States, and for other purposes", approved August 30, 1935;

H. R. 10847. An act to authorize the acquisition of land for cemeterial purposes in the vicinity of New York City, N. Y.;

H. R. 11036. An act to amend section 4321, Revised Statutes (U. S. C., title 46, sec. 263), and for other purposes;

H. R. 11302. An act to authorize the Secretary of War to lend to the reunion committee of the United Confederate Veterans 3,000 blankets, olive drab, no. 4, and 1,500 canvas cots, to be used at their annual encampment to be held at Shreveport, La., in June 1936;

H. R. 11346. An act for the relief of H. R. Heinicke, Inc.;

H. R. 12162. An act to create an additional division of the United States District Court for the Southern District of Mississippi to be known as the Hattiesburg division;

H. R. 12183. An act for the relief of Gladys Hinckley Werlich;

H. J. Res. 538. Joint resolution to provide for the participation by the United States in the Ninth International Congress of Military Medicine and Pharmacy in Rumania in 1937; and to authorize and request the President of the United States to invite the International Congress of Military Medicine and Pharmacy to hold its tenth congress in the United States in 1939, and to invite foreign countries to participate in that congress;

H. J. Res. 547. Joint resolution providing for the importation of articles free from tariff or customs duty for the purpose of exhibition at Great Lakes Exposition to be held at Cleveland, Ohio, beginning in June 1936, and for other purposes; and

H. J. Res. 569. Joint resolution to authorize an appropriation for the expenses of participation by the United States in a conference at Brussels to revise the Convention for the Protection of Literary and Artistic Works concluded at Bern September 9, 1886, and revised at Rome June 2, 1928.

THE LATE REPRESENTATIVE WILLIAM D. THOMAS

Mr. SNELL. Mr. Speaker, it is with very deep regret that I announce to the Members of the House the death, at 6:45 last evening, of our good friend and colleague, WILLIAM D. THOMAS, of the Twenty-ninth Congressional District of the State of New York. Mr. THOMAS had not been in his usual health for several months, but those of his friends who were in close touch with him thought that his strong physique, vigor, and vitality would bring him through, and that he would again be able to attend his duties here in the House. Thus the sudden announcement of his death came as a great shock to all of his friends.

Mr. THOMAS had not been a Member of the House as long as some of us, but his genial personality and his friendly manner won for him a warm spot in the affections of his colleagues on both sides of the aisle. His sudden death in the very prime of vigorous manhood will not only be a great loss to his family and the community in which he lived, and where he played such an important part for many years, but it is a real loss to the State and the Nation. We all mourn his sudden passing, but we know he is at rest in the Great Beyond.

Mr. Speaker, at some later date I shall ask to make more extended remarks on the life and character of our good friend.

Before offering the usual resolution, Mr. Speaker, I ask unanimous consent that the special orders for today may be in order tomorrow.

The SPEAKER. Is there objection to the request of the gentleman from New York?

Mr. BANKHEAD. I trust the gentleman will withdraw that request. I hope that can be arranged tomorrow morning.

Mr. SNELL. Very well. If that is the wish of the majority leader, I will withdraw the request.

Mr. Speaker, I offer the following resolution:

The Clerk read as follows:

House Resolution 517

Resolved, That the House has heard with profound sorrow of the death of Hon. WILLIAM D. THOMAS, a Representative from the State of New York.

Resolved, That a committee of four Members of the House, with such Members of the Senate as may be joined, be appointed to attend the funeral.

Resolved, That the Sergeant at Arms of the House be authorized and directed to take such steps as may be necessary for carrying out the provision of these resolutions and that the necessary expenses in connection therewith be paid out of the contingent fund of the House.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased.

The resolution was agreed to.

The SPEAKER appointed the following committee: Mr. CROWTHER, Mr. GOODWIN, Mr. LORD, and Mr. PATTON.

ADJOURNMENT

The SPEAKER. The Clerk will read the remainder of the resolution.

The Clerk read as follows:

Resolved, That as a further mark of respect this House do now adjourn.

The resolution was agreed to; accordingly (at 12 o'clock and 25 minutes p. m.) the House adjourned until tomorrow, Tuesday, May 19, 1936, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

836. A letter from the Secretary of War, transmitting a draft of legislation to rectify an injustice to retired officers of the Army on duty with the United States Soldiers' Home at Washington, D. C.; to the Committee on Military Affairs.

837. A letter from the chairman of the Board of Governors of the Federal Reserve System, transmitting the twenty-second annual report, prepared by direction of the Board of Governors of the Federal Reserve System, covering operations during the calendar year 1935 (H. Doc. No. 333); to the Committee on Banking and Currency and ordered to be printed, with illustrations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII,

Mr. LEWIS of Colorado: Committee on Rules. House Resolution 515. Resolution providing for the consideration of S. 3398; without amendment (Rept. No. 2667). Referred to the House Calendar.

Mr. DRIVER: Committee on Rules. House Resolution 516. Resolution providing for the consideration of S. 3531; without amendment (Rept. No. 2668). Referred to the House Calendar.

Mr. BLOOM: Committee on Foreign Affairs. House Joint Resolution 586. Joint resolution authorizing the President to invite foreign countries to participate in the New York World's Fair 1939, Inc., in the city of New York during the year 1939; with amendment (Rept. No. 2671). Referred to the House Calendar.

Mr. KELLER: Committee on the Library. Senate Joint Resolution 215. Joint resolution authorizing the selection of a site and the erection of a pedestal for the Albert Gallatin statue in Washington, D. C.; without amendment (Rept. No. 2672). Referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII,

Mr. ROGERS of New Hampshire: Committee on Military Affairs. H. R. 12567. A bill for the relief of Percy C. Wright; with amendment (Rept. No. 2673). Referred to the Committee of the Whole House.

Mr. McREYNOLDS: Committee on Foreign Affairs. S. 4400. An act for the relief of Barbara Jaeckel; with amendment (Rept. No. 2674). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BLAND: A bill (H. R. 12734) to amend an act entitled "An act to distribute the commissioned line and engineer officers of the Coast Guard in grades, and for other purposes", approved January 12, 1923; to the Committee on Merchant Marine and Fisheries.

By Mr. COLDEN: A bill (H. R. 12735) to amend the act of June 19, 1934, relating to The National Archives and the disposition of papers; to the Committee on the Library.

By Mr. JONES: A bill (H. R. 12736) to facilitate the extension of agricultural credit at lower interest rates by providing for the issue of certain bank notes, to encourage the ownership of farm homes, and for other purposes; to the Committee on Agriculture.

By Mr. MANSFIELD: A bill (H. R. 12737) to transfer Fayette County, Tex., from the southern judicial district of Texas to the western judicial district of Texas; to the Committee on the Judiciary.

By Mr. POWERS: A bill (H. R. 12738) to prohibit discrimination on account of maximum age in employment directly and indirectly under the United States; to the Committee on the Civil Service.

By Mr. WADSWORTH: A bill (H. R. 12739) to authorize a preliminary examination of Genesee River, N. Y., with a view to the control of its floods; to the Committee on Flood Control.

By Mr. BLANTON: Joint resolution (H. J. Res. 590) to prohibit United States judges and attorneys from accepting outside employment, and to repeal the act of June 20, 1906 (34 Stat. 316), embracing sections 1, 2, and 3, as appears in District of Columbia Code, Revised, title 7, Education, page 75; to abolish the present Board of Education, declaring vacant all positions held thereunder; to abolish and declare vacant the position of Superintendent of Schools, and to reenact the act of June 11, 1878 (20 Stat. 107), with amendments; to regulate law diplomas; and to prohibit certain outside employment; to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. HIGGINS of Connecticut: A bill (H. R. 12740) granting a pension to Helen H. Taft; to the Committee on Pensions.

By Mr. WEARIN: A bill (H. R. 12741) for the relief of Howard Scott, seaman second class, United States Navy; to the Committee on Naval Affairs.

By Mr. MALONEY: A bill (H. R. 12742) granting a pension to Delia Porter; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

10891. By Mr. PFEIFER: Petition of the New York Federation of Post Office Clerks, New York, urging the passage of the Pearson bill (H. R. 9258) providing for a civil-service court of appeals; to the Committee on the Civil Service.

10892. By Mr. TREADWAY: Petition of citizens of Westfield, Mass., urging the enactment of legislation covering flood protection for the Connecticut River Valley; to the Committee on Flood Control.

10893. Also, petition of citizens of Hampden County, Mass., urging the enactment of legislation covering flood protection for the Connecticut River Valley; to the Committee on Flood Control.

10894. Also, resolutions of the Common Council of Springfield, Mass., urging the enactment of legislation covering flood protection for the Connecticut River Valley; to the Committee on Flood Control.

10895. By the SPEAKER: Petition of Mother's Day, Inc., Philadelphia, Pa.; to the Committee on the Judiciary.

10896. Also, petition of the city of Sheboygan, Wis.; to the Committee on Banking and Currency.

10897. Also, petition of the Board of Aldermen of the city of New York; to the Committee on the Library.

10898. By Mr. KING: Petition of the Republican Territorial Convention at Honolulu, Hawaii, reaffirming its belief in the protective-tariff policies of the Republican Party, and favoring the broadening of the tariff policy so as to include in its benefits those who depend upon agricultural pursuits for a livelihood; to the Committee on Ways and Means.

10899. Also, petition of Republican Territorial Convention at Honolulu, Hawaii, favoring the enactment of legislation authorizing a Hawaiian regiment of infantry to be raised locally and for service only in the Hawaiian Islands; to the Committee on the Territories.

10900. Also, petition of the Republican Territorial Convention at Honolulu, Hawaii, opposing the making of any changes in the organic act of the Territory of Hawaii unless such changes receive the prior approval of the people of the Territory expressed through their legislature; to the Committee on the Territories.

10901. Also, petition of the Republican Territorial Convention at Honolulu, Hawaii, favoring the same treatment for the Territory of Hawaii in all Federal legislation as is accorded to the States of the Union; to the Committee on the Territories.

SENATE

TUESDAY, MAY 19, 1936

(Legislative day of Tuesday, May 12, 1936)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

THE JOURNAL

On request of Mr. ROBINSON, and by unanimous consent, the reading of the Journal of the proceedings of the calendar day Monday, May 18, 1936, was dispensed with, and the Journal was approved.

MESSAGES FROM THE PRESIDENT—APPROVAL OF A BILL

Messages in writing from the President of the United States were communicated to the Senate by Mr. Latta, one of his secretaries, who also announced that on May 18, 1936, the President approved and signed the act (S. 1432) to amend section 5 of the act of March 2, 1919, generally known as the "War Minerals Relief Statutes."

CALL OF THE ROLL

Mr. ROBINSON. I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Adams	Copeland	La Follette	Reynolds
Ashurst	Couzens	Lewis	Robinson
Austin	Davis	Logan	Russell
Bachman	Dickinson	Lonergan	Schwellenbach
Bailey	Dieterich	Long	Sheppard
Barkley	Donahey	McAdoo	Shipstead
Benson	Fletcher	McGill	Smith
Bilbo	Frazier	McKellar	Steiwer
Black	George	McNary	Thomas, Okla.
Bone	Gerry	Maloney	Townsend
Borah	Gibson	Metcalf	Truman
Brown	Glass	Moore	Tydings
Bulkley	Guffey	Murphy	Vandenberg
Bulow	Hale	Murray	Van Nuys
Burke	Harrison	Neely	Wagner
Byrd	Hastings	Norris	Walsh
Capper	Hatch	O'Mahoney	Wheeler
Caraway	Hayden	Overton	White
Chavez	Johnson	Pittman	
Clark	Keyes	Pope	
Connally	King	Radcliffe	

Mr. ROBINSON. I announce that the Senator from Alabama [Mr. BANKHEAD], the Senator from Colorado [Mr. COSTIGAN], and the Senator from Nevada [Mr. MCCARRAN] are absent from the Senate because of illness.

I also announce that the Senator from Massachusetts [Mr. COOLIDGE], the Senator from Wisconsin [Mr. DUFFY], the Senator from Indiana [Mr. MINTON], and the Senator from Utah [Mr. THOMAS] are absent because of their duties as members of the Board of Visitors to the United States Military Academy at West Point.

I further announce that the Senator from Oklahoma [Mr. GORE], the Senator from West Virginia [Mr. HOLT], and the Senator from South Carolina [Mr. BYRNES] are unavoidably detained from the Senate.

Mr. AUSTIN. I announce that the Senator from New Jersey [Mr. BARBOUR] is necessarily absent, and that the Senator from Wyoming [Mr. CAREY] is absent for the day in the performance of his duty as a member of the Board of Visitors to the United States Military Academy at West Point.

The VICE PRESIDENT. Eighty-one Senators have answered to their names. A quorum is present.

SENATOR FROM LOUISIANA

Mr. OVERTON. Mr. President, I present the credentials of the Senator-elect from Louisiana, Mrs. ROSE MCCONNELL LONG.

The VICE PRESIDENT. The credentials will be read.

The Chief Clerk read as follows:

STATE OF LOUISIANA,
EXECUTIVE DEPARTMENT,
Baton Rouge.

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that on the 21st day of April 1936 Mrs. ROSE MCCONNELL LONG was duly chosen by the qualified electors of the State of Louisiana a Senator from said State to represent said State in the Senate of the United States for the unexpired term ending at noon on the 3d day of January 1937.

Witness: His Excellency our Governor, James A. Noe, and our seal hereto affixed at Baton Rouge this 7th day of May 1936.

JAMES A. NOE, *Governor.*

By the Governor:
[SEAL] E. A. CONWAY, *Secretary of State.*

The VICE PRESIDENT. The credentials will be placed on file.

Mr. OVERTON. Mr. President, the Senator-elect from Louisiana is in the Chamber and ready to take the oath of office.

The VICE PRESIDENT. The Senator-elect will present herself at the Vice President's desk to take the oath.

Mrs. LONG, escorted by Mr. OVERTON, advanced to the Vice President's desk, and the oath of office was administered to her.

HENRY THORNTON MERIWETHER—VETO MESSAGE (S. DOC. NO. 234)

The VICE PRESIDENT laid before the Senate a message from the President of the United States, which was read, and, with the accompanying bill, referred to the Committee on Naval Affairs and ordered to be printed, as follows:

To the Senate:

I return herewith, without my approval, Senate bill no. 3581, entitled "An act for the relief of Henry Thornton Meriwether."

This bill, if enacted into law, would provide for the appearance of Henry Thornton Meriwether before a naval retiring board for the purpose of determining whether or not the disability complained of in his case originated in the line of duty in time of war. If the board finds that Commander Meriwether is now suffering from a disability incurred in the line of duty in time of war which renders him unfit to perform all the duties of the grade of commander, United States Naval Reserve Force, in time of war, the President would be authorized to appoint him a commander, United States Naval Reserve Force, and place him on the retired list of the Navy with the retired pay and emoluments of that grade.

The records of the Navy Department show that Mr. Henry T. Meriwether served as an officer of the naval auxiliary service from May 8, 1902, to April 30, 1917, at which time he was ordered to active service as a lieutenant commander in the Naval Reserve Force and assigned to duty as master of the U. S. S. *Jason*. He was promoted to the grade of commander in the Naval Reserve Force on July 7, 1919, upon the recommendation of a selection board. He served on the U. S. S. *Jason* until February 10, 1920, and as commanding officer of the U. S. S. *Neches* from March 22, 1920, to April 27, 1922, at which time he was ordered to the naval hospital, San Diego, Calif. On May 17, 1922, he appeared before a board of medical survey and was found unfit for service by reason of otitis, media, chronic no. 602, origin in the line of duty, disability not the result of his own misconduct, which board recommended that Commander Meriwether be ordered before a naval retiring board. However, under date of June 19, 1922, the Navy Department informed Commander Meriwether that he would not be ordered to appear before a naval retiring board inasmuch as he was not eligible for retirement. He was further informed that no action would be taken on the board of medical survey for the reason that the act of July 12, 1921, prohibited the retirement of Reserve officers of the Navy who did not file their application prior

to October 1, 1921. Commander Meriwether was honorably discharged, because of expiration of enrollment, on February 5, 1925.

The records of the Veterans' Administration show that Mr. Meriwether filed claim for compensation on July 13, 1922, and direct service connection was granted for his disability diagnosed as tinnitus aurium; otitis media, bilateral, 20/20 each ear. This disability, however, was evaluated as less than 10 percent from date of discharge from service to February 17, 1928; temporary partial 15 percent from February 17, 1928, to November 5, 1928; permanent partial 15 percent from November 5, 1928, to June 30, 1933; and no percent from July 1, 1933.

However, under the provisions of Public, No. 78, Seventy-third Congress, the veteran was awarded $11.25 per month, effective July 1, 1933, and in accordance with the provisions of Public, No. 141, Seventy-third Congress, Commander Meriwether is now in receipt of compensation at the rate of $15 per month, effective March 28, 1934.

Application for retirement under the Emergency Officers' Retirement Act of May 24, 1928, was received September 22, 1928. The claim was considered by the Emergency Officers' Retirement Rating Board on February 12, 1929, and it was held that "the disease of retracted drums, hearing 20 feet in each ear, tinnitus (V. ear 8)" was shown to be the direct result of active commissioned service other than as an officer of the Regular Army, Navy, or Marine Corps during the World War, incurred in line of duty in such service, and permanently disabling to a degree of less than 30 percent but more than 10 percent. Authorization of retirement without pay was approved, effective September 22, 1928, and on March 15, 1929, this former officer was advised that his name was being certified to be placed upon the emergency officers' retirement list.

Subsequent to this action there was introduced in the House of Representatives H. R. 9065, Seventy-fourth Congress, which had for its purpose the placing of Commander Meriwether's name on the emergency officers' retired list with pay "if his disability shall now be determined at not less than 30 percent and without regard to any restriction in time now imposed by the act of May 24, 1928." A similar bill was also introduced in the Senate, being S. 3357, Seventy-fourth Congress. Under date of August 19, 1935, the Veterans' Administration rendered an unfavorable report on S. 3357 to the chairman of the Committee on Finance, United States Senate. In making such recommendation it was pointed out that the Emergency Officers' Retirement Act of May 24, 1928, made eligible for retirement with pay, under certain other conditions, those—

> Persons who have served as officers of the Army, Navy, or Marine Corps of the United States during the World War, other than as officers of the Regular Army, Navy, or Marine Corps who during such service have incurred physical disability in line of duty, and who have been, or may hereafter, within 1 year, be rated in accordance with law at not less than 30 percent permanent disability by the United States Veterans' Bureau for disability resulting directly from such war service * * *.

And furthermore that—

> There were many instances in which applications for emergency officers' retirement benefits with pay were denied because the service-connected condition was less than 30 percent disabling and did not reach the required degree prior to May 24, 1929, the delimiting date provided by the Emergency Officers' Retirement Act of May 24, 1928. Undoubtedly many of these claims are equally meritorious and the service-connected disability will be found to have progressed to a degree of more than 30 percent subsequent to May 24, 1929. Moreover, there appears to be nothing to distinguish this claim from other deserving claims which are barred by the provisions of the Emergency Officers' Retirement Act of May 24, 1928.

Neither of the above-mentioned bills has received favorable consideration by Congress. Instead of providing for placing Mr. Meriwether on the emergency officers' retired list with pay, as contemplated by said bills, Senate bill 3581 in reference proposes to place him on the retired list of the Regular Navy with the retired pay and emoluments of the grade of commander, which would grant him an annual compensation of $2,887.50, as against the amount of $15 per month he is now receiving as compensation from the Veterans' Administration.

Granting that this officer's disability was incurred in line of duty in time of war, consideration must be given to the fact that there has been provided by law a special means whereby ex-members of the military forces may obtain relief, that such relief in this case has been granted by the Veterans' Administration in accordance with the law and the circumstances, and that no justification exists for singling this ex-officer out for preferential treatment when others in the same category are not similarly treated. Furthermore, the retirement system of the Regular Navy was provided for the twofold purpose of attracting desirable permanent personnel to the service and of vitalizing the active list. Its maintenance for such purpose is vital to the national defense and should not be jeopardized by utilizing it as a means of relief or for placing upon the regular retired list persons other than the permanent personnel of the naval service.

In view of the circumstances and reasons stated above, I do not feel that I would be justified in giving my approval to this legislation.

FRANKLIN D. ROOSEVELT.

THE WHITE HOUSE, *May 19, 1936.*

SUPPLEMENTAL ESTIMATES, TREASURY DEPARTMENT (S. DOC. NO. 235)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting supplemental estimates of appropriations for the Treasury Department, fiscal year 1936, amounting to $2,833.70, together with draft of a proposed provision pertaining to existing appropriations, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

SUPPLEMENTAL ESTIMATE FOR CEMETERIAL EXPENSES, WAR DEPARTMENT (S. DOC. NO. 236)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting a supplemental estimate of appropriation for the fiscal year ending June 30, 1936, to remain available until June 30, 1937, for cemeterial expenses under the War Department, amounting to $360,000, which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

SUPPLEMENTAL ESTIMATES, DEPARTMENT OF THE INTERIOR, (S. DOC. NO. 237)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting supplemental estimates of appropriations for the Department of the Interior, fiscal year 1936, amounting to $8,541.39, together with draft of a proposed provision pertaining to an existing appropriation, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

PAYMENTS TO THE EASTERN CHEROKEES

The VICE PRESIDENT laid before the Senate a letter from the Comptroller General of the United States, reporting, pursuant to Senate Resolution 285 (submitted by Mr. THOMAS of Oklahoma, and agreed to May 13, 1936), relative to the amounts appropriated by Congress in payment of the lands and improvements of the Eastern Cherokees ceded by them by treaty of December 29, 1835 (7 Stat. 478), etc., which, with the accompanying papers, was referred to the Committee on Indian Affairs.

PETITIONS AND MEMORIALS

The VICE PRESIDENT laid before the Senate resolutions adopted by the General Court of Massachusetts, which were referred to the Committee on Agriculture and Forestry, as follows:

> Resolutions memorializing the President and Congress of the United States in favor of the permanency of the Civilian Conservation Corps
>
> Whereas it is the earnest desire of the people of the Commonwealth of Massachusetts that rehabilitation of the youth of our

Nation, particularly through the activities of the Civilian Conservation Corps, be continued; and

Whereas the said corps has been a remarkable factor in the preservation of the forests, streams, and fields of these United States: Therefore be it

Resolved, That the General Court of Massachusetts urges the Congress of the United States to enact such legislation as may be necessary to make the said Civilian Conservation Corps permanent; and be it further

Resolved, That the secretary of the Commonwealth forthwith send copies of these resolutions to the President, the Vice President, and the Secretary of State of the United States and to the Members of Congress from Massachusetts.

The VICE PRESIDENT also laid before the Senate resolutions of the General Court of Massachusetts, favoring the enactment of legislation to suspend the immigration laws for a period of 2 years to afford the privilege of entry into this country of persons in Germany discriminated against and persecuted on religious or racial grounds, which were referred to the Committee on Immigration.

(See resolutions printed in full when presented today by Mr. WALSH.)

The VICE PRESIDENT also laid before the Senate a resolution adopted at Dallas, Tex., by the Texas Cotton Growers Association in appreciation of the efforts of Congress to place the price of cotton at such levels as will make its production profitable to cotton farmers, and commending the administration for its efforts to bring the agricultural industry to a parity with other basic industries, which was referred to the Committee on Agriculture and Forestry.

He also laid before the Senate a resolution adopted by the North Dakota Farmers Union, protesting against proposed reduction in appropriations for agricultural relief and the Resettlement Administration, which was referred to the Committee on Agriculture and Forestry.

He also laid before the Senate a resolution adopted by the Building Material Institute, of Cuyahoga County, Ohio, favoring the enactment of the so-called Wagner-Ellenbogen low-cost housing bill, which was referred to the Committee on Education and Labor.

He also laid before the Senate a resolution adopted by the Central Labor Council of Alameda County, Oakland, Calif., protesting against the failure of Government officials to observe the safety laws of California requiring wet drilling in silica rock tunnels, which was referred to the Committee on Education and Labor.

He also laid before the Senate a resolution adopted by the Texas Federation of Labor, favoring the enactment of legislation repealing the long- and short-haul clause of the Interstate Commerce Act, which was referred to the Committee on Interstate Commerce.

He also laid before the Senate the petition of the International Falls Trades and Labor Assembly, of International Falls, Minn., praying for the establishment of quota regulations of imports of newsprint to stabilize the newsprint industry, which was referred to the Committee on Finance.

He also laid before the Senate a resolution adopted by the national executive board of the American Gold Star Mothers, Washington, D. C., protesting against the enactment of legislation designating the last Sunday in September as Gold Star Mothers' Day; which was ordered to lie on the table.

Mr. COPELAND presented a resolution of Whizbang Lair, No. 22, Province of New York, Military Order of the Serpent, of Lynbrook, N. Y., favoring the enactment of legislation prohibiting the importation of United States ensigns of foreign manufacture, which was referred to the Committee on Finance.

He also presented a resolution adopted by Manor Council, No. 112, Sons and Daughters of Liberty, of Woodhaven, N. Y., favoring the enactment of legislation providing for the restriction of immigration and the deportation of undesirable aliens, which was referred to the Committee on Immigration.

He also presented a resolution adopted by the Traffic Club of New York, of New York City, N. Y., favoring the enactment of the bill (S. 4174) to foster and protect interstate commerce by authorizing the Interstate Commerce Commission to approve or disapprove of the consolidation or abandonment of carrier facilities of public service, which was referred to the Committee on Interstate Commerce.

Mr. WALSH presented the petition of sundry citizens of Boston, Mass., and vicinity, praying for continuance of the W. P. A. projects, which was referred to the Committee on Appropriations.

He also presented resolutions adopted by the Building Trades Council of Lawrence and vicinity, and Wire Workers' Local Union No. 19859, American Federation of Labor, of Worcester, both in the State of Massachusetts, favoring the prompt enactment of the so-called Wagner-Ellenbogen low-cost housing bill, which were referred to the Committee on Education and Labor.

He also presented memorials and letters in the nature of memorials from employees of Eaton's Wakefield & Boston Express, of Wakefield; Local No. 170, Truck Drivers and Chauffeurs, of Worcester; Emmott Transportation Co., Inc., of Uxbridge; Teamsters Joint Council, No. 10, of Boston and vicinity, and sundry citizens, all in the State of Massachusetts, remonstrating against the enactment of the so-called Pettengill bill, being the bill (H. R. 3263) to amend paragraph (1) of section 4 of the Interstate Commerce Act, as amended February 28, 1920 (U. S. C., title 49, sec. 4), which were referred to the Committee on Interstate Commerce.

He also presented the petition of sundry citizens, being employees of the Boston & Maine Railroad, of Gardner, Mass., praying for the prompt enactment of the bill (S. 4174) to foster and protect interstate commerce by authorizing the Interstate Commerce Commission to approve or disapprove of the consolidation or abandonment of carrier facilities of public service, which was referred to the Committee on Interstate Commerce.

He also presented the petition of Subordinate Lodge No. 685, International Brotherhood of Boiler Makers, Iron Ship Builders and Helpers of America, of Boston, Mass., favoring the making of an appropriation of $500,000 for an addition to the present structural shop at the Boston Navy Yard, which was ordered to lie on the table.

IMMIGRATION OF PERSONS SUFFERING PERSECUTION OR DISCRIMINATION IN GERMANY

Mr. WALSH. Mr. President, I also present for appropriate reference and printing in the RECORD resolutions from the Massachusetts General Court memorializing Congress relative to affording the privilege of entry into this country to persons who are being persecuted and discriminated against in Germany.

There being no objection, the resolutions were referred to the Committee on Immigration and ordered to be printed in the RECORD, as follows:

Resolutions memorializing Congress relative to affording the privilege of entry into this country to those persons who are being persecuted and discriminated against in Germany

Resolved, That the General Court of Massachusetts urges the Congress of the United States to afford the privilege of entry into this country to those persons who are being discriminated against and persecuted in Germany on religious or racial grounds, by a suspension of the present immigration laws for a period of 2 years with reference to such persons; and be it further

Resolved, That the Secretary of the Commonwealth forthwith forward copies of these resolutions to the presiding officers of both branches of Congress and to the Members thereof from this Commonwealth.

REPORTS OF COMMITTEES

Mr. FLETCHER, from the Committee on Banking and Currency, to which was referred the bill (S. 4546) to amend the Emergency Farm Mortgage Act of 1933, as amended, and for other purposes, reported it without amendment and submitted a report (No. 2047) thereon.

He also, from the same committee, to which were referred the following bills, reported them severally with amendments and submitted reports thereon:

S. 4511. A bill to amend the act entitled "An act to provide for the incorporation of credit unions within the District of Columbia", approved June 23, 1932 (Rept. No. 2050);

S. 4512. A bill to amend the act entitled "An act to establish a code of laws for the District of Columbia", approved March 3, 1901 (Rept. No. 2051); and

S. 4596. A bill to amend section 21 of the Permanent Appropriation Repeal Act, 1934, and for other purposes (Rept. No. 2048).

Mr. OVERTON, from the Committee on Commerce, to which was referred the bill (S. 1815) to require certain documents of vessels not wholly owned by citizens of the United States and navigated in the territorial waters of the United States, its Territories, or its possessions; to regulate vessels engaged in the fisheries; and for other purposes, reported it with an amendment and submitted a report (No. 2049) thereon.

Mr. WALSH, from the Committee on Education and Labor, to which was referred the bill (H. R. 4638) to authorize the operation of stands in Federal buildings by blind persons, to enlarge the economic opportunities of the blind, and for other purposes, reported it with amendments and submitted a report (No. 2052) thereon.

INVASION OF RIGHTS OF FREE SPEECH, ASSEMBLY, AND COLLECTIVE BARGAINING—REPORT OF A COMMITTEE

Mr. LA FOLLETTE, from the Committee on Education and Labor, to which was referred the resolution (S. Res. 266) to investigate violation of the right of free speech and assembly and interference with the right of labor to organize and bargain collectively (submitted by Mr. LA FOLLETTE on Mar. 23, 1936), reported it with an amendment and submitted a report (No. 2046) thereon; and, under the rule, the resolution was referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. BAILEY:

A bill (S. 4653) to confer jurisdiction on the Court of Claims to hear, determine, and enter judgment upon the claims of contractors for excess costs incurred while constructing navigation dams and locks on the Mississippi River and its tributaries; to the Committee on Claims.

By Mr. COPELAND:

A bill (S. 4654) to amend an act entitled "An act to distribute the commissioned line and engineer officers of the Coast Guard in grades, and for other purposes", approved January 12, 1923; and

A bill (S. 4655) relative to limitation of shipowners' liability; to the Committee on Commerce.

By Mr. ASHURST:

A bill (S. 4656) to amend the statutes providing punishment for transmitting threatening communications; and

A bill (S. 4657) to penalize procuring of or attempts to procure the escape of any prisoner in the custody of an officer of the United States; to the Committee on the Judiciary.

By Mr. BLACK:

A bill (S. 4658) to aid the several States in making certain toll bridges on the system of Federal-aid highways free bridges, and for other purposes; to the Committee on Commerce.

By Mr. BULOW:

A bill (S. 4659) to authorize the payment of an annuity to William H. Moran, Chief of the Secret Service Division of the Treasury Department, upon his retirement, in recognition and appreciation of his services to the United States; to the Committee on Civil Service.

By Mr. LA FOLLETTE:

A bill (S. 4660) for the relief of Clifford Y. Long; and

A bill (S. 4661) for the relief of Milo Milliser; to the Committee on Claims.

By Mr. MOORE:

A bill (S. 4662) for the relief of Christy Gnazzo; to the Committee on Military Affairs.

A bill (S. 4663) to authorize the coinage of 50-cent pieces in commemoration of the one hundred and sixtieth anniversary of the arrival of General Washington and the Continental Army at Morristown, N. J., after their inspiring victories at Trenton and Princeton, and the establishment of cantonments in Morristown for the duration of the war; to the Committee on Banking and Currency.

By Mr. GUFFEY:

A bill (S. 4664) authorizing the appointment of an additional district judge for the eastern district of Pennsylvania; to the Committee on the Judiciary.

By Mr. McADOO:

A bill (S. 4665) granting a pension to Milka N. Robbins and minor child; to the Committee on Pensions.

By Mr. TYDINGS (by request):

A bill (S. 4666) for the relief of Allen Blow Cook and William Hawley Sewell; to the Committee on Naval Affairs.

By Mr. PITTMAN:

A bill (S. 4667) to prohibit the commercial use of the coat of arms of the Swiss Confederation pursuant to the obligation of the Government of the United States under article 28 of the Red Cross Convention signed at Geneva July 27, 1929; to the Committee on Foreign Relations.

By Mr. JOHNSON:

A joint resolution (S. J. Res. 268) to amend the joint resolution entitled "Joint resolution authorizing the Federal Trade Commission to make an investigation with respect to agricultural income and the financial and economic condition of agricultural producers generally", approved August 27, 1935; to the Committee on Agriculture and Forestry.

INTERNAL-REVENUE TAXATION—AMENDMENT

Mr. LONERGAN submitted an amendment intended to be proposed by him to the bill (H. R. 12395) to provide revenue, equalize taxation, and for other purposes, which was referred to the Committee on Finance and ordered to be printed.

AMENDMENTS TO FIRST DEFICIENCY APPROPRIATION BILL

Mr. BILBO submitted amendments intended to be proposed by him to House bill 12624, the first deficiency appropriation bill, which were referred to the Committee on Appropriations and ordered to be printed, as follows:

On page 21, line 13, to strike out "$1,425,000,000" and in lieu thereof to insert "$1,475,000,000."

On page 22, line 4, before the colon, to insert a semicolon and "and (k) assistance for public elementary schools, State-supported junior colleges, and other educational purposes, $50,000,000."

On page 22, line 3, to strike out the word "and" before the letter "j" in parentheses.

GRAIN FUTURES ACT—AMENDMENT

Mr. POPE. Mr. President, I submit an amendment intended to be proposed by me to the bill (H. R. 6772) to amend the Grain Futures Act to prevent and remove obstructions and burdens upon interstate commerce in grains and other commodities by regulating transactions therein on commodity futures exchanges, to limit or abolish short selling, to curb manipulation, and for other purposes. I ask that the proposed amendment may be printed and lie on the table. The amendment includes potatoes among the commodities covered by the bill.

The VICE PRESIDENT. Without objection, the amendment will be received, printed, and lie on the table.

APPROPRIATIONS FOR THE TREASURY AND POST OFFICE DEPARTMENTS

The VICE PRESIDENT laid before the Senate the action of the House of Representatives on House bill 10919, the Treasury and Post Office Departments appropriation bill, which was read, as follows:

IN THE HOUSE OF REPRESENTATIVES, UNITED STATES,
May 14, 1936.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 26 to the bill (H. R. 10919) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1937, and for other purposes, and concur therein with the following amendment:

In lieu of the matter inserted by said amendment insert:

"With the approval of the Director of the Bureau of the Budget, there may be transferred sums (not exceeding a total of $450,000)

to the appropriations. 'Salaries, Office of Treasurer of United States, 1937', 'Contingent expenses, Treasury Department, 1937', 'Printing and binding, Treasury Department, 1937', and 'Stationery, Treasury Department, 1937', from funds available for the Agricultural Adjustment Administration, Home Owners' Loan Corporation, Farm Credit Administration, Tennessee Valley Authority, Federal Farm Mortgage Corporation, Reconstruction Finance Corporation, Federal Emergency Relief Administration, farmers' crop production and harvesting loans, Federal land banks, and other banks and corporations under the supervision of the Farm Credit Administration, Railroad Retirement Board, Soil Conservation Service, including soil conservation and domestic allotment, Social Security Board, Federal Housing Administration, and Emergency Conservation Work, to cover the expenses incurred on account of such respective activities in clearing of checks, servicing of bonds, handling of collections, and rendering of accounts therefor: *Provided*, That funds transferred hereunder from the appropriation for Emergency Conservation Work shall remain available until June 30, 1937, any provision in the First Deficiency Appropriation Act, fiscal year 1936, to the contrary notwithstanding: *Provided further*, That a statement of any transfers of appropriations made hereunder shall be included in the annual Budget."

That the House recede from its disagreement to the amendment of the Senate numbered 49 to said bill and concur therein with the following amendment:

In lieu of the sum inserted by said amendment, insert "$9,917,500"; and

That the House insist upon its disagreement to the amendments of the Senate numbered 48 and 52 to said bill.

Mr. GLASS. I move that the Senate agree to the amendment of the House to Senate amendment numbered 26.

The motion was agreed to.

Mr. GLASS. I also move that the Senate disagree to the amendment of the House to Senate amendment numbered 49, and that the Senate further insist on its amendments numbered 48 and 52 to the bill, request a further conference with the House on the disagreeing votes of the two Houses thereon, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Vice President appointed Mr. GLASS, Mr. MCKELLAR, Mr. HAYDEN, Mr. STEIWER, and Mr. NORBECK conferees on the part of the Senate at the further conference.

VICE PRESIDENT GARNER

Mr. MURPHY. Mr. President, I ask unanimous consent to have printed in the RECORD an article from the Brownsville (Tex.) Herald of May 10, 1936, in the nature of a tribute to our distinguished and beloved Vice President.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Brownsville (Tex.) Herald of May 10, 1936]

JOHN NANCE GARNER, VICE PRESIDENT OF THE UNITED STATES, FOR EXCEPTIONAL SERVICES BEYOND THE LINE OF DUTY—FINAL PORT VICTORY IS CREDITED TO JOHN GARNER

From the very inception of the deep-water fight of the lower Rio Grande Valley, the battle was waged on two fronts. Success on one front was valueless without success on the other. And success on the other front depended largely on success on the first front.

The valley had its fight at home and at Washington.

In succeeding pages the history of the home front is outlined in detail, but the real story of the fight at Washington probably never will be told.

Of one thing, however, there can be no doubt.

All of the efforts made on the home front would have been unavailing had not the Washington offensive been guided by that man so beloved of his constituents of the Fifteenth Congressional District, John Nance Garner, former Representative and Speaker of the House, the present Vice President of the United States.

The citation that the lower Rio Grande Valley would pin on his chest would read:

"For exceptional services beyond the line of duty", and how well deserved is that appreciation of his services can only be told by those who have been closely allied with the deep-water fight of the valley during the past 20 and more years.

For the consummation of our deep-water projects rested completely in the hands of official Washington.

First and foremost the Brazos Santiago Harbor project, embracing the Brownsville and Port Isabel ports, had to win the approval of the Board of Army Engineers, and later had to run the gamut of congressional opposition.

To these ends John Garner threw his abilities with an energy far beyond that demanded or expected of a Congressman by his constituents.

His years of experience in official Washington, his influence, far beyond that of the average Congressman, were expended in a way that brought the desired results. At what expense of time and effort John Garner, a leading Democrat, secured the approval by a Republican Congress of the valley's harbor project only he could tell, and those who know him best know that he never will tell.

But secure it he did following a full approval of a 25-foot project by the Army Engineers.

The full measure of what John Garner did may be realized from the Rivers and Harbors Act of 1930, which not only put the stamp of the Federal Government on our deep-water ports but committed the Government to the building of the massive jetties, the dredging of the outer channel, and set up provisions for all-time maintenance of the channel at Federal expense.

For the first time the deep-water project of the valley was in businesslike shape. A definite course was set forth. The Government was committed to do certain things when the Brownsville and Port Isabel-San Benito navigation districts had done certain things. The "ifs" had been knocked into a cocked hat.

It is no disparagement of the sincere efforts put forth by Senators MORRIS SHEPPARD and TOM CONNALLY, Representative JOSEPH MANSFIELD, and other congressional friends of the valley, to say that John Garner's leadership carried the day.

With the Brownsville Navigation District authorized to issue bonds to the amount of $3,500,000, it looked as if the battle for the Brownsville port had been won.

But came the depression.

The bonds could not be sold except at a ruinous discount, a sale the navigation commission would not countenance.

So the Brownsville port project lagged until early in 1932, when an application was made to the Reconstruction Finance Corporation for a loan, with the bonds as security, to enable the district to proceed with its construction program.

Before final action was taken on this application the Public Works Administration came into being, and the application was taken from the R. F. C. and began its weary way through the P. W. A.

Again it was John Garner, this time as Vice President of the United States, who directed the strategy that resulted in the eventual approval of the loan application, carrying with it such a substantial grant that the Brownsville navigation district will have expended but $1,750,000, as compared to the $3,500,000 at first considered necessary.

The inside story of what John Garner did and how he did it during those days when the P. W. A. was weighing the loan application in the balance will never be told.

But this may be said: That without his indefatigable effort, without his sincere and skillful submission of the case of the Brownsville navigation district, without his influential proddings, there never would have been a port of Brownsville.

A friend is a friend to John Garner, once and forever.

On no man in public life do the obligations of friendship rest more heavily.

Convinced that the Brownsville port was conceived as an economic necessity, that its construction would materially bless his friends, he put his shoulder to the wheel with the same zeal as Vice President that he had displayed as Representative.

John Garner turned the trick.

PAYMENT OF ADJUSTED-SERVICE CERTIFICATES—ADDRESS BY SENATOR CLARK

Mr. TRUMAN. Mr. President, I ask unanimous consent to have printed in the RECORD an address on the subject of the soldiers' bonus, delivered by my colleague the senior Senator from Missouri [Mr. CLARK], over the National Broadcasting Co. network on Monday night, May 18, 1936.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

Scarcely any subject of general public interest within our times has so readily lent itself to entirely honest and patriotic divergency of opinion to a greater extent than did the controversy as to the immediate payment of the adjusted-service certificates—or in popular parlance—the bonus. Millions of Americans honestly regarded the proposition of paying the face of the adjusted-service certificates on any terms except ordinary discount rates as a raid upon the Treasury. Many millions of other Americans with equal honesty and more reason regarded the payment in full of the certificates as the tardy and belated liquidation of a debt which had accrued prior to November 11, 1918, and which should have been funded or liquidated promptly thereafter. Other millions of Americans held to varying shades of opinion between the two extremes which have been stated. With the changes in the financial situation of the Nation and the developments in our national policy as to expenditures, a multitude of our citizens have had occasion to change their attitude as to justice of paying at once this debt now nearly two score years old.

Let me for a moment recall to your mind the circumstances which justified the acknowledgment of a debt which was embodied in the issuance of the adjusted-service certificates. It is to these circumstances that we must look for the justification both for the original issuance of the bonus certificates and for their payment either now or in 1945 or at any other time.

In April 1917 the United States declared war on Germany. We had a small and efficient Regular Army in conformity with our traditional national policy. We had a most excellent and devoted National Guard, but the Regular Army and National Guard combined, of course, formed a force vastly smaller than our needs for

the prosecution of a war. It was necessary to raise a new army of a size unprecented in our history.

At the urgent insistence of the War Department, Congress turned its back upon our ancient and historic policy of fighting our wars with volunteer armies and decided upon conscription. Millions of our youth were drafted from their civilian pursuits into the military service in addition to the several hundred thousand who had enlisted in the National Guard, Regular Army, Navy, or Marine Corps. Altogether more than 4,000,000 Americans were called to the colors in the less than 2 years of our participation in the great war.

It is not necessary in this brief period to go into detail as to our military participation in that awful struggle. The world knows and has acclaimed the story. Suffice it to say that all of our services—Army, Navy, and Marines—met every demand which could be made upon them in a manner to shed imperishable luster upon our arms; that on some of the bloodiest and most decisive fields of the entire struggle our lads played a gallant, important, and, indeed, a decisive part; that finally American troops were the spearhead of the assault which smashed the Hindenburg line amid the greatest carnage in history and compelled the Central Powers to sue for peace. Undoubtedly if the war had been prolonged until the next year the military contribution of the United States would have been upon a scale never equaled in military history. As it was, such experts as Grand Admiral Von Tirpitz and General von Ludendorff attributed the final defeat and collapse of the Central Powers to the activities of the American Expeditionary Forces and to the potentialities of the huge reserves already formed and forming on this side of the Atlantic. And so the war was won, and within a few months nearly all of the armed forces were summarily returned to the civilian status from which they had been summarily drawn by the dread advent of war. But in millions of cases this return to the civilian life was accompanied by a very definite economic disadvantage.

All of us who are old enough well remember how, when the units of the National Guard or the draft contingents of the National Army were mustered in towns and cities throughout the land and marched down to the railroad stations to entrain for the camps, with France as their ultimate destination, they were accompanied by the tears and prayers of their fellow citizens, by fiery exhortations of patriotism from civic orators and local and national leaders. Who that marched out in those days can ever forget the note which we heard so often, so urgent and emotional as to be almost hysterical:

"When you boys come home there will be nothing too good for you!"

Well, the boys came home. That is, most of them did. Some sleep on the other side of the ocean. Many died in camps on this side of the water. Thousands suffered disability from wounds or disease, either here or in France, which has since prevented their return to a normal participation in civilian life or severely handicapped them in such participation in civilian affairs.

Yes; the boys came home. And they were discharged with a generous allowance from the Government of $60, which at the abnormally high level of prices then existing was not enough to enable the discharged soldier to buy a modest civilian outfit of clothes and subsist for more than a week or so while he was trying to find a job. And what did he find? Why, in a multitude of instances he found himself out of a job. He found that manufacturers of munitions and war supplies had been amassing profits of millions upon millions by reason of our participation in the war. He found that in thousands of cases common labor, exempted from service for work in munition plants, had been paid to the tune of $10 or $12 or $15 a day, while the soldier had been paid a dollar and a quarter a day for being shot at or a dollar a day while he was getting ready to go across. And in all too many cases he found his job gone and someone who for one reason or another had been detained at home holding the job or holding the advancement to which he would have been entitled but for his absence in the service. Not only in business and labor but in the professions, hundreds of thousands of veterans suffered very definite economic disadvantage in the race for life by reason of their military or naval service. Many thousands never have recovered from that economic disadvantage.

I can speak freely about the bonus because, although I put in more than 2 years in the Army and spent something over a year in France, I have no adjusted-service certificate and never did have one. And that was proper. I was a colonel and drew a colonel's pay. The adjusted-service certificates were, and the bonus bonds will be, properly limited to enlisted men and officers not above the rank of captain.

I think, and have always thought, that the debt from the Government to these men accrued on November 11, 1918, and that the Government on their discharge from the service or very soon thereafter should have made a payment to them in cash of a sum sufficient to at least in some degree compensate them for the economic loss suffered through their service. It would have been much cheaper to have handled it in that way. It could then have been handled on the same basis of compensation as is now under way for an outlay of less than a billion dollars; for be it remembered that the greater part of the cost of the adjusted compensation represents interest and the costs of deferred payment. The cost of a cash payment at the time it was really due and the time it would have done the veterans the most good would have been relatively small in comparison with the vast outlays already made on account of the war. But the pressure of the great interests intent on the abolition of the excess-profits tax and other wartime taxes was so great that nothing was done toward either a recognition or settlement of the debt and the veterans were left to relocate themselves in civil life as best they could, and if they could not to suffer the consequences. Every contractor with a claim against the Government growing out of the war could enforce and obtain payment with 6-percent interest, but the men who were prepared to bare their breasts to the storm had only a moral and not a legal claim and were left in the humiliating position of being suppliants to Congress for relief. The Government was under the fiscal dictatorship of the arch enemy of their claims, the typical representative of those who profited most by the removal of the excess-profits tax, Andrew W. Mellon.

We have all seen blatantly displayed in the newspapers, we have all heard stridently proclaimed over the radio statements from alleged ex-service men who decried the principle of adjusted compensation and abused all who advocated it. I have no patience whatever with such expressions. Almost without exception they came either from those who themselves were so comfortably placed from an economic standpoint that they had no conception of the plight of their less fortunate comrades or else from those who were themselves making a living on the pay of the great financial interests who were opposed to paying the debts of the last war but in favor of squandering huge sums of money in preparation for a future war. They complacently asserted that the men who wore the uniform had done no more than their duty; that their pay of a dollar or a dollar and a quarter a day was all that they deserved, and that the argument as to their economic hardship due to service was based upon pure myth and fable. Against such callous statements I place my own experience. In my capacity as a past officer of the American Legion and my capacity as a former Infantry officer, I have had occasion to investigate and be familiar with hundreds of cases, many of them from my own regiment of men whom I knew of my own knowledge had been excellent soldiers. In a distressingly large number of cases I found men who had gallantly served their country and been summarily cast off who had never been able to reestablish themselves economically.

The leading munition makers in the United States, the greatest profiteers during the period of the war, financed organizations in opposition to doing justice to the veterans of the last war. Among the bitterest opponents, first, of the enactment of the compensation law and then to immediate payment was one firm which has recently been exposed by the Munitions Committee of the Senate as having held up construction of vitally needed power plants during the crisis of the war while it haggled with the Government about its own compensation and demanded huge bonuses for its executives and civilian employees, while American boys were dying in the front-line trenches in France. I have myself within the year heard the head of a great munition company, who himself received bonuses of three and a half million dollars during the 2 years of our participation in the war for performing a good, safe civilian job, smugly testify on the witness stand that he would regard a demand for immediate payment of the soldiers' bonus as unwise and unpatriotic. With such cant I have no patience whatever.

It is not necessary to trace the struggle for adjusted compensation. By 1925 the demand for it had become so strong and universal that Congress overrode the Mellon-induced Presidential veto and enacted it into law. It is important, however, to remember that Congress and not the veterans prescribed the terms of this act. Although the debt was then already 7 years overdue, the Congress elected at the time not to pay in cash but in obligations maturing in 20 years and bearing interest meanwhile at a very low rate of interest, far below the rate accorded to wartime contractors. Never has there been a greater fallacy than the often repeated statement that the Adjusted Compensation Act represented a contract upon which the service men were seeking to renege by urging immediate payment. The fact is that Congress prescribed the terms of the act, and the veterans, since they had no legal recourse, had perforce to accept the terms prescribed or nothing. There was nothing whatever, morally or legally, to preclude them from presenting their case to subsequent Congresses in an appeal for a just reckoning which would start with the proper date of the debt—November 11, 1918.

With the depression the demand became insistent throughout the Nation for a readjustment of the terms of the certificates which would give effect to the real date of the obligation and expedite payment so as to put the money into the hands of the men who desperately needed it. I need not refer in detail to the more unfortunate incidents of that struggle. I shall not try to describe the ill-advised venture of several hundred unfortunate veterans, rendered desperate by poverty and the hunger of their dependents, who came to Washington to personally urge their claims upon Congress. I pass over one of the most disgraceful incidents in American history when during the latter days of the Hoover administration the well-fed, well-equipped Regular Army was turned loose to drive by flame and sword from the miserable hovels in which they were sheltering their women and children, unarmed men who had once upon a time with guns in their hands stood between this country and the mightiest military nation in the world.

President Roosevelt was elected to the Presidency in 1932, after a frank and explicit statement that he would not favor the immediate payment of the bonus until in his opinion the condition of the Treasury justified it. I honor him for that statement. I entertained similar views and voluntarily expressed them from the stump when I was a candidate for the Senate. The overwhelming

majority of the American people, including an overwhelming majority of the holders of adjusted-service certificates—who have certainly proved that they are as patriotic and self-sacrificing as any body of men and women within the Nation—agreed with this principle.

In accordance with this principle, I myself, in company with many others, since I have been a Member of the Senate, voted three times against the immediate payment of the bonus. I have no regrets for those votes. And I may say that in all my very large acquaintance among the veterans of Missouri I found only one or two to criticize me for those votes. But when it became the settled policy of the Government to try to defeat the depression by increasing buying power of the Nation at large and putting money in circulation, when we were spending four billion here and three billion there, when we were running up the biggest bills in our peacetime history for the support of Army and Navy in preparation for a new war, many of us could not reconcile our consciences to the opposing the immediate payment of a debt which we have always believed to have been many years overdue.

At the last session of the Congress, a very large majority of both branches favored the immediate liquidation of this debt. By very skillful management on the part of those opposed to payment the issue was finally presented complicated by the addition of an entirely separate and highly controversial matter—that of currency inflation, a subject in no wise connected with the payment of the bonus. The President properly vetoed the bill and his veto was sustained in the Senate.

At the beginning of the present session of Congress the sponsors in the House of the various plans for the immediate payment of the compensation certificates, and the representatives of the various service men's organizations composed their previous differences and agreed upon a bill which was introduced into the House by Representative VINSON, of Kentucky, and Representative MCCORMACK, of Massachusetts, later joined by Representative PATMAN, of Texas, who had formerly sponsored a different and somewhat antagonistic plan. This measure subsequently passed the House by an overwhelming vote.

I was requested to introduce an identical bill in the Senate and was prepared to do so with no doubt as to its successful passage in the Senate. But because I was primarily concerned in the successful consummation of the act rather than in mere passage through the Senate. I immediately sought consultation with two of the most astute and devoted friends of the veterans in the Senate—Senator JAMES F. BYRNES, of South Carolina, and Senator FREDERICK STEIWER, of Oregon. These Senators had jointly introduced a bill following the veto in the preceding session which provided for immediate payment on a basis of nearly a hundred percent. Together we sweated over the matter. We took stock of the situation. We concluded that we could pass either the House bill or the Byrnes-Steiwer bill without difficulty. But we estimated that we would need additional and powerful assistance to pass our bill over a possible Presidential veto.

We interviewed Senator PAT HARRISON, the influential chairman of the powerful Finance Committee which passes on veterans' measures. PAT had always been extremely sympathetic to the service men but had opposed immediate payment of the bonus through his loyalty to the administration. We found that he was anxious to cooperate with us provided a plan could be devised which would fully protect the interest of the Government as well as the veteran.

For the modified plan, which became the final enactment, the credit is primarily due to Senator HARRISON and Senator BYRNES. They worked out an additional feature to the House bill which is calculated both to cut down immediate Government expenditures and to protect the interest of the thrifty veteran who does not desire to cash his certificate now. In other words, they devised a plan for providing an incentive in the form of a safe investment for certificate holders not to cash the bonds which they will receive. This modified plan was introduced jointly into the Senate by Senators HARRISON, BYRNES, STEIWER, and myself.

With the powerful and invaluable assistance of Senator JOSEPH T. ROBINSON, the majority leader in the Senate, as well as that of Minority Leader MCNARY, the bill was passed through the Senate by a large majority and later successfully passed over the President's veto.

Let me say that the difference between the President and the Congress represented simply an honest difference of opinion. The President believed that the condition of the Treasury did not justify the expenditures. The Congress believed that this expenditure, so widely diffused throughout the Nation, was likely to give a bigger impetus to recovery than any of the New Deal expenditures. It further believed in the justice of the payment of a just debt already many years overdue. Once the bill had become a law, President Roosevelt acted with unparalleled vigor and promptness to insure speedy payment to the certificate holders. I believe that the handling of this matter will establish a record both for promptness and smoothness in such matters. Let me briefly describe the arrangements which are being made.

Any holder of an adjusted-service certificate may obtain from any of the veterans' organizations or from the nearest office of the Veterans' Administration or from the Washington office of the Administration proper application blanks for the issuance of the new bonds. This application may be sent either to the nearest office of the Administration or to Washington. As soon as the data has been checked by the Administration it is certified to the Treasury Disbursing Unit, located in each of the Federal Reserve cities, except Richmond, which is served from Washington. Bonds are then issued in units of $50 each up to the nearest $50 to the amount due the veteran and a check is drawn to his credit for the odd amount due. The bonds and check are then placed in an envelope addressed to the veteran for whom intended.

All completed work will be turned over to the postmasters about 10 days prior to June 15 to permit delivery to the veteran as promptly as possible after that date. The delivery procedure requires that personal delivery must be effected and a receipt obtained from the veteran. This provision, of course, is for the veteran's own protection. Where the veteran is not at home when the postman makes his round he may obtain his bonds by calling at the postal station, identifying himself, and signing the required receipt. The Secretary of the Treasury will designate the United States Treasury and certain post offices as the points at which payment of the bonds will be made. I urge every veteran who is in a position to do so to keep his bonds as the very best investment in the world. But if it becomes necessary for him to redeem his bonds he may present himself to his local post office, establish his identity as the person whose name appears on the face of the bonds to be redeemed, and sign the request for payment on the back thereof. The local postmaster will, if the veteran so desires, take charge of the bonds and transmit them without cost to the veteran to a designated paying office, where a check will be drawn for the amount due and mailed to the veteran at the address requested by him in his application for payment. The veteran may at his own risk and expense send his bonds to the Treasury Department in Washington for payment, but in most instances it will be more convenient for him to have his local post office handle the transaction.

Two hundred and thirty-five post offices have been designated as paying offices, so located with regard to mail facilities as to be able to render prompt service to all veteran bondholders within the continental limits of the United States. Fifty-nine of these offices are central accounting post offices and will redeem bonds forwarded by postmasters in the area covered by the office. The other 176 post offices, embracing practically all of the larger cities and towns, will redeem bonds presented directly to their offices. The Post Office Department expects that bonds received at the paying offices will be redeemed and the checks mailed to the veterans within 24 hours after receipt.

Certain officers of the United States Government will be authorized to witness requests of the veterans for payment and certify thereto. These will include any postmaster or acting postmaster or post-office inspector in charge or other post-office employee designated by the postmaster; any executive officer of a bank or trust company incorporated in the United States; judges and clerks of United States courts, collectors of customs and of internal revenue and many others.

Veterans may negotiate their checks through the usual channels such as banks, stores, and similar means. Based upon experience it is not expected that any difficulty will be experienced in this connection, as the rightful owners of checks drawn upon the Treasurer of the United States usually find it a comparatively simple matter to convert them into cash.

Let me emphasize again; it is not necessary for a veteran to present himself at a paying post office. Any postmaster will receive his application and the check will be mailed to the veteran at the address specified by him on the back of the bond.

In conclusion, I once more urge all who can to hold their bonds. It is a fine investment. We are none of us as young as we used to be. For many old soldiers, the bonds which you are now receiving would be all that you would leave your wives and children. Cling to them as long as you can. Make sacrifices to hold on to this splendid investment. And if you must cash in, make every effort to spend your money wisely and not squander it on knick-knacks and novelties. In that way you can best justify the policy of the Congress in giving you your present opportunity.

THE CHIEF EXECUTIVE—ADDRESS BY SENATOR TRUMAN

Mr. CLARK. Mr. President, I am asking permission to have inserted in the RECORD an address on the subject of The Chief Executive, delivered by my colleague the junior Senator from Missouri [Mr. TRUMAN] before the Democratic State convention at Joplin, Mo., May 5, 1936.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

It is a pleasure to come here for this State convention. I like Joplin; I like Democrats; I am therefore doubly happy.

I am also happy because Missouri is to be congratulated upon its efficient Democratic State government. Governor Park has given this great Commonwealth a great administration in a time of stress. He has kept the State finances balanced, has cooperated with the National Government, and has altogether made us proud of our State once more. The State and the Democratic Party are also to be congratulated upon its candidate for Governor, Maj. Lloyd C. Stark. He has every qualification Missouri's Governor should have—family, education, experience. I predict for him as great a majority as any Governor has received in recent years and a successful and efficient administration.

I can't help right here but pay tribute to our State chairman and national committeeman, James P. Aylward. He is without a

peer as a campaigner and a campaign manager. He has all the qualifications necessary to make the Democrats of Missouri a great national committeeman.

My good friend and colleague Senator CLARK has told you with an ability I envy of the progress of the ship of state under the command of Franklin D. Roosevelt. The world has marveled at his skill as he piloted the ship from the storm-tossed waters of 1933 to the fair sailing of today. None but a statesman worthy to stand beside the greatest of this Nation's great could have saved us from our peril; none but a steady hand, a stout heart, the God-given gifts of faith and vision.

You and I and all the world have seen his magnificent achievement. But we have seen something else, too, though we may have failed to note its sublimity. In the titanic struggle engaging the energies of Franklin D. Roosevelt, we have come to measure his stature by his deeds; and in so doing, my friends, many of us have overlooked the human quality of the man himself.

We know what sort of President he is; have we ever, I wonder, paused to ask ourselves what manner of man he is? What are the human qualities of President Roosevelt? What are the traits that attract the respect, the admiration, the love of Americans to this great leader of men, and hold them to him as a magnet draws and holds that within its field?

Turn the pages of history with me as we seek the answer. Generations ago, when the Republic was in the making, as we have learned, there was a famed American warship that sailed the seas to do battle with the Nation's foes. We all have heard of the *Bonhomme Richard* and her great commander, John Paul Jones. The name of that ship intrigues me—the *Bonhomme Richard*. Translated from the French, it means simply the "Good Man" Richard. "Good man", indeed, it was.

That was long ago. But history repeats. And when I think of Franklin D. Roosevelt today, I like to think of him as another "bonhomme", another "good man", fighting for the liberties of the common people as fought the *Bonhomme Richard* on the dark seas when our fathers' grandfathers were in their swaddling clothes.

And so I would call him, were it left to me, the "Bonhomme Roosevelt." It is a fitting word to describe him. To me it means something more than the literal translation "good man." It means, as well, good neighbor, good citizens, and, perhaps most of all, good temper and good nature.

It means a smile on the lips when the heart is heavy. It means courage unquenched by the torrents of adversity. It means the unconquerable will to press bravely and blithely on, calm of face and serene of soul, while those about one falter and fall. It means nerves of steel and indomitable purpose to battle for the downtrodden and the forgotten, champion of their rights and liberties.

Such, my friends, is the human side of the great leader of whom I think as "Bonhomme" Roosevelt.

His critics say that he can't take it when he is thwarted, but I tell you from the fullness of my personal knowledge it isn't true.

Can't take it? What was the attitude of the stricken Roosevelt a dozen years or so ago when that baffling scourge, paralysis, cut him down on the threshold of his prime? Who, in all America, fought this overwhelming personal disaster with stouter heart or cheerier smile than our great "Bonhomme" Roosevelt? If there be a single man of those who prate that "Roosevelt can't take it", who himself has met his personal misfortune with higher courage or greater bravery, let him come forward.

And when such a man proclaims that Franklin D. Roosevelt "can't take it", maybe we'll pay some attention to those words, but not until then.

In 1789, 90 percent of our people were engaged in agricultural pursuits, and the people were widely dispersed. There were no large cities. Now we have the largest city on the American continent, and the second in point of population in the world, within our borders. We have become an industrial Nation. People of the early Republic grew and processed their food and their textiles all on the farm. They had few wants and few conveniences for comfort.

Then came the age of invention and industrialization, the concentration of population in great centers and the creation of a desire for human comforts. One-fourth of the people have all these luxuries and comforts that they can use; one-half of the people have a few of the comforts, and 25 percent of the people of the Nation have none of them. Six million families receive less than $1,000 per year income; 12,000,000 families receive less than $1,500 per year, and 36,000 families at the top of the financial ladder receive as much income as all the 12,000,000 families at the bottom of it. These figures are from the Public Affairs Committee report, an organization not particularly friendly to the New Deal but conceded to be accurate in its figures.

We saw starvation and want among 15,000,000 people in 1932, amidst a surplus of everything any family could desire. Our President saw that, and his heart went out to those underprivileged people. He believes that if God gave us a country that can produce plenty of everything, then that plenty ought to be more evenly distributed. He has gone about it by means of emergency legislation, and when the Supreme Court has said that certain emergency legislation is contrary to constitutional provisions, he has tried something else and some other way to accomplish his purpose of a more even distribution of income and the comforts of life.

When Roosevelt became President his first words to the Nation frankly proclaimed that he knew of no panacea to end the miseries then surrounding, almost enguling, us. He told his countrymen he would have to proceed by trial and error; that he would err undoubtedly, and profiting from the mistake would try again on another front, like a general leading his forces against unmeasured enemies.

We knew what to expect. And when President Roosevelt told us of his purpose what did we reply? Why, the Nation rocked with the roar of the universal answer. "Go head, Mr. President", we said. And for God's sake, go ahead fast. We've spent 3 years doing nothing, and it's time for action."

All right. The President did go ahead, and he went ahead fast. The Nation was behind him as one man in his desire to save the country. They were breathless days. Sweeping changes were made in our laws. For a time, almost every day produced a new, far-reaching law. Such was the method of trial and error by which the President strove to redeem America from the abyss into which it was slipping.

And when, thanks to this burst of intelligent action for which we had waited in vain while his predecessor fiddled and grouched, we finally got our feet on solid ground again, what happened? Why, grave doubts arose as to whether we had done the right thing or not! White-lipped, terrorized men, who had begged him to save them, and whom he had saved, began to question the means of their salvation. It hadn't been done according to the laws and the Constitution, they said. True, their skins were whole now, but what about the Constitution of the United States? Had the President done right by the Constitution?

Well, my friends, we know what happened. One by one, these critics began to cut the ropes that hauled us up from the sides of the bottomless pit. The first rope they cut was N. R. A. True, N. R. A. had served its purpose during the emergency. But now the Supreme Court held it unconstitutional.

How did President Roosevelt take that?

He had a bad day when he saw this mainstay of his program discarded. One bad day—count it—one. Would you begrudge him one day of mourning? And when that day passed, he took this body blow, this solar-plexus attack, just as he had taken his other misfortune—with a smile. Again he was cheery and blithe; again he was the "bonhomme" Roosevelt of the days before.

The next main emergency measure to be declared unconstitutional was the A. A. A. And this time Bonhomme Roosevelt did not allow himself even the 1 day of mourning. No. "If we can't lift the farmers up out of their rut with that rope," he said in effect "I guess we'll have to try something else." And without loss of time he set about a substitute measure to take the place of the law discarded by the Supreme Court.

The depression for the farmer really began in 1921. He was completely deflated at that time, and was at the botton of the financial pit continuously until President Roosevelt came along with a concrete plan to help him out. The average farm income, even in the so-called prosperous years, was only $812 per person, and in 1932 it was only $434. That is an altogether insufficient reward for that most important group in our national make-up engaged in agriculture. It is in the public interest, and public welfare demands that the financial situation of the American farmer be improved. The present Democratic administration, under the leadership of Franklin D. Roosevelt, has succeeded in materially increasing the farm income in the last 2 years.

A national agricultural policy is necessary to remedy the farm situation. When the Supreme Court decided that the A. A. A. was not constitutional, the soil-conservation plan was inaugurated. This plan contemplates a Federal-aid program in conjunction with State agricultural plans. It is my opinion that it will be successful, because the farm income must be further increased. If for any reason it doesn't work, we can depend on President Roosevelt to make another effort.

Still proceeding by trial and error, as he promised the Nation, the President encountered opposition in Congress over two of his tens of thousands of work projects. Two out of many thousands is a mighty small percentage of error, it seems to me. But, anyhow, when Congress said, "We refuse to appropriate funds for Passamaquoddy and the Florida canal", how did Bonhomme Roosevelt take that? He might have said, "All right, I've got the money to put these projects through, anyhow, so I'll do it without your appropriation." He might have said that, but he didn't.

He said, in effect, "Very well, gentlemen; if you prefer not to continue these projects, we'll stop the work." And still smiling, still debonair, still working for the country's welfare as he saw it, he put them aside good-naturedly and went on to other things.

And so they say he "can't take it."

My friends, President Roosevelt believes the Government belongs to the whole American Nation, not just to Morgan, Du Pont, and the Liberty League. That gang, after running this Nation for years, no longer rules at Washington. They have lost something. They are trying to get it back, and they aren't particular about how they try. They want to rule again, and by hook, crook, and Jouett Shouse, they will rule again if they can.

If anybody can't take it, they can't.

Bonhomme Roosevelt has shown us again and again that he can. And now, it seems to me, it is up to us to show our faith in him. We soon will have that opportunity. We can choose between the Jolly Roger and the Bonhomme Roosevelt. And you and I know now what the choice will be.

COOPERATION AND COOPERATIVE GROWTH—ADDRESS BY SENATOR BENSON

Mr. POPE. Mr. President, I ask to have printed in the RECORD an address on the subject of Cooperation and Cooperative Growth, delivered by the junior Senator from Minnesota [Mr. BENSON] May 5, 1936, at St. Paul, Minn. It is a very interesting and informative address.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

MINNESOTA LEADS THE WAY

It is my pleasure to call attention to the fact that I have the honor of representing in the United States Senate one of the most forward-looking constituencies in this country. A majority of the people in Minnesota are of Scandinavian and German birth or origin. They brought with them the thrift, home pride, and spirit of cooperation of the peoples of Sweden, Norway, Germany, Finland, and Denmark. They take seriously the principles of democracy upon which our Government is founded. So much do they do this that they apply these same principles to their everyday activities, and as a direct result, the number of cooperative enterprises, both producer and consumer, which today flourish in my State, exceeds that of any other State in the entire Nation, regardless of population.

With a population of 2,627,000, Minnesota today has in successful operation more than 4,800 cooperatives. One hundred and forty-four thousand Minnesota farmers participate in the benefits as members of producers' cooperatives. Seventy-five thousand Minnesota consumers enjoy the benefits of consumer cooperatives, and 531,180 members took advantage of cooperative mutuals and societies for farm supply, insurance, telephone service, credit unions, etc.

Minnesota has established such a lead over other States in the field of cooperative marketing enterprises, that 13.9 percent of all such enterprises in the United States are located in Minnesota. This 13.9 percent have 252,100 members, and in 1935, did a business of approximately $109,000,000, according to the State department of agriculture.

Our sister State, Wisconsin, ranks next with 10.9 percent of all such organizations in the United States, 135,500 members, and a $62,000,000 annual business.

COOPERATIVES HAVE NO FAILURES

And here is the most striking fact of all. Since 1925, the number of failures of cooperatives in Minnesota is only one-half of 1 percent. Since 1930 there have been no failures at all. Such a record is unsurpassed by any other group. It means that while private business and private banking failed, these cooperatives continued to succeed and to expand, depression or no depression, for they had their roots in the needs and welfare of the people.

Then should there not be a lesson in their experience?

First, I will refer to the growth of producers' cooperatives, more familiarly known as cooperative marketing associations, which are mainly agricultural and quite general throughout the United States, although probably more extensive in Minnesota than in most of the States. The aim of these organizations is to enable the farmer to bargain collectively for the sale of his products in which is incorporated his labor power. And as the average farmer in our Western States receives the major part of his income from his labor rather than from his investment, he is in much the same position as the industrial worker who finds it necessary to associate himself with his fellow workers to bargain collectively for the sale of his labor power. Therefore, these agricultural cooperative marketing associations are necessary in the life of the farmer in order to enable him to maintain a decent standard of living and exercise some degree of control in his economic life.

It is of interest to note the degree of development attained in Minnesota by the farmers in marketing cooperatively their products, and the nature, number or associations, and value of the products marketed during the past 2 years, 1934–35. These figures are based upon data of one great cooperative enterprise in the State. They are as follows:

Producer cooperatives in Minnesota

	Number	Members	Annual business
Creameries	638	86,768	$44,386,000
Cheese factories	36	1,008	1,000,000
Fluid milk	6	9,000	3,185,000
Fruits and vegetables	25	4,000	1,000,000
Grain	265	41,605	17,000,000
Livestock	325	66,625	22,000,000
Poultry and eggs	14	770	3,000,000
Wool	5	6,600	3,400,000
Fish	2	365	160,000
Miscellaneous	2		2,263,000
Grand total	1,318	144,000	97,395,000

Even these tables are not entirely complete, according to further data obtained by Minnesota's State department of agriculture, which I will recite later, and which varies in several instances with the table I have presented. The point is that it is very doubtful if these 144,000 farmers would have been able to receive $97,000,000 for the products they marketed had they not been associated together for this purpose. In our existing economic society it is an absolute necessity that farmers and workers should organize in self-protection against being exploited, as individually they possess little or no power to prevent this.

But while organization in the form of marketing associations and labor unions afford a means of protection, they fall short of solving the economic problems of farmers and workers for the reason that neither can control the market, whether it be for farm products or human-labor power.

Producers' cooperatives, therefore, while presenting a barrier against undue exploitation by greatly depressing prices of farm products, must be supplemented by political action, and also by other economic methods that are more far reaching. It is of this latter that I desire to speak more at length. I herein refer to consumers' cooperation.

Farmers early began to realize to a limited extent that the same cooperative principles they applied to marketing their products could with equal advantage be applied to purchasing their supplies. Therefore, many cooperative marketing associations began to purchase such things as fertilizer, seed, feed, and so forth. But as time went on, purely consumers' cooperatives were organized and carried on with great success. Particularly is this true of the oil business. In this day and age of motor-driven machinery on the farm, petroleum products constituted a large item of expense in farming operations. In the early days of the oil industry enormous profits were made, as is well known to everyone. In order, therefore, to avoid having to pay excessive prices for petroleum products, farmers started their own cooperative bulk plants and service stations.

In June of 1921, the first of these cooperative oil associations was started in Cottonwood, Minn. Other communities emulated the example of these farmers at Cottonwood, with the result that many thousands of dollars have been saved to the farmers in the purchase of these products alone. In 1927 a number of these retail cooperative oil associations joined together to purchase collectively at wholesale. Today there are more than 140 of these oil cooperatives situated in the States of Minnesota and Wisconsin, organized in what is known as the Midland Cooperative Wholesale, located in its own building in Minneapolis, conducting its own blending plant and doing an annual business of between two and three million dollars. In this connection it is interesting to know that although this wholesale has assets of well over $200,000 above all liabilities, not one cent has ever been paid into it by the affiliated associations, the entire capital structure having been built out of the savings effected by the various affiliated retails in thus purchasing together.

SAVE UP TO 20 PERCENT

In the retail end of these oil cooperatives, much larger savings have been made by the individual members, ranging all the way from 5 to over 20 percent on their purchases. In Freeborn County, Minn., during the past 10 years, there has been paid out in patronage dividends by the Freeborn County Cooperative Oil Association more than $275,000. In Kanabec County, the cooperatives have done more than 70 percent of the entire petroleum-products business transacted in the county.

In order to give some idea as to the scope and magnitude of the consumers' cooperative movement in Minnesota, the following figures, compiled by one large cooperative concern, are of interest:

Consumer cooperatives in Minnesota

	Number	Members	Annual business
Essentially Rochdale co-ops:			
Store societies (1934)	103	25,000	$5,611,383
Affiliated 38			
Independent 65			
Oil associations (1935)	150	50,000	7,500,000
Affiliated 95			
Independent 55			
Total	253	75,000	13,111,383
Mutual or co-op societies:			
Credit unions (1935)	205	35,000	3,075,000
Insurance (1934)	160	245,000	5,700,000
Telephone (1933)	1,558	56,000	670,000
Burial (1933)	10	5,180	51,600
Total	1,933	341,180	9,496,600
Farm supply (other than above):			
Farm Bureau and Farmers' Union	80	35,000	300,000
Producer co-ops (side-lines)	600	80,000	5,000,000
Total	680	115,000	5,300,000
Grand total (all societies)	2,866	531,180	27,907,983

A similar story on a smaller scale might be told of many other States, as farmers have organized consumers' cooperatives, which in turn have united their regional wholesales in a cooperative organization known as the National Cooperatives, Inc. This national cooperative is comprised of the following: Midland Cooperative Wholesale, Minneapolis, Minn.; Farmers Union Central Exchange, St. Paul, Minn.; Central Cooperative Wholesale, Superior, Wis.; Consumers' Cooperative Association, North Kansas City, Mo.; Ohio Farm Bureau Cooperative Association, Columbus, Ohio; Indiana

Farm Bureau Cooperative Association, Indianapolis, Ind.; Farm Bureau Services, Lansing, Mich.; Pennsylvania Farm Bureau Cooperative Association, Harrisburg, Pa.; Consumers' Cooperative Association, Amarillo, Tex.; Pacific Supply Cooperative, Walla Walla, Wash.; and Eastern Cooperative Wholesale, New York City.

As officials of the Northern States Cooperative League state it in a recent article, the cooperatives are in full sympathy with Government ownership and control along certain specific lines, such as natural resources, post offices, etc., but are even more interested in the "cooperative action of our people as consumers and producers of goods and services." I hope it will be noted that we consider every person who works, who earns from the service he renders, whether on the farm or in the factory or behind the desk of the professional or white-collar worker—we consider and classify every such person as a producer.

Minnesota's supremacy over all States in cooperatives is especially pronounced in fields other than consumer. Combining the two, consumer and producer cooperatives, we find this interesting picture as given by Deputy Commissioner Hay of the State department of agriculture:

Cooperative creameries (P)	644
Cooperative cheese factories (P)	35
Elevators (P)	373
Livestock shipping associations (P)	636
Stores (C)	216
Gasoline associations (C)	140
Produce (P)	177
Fire insurance (mutuals) (C)	177
Hail and cyclone—insurance (C)	14
Miscellaneous—insurance (C)	9
Burial associations (C)	13
Sales agencies	22
Telephone associations (C)	1,809
Service associations (C)	17
Lumber associations (P)	11
Trucking associations (P)	116
Implements (P)	10
Poultry and egg (P)	8
Credit union	225
Fisheries	3
Canneries	3
Regional credit	37
Cooperative bank	1
Service—bull, sheep, meat, threshing	100
Garment	2
Newspapers	3
Electric associations	50
Total	4,856

It is impossible in this compilation to give business figures on all activities, as were given by the table compiled by Midland Cooperative, but I might say in passing that cooperative creameries have captured almost two-thirds of the creamery business in Minnesota.

I have set forth these facts and figures in order to show the growth and importance of consumers' cooperation. Now let us see just what is consumers' cooperation. Consumers' cooperation means cooperative organization and activities through which people join together for the purpose of securing consumer goods for themselves. Obviously, then, it eliminates profit, since no one can profit at his own expense.

The principles of consumers' cooperation are exceedingly simple and are as follows: Open and unlimited membership; fixed rate of interest on capital invested; each member only one vote, regardless of their investment; no proxy voting; patronage dividends on the basis of patronage. This means that after paying all expenses of operation, including interest on invested capital and providing for a reasonable reserve, that all profits are returned to the members on the basis of their patronage.

These principles were first applied in a practical manner in Rochdale, England, in 1844. This is why this form of cooperation is often referred to as Rochdale cooperation. Starting with 28 persons and a capital of $140, this movement has grown to such an extent in England alone that today it has 7,000,000 members and transacts approximately more than half the retail business of that country in consumer goods. Some 1,150 retail cooperatives are federated into a great wholesale, which in turn owns and operates about 150 factories producing all the necessities of life. Its bank is second to that of the Bank of England. It writes more than half the industrial insurance in that country. It owns its own plantations abroad and has its own steamships in which to transport its merchandise.

SWEDEN SHOWED THE WAY

In Sweden, where the cooperative movement is not more than 40 years old, the same story can be told to an even greater degree. In that country more than 40 percent of the retail business of the country in consumer goods is done by the cooperatives. The great wholesale owned by these retail cooperatives in turn owns mills and factories, and is powerful enough to set the price at which merchandise is sold to the consumer. A most interesting phase of the movement in Sweden is that whenever trusts and combines have set prices very high, the cooperative wholesale has entered the field and forced prices down, on some occasions forcing the trust to relinquish the field entirely. One case in point is that of an international trust which was compelling the consumer public to pay as high as 37 cents for an electric-light bulb. The cooperatives of Sweden, Norway, Finland, and Denmark combined and erected a modern plant of their own. This forced the trust to cut the price to 25 cents a bulb, which the cooperative met and later reduced still lower selling a superior quality bulb to that put out by the trust and at a lower price. Today the price is as low as 20 cents in place of the previous one of 37 cents and the quality is better. Thus does cooperation control prices in the interest of the people and prevent private business from exercising extortion.

The reason for my reference to what is being done in countries abroad is merely to show that where consumers' cooperation has been long in existence, remarkable results have been obtained which make for the common good.

Needless to say that whenever there is an organized, conscious, economic interest it is always reflected politically.

In our country this is well exemplified in the political influence exerted by large business interests.

In England there is the Independent Labor Party reflecting the interests of the common people as manifested in their cooperative enterprises. In Sweden the people's interest are politically reflected by the Social Democratic Party.

Both these political parties naturally favor public ownership of natural sources of wealth, and in many cases public operation of basic industries as a check upon big business which otherwise would function as a monopoly, as big business is doing in a large measure in our own country.

If the peoples of countries abroad can do what they are doing with their limited resources, how much more can we in the United States achieve when we once become conscious of our interests?

The fact has been gathered by the Farm Credit Administration, Consumers' Division, Washington, D. C., that 2,490,000 people in the United States are engaged in cooperative marketing of fruit, dairy products, grain, livestock, cotton and products, wool and mohair, nuts, tobacco, forage crops, and miscellaneous, organized into 8,794 producers' cooperative organizations, carrying on a business for 1935 of $1,343,000,000.

Any such a section of our population engaged as it is in a business which seemingly carries on, depression or no depression, should be duly commented upon and endorsed by forward-looking people. Add to the $1,343,000,000 for cooperative marketing the approximate half billion dollars' worth of business from the consumer cooperatives and the eighty-million-odd of money in credit unions and we get a very notable figure.

It would pay us as citizens, and our representatives in Congress, to know these facts and consider the potential possibilities of cooperation as a way out of present chaos toward the economy of abundance many people are thinking about.

The people of Minnesota are becoming more and more conscious of the fact that we need to produce for all the needs of all the people instead of for private profit, and as a result we are building a powerful consumers' cooperative movement which will ally itself with producers' cooperatives—because the same people are in both organizations—and together function for the common good.

FOUNDATION OF FARMER-LABOR PARTY

It is because of this that we in Minnesota have the Farmer-Labor Party, a party that grows from the soil of our fertile farms, and from the workingmen's homes of our cities and towns, and from the offices where men and women toil in businesses and professions, struggling for an insecure day-to-day livelihood under an economic system that totters because its fate and its future rests on the selfish whim and fancy of a profit-seeking few.

This Farmer-Labor Party of Minnesota is a political party reflecting the economic interests of the common people, who not only are conscious of these interests as distinguished from those who live from unearned increment, but who are steadily and rapidly developing the necessary machinery with which to serve themselves in the economic field.

This is consumers' cooperation, which supplemented with public ownership of natural sources of wealth and natural monopolies will bring permanent prosperity to the plain people who do the world's necessary work.

That this is not visionary is evidenced by the fact that where these principles are applied, as in Sweden, there are only approximately 47,000 unemployed in that country, and this includes those often referred to as unemployable. Could we bring about in our own country, a situation such as exists in Sweden, we should have only 1,000,000 unemployed at the present time, instead of from 12,000,000 to 15,000,000.

Again let me call your attention to the fact that the people of my State—Minnesota—are preponderantly Scandinavian, and they not only possess the same characteristics as their kin in the Old World but are also aware of what is being done in the country of their origin.

These people are applying the principles of democracy to their everyday activities and building an industrial democracy which in turn shall be reflected by a genuine political democracy.

In this day and age, when we are in possession of the knowledge and material means which makes possible an economy of abundance, it is absurd that we should not avail ourselves of the opportunity to achieve lasting and permanent prosperity for all.

Cooperation furnishes the philosophy and the technique for achieving this desirable result and deserves not only our careful and thoughtful consideration but our active support politically, if we really mean what we say when we declare that ours is a Government of, by, and for the people.

ADDRESS BY HON. JAMES A. FARLEY AT NORTH DAKOTA DEMOCRATIC CONVENTION

Mr. BULOW. Mr. President, I ask unanimous consent to have printed in the RECORD the address delivered by Hon. James A. Farley at the Democratic State convention, held at Devils Lake, N. Dak., May 12, 1936.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

This gathering, so far as I am concerned, is more like a homecoming or a reunion than a formal political session. You might say that North Dakota is where the movement that landed Franklin D. Roosevelt in the White House, and, incidentally, the movement that will keep him there through another term, was born.

It was in July 1931 that I came to Aberdeen, just across your southern border, on a scouting trip to ascertain what was the sentiment of the country on the then prospective Democratic nomination for the Presidency. I found that my mission was a welcome one, and the finest thing about it was that a delegation of Democrats from North Dakota came down there to tell me that North Dakota's choice for President was Franklin D. Roosevelt. That report was corroborated at your State convention the following January at which your delegates were selected. The voters of your State gave their approval of your selection at the March primary, which was among the first of the primaries in the United States where the voters instructed their delegates for Franklin D. Roosevelt.

A lot of other States followed suit but you were the pioneers. Though the honor of participation in the event that meant so much to our country was Nation-wide in the election of that year, I have a particular sense of companionship with those who joined early.

It is probably true that the band-wagon jumpers are the ones who decide elections in this country. After all, political battles are determined by the converts. The Democratic Party was the minority party 4 years ago. According to the registration figures of that time, there were more Republicans than people of our political complexion. I have not the exact figures at hand, but it is safe to say that those asserting allegiance to the other party exceeded by millions those who professed themselves as Democrats. Yet we won the election by more than 7,000,000 votes, carrying 42 States out of the 48. We did this because the cause we presented converted millions of Independents and Republicans and Progressives to our way of thinking. I am grateful to this multitude who put country before partisanship; patriotism before politics. I know we must hold them in the coming election, which I tell you now is going to be as complete a triumph for the Roosevelt principles as the elections of 1932 and 1934. I acknowledge gratefully the party's debt to these converts, but yet I am conscious of a little warmer feeling for those, like yourselves, who joined the colors when nobody knew whether the Roosevelt movement would prove only one more vain effort against the regime of privilege, or would turn out to be the overwhelming force it became before the people went to the polls 4 years ago.

Actually, particularly in this part of our country, party labels have become less and less significant. Though North Dakota testified to its intrinsic Democracy by voting for Roosevelt in 1932, its Governor and congressional delegation are still classed as Republican, even though the latter have frequently voted for Democratic measures. So wide is the rift in the opposition party today that a person of almost any political school of philosophy may find some faction that includes him. Senators LA FOLLETTE, and HIRAM JOHNSON, and NORRIS, for example, still figure in the biographical accounts as Republicans though President Roosevelt has no more stanch supporters than they are. It takes time for strong men to change their basic political faiths. Some of your neighboring States have gone the whole way, and after generations of Republicanism are, in name as well as in fact, Democratic. Even here the leaven is working. In 1932 your Republican candidate for United States Senator, GERALD NYE, was elected by a majority of more than 100,000; in 1934 Senator FRAZIER'S majority was less than 50,000. I am not going to attempt to tell you what will happen in regard to your congressional delegation this year, but I am confident that you and all your sister States will be in the Roosevelt column as usual when the votes are counted in November.

You are going to be anything but lonesome in that connection, for every record of registration from the Atlantic to the Pacific and from Canada to the Gulf points to another endorsement of our great President as definite as that of 4 years ago, and 2 years ago, and I have no hesitancy in assuring you that in terms of electoral votes and popular vote 1936 will give the President the greatest endorsement received by any of our Chief Executives since the birth of parties in this country.

The reason for this is not far to seek. Take your own case. You came out for Roosevelt 4 years ago. I ask you, Have you any reason to regret what you did then? Of course you haven't. You voted for him because you had faith in his desire and his ability to correct the ills from which you and all the rest of the country were suffering then. You know that, thanks to him and to the policies inaugurated by him, that faith has been vindicated. I do not think there is any better way of conveying to you the difference between things as they are and things as they were than is afforded by a study of the files of your own newspapers. I will give you a few of the headlines in the Fargo Forum during January of 1933:

"Wheat prices turn weaker."

And here is another one, illustrative of what was going on at that period: "Resistance to foreclosures and debts; farm strikes North Dakota aim."

Now, let's take a 3-year jump to January of 1936, when the same paper cheerfully announces this: "With cash income to farmers from the sale of seven important products up 43 percent in December compared with the previous year, there has been throughout the district a corresponding increase in trade. Milk cows, which have become an extremely important factor on North Dakota farms, are bringing the best returns for several years, with butterfat prices close to the top since the recovery set in."

An editorial at the end of January of this year recites that: "Despite years of adverse conditions in the agricultural territory served by Fargo, the city not only has held its own but actually it has forged ahead as a distributing center." And the editorial further recites that Fargo appears to be well pleased with progress made last year and as to future prospects.

Let's take a look at the Grand Forks Herald. On the eve of President Roosevelt's advent to the White House this paper said editorially: "With spirit undaunted, with hope unquenched, and with the will to achieve strengthened, men are looking forward to the better day whose dawn it is hoped is breaking, but for whose full effulgence we must wait in patience." It was at this same time that this Grand Forks paper carried such mournful headlines as "Farm income drops" over a story which began: "Harnessed with mortgages to a load of debt, America's farmers are mired in a slough of fixed charges."

"Three banks close in Emmons County" is another of the gloomy headlines.

Soup kitchens figured largely in the news of that day.

The note of hopefulness began with the inauguration of President Roosevelt.

"The new President", said the Grand Forks Herald, "cannot be expected to work miracles. He will not create prosperity. If under his guidance means can be found whereby the people themselves may more readily regain prosperity, the utmost will have been accomplished that we have any right to expect. Therefore, with loyalty and tempered judgment, there must go patience in order that there may be given the time which is required for the working out of the best and most wisely conceived plan."

We all know how far the President has exceeded the most sanguine expectations, such as I have quoted. There is no branch of commerce or industry that does not show an improvement that would have been deemed almost miraculous from the viewpoint of the spring of 1933. It is appreciation of that circumstance that is behind the expectation I have voiced of the great triumph that is coming for Roosevelt policies and Democratic principles the next time the people have a chance to tell what they really feel and think at the polls.

You can get the same story out of the newspapers of every State of the Union—the same pessimism and despair 4 years ago, the same rebirth of hope when the new President took office, the same jubilant headlines recording renewed earnings of businesses—agricultural and industrial, as of today.

Well, how did all this come about? What caused a bankrupt people to become solvent in these few years? Why are the prices of corn and wheat, hogs and cattle up to where there is a chance for the farmer to get out of debt, to send his children to school properly clad and decently fed? What put the industrial East back to a position where a business is not a liability, a factory is not a burden, and the ownership of houses and lands is not an economic misery?

Obviously, some of these things could not have been accomplished if the others were not. The restoration of the purchasing power of the farmer made the wheels of the eastern mills turn; the reemployment of the operatives in those mills gave a market for the farmers' produce. Which came back first is as unimportant as that old trick question of whether the hen preceded the egg or the egg started the poultry line.

Both of the great branches of our economic system got to going, and we were saved from industrial chaos and from social chaos.

Again I ask you what did this? Was it that without any calculable cause the farmers suddenly became superefficient, or that businessmen suddenly developed a capacity they lacked when their enterprises were paralyzed? Or was it that there came to be head of your Government a man wise enough to find a method of stopping the spinning downward of all our enterprises, brave enough to make perilous decisions promptly, just enough to be fair among all classes and interests? You know the answer without my putting it into words.

Sad to say, in the course of performing the biggest job that ever confronted an American Executive, some things were done that passed the bounds set by the Supreme Court. I know how mortified a law-abiding people like you must feel that you made your way back to comparative economic safety under an unlawful system. I presume your distress under the circumstances was equal to the chagrin and dismay of the mill workers who found themselves with shorter hours and higher pay under the equally unconstitutional N. R. A.

Because he guessed wrong, according to the Court's ruling, the President is being accused by our political adversaries of usurpation; of assuming powers for himself and for Congress beyond what the Constitution permits. He certainly has much good company among his great predecessors in the Presidency, for there has never

been a great Chief Executive since the beginning of the American Government against whom the same charge was not made. Usurper is one of the mildest terms applied to Washington by his contemporary critics. Jefferson strayed beyond the constitutional limits when he effected the Louisiana Purchase. Andrew Jackson was offside in a variety of instances, and so was Abraham Lincoln with the emancipation proclamation, among other acts.

It must be a source of solace to you, in thinking back on the law-breaking of the A. A. A. days, that your own Senators and Representatives, of whom I know you think highly, voted for this legislation.

To listen to the shocked expressions of the Republican editors and orators, not to mention the spokesmen for the Du Pont Liberty League, is to get a picture of unparalleled alarm for the security of American institutions. Yet, despite the numerous occasions when Presidents have differed from the views of the great judicial body, the Supreme Court remains the highest tribunal of the land, and the balance among the three great divisions of our Government is preserved. Undoubtedly in the future, as in the past, Presidents will at times find themselves at variance with the judicial branch. When they are ruled against they will seek new laws that will meet the Court's objections, just as Franklin D. Roosevelt has done, and the country will rock along as comfortably as ever, notwithstanding the cries of alarm from the prophets of disaster.

The people of this country are going to reelect Franklin D. Roosevelt because of what he has done for the national welfare. The campaign to break down his fellow citizens' faith in him has been in progress for a long time—in fact from the time those who have always fattened on special privilege found that the aid they begged for when they were in a panic at their crumbling fortunes had put them on their feet again. Once more making money, they began to hunt about for some means of keeping the ordinary citizen from getting a share in the good things of life, in order that they might have all of the advantage and none of the cost of the general restoration.

It being impossible for them to question the matter-of-fact market reports that tell the story of our economic improvement, they are reduced to denying that it was the acts of the Roosevelt administration that brought this about. They do not attempt to tell what else did it. The nearest thing to such an explanation is the statement of the chief exponent of things as they were. Ex-President Herbert Hoover did confide to a wondering audience that he had the depression stayed nearly a year before he ceased to be President. Those of us who remember the days of crashing banks, of mercantile failures, of falling markets, and of the general gloom and apprehension that prevailed from June of 1932 until the advent of Roosevelt to the White House, can only be amused by his predecessor's weird hypothesis.

Now, let us analyze, a little bit, the charges brought against the administration by those who seek to replace it. It is not important, for the result of November's election is a foregone conclusion, but just for the sake of the record it might be well to note the flimsy course to which political necessity has driven the President's foes.

They say he is extravagant, wasteful of the public's money, careless of the principles of Government economy. If the President of the United States stood behind a counter, handing out relief checks, after personally investigating every one of the millions who applied for help, he might be sure that such of these was honestly destitute and deserving. Under such conditions perhaps no small soul would have received $2.77 worth of groceries for nothing when he could have paid for his food.

Perhaps if the President of the United States had been able to officiate as straw boss on a million petty jobs he might have been able to make it certain that no shirker had succeeded in obtaining a meager relief wage without performing a full day's pay. So much for the charge of recklessness in distributing the relief funds.

They talk of politics in the administration of the emergency agencies. Has anybody who is listening to this speech ever heard of a man or woman being asked whether he or she is a Democrat or a Republican before getting the dole or the emergency job? Thousands of men and women have been entrusted with minor parts in creating the machinery for handling the various forms of aid. No doubt some of them, with an excess of party zeal, have transcended the strict rules laid down by the President in this regard. I ask you if you have seen anything of moment along this line in North Dakota.

About all that is left of the indictment is that some of the projects that engage the attention of the Works Progress Administration are not calculated to show visible results, as the building of a bridge, the erection of a dam, or the laying down of a road shows it. I do not have to tell you that many of our people in normal times have as their activities work of a nonproductive material nature. There are thousands of girl stenographers, manicure operators, there are artists, musicians, and actors. It would be hardly practical, would it, to set these to driving trucks or digging post holes?

The unemployed among these have either to be given the sort of work they know how to do or be dumped on the dole. Which process do you think is most likely to produce a favorable effect on the morale of these people? That is about all there is to this clamor of boondoggling.

We come down to the most absurd charge of all—that the President is an enemy to business. How much business would there be left in this country if he had let things drift as they drifted during the previous administration? Who but the President has builded up so patiently the purchasing power of the masses that is the groundwork for such progress as has been made?

If he had not made business his particular care, would the headlines of your newspapers show, for example, that the automobile companies had sold nearly 16,000 automobiles in your State in 1935, as against fewer than 5,000 in 1932?

North Dakota shows $5,000,000 more in savings-bank deposits than she had in 1933. What is more significant is that the individual income-tax reports show incomes more than doubled in the same period. That is how your State has fared during the recovery era.

Now let us look briefly to what the Administration has done for North Dakota. Your farmers got more than $30,000,000 in rental and benefit payments.

What you have gained in material advantages through forest-fire protection, improvement of the woods and range country, precautions against soil erosion, game and fish conservation and other work mainly done through the C. C. C. camps cannot be estimated in dollars and cents. The value to the 2,200 young men who through these camps have been saved from the perils, moral, mental, and physical, that would have beset them had they been subjected to the strain of idleness, vagrancy, and irresponsibility, is beyond price.

In addition $170,000,000 has been loaned to your farmers and $9,000,000 to your home owners. This will be repaid, of course, but think of the number of farms and homes that have been saved from mortgage foreclosures by this extension of Government credit when no other credit was available.

As in every other State, your banks have been made secure, where prior to the advent of the Roosevelt administration they were either closed or tottering. Is it any wonder that I am able to prophesy an overwhelming vote next November for the President, who has so ably fulfilled the purpose of government which must be the welfare of the people?

I address a Democratic convention, but the message is to men and women of all parties; and when I tell you that their response will be greater than it was when they elected him, and when they certified their appreciation of his efforts in the congressional elections 2 years later, I am neither exaggerating nor expressing a mere political hope. No; I am speaking out of a fairly intimate knowledge of public sentiment, gathered during journeys that have covered practically every State in the Union.

The people know that the work of recovery is only half done; they are aware that no small part of the task undertaken by Franklin D. Roosevelt is to make certain that another such economic calamity as befell us shall not recur. That is why they will brook no interruption to the processes that have worked so well, but will insist that the President shall have the opportunity, with their enthusiastic support, to complete his job.

THE BANKING SYSTEM—ADDRESS BY A. P. GIANNINI

Mr. POPE. Mr. President, I ask permission to have printed in the RECORD a radio address on the subject of the banking system, delivered by Mr. A. P. Giannini, of California, Friday, May 1, 1936.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

Ladies and gentlemen, I have always been proud to be a banker. Today, however, I am prouder than ever to be a banker. The reason is not far to seek. My bank, to which Secretary Wallace has so kindly referred, has 1,600,000 depositors. Most of these depositors are average men and women—farmers, working people, housewives, clerks, professional men. Like most bankers, my great concern has always been to maintain the safety of the deposits of these people.

In the past, that has sometimes been difficult. Today, however, the depositor in my bank—the depositor in any bank—is safer than he has ever been in all our banking history. Due to the legislation of the last 3½ years, our banks are now in a better position than at any time in the past to justify the confidence of the average men and women who entrust their earnings to them. That is why I am prouder than ever to be a banker.

Most of you listening to me tonight are bank depositors. You have a stake in this question of security. I want, therefore, to talk for a few minutes with you about the recent steps which have been undertaken for your safety and protection.

First of all, let us look at this question from the point of view of the bank.

The chief commodity a bank has to sell is credit, and its ability to supply the market is not limited to the capital, surplus, and undivided profits which belong to the stockholders. Successful banking requires that the banks be able to draw as well upon the vast store of money made available to them by depositors. It is elementary, then, that there must be general confidence in the ability of the banks to repay the moneys deposited, and this confidence can only come from sound operations, involving sound credits and the most ample protection which can be furnished to the banks' customers.

When the banking system was put to the test at the height of the depression, it was found that this confidence had vanished

because the basis for its continuance no longer existed. This is best illustrated by the fact that after many months of persistent effort to allay the fears of bank depositors and patrons, and after actively campaigning to induce depositors to leave their money in banks, the deposits shrunk by billions. At the end, banks, in unprecedented numbers, were forced to close.

Depositors and stockholders, too, by the hundreds of thousands, know only too well that there was real basis for the fears which brought this condition about. The securities in which bank funds were invested were being constantly dumped on a falling market to provide funds which were being demanded by depositors. In this process their values declined to the point where bank capital was greatly depleted. If confidence was to be restored, heroic measures were called for.

President Roosevelt immediately grasped the situation and under his leadership two vital steps were taken, to be followed later by others tending in the same direction, to restore confidence, make banking operations safer, and give absolute assurance to depositors. The first step was to prosecute a vigorous program through the Reconstruction Finance Corporation to take up the slack in bank capital. In my opinion, it is misleading, if not foolish, to charge that this program was based upon a desire to put the Government into the banking business. If the capital necessary to enable the banks to function safely was to be supplied at that time, it was absolutely essential that the Government credit be used for the purpose of supplying the funds. Private funds were not available in sufficient amounts and to the extent that they were available they could be invested in bank capital as readily as at any other time. So, through the Reconstruction Finance Corporation, the Government actually invested over $1,000,000,000 of public funds in more than 6,000 banks throughout the country. Time has demonstrated that this was a wise and constructive measure. It is now quite apparent, also, thanks to the recovery we have had, that the investment was a sound one and will ultimately be repaid.

But President Roosevelt was not content merely to take steps for the protection of the capital structure of the banks. He went further and outlined a program for the direct protection of the small depositor. This program came into actual practice through the establishment of the insurance of bank deposits through the Federal Deposit Insurance Corporation. This Corporation, with over $300,000,000 of assets, supplied by the Government, by the Federal Reserve banks and by the 14,000 insured banks, gives to the depositors in all insured banks the absolute assurance that their deposits up to $5,000 will be promptly repaid in the event of the failure of a bank. Through the Federal Deposit Insurance Corporation over 98 percent of all the depositors in insured banks are fully protected. It may be properly added here that under the permanent Federal Deposit Insurance Law, the insured banks are paying into the reserve funds of that corporation about $35,000,000 a year. That means that in the course of a few years, a further reserve created by the banks themselves should be adequate to give absolute assurance to every bank depositor without the necessity of continuing assessments.

As I see the matter, no sound reason can be assigned why the Federal Deposit Insurance Corporation cannot become, if indeed it is not already, a great stabilizing influence in the banking world, as well as an adequate insurer against all loss to depositors.

Future generations, in surveying the experience of the past and viewing the ruinous effects of lost bank deposits, may well wonder that the apparently wanton disregard of the safety of bank deposits so long persisted. It is a definite responsibility upon every government chartering a financial institution to require it to be so conducted that it will be able to meet its obligations. That responsibility is one that should be discharged at all times with honor and without loss to the patrons of the banks. It is no hardship on banks to be compelled to make moderate contributions to a general reserve fund which will insure this result.

If time permitted, it would be worth our while to consider features of the Banking Act and other laws which are designed to give further protection to the general public, as well as to the banks themselves. All of these measures are designed to the end that there never may be a repetition of the catastrophe from which we have lately emerged. There are provisions which promise to keep at all times a safe margin of capital back of all of the obligations of every financial institution. There are other provisions which will bring to a halt unsafe and unsound practices in any institution without hampering legitimate operations.

I have in mind particularly such provisions as those which prohibit the loan of a bank's funds to its own executive officers and provisions authorizing the fixing of margin requirements where the bank's credit is used to finance purchases and sales of securities on exchanges. Such provisions protect the interests of depositors and stockholders alike and have been found to be necessary to prevent abuses.

The Banking Act also divorces investment and commercial banking. Another law creates the Securities and Exchange Commission, the function of which is to protect the investor in buying securities. Through the information which must be furnished before securities can be listed on exchanges, investors are in a better position than ever before to protect themselves. This service is as valuable to banks as to individuals. Certain power is now clearly given to the Board of Governors of the Federal Reserve System and to the Securities and Exchange Commission. This power exercised in the public interest ought to go far to prevent a recurrence of the disasters that we have experienced periodically in the past.

We have about us today abundant evidence that banks and their clients are enjoying the benefits that flow from the principles and policies represented in banking legislation and administration of the past 3 years. The report of the Comptroller of the Currency, recently issued, shows that deposits in national banks are at the highest point in the entire history of the national banking system. It also shows that national banks which had been operating at an annual loss since 1931 of from two hundred to three hundred millions were operated at a substantial profit in 1935. It also shows that there have been only five national banks closed in the 2 years and 4 months since deposit insurance was inaugurated, and that there have been no national banks closed so far in 1936.

Surely no one will deny that the major features of policy, to which reference has been made, are truly constructive and that our financial structure rests upon a sounder foundation than at any period within our memory. There is more adequate protection for the public, less hazard to the stockholder, and a brighter prospect of success and prosperity in all lines than we have seen for many years.

That, again, is why I am proud to be a banker. I can face the future with greater confidence because I know that the interests of the depositor are more adequately safeguarded.

A STUDENT PLEA FOR WAR—ADDRESS BY BASCOM TALLEY

Mr. CLARK. Mr. President, recently a meeting was held by the students of Tulane University, New Orleans, to protest against further war. On that occasion one student, Bascom Talley by name, appeared and made a very striking and impressive speech on behalf of war and in defense of war. This is one of the most striking documents which has recently come to my observation and perhaps the most intelligent argument that could be made for the huge naval and military appropriation bills recently passed by the Congress. I ask unanimous consent that an article from the New Orleans Item Tribune, containing Mr. Talley's speech, may be inserted in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New Orleans Item Tribune]

A STUDENT PLEA FOR WAR AT A MEETING TO PROTEST IT

When Tulane students recently met to protest against any more wars, one of them rose to defend conflict. This was Bascom Talley, a derby hat on his head, and a cigar jutting defiantly from his teeth. He read his speech. It follows:

"You are here this morning to participate in a demonstration against war. Yes, against war. Have you stopped to think what you are doing? You are protesting and demonstrating against the only sure-profit industry in the United States today. You ask me how is the wad to be classed as an industry? Well, there is no doubt that war in any and every sense has many industrial connections. My corporation is a good and glaring example of the industrial connections of war.

Some radically inclined people would have you believe that we, the people Pu Dont, are interested in the promotion of wars solely for personal profit. They are wrong. Our interest is not purely personal, we also have the interests of the stockholders at heart—we also have the interests of our employees at heart—we have the interests of the Nation at heart—and after that, we have the interests of the nations at heart. We, the people Pu Dont, sincerely believe that with the proper amount of cooperation from the Government and the people at large, we can bring this country back to its rightful place as the boom country of the world. What does it matter that the boom is transitory, what we want is a boom, boom, boom.

Some may be doubtful when we say that we the Pu Donts can restore boom conditions in this country. They evidently are not familiar with the powers of our public relations counsel or our Hearst Randolph William. With the increase in demand for armaments, we can double, treble, quadruple or Dionne the number of men we employ. This will in part relieve the employment situation. Then, too, you must consider the number of men that will be employed, or shall I say occupied in the fighting of the war. They too, will be taken from the rolls of the unemployed. True, some might prefer a job in our tremendous factories to going to a war. Of course jobs with us would be more enjoyable and safer from the point of view of life and death, but we must be unselfish and remember that everybody can't have the cream. So if you don't want to go to war, study to be an armament expert.

Then there are those that criticize us for our seemingly heartless attitude toward the great death toll that is synonymous to war. We really could disregard this argument, but for the benefit of those who would like our point of view, let me say that while losses of men is a loss in some senses of the word, we the Pu Donts don't believe that it is best to be continually looking at the losses.

We think that those remaining after a war should look at the profits—they can be measured in dollars and cents, while the

death list can only be measured in the number of coffins or shall I say holes in the ground and empty places at the table. In most cases the empty places at the table mean more food for those who are left, and that is a real benefit.

Of course, some may say that the men that are killed may be the breadwinners. That's perfectly true, but we offer an adequate insurance to offset that difficulty should it arise. We recommend the purchase of our stock. Win, lose, or draw, you are assured of returns from our stock, because we have international connections, and are certain that if one country loses the other will win, and we'll get our profits just the same, and better yet, if it's a sort of a draw, both sides will pay, thereby increasing our dividends still more.

War builds character. You may wonder how we reach that conclusion—so did I until one of the Pu Dont public relations agents brought forth this brain child of logic. By character we will mean an increased patriotism; that is, a greater desire to fight for one's country. Should the circumstances arise in which a war could be promoted, many men who never thought in terms of duty to their country would be entangled in the war, and many others would volunteer of their own accord.

Of course, we realize that most men have to be worked up emotionally to the state where they will volunteer. Always willing to cooperate, we the Pu Donts hereby pledge our untiring support to the most effective system of propaganda that can be devised for the raising of patriotism.

Up to this time I have been talking mainly in terms of our own Nation, but there's one point that's more effective yet in regard to our plan to restore America as a boom country.

Think of the profits to be derived from stirring up a juicy European war. In this undertaking the so-called socially minded objectors to war should have no objection, because we're not hurting them, and they should not meddle in European business. Of course, we're meddling in it ourselves just a little bit, but that is for a good cause, the restoration of the United States to its rightful place as the foremost boom country of the world.

Then, too, to give further consideration to these objectors to war that say it is a scourge to humanity, and benefits none. We of the Pu Donts corporations maintain that they have forgotten to think about those poor and otherwise useless people who are sent straight to their heavenly destinations without being further subjected to the vicissitudes, trials, and tribulations of this world.

Then, in conclusion, I would like to summarize for the benefit of those who doubt that war is a profit-making industry, just a few of the stable, peaceful products that can be readily converted into weapons of war. Cotton, I presume, is used to make guncotton; if not that, I'm sure that cotton rags can be used to wipe Pu Dont oil from Pu Dont guns that are made from Pu Dont steel.

Also there has been recently developed from corn a new explosive that is allegedly more powerful than nitroglycerine, but of course, our laboratories cannot give full information to the general public at this time, because several governments are bidding for it and we must give it to the highest bidder. We do not think that anyone should object to our policy of selling our discoveries to the highest bidding government, because, after all, we have to think of our profits. Then, too, wheat, along with being excellent for the manufacture of Wheatics, Puffed Wheat, Shredded Wheat, and other articles of common consumption, has provided us with a certain ingredient that is very valuable for the manufacture of powder.

Need I say more—if we have the only sure profit industry, and can guarantee returns to our stockholders, why demonstrate against war, the greatest good to humanity?

Let us, the Pu Donts, restore the United States to its rightful position as the foremost boom country of the world—boom, boom. * * *

SUPREME COURT DECISION OF COAL CONSERVATION ACT

Mr. GUFFEY. Mr. President, I ask unanimous consent to have inserted in the RECORD an editorial from the Philadelphia Record of May 19, 1936, entitled "Chaos Is Constitutional."

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Philadelphia Record of May 19, 1936]

CHAOS IS CONSTITUTIONAL

The Supreme Court yesterday took the Constitution and twisted it until it yelled "Ouch!"

Then the Court solemnly announced that the Guffey Coal Act was "clearly" and "indisputably" unconstitutional—

Even though it took the six majority Justices 68 days, a record time, to discover what they now say is "so clear" and "so indisputable"—

Even though three of the nine Justices—Brandeis, Stone, and Cardozo—not only don't think the majority decision is "clear" or "indisputable" but disagree with it completely—

Even though Justice Hughes also disagreed with some of the majority contentions and wrote a separate opinion reaching their conclusion by another route.

The Guffey Coal Act was drafted to eliminate chaos in the soft-coal industry. Just as A. A. A. was drafted to eliminate chaos in agriculture, and N. R. A. was designed to end chaos in business generally.

Now the Guffey Act goes the way of A. A. A. and N. R. A.

Chaos is constitutional.

In effect, that is what Justice Cardozo declares in his brilliant dissenting opinion. He writes:

"Commerce had been choked and burdened; its normal flow had been diverted from one State to another; there had been bankruptcy and waste and ruin alike for capital and for labor. The liberty protected by the fifth amendment does not include the right to persist in this anarchic riot.

"Stabilizing prices would go a long way toward stabilizing labor relations by giving the producers capacity to pay a living wage. To hold otherwise is to ignore the whole history of mining. All in vain have official committees inquired and reported in thousands of printed pages if this lesson has been lost.

"Indeed, the prevailing opinion goes so far, it seems, as to insist that if the least provision of the statute in any of the three chapters is to be set aside as void, the whole statute must go down, for the reason that everything from end to end is to be swallowed at a single draught, without power in the Commission or even in the Court to abate a jot or tittle."

Chaos was constitutional in the three disastrous years of Hoover, in the years when banks were falling like leaves in winter; when 15 millions were jobless and in bread lines; when business and the country both were bankrupt.

But the moment a President and a Congress seek to do something constructive; the moment Americans start to build—then the court steps in to say that the people of this country shall build only what the court is willing for them to build.

The Guffey Act has been recognized as a national necessity by the majority of the mine operators, by labor, by Congress, and by the President.

It is even recognized as a necessity by three of the nine members of the Supreme Court.

Yet six men disagree; six men say "nay"—and this needful, constructive law is tossed into the wastebasket, the welfare of mine operators and mine workers is ignored.

Destruction may proceed unhampered. Construction must run the blockade of the gods in black.

If the unconstitutionality of the Guffey Act is obvious and "indisputable", why did it take the court so long to discover the fact?

Why? Because the unconstitutionality of the Guffey Act is neither obvious nor indisputable. There is nothing in the Constitution about coal. There is nothing in the Constitution against regulation of business in the interests of the Nation. To the contrary, the whole Constitution is dedicated to the public welfare.

Moreover, the Constitution specifically gives Congress power to regulate interstate commerce. And if regulation of the coal industry does not constitute regulation of interstate commerce—then it would seem that words do not mean what they say.

And that's just it. To a majority of the men in black, words do not mean what they say.

In order to justify their own personal desires, to invalidate the Guffey Act, the Justices were obliged to resort to a far-fetched concept. They were forced to draw a fine distinction.

This fine distinction, as outlined by Mr. Justice Sutherland, holds that even though coal may be chiefly distributed in interstate commerce, it is not in interstate commerce until it has actually started moving from the mine.

In other words, interstate commerce is stripped of its ordinary, common-sense meaning, and given a very specialized, restricted definition. As the Court puts it, until the coal begins moving, it is at rest—and, therefore, not in interstate commerce. Ergo, the Government cannot regulate the coal industry.

Only a legal mind could rely upon such a preposterous argument. And only the most reactionary of legal minds could accept it with a straight face. It is an argument which equals in absurdity the Court's contention in the A. A. A. decision that agriculture is a local problem.

Without regard to the merits of the Guffey Act, its desirability or its constitutional implications, we cannot but feel that the Alice in Wonderlandish reasoning of Justice Sutherland in this decision drags the high Court lower than ever in public confidence and esteem.

This Supreme Court decision performs at least one service, even though it impedes our economic progress.

That service is in showing the people that the Constitution is not only what the judges say it is, but that the majority of the judges stand ready to twist, stretch, and mutilate the Constitution in order to satisfy their own prejudices and freeze those prejudices into law.

Let lawyers, students, thinking citizens everywhere get out their copies of the Constitution. Let them read carefully, earnestly. Let them scan every provision.

And then let them try to imagine that the founding fathers intended the Supreme Court to be the monarch of America.

Let them try to find anything, in plain words, which would justify the men in black in standing, with upraised hands, in the path of American progress.

Let them find anything in that great document which says that chaos is constitutional.

IN AND OUT—ARTICLE BY GEORGE N. PEEK

Mr. DICKINSON. Mr. President, I ask unanimous consent to have printed in the RECORD an article by Mr. George N. Peek, entitled "In and Out", as published in the Saturday Evening Post of last week.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Saturday Evening Post, Philadelphia, Pa., May 16, 1936]

IN AND OUT—THE EXPERIENCES OF THE FIRST A. A. A. ADMINISTRATOR

By George N. Peek, with Samuel Crowther

I went into the Roosevelt administration because I saw a chance to do something for agriculture and, through agriculture, for the Nation. I got out when I saw that I had no chance there to do anything either for agriculture or for the Nation. I am in politics for agriculture—not in agriculture for politics.

The administration has committed itself, by a distortion of the lately deceased Agricultural Adjustment Act, to a policy of socialized farming. It has committed itself, by a distortion of the Reciprocal Trade Agreements Act, to a low-tariff policy which has all the worst features of that free trade which the Nation has always turned down at the polls.

Both these policies are destructive. They can add nothing at all to the wealth and prosperity of the United States. They can only subtract from what we have, shift jobs from American to foreign workers, and transfer to foreign nations the control of what we have left. Exactly that has been happening. The facts are very clear. I shall present them without prejudice or passion.

The facts as exhibited by the official records mean little to many in this administration. The major policies of agriculture and foreign trade are in charge of men who have never earned their livings in industry, commerce, finance, or farming, and who have little comprehension as to how such livings are earned. Presenting facts to them is a sheer waste of time. They are long on theories but short on simple arithmetic. They are full of very big thoughts. These thoughts are so big that the United States is not a large enough field for them to operate in.

They would remake the United States as an incident to remaking the world. For instance, one highly placed official, at a time when crop surpluses were bothering us, came forward with an elaborate scheme for a world corporation which would pool all surpluses everywhere and distribute them to the poor of the world. He actually succeeded in calling a conference of departmental officials to consider his scheme. Another bright young man, who prided himself on the breadth of his views, was going to solve everything by having the United States forcibly guarantee the peace of the world. No one will ever know how many fantastic schemes were in the air. Many of them crossed the border line of sanity, but anyone who attempted to apply elementary common sense was denounced as an obstructionist. It was heresy to assert that two plus two had to equal four.

I had left the Republican Party to support Alfred E. Smith in 1928 because he promised to put into effect the farm program which I had been working on as far back as 1922. I worked for the election of Franklin D. Roosevelt because he seemed to comprehend the farm situation and promised to try to solve it along the lines a group of us had been steadily advocating. I entered what I thought was a Democratic administration, not because it was Democratic but because it was pledged to a certain course of action. I eventually found that I was not in a Democratic administration but in a curious collection of Socialists and internationalists who were neither Republicans nor Democrats.

They, fanaticlike, believed that their objectives transcended the objectives of ordinary human beings, and therefore they could not allow themselves to be hampered by platform pledges or by the Constitution.

There were two broad general groups—the Socialists and the internationalists. The Socialists, or, more strictly, the collectivists, seemed—for nothing was in the open—to be headed by Felix Frankfurter, Rexford G. Tugwell, and Jerome Frank. They gained the mind of the Secretary of Agriculture and had a good deal of sway throughout the Department. The internationalists ruled the State Department and were headed by Secretary Hull and Assistant Secretary Sayre. Those within the groups had many divergent aims. Secretary Wallace, who has an elastic mind capable of any stretching, alone managed to be in both groups.

ENTERING THE ADMINISTRATION

The outstanding and only common characteristic of both groups is their willingness to make the interests of our country and its people subservient to the practice of their theories and to substitute personal government centralized in Washington for our traditional State and local governments. The tactics pursued were unpleasantly reminiscent of those followed in the setting up of totalitarian governments in Russia, Italy, and Germany. Both groups have blind spots where the interests of the United States are concerned.

These are serious charges and I do not make them lightly. I intend to prove each point. But first I want to make my relations with the administration very clear. I entered the administration on my own terms. I did not want a job or political preferment of any kind. My salary as Administrator of the Agricultural Adjustment Act I turned over to private counsel whom I retained to advise me independently of the A. A. A. counsel—in whom I had no confidence.

The Agricultural Adjustment Act was a hodgepodge of conflicting notions compromised into a bill which had to be passed in order to get action. In supporting the act, I thought that it would be used for constructive purposes, and I did not have the slightest idea that in its administration it would become principally an instrument to regiment the farmer through acreage control. I had not the slightest idea that it would not be used for the purposes which through the years we had discussed—to open our foreign markets, to sell our surpluses, to improve distribution at home and to pay proper benefits independently of acreage control. I thought that before taking office I had made my views abundantly clear. I have no doubt now but that I did. But others had other views, and they were willing to wait until they could make them prevail.

Through all my life I have been steadfastly against the promotion of planned scarcity. On this point Secretary Wallace and I disagreed sharply while the bill was in the making. That I shall take up in detail in a later section.

A. A. A. PRELIMINARIES

The point of importance now is my understanding with the President as a condition precedent to taking office. Here are some entries from my diary for April 5, 1933—the Agricultural Adjustment Act was passed on May 12.

I talked with Wallace. I told him I was going up to the Hill for a while (meaning Senator SMITH'S office) to review my testimony. Upon arrival at Senator SMITH'S office a messenger from the Secretary's office came for me and said the Secretary wanted me to come to the Department right away, which I did. He said the President wanted us to come to the White House at 4:15, and asked what my answer would be to the President. I told him that depended upon the President's decision as to policy, which I would discuss in our interview. We spent 20 minutes with the President, who asked me if I would take the administration of the farm bill. I said that I regarded the problem as more industrial than agricultural, and that B. M. (Bernard M. Baruch) was the best man in the country for the job. He said he had talked with Baruch and that he could not take it but had strongly recommended me. I said that I came down here at Wallace's request and had tendered my services to be helpful, but that I could not take the job without a lot of things being understood, because I felt that he (the President) alone must outline the policy, as, in my opinion, the success or failure of his whole administration and the recovery of the country depended upon the successful administration of this act; that all that he had done about the banks and other things would be of no avail if this failed. I said that—

First, the form of the bill itself as it came through the Senate must be considered in connection with its administration.

Second, that his policy toward it must be known.

Third, that responsibility must rest with the Secretary and the Administrator, who jointly must have direct access to him, with no one else permitted to run circles around them to him.

Fourth, my five-point program represented my views. I left it with him. He congratulated me upon getting them all upon one page.

Here are the main features of the "five points" I left with the President:

1. Situation to be corrected.

The policy of attempting to expand industrial exports, regardless of the effect upon agriculture, is a demonstrated failure. It has been attempted by previous administrations, supported by leaders in business and finance, and by Government itself, but the plan collapsed when we could no longer continue to lend money to other nations to enable them to buy our wares. * * *

2. American-owned foreign plants.

Many of our processors have foreign plants which to a considerable extent take care of their trade outside of the United States. Our aim should be to ship products of the farm in manufactured form from plants within the United States to increase employment and stimulate activity at home. * * *

3. Centralized control or supervision of exports and imports.

Such control is suggested in order to benefit industries, localities, and labor within the United States. * * *

4. Competition for the consumer's dollar.

This competition exists generally in all industries, but I refer to the food industries in particular. Price cutting and other trade practices due to such competition are among the primary causes of the present depression as well as of the disparity in prices between farm commodities. Large-volume business is sought with the result of ruinously low prices to the farmer and at the expense of net profits even to the processor and distributing agencies. * * *

5. Policies regarding domestic against international trade.

We cannot follow both at the same time. My view is that we should favor the former and adjust our tariffs and perhaps the foreign debts by reciprocal agreements to encourage in the national interest, exports of farm products, preferably in manufactured form, in exchange for noncompeting farm products and selected industrial products. * * *

We told him (the President) that Lowden (Gov. Frank Lowden) would be here Friday, and he asked that we get Baruch to come too, that we should get together for a general discussion. The President referred to Raskob's change of heart between the 1928 convention and the 1928 campaign, and said that R. had first been opposed to the farm plank and later agreed with it to show how reasonable it appeared when explained.

The President asked me again if I would administer the bill, and I said that my views were in conflict with those of the Secretary and that a general understanding was necessary. Wallace confirmed my statement of the difference in views. The interview ended, to be renewed Friday.

Continuing the diary:

(Apr. 7, 1933—Friday). Lowden, B. M. B., and I went to the White House at 3:30 for a conference with the President. We spent nearly an hour there. The President said he had read my five-point memorandum and was quite in accord with it. He and I disagreed on the question of restricted production as a national policy. He said that it was likely the international wheat situation would be discussed at international conference on April 21. B. M. B. went over his objections to the bill and the President agreed to send for him before the bill went to conference, after it passed Senate. I argued strongly for one hundred million appropriation. Treasury to be reimbursed by tariff duties on agricultural imports, especially fats, oils, and blackstrap molasses. Governor Lowden supported me in this view, and the President said he would not object. I argued the injustice of asking processors to pay the expenses of a retreat from our traditional land policy. I felt processors should be compelled to pay the farmers fair prices, and if they would not do it, I favored taxing them and paying the farmers a benefit payment to insure parity prices on the domestically consumed portion of the crop. I felt that it was not fair to ask them to pay for the retirement of acreage. It is clear that further understanding is necessary, including freedom of action in selecting assistants.

The conference was of far-reaching importance, as both Bernard M. Baruch and Governor Lowden agreed to be of any help they could in an advisory way. * * *

(Apr. 22, 1933—Saturday.) By request went to see Secretary Wallace yesterday evening. Did not discuss details of administration of bill. Urged him to get comprehensive data on all exports and imports with each country for the purpose of determining expansion of agricultural exports. The Secretary expressed himself as of the opinion that we should go on through with the deflation now, adjusting supply to demand, and has not given up his idea of taking acreage out of production, although Earl Smith and Gregory shocked him considerably in a talk they had with him earlier in the day about the bad effect of his bureaucratic tendencies. Smith (Earl C. Smith, president, Illinois Agricultural Association) and Gregory (C. V. Gregory, editor, Prairie Farmer) asked me if Ezekiel (Mordecai Ezekiel, a bureau economist), and who else, was responsible.

(Apr. 26, 1933—Wednesday.) Suggested to Wallace yesterday the possibility of disaster if commodity prices were to rise sharply while unemployment continued, wages were reduced, and people continued to be laid off. Urged that some general industrial and municipal activities be encouraged. He asked me to see Ickes. Wallace said later that a committee had been appointed by the President of three men—Ickes, Wallace, and Dern.

(May 3, 1933—8:30 p. m.) F. D. R. at White House; Wallace, Tugwell, Wilson, Appleby, H. Cummings, Roper, Perkins, Woodin, (Assistant) W. Cummings, Farley, (Assistant) Moley, (Director of the Budget) Douglas, Morgenthau, other assistant Secretaries and attachés.

Very spirited debate over policy and organization. President finally settled matter of organization by marking Department chart.

After adjourning meeting about midnight he detained Wallace and me to decide matters of organization. This chart suggested an administrative organization as follows: The Secretary and the Administrator, and Divisions of Processing and Marketing, Finance, Information and Publicity, and Production; the six heads to form an administrative council. The office manager, general counsel, statistical division, and the world trade representative were to report to the Administrator as staff assistants. Wallace said he would like to have Rex a member of the council; the President said "no."

On May 15, 1933, upon taking office as the Administrator of the Agricultural Adjustment Act, I issued a statement which said in part:

"In the first place the sole aim and object of this act is to raise farm prices. Generally speaking, it is to raise them to a point where farm products will purchase as much of industrial products as they did before the war and to keep farm prices at that level. This is just what farmers through their organizations have been demanding for a dozen years.

"To agriculture it should be said that the purpose is not to do something for the farmers. It is to enable farmers to do something for themselves that they have been prevented from doing through many long, painful, and distressing years * * *."

With Charles J. Brand as coadministrator an organization for the administration of the A. A. A. was put together. He had organized the Bureau of Markets of the Department of Agriculture, and was thoroughly familiar with Government procedure—which I was not. He was then engaged in private industry. Mr. Brand was a most able and loyal associate.

We got the best men we could and as quickly as we could.

Generally we were fortunate in our own selections. But everything was in confusion, and we found ourselves saddled with many more whom we did not choose and did not want.

A plague of young lawyers settled on Washington. They all claimed to be friends of somebody or other, and mostly of Felix Frankfurter and Jerome Frank. They floated airily into offices, took desks, asked for papers, and found no end of things to be busy about. I never found out why they came, what they did, or why they left. Perhaps all of them expected to be hired and perhaps some of them were hired. I only know that in the legal division were formed the plans which eventually turned the A. A. A. from a device to aid the farmers into a device to introduce the collectivist system of agriculture into this country.

Jerome Frank was a lawyer who had practiced in Chicago and New York City, and had come to Washington, so he told me, at the request of Felix Frankfurter. Dr. Tugwell brought him to Agriculture.

I found that I knew Mr. Frank. I had met him at a time when he was counsel for a group of banks. He told me that he had more recently been with Thomas L. Chadbourne's firm in New York.

PROPHETS OF THE NEW ORDER

Mr. Frank was a good lawyer, but, as I later discovered, he was more concerned with social theory than with law, and he was so certain of his cleverness that he thought he could frame new laws or interpret old laws in such a manner as to carry out the theories he held. Practically all the young lawyers who swarmed into Washington dangling Phi Beta Kappa keys were enveloped in the delusion that they carried with them the tablets containing a new dispensation. They were going to inform the established lawyers and the Supreme Court what the law really was. Mr. Frank was slated to be solicitor for the Department of Agriculture. Mr. Farley killed that projected appointment.

Shortly after I accepted the position of Administrator and Brand had agreed to act as coadministrator, we went to the White House with Secretary Wallace to discuss procedure with the President and to arrive at a starting point. During the conversation I objected to Jerome Frank acting as general counsel for A. A. A. I advanced, among other reasons, the thought that he had had no experience with farm organizations and farmers, that he had been a city lawyer, and that his personality was such as not to inspire the confidence of the farm leaders.

In all of this Brand concurred. After discussing the subject for a few minutes, the President agreed with our point of view and told Wallace in our presence that he had better get rid of Frank by having him transferred to some other department, and suggested Justice. Upon our return to the office Wallace sent for Brand and me, and when we arrived at his office we found Frank there. Wallace said he had told him what the President had said, and we thought that the matter was settled. The next morning Wallace sent for me again. He was in great distress and appealed to me to retain Frank in the face of what the President had said.

Against my better judgment I yielded. As a precaution I retained Frederic P. Lee as private counsel.

We shortly discovered that Mr. Frank and his department were more concerned with matters of policy than with questions of law. They appeared to be proponents of the puppet system of Government and very anxious to extend Government control as a prelude to Government ownership. Contracts and arrangements which did not have Mr. Frank's approval for social rather than legal reasons seemed, no matter what their urgency, to get pigeonholed in his department. He always claimed that he did not have enough assistants to put things through promptly, although for a while he succeeded in getting over a hundred lawyers on his staff.

On September 30, 1933, Mr. Brand resigned. In December an article appeared in a New York newspaper to the effect that there was a split in the A. A. A. between the radicals headed by Mr. Frank and the conservatives headed by me, and that the young liberal lawyers, not only in the A. A. A. but throughout the administration, were about to walk out. It was written by a reporter who was close to the President and to the left-wing lawyers. Unfortunately it was not true.

The President on December 11 asked me to see him and, without going at length into the differences which had developed in the A. A. A., said that he had some special and important work for me to do in connection with foreign trade and, since it was directly in the line of my five points, he felt that I could do more in that field than in the position I had. This was equivalent to asking for my resignation from the office of administrator.

I left for Chicago that afternoon to address a meeting of the American Farm Bureau Federation. I made it very plain to that meeting that I was not in sympathy with the talk about abolishing the profit system and radically changing our institutions. I said in that speech:

"There is great apprehension in the minds of many businessmen today about the relations of government to business. There is grave concern over the expressions of a few ultraliberals about the Government taking over private business. If you want my opinion—personally, not officially, mind you—I would say that this apprehension is unwarranted. Unless it hustles, the Government has more hay down now than it will get up before it rains.

"Legitimate profits have always been regarded in this country as a proper reward for individual initiative, industry, and thrift. I know of no substitute for such traits. I am in favor of the profit system; but I am in favor of starting with the farmer.

"I am not committed to any one method of farm adjustment. I have not yet seen the perfect system either for the farmer, for the laborer, or for industry. I feel that fundamental plans should be discussed and understood before adoption; that new methods of social control should be clearly outlined, and that the people as a whole should have the right and duty to make the ultimate decision."

On my return from Chicago I found that the White House had issued a press release creating—

"A temporary committee to recommend permanent machinery to coordinate all Government relations to American foreign trade. * * * The report of a committee and final action thereon is expected within 2 weeks. George Peek, Agricultural Adjustment Administrator, having completed the organization period of the A. A. A., is designated to head this committee as special assistant to the President on American trade policy."

I resigned as Administrator of the A. A. A., setting out in my letter to the President that it was at his request. I felt that the A. A. A. was headed for trouble, for it was developing into an agency for permanent and wholesale acreage control from a central point and without due regard to local conditions.

FARMING BY BUREAUCRACY

Such a program is wrong in theory and is difficult if not impossible to administer in a democracy. I could not then or now willingly be a party to seeing control of the land of the farmers taken from them and put at the disposal of a Washington bureaucracy. As the A. A. A. began to expand as a social reform instead of as a farm aid, it became inevitable that in time the farmers would own their farms in name only and that, in fact, they would be the hired hands of Washington.

I had the choice of getting out of the Administration or staying in and seeing what I could do about foreign trade. I chose the latter course, albeit with misgivings and some sacrifice of spirit. I felt that eventually the proper development of foreign trade could effect a disposal of some surplus crops and in that way aid the domestic program—perhaps it might even be developed to a point where it could be used to kill off the acreage limitation and regimentation movement.

On December 30 I filed a report with the President recommending a foreign-trade administration and a United States foreign-trade corporation.

The arrangement that I proposed is not to be confused with any of the numerous corporations chartered with the public funds to put the Government into business. I had in mind something more in the nature of the British Board of Trade which would act as a clearing house for statistical information and set up double-entry books on the whole of our foreign trade so that we might distinguish between foreign trade and finance conducted at a profit to the Nation as a whole and that trade and finance conducted only for the profit of small groups and at the expense of the Nation as a whole. I had a suspicion that proper accounts would show that our foreign trade and foreign lending from the war period through to the beginning of the depression had been merely draining our resources.

THE EXPORT-IMPORT BANK

The President at that time was apparently in accord with my position—which I had already presented to him in the five points. On February 2, 1934, by Executive order he established the export-import bank and asked me to serve as president. The purpose of this bank was to help finance trade with Russia, but because of the misunderstanding concerning the Russian debt, it never did anything. On March 9 he established the second export-import bank. This was designed for trade with Cuba. Later the banks' activities were consolidated and their powers made general. The life of the banks was later extended by Congress. Both were under the authority of the National Industrial Recovery Act, and under that same authority on March 23, 1934, the President established the office of Special Adviser to the President on Foreign Trade. Four days later he extended the Executive committee on commercial policy.

As special trade adviser I took it as my primary function to find out what we had been doing on foreign trade through the years. When a man takes charge of a business, no matter what theories he may hold, he first calls for an independent audit of the books so that he will know what he is expected to manage. The results of my audit were submitted in two comprehensive letters to the President. He discussed both letters with me, apparently approved my findings, and ordered the documents printed as a part of the public records. I shall later take them up more in detail. It is enough here to say that the first thing I found out is that we had kept no books, in the modern sense of the word. We had been keeping, in various places, records by a single-entry system, but with no real income statement or balance sheet. Statistics on foreign trade are filed in 50 or more different governmental agencies, committees, or departments, all supposed to have something to do with the subject. The first part of the job was to assemble from these statistics a plain income account and balance sheet to show whether we had been doing business at a profit or a loss. This accounting showed, for the past 38 years, an increasingly disadvantageous position, by reason of a large increase of debts owed us from abroad.

The next step in our investigation was to break down the debit and credit items into terms of goods, services—visible and invisible—and capital transactions, including gold and silver. This led to startling findings. For instance, in 1910, less than 9 percent of our total dollar settlements was in capital transactions—investments, here and abroad. Seventy percent was in merchandise and services, the remainder being for war debts, tourist expenditures, immigrant remittances, and miscellaneous items. But in 1934 capital transactions between this and other countries accounted for 43 percent of the whole international movement and in the first 6 months of 1935 preliminary figures indicate 52 percent.

Having found out in a general way where the Nation stood on foreign balance, it seemed in order to do something about it, but I began to find that Government bookkeeping in foreign trade was not wanted. A considerable group, both in and out of the administration, for various reasons preferred the old copy-book theories of foreign trade to any policies based on factual information. Many bankers were against bookkeeping in spite of the fact that most of them had no knowledge at all of the actual accounts and, as I shall subsequently show, conducted enormous international financial operations with practically no knowledge of what they were doing. The war debt cancelationists—and among them were practically all the League of Nations special advocates—did not want accounts, perhaps because the accounts showed plainly that the United States had in its hands the power to collect its war debts. The professional trade boosters did not want accounts which might disclose that their policies at times ran counter to the public interest, as well as to the interests of investors.

THE INTERNATIONALIST VIEWPOINT

All of this opposition centered in the State Department. Secretary of State Hull is a very worthy gentleman who spent his early days as a lawyer and judge in Tennessee. Most of the time since 1907 he has been a Member of Congress. He has been on a public pay roll of one kind or another since 1903. Like most of his generation in the South, he grew up in the tradition of free trade. To him low tariffs are in the nature of a religion.

Mr. Hull has as his chief collaborator a very estimable gentleman, Prof. Francis B. Sayre, who married a daughter of the late President Wilson. Messrs. Hull and Sayre were both appointed to satisfy a certain wing of the Democratic Party. Professor Sayre was left enough money by his father, a Pennsylvania manufacturer, to do more or less what he pleased and, graduating from the Harvard Law School, he has preferred to teach law rather than to practice it. His widest experience was during the years 1923–30, which he spent as adviser to the Siamese Government. He is a doctrinaire who believes in the brotherhood of man, which is somehow to be brought about through the League of Nations and international free trade. If you do not agree with him, he thinks your motives must be bad because his are good.

It would not be fair to say that Messrs. Hull and Sayre would be willing to subordinate the interests of the United States to the furthering of their policies. It is fair to say that their mental processes are so rigid and their range of view so narrow that practically they might not know the interests of the United States when they saw them.

Messrs. Hull and Sayre represented the internationalist viewpoint within the administration just as the Tugwell-Frank coterie with Felix Frankfurter on the side lines represented the collectivist viewpoint. A collectivist believes in a planned economy. This requires a nationalist state and is directly opposed to internationalism. Secretary Wallace is, I am informed, the only human being who ever succeeded in being both a collectivist and an internationalist at the same time. He wrote a book, America Must Choose, which no doubt explained to his satisfaction how anyone can go in opposite directions at the same time.

RECIPROCAL-TRADE AGREEMENTS

However, the problem involved in attaching divergent pulls to the chariot of state did not seem to bother these groups in the administration. While the A. A. A. was seeking to raise farm prices so that agriculture could buy on an equality with industry, the N. R. A., through the President's reemployment agreement, was seeking to raise nonagricultural wages which would have the effect of putting industrial products out of the buying reach of the farmer. The Hull-Sayre program, as it developed, had as its objective the lowering of import duties and thus knocking the pins out from under both the N. R. A. and the A. A. A.

The Executive Committee on Commercial Policy, established by the President November 11, 1933, believed that if the President were empowered to execute reciprocal-trade agreements, granting concessions in duty if need be, our foreign trade might be stimulated. The whole world was doing that, and we were being left out. Some of the discussions leading up to the drafting of the Reciprocal Trade Agreements Act inclined to the ludicrous. The planned economy experts got an inning and actually drew up a plan as to what American industries were noneconomic and should therefore be destroyed by permitting and even furthering foreign competition. Master minds were everywhere about us, but that project was killed off.

In June 1934 the Reciprocal Trade Agreements Act was passed by Congress and became a law. In all my work as special adviser I found my every recommendation opposed by Messrs. Hull and Sayre, and when the Reciprocal Trade Agreements Act went through I found that they intended to administer it exactly as they chose and to the end of breaking down the American tariff system in the fervent belief that somehow the affairs of the whole world would thus be bettered. Their method of doing this was very simple. Our country has what are called "unconditional most-favored-nation" clauses in its commercial treaties with many countries. This is construed by Secretary Hull to mean that if in a special agreement a duty be lowered to country A in return for certain concessions from it, the same lowered duty will apply to all nations without any concessions from them. The process of applying the lowered duties to every other country is called generalization, and its effect is to make every tariff reduction in a so-called reciprocal treaty a general reduction. On this account practically none of the other countries of the world generalize their reciprocal concessions.

As special adviser to the President I many times protested these interpretations. In my report of December 31, 1934, I made formal

protest, and I also recommended abolishing my office and creating a permanent foreign-trade board. My office expired after the Supreme Court declared N. I. R. A. unconstitutional. It was impossible for me to discover whether the President agreed or did not agree with me. I determined, therefore, in July 1935 to press the matter to a decision. On July 16 I wrote to the President, in part, as follows:

"As these studies progressed I was forced inescapably to the conclusion that our general depression and the financial collapse of 1931-32 were traceable in very large measure to the commercial and financial policies pursued by the three post-war administrations in their relations with foreign nations. These policies rendered us vulnerable to the economic shocks which eventually overwhelmed us.

"This conclusion in turn led me to make to you two recommendations of major importance designed to correct the condition to which I refer.

"First, was the creation of a permanent foreign-trade board to coordinate the various foreign-trade activities of the Government. * * *

"Second, I have recommended that we abandon the unconditional most-favored-nation policy." * * *

RESIGNATION DEFERRED

"My objections to the unconditional most-favored-nation policy are twofold. In the first place, its use involves the progressive destruction of our bargaining power at a time when the conditions in international trade require that we retain the maximum freedom of action and bargaining power if our nationals are to compete on equal terms with the nationals of other countries in the markets of the world. In the second place, the result of the generalization of concessions under the unconditional most-favored-nation policy is to effect a general reduction of our tariff in return for scattered concessions from a limited number of nations. * * * I believe that a low-tariff policy is not an appropriate one for us at a time when our internal economic balance is in process of readjustment and when unemployment figures remain at their present level. I think that before we attempt general tariff reduction there should be a clear indication of policy from Congress on the subject.

"My fundamental reason for taking this step is that I feel increasingly out of sympathy with the foreign-trade policy now being pursued. I believe that national recovery will be impossible so long as these policies are continued."

I followed this a few days later with another letter in which I said, among other things:

"As I have indicated to you on a number of occasions, a question of major policy is involved. * * * Unless the issue is squarely faced and rightly settled within the Democratic Party, it is one which may well become a major campaign issue in 1936, with results to your administration and the Democratic Party which cannot now be foreseen. It can and should be settled, through free and open discussion of the principles involved, in the party councils and in Congress."

Then I presented my resignation as president of the Export-Import Bank, which was the only position I then held. The President in a letter to me suggested that, since he was going away on a long vacation, I withhold my resignation until after his return, when we would talk everything over. On July 29 I replied agreeing to withhold my resignation, but making it very plain that remaining in the administration must not be interpreted to mean that I approved its foreign-trade policies or would refrain from public criticism.

A NEW WAY TO LOWER TARIFFS

The State Department went ahead making its agreements without any comprehension of the actual facts of trade or the importance of maintaining an American economy distinct from an international economy. A great deal more than tariffs is involved in the question. The tariff is only one of several means to an end. That I shall later bring out. At a later date Dr. Henry F. Grady, of the State Department, and chairman of the Trade Agreements Committee, put into a magazine article what those of us who were following the situation already knew, but which the public did not.

He said: "Our objective is the general amelioration of the world situation. * * * We have already lowered many rates, which have been generalized to other countries. When we shall have gone the rounds of most of the important countries of the world, reducing in each case the duties on commodities of which it is the principal source, we shall have lowered our tariffs on a great many items where the case for lowering is justified. As a result of extending these reductions to virtually all countries, we will obtain, it would seem, what the proponents of unilateral tariff reduction desire; but we will do it more carefully and scientifically than is possible by legislative action."

Later in a speech at Riverside, Calif., he said, "This new policy is of an importance that can hardly be exaggerated. We are to a greater degree than ever before meshing our domestic economy into world economy."

The State Department went ahead. They set up a trade-agreement mechanism which, in effect, excluded any conference with the practical interests and put the actual making of the treaties in the hands of college professors and men of only bureau training. If an American businessman wanted to find out what was being done about any particular agreement he had to go to a foreign embassy or send a representative abroad to talk with business interests.

None of the agreements gave any benefits to the United States commensurate with the concessions granted.

The State Department paid no attention at all to the protests of the representatives of the special adviser's office. They refused to make any agreements touching the recovering of public or private debts owing to Americans while all the other nations, and especially Great Britain, in their agreements saw to it that their debts were looked after. The State Department bound articles on the free list in such fashion as to destroy much of our bargaining power and prevent the rounding out of a self-reliant United States. Also it limited the taxing prerogative of Congress. They made a duty cut on the ground that American prices were too high—and again because they thought industrial salaries were unduly large. Whether they were right or wrong does not matter. Congress had not given to the State Department a roving commission to pry into industry.

I talked with the President, but got nowhere. I was under no obligation to keep silent. I spoke my mind before a luncheon of the War Industries Board Association in New York City on Armistice Day, 1935, and concluded with a table which I called America's Choice. Here it is:

AMERICA'S CHOICE—WHICH SHALL IT BE?

A policy for internationalists	*A policy for America*
I	I
Relaxation of immigration laws and regulation of immigration by international agreements.	Rigorous tightening of immigration laws: (a) To reduce American unemployment. (b) To reduce alien influence in our domestic affairs.
II	II
General reduction of tariffs: (a) Laissez faire. (b) Unconditional most-favored-nation.	Preservation of the American market, American price levels, and American employment: (a) Selective imports and exports. (b) Tariff reductions only for specific advantages in individual foreign countries (i. e., reciprocity or conditional most-favored-nation).
III	III
Stabilization of currencies by general international action (i. e., return to unregulated or foreign-controlled gold standard).	Stabilization of American dollar at American price level—thereafter stabilization by agreement with individual countries or blocs where possible (i. e., a managed currency based on national bookkeeping).
IV	IV
Free export of capital and resumption of general foreign loans. Multiplication of branch factories and American direct investments abroad.	Control of export of capital: (a) To conserve national assets and resources. (b) To assist American trade, foreign and domestic. (c) To minimize foreign influence or control over American securities market and American enterprise.
V	V
Naval limitation by international agreement to meet the requirements of Great Britain, Japan, France, Italy, and Germany.	Navy designed to meet American requirements, including defense of the Panama Canal and the Pacific coast.
VI	VI
Dependence on foreign shipping and communications.	Development of American shipping and communications systems.
VII	VII
Submission of disputes to decision of foreign-dominated tribunals such as the World Court.	Settlement of disputes by arbitration confirmed by the Senate.
VIII	VIII
Automatic intervention in European or Asiatic political disputes, as under the Kellogg Treaty and Stimson Doctrine. Collaboration with League in naming "aggressors" anywhere in the world and enforcing sanctions.	In case of wars in Europe or Asia, strict neutrality and avoidance of "moral" judgments on belligerents. Cash and carry policy for direct or indirect trade with belligerents. For the Americas the Monroe Doctrine, plus the good-neighbor policy.

A New York newspaper picked up the parallel columns of my eight points and printed them in big type. The President saw that editorial, and he wrote to me from Warm Springs a page-and-a-half letter which showed both irritation and agitation. He denied that the policies labeled "internationalist" were the policies of his administration. In that I profoundly differed with him,

for to me the trend was unmistakable. I took the opportunity at once to resign.

I had a meeting with the President on November 19. He asked me about the Canadian agreement, which had just been announced. I told him that it was a very good agreement for Canada and some other countries, but a very bad one for the United States and that I was preparing a factual memorandum on it. I left with him a copy of the eight points.

I saw the President again on December 12. Our meeting was cordial. He asked what I was going to do. I said: "I am going out to continue the work that has taken most of my time for 13 years. * * *"

I know that I have fought for the truth as I have seen it; I have kept the faith as I have known it. In recording the struggle I am seeking to tell my loyal associates and supporters in the long farm battle what the developments have been and what the portents are if present policies are carried through. In conscience I can do no less.

The American dream of a free, peaceful, and prosperous United States, resting on the foundations of a self-reliant home-owning agriculture, is not yet dead. It is worth working for and fighting for. It still lies within our power to make this dream come true.

COLLECTION OF REVENUE FROM INTOXICATING LIQUORS

The Senate resumed consideration of the bill (H. R. 9185) to insure the collection of the revenue on intoxicating liquor, to provide for the more efficient and economical administration and enforcement of the laws relating to the taxation of intoxicating liquor, and for other purposes.

Mr. KING. Mr. President, I ask unanimous consent that the formal reading of the bill be dispensed with, that the bill be read for amendment, and that committee amendments be first considered.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

Mr. KING. Mr. President, before proceeding to consideration of the bill I should like to submit a brief statement as to its purposes, so that Senators who may be interested may know something of its provisions.

The bill was introduced in the House of Representatives many months ago and received careful consideration at the hands of the Ways and Means Committee. It came to the Senate and was referred to the Committee on Finance. It was then referred to a subcommittee which held hearings and later reported to the full committee. After careful consideration the full committee reported the bill to the Senate. I understood the report was unanimous, but this morning I was advised that a minority report has been filed with respect to one particular matter which will be presented later.

The purpose of this bill is to amend the administrative provisions of law relating to the collection of taxes upon distilled spirits, wines, and fermented malt beverages. The bill is necessary because, due to the long period of prohibition, the internal-revenue laws have not kept pace with the growth of the country. At the public hearings held by your committee, representatives of the distillers, rectifiers, wine-makers, and brewers appeared and offered numerous amendments to the bill as it passed the House. These representatives and those of the Treasury Department were requested by your committee to confer and endeavor to agree upon such amendments as could be accepted by the Treasury Department without danger to the revenue. All of the amendments to the bill which your committee recommends are, with few exceptions, satisfactory to the Treasury Department.

The bill in general, in the interest of flexibility, makes certain changes in the laws relating to supervision by the Government of the production of, and the collection of taxes on, distilled spirits, wines, and fermented malt beverages.

In connection with the brewing industry it broadens the present laws so as to permit the manufacture in breweries and bottling houses of products which your committee believes can be permitted to be manufactured without danger to the revenue. It permits the shipment of beer in tank cars, if, in the judgment of the Commissioner of Internal Revenue, such shipments can be made without danger to the revenue. It also directs the Commissioner of Internal Revenue to investigate and ascertain whether refunds for losses on account of leakage, wastage, and so forth, can be made without danger to the revenue, and in the event that an affirmative finding is made, requires the Commissioner to prescribe rules and regulations under which such refunds can be made.

Among the amendments proposed by the wine makers and which your committee recommends be enacted are those authorizing the manufacture of vermouth on bonded winery premises, and the clarification on such premises of wine which has become cloudy without payment of the special tax as a rectifier or the 30-cent tax imposed on the products of rectification.

Among the amendments proposed by the rectifiers and which your committee recommends be enacted are those authorizing rectification of spirits and wines in customs manufacturing warehouses for shipment to Puerto Rico without payment of taxes due on the products of such rectification and exempting the rectifier of such spirits and wines from payment of special tax as a rectifier on account of such rectification conducted in the manufacturing warehouse; and another under which cordials, and so forth, made with tax-paid sweet wines, fortified with tax-paid brandy, will be relieved from second taxation as distilled spirits—as required under existing law—if they contain more than 24 percent of alcohol.

The bill contains new provisions which abolish the old distinctions between distillery warehouses, general bonded warehouses, and special bonded warehouses, and establish a new type of warehouses to be known as Internal Revenue bonded warehouses.

To aid in the suppression of bootlegging, the bill defines certain acts committed in connection with liquor-tax evasions as offenses against the United States and imposes severe penalties for the commission of such offenses.

The last title of the bill makes the Federal Alcohol Administration—which is now a division of the Treasury Department—an independent establishment of the Government.

The bill deals with many phases of internal-revenue taxation of distilled spirits, wine, and malt beverages. For the most part, the bill proposes technical amendments to the existing law on that subject. Many of these amendments have as their object the more economical administration of these laws. It was disclosed at the hearings that it was possible in various ways to simplify enforcement and avoid duplication in the work of tax collection. Other provisions of the bill propose the elimination of obsolete requirements of the statutes—most of them running back as far as 1875—which can now be repealed without danger to the revenue. Other statutes, old and new, are proposed to be modified to remove burdens on the liquor-producing and distributing industries when this can be done without sacrificing efficiency of execution of the law or certainty of collection of the tax. Some of the restrictions which have been removed or modified were imposed during national prohibition as an adjunct to that policy and their necessity no longer exists. Other provisions of the bill are designed to close doors which are now open to the tax evader and to assure tax collection by providing for closer supervision of those liable for the various taxes under these laws and by providing for other administrative machinery under which tax collection will be speedy and sure.

Your committee believes that a complete codification of the internal-revenue laws relating to liquor would be of great benefit to all persons concerned with the administration and application of such laws. However, it would, perhaps, be inadvisable to attempt such codification at this time. Nevertheless, the bill recommended for enactment, by removing obsolete provisions and clarifying the statutes, has made a step in the direction of a codification and will doubtless prove of great benefit from a purely practical standpoint.

The amendments to existing law are so various that any general statement will not adequately disclose the character of each particular section of the bill. The report submitted by the committee contains a detailed analysis of the various sections of the bill under which the effect of each is set forth.

Mr. BORAH. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Idaho?

Mr. KING. Certainly.

Mr. BORAH. Is there anything in the bill of substance other than a codification of the liquor laws?

Mr. KING. That is my judgment. I do not know whether the Senator would call it "substance." There is one amendment to be offered which is not in the printed bill.

Mr. BORAH. I understand.

Mr. JOHNSON. Mr. President——

Mr. KING. There is another amendment to be offered in regard to the wine schedule.

I yield to the Senator from California.

Mr. JOHNSON. I was simply going to call attention to the question of taxation of the wine interests in order that the Senator from Idaho might consider that phase of the bill.

Mr. KING. I have asked that the Senate consider committee amendments first. I suggest that we consider amendments to which there is no objection and which are formal in their character and pass over any which may require some consideration until we shall have completed consideration of the unobjected amendments.

The PRESIDENT pro tempore. The clerk will state the amendments of the committee.

The first amendment of the Committee on Finance was, on page 1, after line 5, to strike out:

SEC. 2. Every bottle, box, package, barrel, keg, cask, or other receptacle containing intoxicating liquor which does not have on it a tax stamp, import stamp, strip stamp, label, brand, stencil, or other marking required by any law of the United States now or hereafter in force in regard to the manufacture, taxation, or transportation of or traffic in intoxicating liquor, or by any regulation issued under such law, or which has on it any false or falsely made, fraudulent, or fictitious tax stamp, import stamp, strip stamp, label, branch, stencil, or other mark made in similitude of that required by such law or regulation, or which is not accompanied by manifests, bills of lading, certificates, permits, or other documents required by such law or regulation, shall with its contents, be seized and forfeited.

The amendment was agreed to.

The next amendment was, on page 2, line 12, to change the section number from "3" to "2"; in line 15, after the words "traffic in", to strike out "intoxicating liquor" and insert "distilled spirits, wines, or fermented malt liquors"; in line 22, after the word "Firearms", to strike out "act" and insert "Act)"; in line 24, after the word "in", to strike out "length)" and insert "length"; and on page 3, line 7, after the word "length" and the comma, to strike out "in violation of the provisions of the National Firearms Act", so as to make the section read:

SEC. 2. (a) Whoever, when violating any law of the United States, or of any Territory or possession of the United States, or of the District of Columbia, in regard to the manufacture, taxation, or transportation of or traffic in distilled spirits, wines, or fermented malt liquors, or when aiding in any such violation, has in his possession or in his control any device capable of causing emission of smoke, gas, or fumes, and which may be used for the purpose of hindering, delaying, or preventing pursuit or capture, any explosive, or any firearm (as defined in the National Firearms Act), except a machine gun, or a shotgun or rifle having a barrel of less than 18 inches in length, shall be fined not more than $5,000 or be imprisoned for not more than 10 years, or both, and all persons engaged in any such violation or in aiding in any such violation shall be held to be in possession or control of such device, firearm, or explosive.

(b) Whoever, when violating any such law, has in his possession or in his control a machine gun, or any shotgun or rifle having a barrel of less than 18 inches in length, shall be punished by imprisonment for not more than 20 years; and all persons engaged in any such violation or in aiding in any such violation shall be held to be in possession and control of such machine gun, shotgun, or rifle.

(c) Every such firearm or device for emitting gas, smoke, or fumes, and every such explosive, machine gun, shotgun, or rifle, in the possession or control of any person when violating any such law, shall be seized and shall be forfeited and disposed of in the manner provided by section 7 of the National Firearms Act.

The amendment was agreed to.

The next amendment was, on page 3, line 18, to change the section number from "4" to "3"; in line 20, after the figures "1934" and the comma, to insert "as amended"; and in line 21, after the words "of the", to strike out "customs or of the internal revenue" and insert "Customs Service or of the Internal Revenue Service", so as to make the section read:

SEC. 3. Section 1 of the act entitled "An act to provide punishment for killing or assaulting Federal officers", approved May 18, 1934, as amended, is amended by striking out the words "any officer of the Customs Service or of the Internal Revenue Service" and inserting in lieu thereof the words "any officer, employee, agent, or other person in the service of the customs or of the internal revenue."

The amendment was agreed to.

The next amendment was, under the heading "Title II", on page 4, after line 19, to strike out:

SECTION 201. Section 3287 of the Revised Statutes, as amended (26 U. S. C., 367; U. S. C., Supp. VII, title 26, sec. 1231 (a) and (b)), is amended to read as follows:

"SEC. 3287. (a) All distilled spirits shall be drawn from receiving cisterns into casks or packages, each of not less capacity than 10 gallons wine measure, and shall thereupon be gauged, proved, and marked by a storekeeper-gauger, who shall cut on the cask or package containing such spirits, in a manner to be prescribed by the Commissioner of Internal Revenue, the quantity in wine gallons and in proof gallons of the contents of such casks or packages. There shall be marked or branded on the head of each such cask or package in letters of not less than three-fourths of an inch in height the name of the distiller, the registered number of the distillery, the city or town and State, the number of the supervisory district in which the distillery is located, the particular name of such distilled spirits as known to the trade, that is to say, high wines or spirits, as the case may be, the kind of cooperage (indicated by abbreviations), and the serial number of the cask or package. Such serial numbers for every distillery shall begin with number 1 and continue in a regular sequence, and no two or more casks or packages warehoused at the same distillery shall be marked with the same number. The head of the cask or package bearing these marks and brands shall be known as the 'Government head.'

"(b) The gross weight, tare, net weight, wine gallons, proof, and proof gallons shall be cut upon the bung stave of the cask or package in the order named, on the side of the bunghole nearest to the Government head. After the cask or package has been weighed, proofed, and marked as above required, the storekeeper-gauger shall stencil on the Government head of the cask or package the word 'Inspected', followed by his name and title, and the spirits shall be immediately removed into the distillery warehouse."

The amendment was agreed to.

The next amendment was, on page 6, after line 4, to insert:

SECTION 201. Section 3287 of the Revised Statutes, as amended (U. S. C., 1934 ed., title 26, sec. 1231), is amended to read as follows:

"SEC. 3287. (a) Except as provided in section 602 of the Revenue Act of 1918, as amended, all distilled spirits shall be drawn from receiving cisterns into casks or packages and thereupon shall be gauged, proved, and marked by a storekeeper-gauger, and immediately removed into an Internal Revenue bonded warehouse. The Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, is hereby empowered to prescribe all necessary regulations relating to the drawing off, gauging, and packaging of distilled spirits; the marking, branding, numbering, and stamping of such packages; and the transfer and transportation to, and the storage of such spirits in, Internal Revenue bonded warehouses."

The amendment was agreed to.

The next amendment was, on page 7, after line 6, to strike out:

(d) Alcohol or high-proof spirits withdrawn free of tax for the use of the United States, as authorized by law, may be drawn off or transferred by pipes directly from storage tanks of any industrial-alcohol plant to closed metal storage tanks situated in the industrial-alcohol bonded warehouse and transferred from such storage tanks to tanks or tank cars for shipment, upon the execution of such bonds and under such regulations as the Secretary of the Treasury may prescribe.

The amendment was agreed to.

Mr. KING. Mr. President, I may say that that language is in existing law, so that it is surplusage.

The PRESIDENT pro tempore. The next committee amendment will be stated.

The next amendment was, on page 7, at the beginning of line 16, to strike out "(e)" and insert "(c)", and in the same line, after the word "The", to strike out "Secretary of the Treasury" and insert "Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury"; at the beginning of line 20, to strike out "(f)" and insert "(d)"; in the same line, after the word "The", to strike out "Secretary of the Treasury" and insert "Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury"; and on page 8, line 2, after the word "the", to strike out "Secretary" and insert "Commissioner", so as to read:

(c) The Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may, by regulations, prescribe the

standards of fill of casks or packages of distilled spirits at each distillery.

(d) The Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may, by regulations, from time to time require a distiller, at his expense and under the immediate personal supervision of a storekeeper-gauger, to do such marking and branding and such mechanical labor pertaining to gauging required under this section as the Commissioner deems proper and determines may be done without danger to the revenue.

The amendment was agreed to.

The next amendment was, on page 8, after line 4, to strike out:

SEC. 202. Section 3295 of the Revised Statutes, as amended (26 U. S. C., 374; U. S. C., Supp. VII, title 26; sec. 1236), is further amended to read as follows:

"SEC. 3295. (a) Whenever an order is received from the supervisor of the district for the removal from any distillery warehouse of any cask or package of distilled spirits on which the tax has been paid, the storekeeper-gauger, by whom the same is gauged and inspected, shall, before such cask or package has left the warehouse, place upon the Government head thereof, in such manner as to cover no portion of any brand or mark prescribed by law already placed thereon, a stamp, on which shall be engraved the number of proof gallons contained in such cask or package on which the tax has been paid, and which shall state the serial number of the cask or package, the name of the person by whom the tax was paid, and the person to whom and the place where it is to be delivered.

"(b) Said stamp shall be signed by the collector of the district, and the storekeeper-gauger, and shall be as follows:

Tax-paid stamp, No. ------

Received ----------, 19--, from ----------; tax on ---------- gallons proof spirit, cask no. ----------, ---------- warehouse at ---------- for delivery to ----------, at ----------.

Collector -------- District, State of ----------.
Attest:

---------- ----------,
United States storekeeper-gauger.

"(c) At the time of affixing the tax-paid stamp the storekeeper-gauger shall cut or burn upon the Government head of each cask or package the date of payment of the tax, the number of proof gallons, and the number of the stamp, which cutting, marking, or branding shall be erased when such cask or package is emptied.

The amendment was agreed to.

The next amendment was, on page 9, after line 16, to insert:

SEC. 202. Section 3295 of the Revised Statutes, as amended (U. S. C., 1934 ed., title 26, sec. 1236), is further amended to read as follows:

"SEC. 3295. (a) Whenever an application is received for the removal from any Internal Revenue bonded warehouse of any cask or package of distilled spirits, the storekeeper-gauger shall gauge and inspect the same, and shall, before such cask or package has left the warehouse, place upon such package such marks, brands, and stamps as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall by regulations prescribe."

On page 10, line 4, before the word "The", to strike out "(d)" and insert "(b)"; in the same line, after the word "The", to strike out "Secretary of the Treasury" and insert "Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury"; and in line 10, after the word "the", to strike out "Secretary" and insert "Commissioner", so as to read:

SEC. 202. Section 3295 of the Revised Statutes, as amended (U. S. C., 1934 ed., title 26, sec. 1236), is further amended to read as follows:

"SEC. 3295. (a) Whenever an application is received for the removal from any Internal Revenue bonded warehouse of any cask or package of distilled spirits, the storekeeper-gauger shall gauge and inspect the same, and shall, before such cask or package has left the warehouse, place upon such package such marks, brands, and stamps as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall by regulations prescribe.

"(b) The Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may, by regulations, from time to time, require any distiller, at his expense and under the immediate personal supervision of a storekeeper-gauger, to do such marking and branding and such mechanical labor pertaining to gauging required under this section as the Commissioner deems proper and determines may be done without danger to the revenue."

The amendment was agreed to.

The next amendment was, on page 10, line 13, after the words "Revised Statutes", to strike out "(U. S. C., Supp. VII, title 26, sec. 1811 (a))" and insert "(U. S. C., 1934 ed., title 26, sec. 1811 (a))"; in line 18, after the word "or", to strike out "distillery warehouse" and insert "Internal Revenue bonded warehouse"; and on page 11, line 2, after the words "by the", to strike out "Secretary of the Treasury" and insert "Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury", so as to make the section read:

SEC. 203. Section 3290 of the Revised Statutes (U. S. C., 1934 ed., title 26, sec. 1811 (a)) is amended to read as follows:

"SEC. 3290. Whenever any storekeeper-gauger employs any owner, agent, or superintendent of any distillery or Internal Revenue bonded warehouse, or any person in the service of such owner, agent, or superintendent, or any rectifier or wholesale liquor dealer, or any person in the service of such rectifier or wholesale liquor dealer, to use his brands or to discharge any of the duties imposed upon him by law, he shall, for each offense so committed, be subject to a fine of not more than $1,000. This section shall not apply in any case in which the use of the storekeeper-gauger's brand or the discharge of his duties by another has been directed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, under authority of law."

The amendment was agreed to.

The next amendment was, under the heading "Title III", on page 11, line 8, after the word "amended" to strike out "(26 U. S. C., sec. 286; U. S. C., Supp. VII, title 26, secs. 1166 (b) and 1353)", and insert "(U. S. C., 1934 ed., title 26, secs. 1166 (b) and 1353)", so as to read:

SECTION 301. (a) Section 3262 of the Revised Statutes, as amended (U. S. C., 1934 ed., title 26, secs. 1166 (b) and 1353), is amended to read as follows:

"SEC. 3262. (a) No bond of a distiller shall be approved unless—

"(1) The distiller is the owner in fee, unemcumbered by any mortgage, judgment, or other lien, of the lot or tract of land on which the distillery is situated; or

"(2) The distiller files with the officer designated for the purpose by the Commissioner of Internal Revenue, in connection with his notice, the written consent of the owner of the fee, and of any mortgagee, judgment-creditor, or other person having a lien thereon, duly acknowledged, that the premises may be used for the purpose of distilling spirits, subject to the provisions of law, and expressly stipulating that the lien of the United States for taxes and penalties shall have priority of such mortgage, judgment, or other encumbrance, and that in the case of the forfeiture of the distillery premises, or any part thereof, the title to the same shall vest in the United States, discharged from such mortgage, judgment, or other encumbrance; or, if consent as required under this paragraph cannot be obtained,

"(3) The distiller, with the approval of the Commissioner, files with the officer designated by the Commissioner a bond, approved by the Commissioner, in the penal sum equal to the appraised value of the lot or tract of land on which the distillery is situated, the distillery, the buildings, and the distilling apparatus. Such value shall be determined, and such bond shall be executed, in such form and with such sureties, and filed with the officer designated by the Commissioner of Internal Revenue, under such regulations as the Secretary of the Treasury shall prescribe.

"(b) In any case where the owner of a distillery or distilling apparatus, erected prior to July 20, 1868, has only an estate for a term of years or other estate less than fee simple in the lot or tract of land on which the distillery is situated, the evidence of title to which shall have been duly recorded prior to that date; or in like case, where the lease or other evidence of title is held but was not required by the laws of the State to be recorded in order to be valid at the time of its execution; or in any case of such prior erection where the title was then, and has continued to be, in litigation; or in any case of such prior erection where such owner is possessed of the fee, but encumbered with a mortgage executed and duly recorded prior to July 20, 1868, and not due, or in any case of such prior erection where the fee is held by a femme-covert, minor, person of unsound mind, or other person incapable of giving consent, as required in subsection (a), the value of such lot or tract of land, together with the building and distilling apparatus, shall be appraised in the manner to be prescribed by the Commissioner; and the officer designated by the Commissioner may, at the discretion of the Commissioner, be authorized to accept, in lieu of the said written consent, the bond of such distiller, in such form as the Commissioner may prescribe, with not less than two personal sureties or one corporate surety, conditioned that in case the distillery, distilling apparatus, or any part thereof, shall by final judgment be forfeited for the violation of any of the provisions of law, the obligors shall pay the amount stated in said bond. Said sureties shall be residents of the collection district or county, or of an adjoining county in the same State in which the distillery is situated, and owners of unemcumbered real estate in said district or county, or adjoining county, equal to such appraised value, and the penal sum of said bond shall be equal to the appraised value of said lot or tract of land together with the buildings and distilling apparatus.

"(c) The officer designated by the Commissioner may at any time, at the discretion of the Commissioner, accept such bond as is authorized to be given by the distiller in lieu of the written consent of the owner of the fee in the case of a distillery erected

prior to July 20, 1868, notwithstanding such distillery has since then been increased by the addition of land or buildings adjacent or contiguous thereto, not owned by the distiller himself in fee; such bond to be for and in respect of such addition only, if the distillery be one which the distiller owns in fee or in respect to which he has procured the written consent of the owner of the fee or other encumbrance, otherwise to be for and in respect of the entire distillery as increased by such addition.

"(d) In case of any distillery sold at judicial or other sale in favor of the United States, a bond may be taken at the discretion of the Commissioner of Internal Revenue, in lieu of the written consent required by this section, and the person giving such bond may be allowed to operate such distillery during the existence of the right of redemption from such sale, on complying with all the other provisions of law.

"(e) No lien shall attach to any lot or tract of land, distillery, building, or distilling apparatus, under the provisions of section 3251 of the Revised Statutes, as amended, by reason of distilling done during any period included within the term of any bond taken under the provisions of paragraph (3) of subsection (a) of this section."

The amendment was agreed to.

The next amendment was, on page 15, line 4, after the word "amended", to strike out "(26 U. S. C., sec. 289; U. S. C., Supp. VII, title 26, sec. 1168)" and insert "(U. S. C., 1934 ed., title 26, sec. 1168)"; and in line 17, after the word "amended", to strike out "(26 U. S. C., 321)" and insert "(U. S. C., 1934 ed., title 26, sec. 1198)", so as to read:

SEC. 302. Section 3264 of the Revised Statutes, as amended (U. S. C., 1934 ed., title 26, sec. 1168), is further amended by adding at the end thereof the following new paragraph:

"The Secretary of the Treasury in the case of any distillery, may, under regulations, waive such of the requirements of this section as he determines may be waived without danger to the revenue. Whenever the Secretary of the Treasury, by authority of this paragraph, waives any or all of the requirements of this section, he may, by regulation, relieve the distiller from such requirements of sections 3285, 3309, 3310, and 3311 of the Revised Statutes, as amended, and of section 6 of the act of March 1, 1879, as amended (U. S. C., 1934 ed., title 26, sec. 1198), and of such other provisions of law relating or incidental to survey requirements, as the Secretary determines may be waived without danger to the revenue."

The amendment was agreed to.

The next amendment was, on page 15, line 22, after the word "amended", to strike out "(26 U. S. C., sec. 284; U. S. C., Supp. VII, title 26, sec. 1165)" and insert "(U. S. C., 1934 ed., title 26, sec. 1165)"; and, on page 16, line 4, after the word "amended", to strike out "(26 U. S. C., sec. 289; U. S. C., Supp. VII, title 26, sec. 1168)" and insert "(U. S. C., 1934 ed., title 26, sec. 1168)", so as to read:

SEC. 303. Section 3260 of the Revised Statutes, as amended (U. S. C., 1934 ed., title 26, sec. 1165), is further amended by adding at the end thereof the following new paragraph:

"Whenever, under authority of law, the Secretary of the Treasury shall relieve a distiller from the survey requirements of section 3264 of the Revised Statutes, as amended (U. S. C., 1934 ed., title 26, sec. 1168), he may likewise by regulation fix the penal sum of the distiller's bond, but in no case shall the amount of the minimum bond be less than $5,000 nor the amount of the maximum bond greater than $100,000."

The amendment was agreed to.

The next amendment was, on page 16, line 10, after the words "Revised Statutes", to strike out "(26 U. S. C., sec. 292; U. S. C., Supp. VII, title 26, sec. 1171)" and insert "(U. S. C., 1934 ed., title 26, sec. 1171)", so as to read:

SEC. 304. Section 3267 of the Revised Statutes (U. S. C., 1934 ed., title 26, sec. 1171) is amended by adding a new paragraph at the end thereof, to read as follows:

"Whenever, under authority of law, the Secretary of the Treasury shall relieve a distiller from the survey requirements, he may, by regulation, require the distiller to provide such receiving cisterns, tanks, or such other equipment as the Secretary shall deem proper in order to protect the revenue."

The amendment was agreed to.

The next amendment was, on page 16, line 22, after "(28 Stat. 568)" and the comma, to strike out "(26 U. S. C., sec. 287; U. S. C., Supp. VII, title 26, sec. 1166 (c))" and insert "(U. S. C., 1934 ed., title 26, sec. 1166 (c))"; on page 17, line 20, after the words "taxation of", to strike out "intoxicating liquor" and insert "distilled spirits, wines, or fermented malt liquors"; and on page 18, line 2, after the word "of", to insert "distilled spirits, wine, fermented malt liquor, or other", so as to read:

SEC. 305. Section 67 of the act of August 27, 1894 (28 Stat. 563), (U. S. C., 1934 ed., title 26, sec. 1166 (c)), is amended to read as follows:

"SEC. 67. (a) No individual firm, partnership, corporation, or association, intending to commence or to continue the business of a distiller, rectifier, brewer, or winemaker, shall commence or continue the business of a distiller, rectifier, brewer, or winemaker until all bonds in respect of such a business required by any provision of law have been approved by the Commissioner of Internal Revenue or such other officer of the Bureau of Internal Revenue as the Commissioner, with the approval of the Secretary of the Treasury, may designate.

"(b) The Commissioner or the designated officer may disapprove any such bond or bonds if the individual, firm, partnership, corporation, or association giving the same, or owning, controlling, or actively participating in the management of the business of the individual or firm, partnership, corporation, or association giving the same, shall have been previously convicted in a court of competent jurisdiction of (1) any fraudulent noncompliance with any provision of any law of the United States if such provision related to internal-revenue or customs taxation of distilled spirits, wines, or fermented malt liquors, or if such an offense shall have been compromised with the individual, firm, partnership, corporation, or association upon payment of penalties or otherwise, or (2) any felony under a law of any State, Territory, or the District of Columbia, or the United States, prohibiting the manufacture, sale, importation, or transportation of distilled spirits, wine, fermented malt liquor, or other intoxicating liquor.

"(c) In case the disapproval is by any officer other than the Commissioner, the individual, firm, partnership, corporation, or association giving the bond may appeal from such disapproval to the Commissioner.

"(d) The disapproval of the Commissioner in any matter under this section shall be final."

The amendment was agreed to.

The next amendment was, on page 18, line 10, after "Sec. 306", to insert:

(a) Section 1 of the act entitled "An act to allow the bottling of distilled spirits in bond", approved March 3, 1897, as amended (U. S. C., 1934 ed., title 26, sec. 1276), is further amended to read as follows:

"That whenever any distilled spirits deposited in the Internal Revenue bonded warehouse have been duly entered for withdrawal, before or after tax-payment, or for export in bond, and have been duly gauged and the required marks, brands, and tax-paid stamps (if required) or export stamps, as the case may be, have been affixed to the package or packages containing the same, the distiller or owner of said distilled spirits, if he has declared his purpose so to do in the entry for withdrawal, which entry for bottling purposes may be made by the owner as well as the distiller, may remove such spirits to a separate portion of said warehouse which shall be set apart and used exclusively for that purpose, and there, under the supervision of a United States storekeeper-gauger in charge of such warehouse, may immediately draw off such spirits, bottle, pack, and case the same. For convenience in such process any number of packages of spirits of the same kind, differing only in proof, but produced at the same distillery by the same distiller, may be mingled together in a cistern provided for that purpose, but nothing herein shall authorize or permit any mingling of different products, or of the same products of different distilling seasons, or the addition or subtraction of any substance or material or the application of any method or process to alter or change in any way the original condition or character of the product except as herein authorized; nor shall there be at the same time in the bottling room of any Internal Revenue bonded warehouse any spirits entered for withdrawal upon payment of the tax and any spirits entered for export.

"Every bottle when filled shall have affixed thereto and passing over the mouth of the same such suitable adhesive engraved strip stamp as may be prescribed, as hereinafter provided, and shall be packed into cases to contain six bottles or multiples thereof, and in the aggregate not less than 2 nor more than 5 gallons in each case, which, if tax-paid, shall be immediately removed from the warehouse premises. Each of such cases shall have affixed thereto a stamp denoting the number of gallons therein contained, such stamp to be affixed to the case before its removal from the warehouse, and such stamps shall have a cash value of 10 cents each, and shall be charged at that rate to the collectors to whom issued, and shall be paid for at that rate by the distiller or owner using the same.

"And there shall be plainly burned, embossed, or printed on the side of each case, to be known as the Government side, the proof of the spirits, the registered distillery number, the State and supervisory district in which the distillery is located, the real name of the actual bona fide distiller or of the individual, firm, partnership, corporation, or association in whose name the spirits were produced and warehoused, the year and distilling season, whether spring or fall, of original inspection or entry into bond, and the date of bottling, and the same wording shall be placed upon the adhesive engraved strip stamp over the mouth of the bottle. It being understood that the spring season shall include the months from January to July, and the fall season the months from July to January.

"And no trade-marks shall be put upon any bottle unless the real name of the actual bona fide distiller, or the name of the individual, firm, partnership, corporation, or association in whose name the spirits were produced and warehoused, shall also be placed conspicuously on said bottle."

On page 21, line 3, after the word "amended", to strike out "(26 U. S. C., sec. 412; U. S. C. Supp. VII, title 26, sec. 1277)" and insert "(U. S. C., 193) 4 ed., title 26, sec. 1277)"; and in line 11, after the word "spirits", to insert a colon and the following proviso: *"Provided,* That nothing in this act shall authorize the labeling of spirits in bottles contrary to the provisions of regulations issued pursuant to the Federal Alcohol Administration Act, or any amendment thereof", so as to read:

SEC. 306. (a) Section 1 of the act entitled "An act to allow the bottling of distilled spirits in bond", approved March 3, 1897, as amended (U. S. C., 1934 ed., title 26, sec. 1276), is further amended to read as follows:

"That whenever any distilled spirits deposited in the Internal Revenue bonded warehouse have been duly entered for withdrawal, before or after tax payment, or for export in bond, and have been duly gauged and the required marks, brands, and tax-paid stamps (if required) or export stamps, as the case may be, have been affixed to the package or packages containing the same, the distiller or owner of said distilled spirits, if he has declared his purpose so to do in the entry for withdrawal, which entry for bottling purposes may be made by the owner as well as the distiller, may remove such spirits to a separate portion of said warehouse which shall be set apart and used exclusively for that purpose, and there, under the supervision of a United States storekeeper-gauger in charge of such warehouse, may immediately draw off such spirits, bottle, pack, and case the same. For convenience in such process any number of packages of spirits of the same kind, differing only in proof, but produced at the same distillery by the same distiller, may be mingled together in a cistern provided for that purpose, but nothing herein shall authorize or permit any mingling of different products, or of the same products of different distilling seasons, or the addition or subtraction of any substance or material or the application of any method or process to alter or change in any way the original condition or character of the product except as herein authorized; nor shall there be at the same time in the bottling room of any Internal Revenue bonded warehouse any spirits entered for withdrawal upon payment of the tax and any spirits entered for export.

"Every bottle when filled shall have affixed thereto and passing over the mouth of the same such suitable adhesive engraved strip stamp as may be prescribed, as hereinafter provided, and shall be packed into cases to contain six bottles or multiples thereof, and in the aggregate not less than 2 nor more than 5 gallons in each case, which, if tax-paid, shall be immediately removed from the warehouse premises. Each of such cases shall have affixed thereto a stamp denoting the number of gallons therein contained, such stamp to be affixed to the case before its removal from the warehouse, and such stamps shall have a cash value of 10 cents each, and shall be charged at that rate to the collectors to whom issued, and shall be paid for at that rate by the distiller or owner using the same.

"And there shall be plainly burned, embossed, or printed on the side of each case, to be known as the Government side, the proof of the spirits, the registered distillery number, the State and supervisory district in which the distillery is located, the real name of the actual bona-fide distiller or of the individual, firm, partnership, corporation, or association in whose name the spirits were produced and warehoused, the year and distilling season, whether spring or fall, of original inspection or entry into bond, and the date of bottling, and the same wording shall be placed upon the adhesive engraved strip stamp over the mouth of the bottle. It being understood that the spring season shall include the months from January to July, and the fall season the months from July to January.

"And no trade-marks shall be put upon any bottle unless the real name of the actual bona-fide distiller, or the name of the individual, firm, partnership, corporation, or association in whose name the spirits were produced and warehoused, shall also be placed conspicuously on said bottle."

(b) Section 2 of the act entitled "An act to allow the bottling of distilled spirits in bond", approved March 3, 1897, as amended (U. S. C., 1934 ed., title 26, sec. 1277), is further amended by striking out the last clause following the words "Secretary of the Treasury", and inserting in lieu thereof the following: "but no spirits (except gin for export) shall be bottled in bond until they have remained in bond in wooden containers for at least 4 years from the date of original gauge as to fruit brandy, or original entry as to all other spirits: *Provided,* That nothing in this act shall authorize the labeling of spirits in bottles contrary to the provisions of regulations issued pursuant to the Federal Alcohol Administration Act, or any amendment thereof."

The amendment was agreed to.

The next amendment was, on page 21, after line 15, to strike out:

SEC. 307. (a) Section 3293 of the Revised Statutes, as amended; section 4 of the act of May 28, 1880 (21 Stat. 145); section 49 of the act of August 27, 1894 (28 Stat. 563; 26 U. S. C., sec. 371), as to the bonded period for spirits; and section 50 of the act approved August 27, 1894 (28 Stat. 564), as amended (26 U. S. C., sec. 407; U. S. C., Supp. VII, title 26, sec. 1275), as to loss allowance for spirits, are hereby declared to be the law on and after December 6, 1933. This section shall not invalidate any allowance for loss with respect to spirits withdrawn after December 5, 1933, and prior to the thirtieth day after the date of the enactment of this act.

(b) Distilled spirits 8 years of age, or older, which were in bonded warehouses on December 5, 1933, may remain therein after such date and, when withdrawn at any time on or after the thirtieth day after the date of the enactment of this act, may be granted an allowance (which shall be in addition to the allowance for loss otherwise allowable) for loss at the rate of one proof gallon as to casks or packages of a capacity of not less than 40 wine gallons, and one-half proof gallon as to casks or packages of a capacity of less than 40 wine gallons and not less than 20 wine gallons, for each period of 6 months or fraction thereof that the spirits remain in bond between December 5, 1933, and the thirtieth day after the date of the enactment of this act.

And in lieu thereof to insert the following:

SEC. 307. (a) All distilled spirits heretofore or hereafter entered for deposit in a bonded warehouse shall be withdrawn therefrom within 8 years from the date of original entry therein, except as provided in subsection (c) of this section.

(b) Any distilled spirits heretofore or hereafter deposited in any bonded warehouse may, at the time of withdrawal of the spirits from such warehouse, upon the filing of an application for the regauge of such spirits, giving a description of the package containing the spirits, be regauged by a storekeeper-gauger who shall place upon each such package such marks and brands as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall by regulations prescribe. If upon such regauging it shall appear that there has been a loss by leakage or evaporation of distilled spirits from any cask or package, without the fault or negligence of the distiller or warehouseman, taxes shall be collected only on the quantity of distilled spirits contained in such cask or package at the time of such withdrawal. The allowance which shall be made for such loss of spirits shall not exceed—

1 proof-gallon for 2 months or part thereof;

1½ gallons for more than 2 months and not more than 4 months;

2 gallons for more than 4 months and not more than 6 months;

2½ gallons for more than 6 months and not more than 8 months;

3 gallons for more than 8 months and not more than 10 months;

3½ gallons for more than 10 months and not more than 12 months;

4 gallons for more than 12 months and not more than 15 months;

4½ gallons for more than 15 months and not more than 18 months;

5 gallons for more than 18 months and not more than 21 months;

5½ gallons for more than 21 months and not more than 24 months;

6 gallons for more than 24 months and not more than 27 months;

6½ gallons for more than 27 months and not more than 30 months;

7 gallons for more than 30 months and not more than 33 months;

7½ gallons for more than 33 months and not more than 36 months;

8 gallons for more than 36 months and not more than 40 months;

8½ gallons for more than 40 months and not more than 44 months;

9 gallons for more than 44 months and not more than 48 months;

9½ gallons for more than 48 months and not more than 52 months;

10 gallons for more than 52 months and not more than 56 months;

10½ gallons for more than 56 months and not more than 60 months;

11 gallons for more than 60 months and not more than 64 months;

11½ gallons for more than 64 months and not more than 68 months;

12 gallons for more than 68 months and not more than 72 months;

12½ gallons for more than 72 months and not more than 76 months;

13 gallons for more than 76 months and not more than 80 months;

13½ gallons for more than 80 months from the date of original gauge as to fruit brandy, or original entry as to all other spirits; and no further allowances shall be made for loss by leakage or evaporation.

The foregoing allowance for loss shall apply only to casks or packages of a capacity of 40 or more wine gallons, and the allowance for loss on casks or packages of less capacity than 40 gallons shall not exceed one-half the amount allowed on said 40-gallon

cask or package; but no allowance shall be made on casks or packages of less capacity than 20 gallons. The proof of such distilled spirits shall not in any case be computed at the time of withdrawal at less than 100 percent.

(c) Distilled spirits which on the effective date of this section are 8 years of age, or older, and which are in bonded warehouses, may remain therein after such date; but no allowance for loss by leakage or evaporation shall be made in the case of such spirits with respect to any period after such date.

(d) This section shall take effect 30 days after the date of the enactment of this act.

The amendment was agreed to.

The next amendment was, on page 26, after line 8, to strike out:

SEC. 308. Section 602 of the Revenue Act of 1918, approved February 24, 1919, is hereby amended to read as follows:

"SEC. 602. (a) At registered distilleries packages may be filled with spirits reduced to not less than 100 proof from receiving cisterns and tax paid without being entered into bonded warehouse. Such spirits may be also transferred from receiving cisterns at such distilleries, by means of pipe lines, direct to storage tanks in the bonded warehouse and may be warehoused in such storage tanks. Such spirits may be also transferred in tanks or tank cars to general bonded warehouses for storage therein, either in storage tanks in such warehouses or in the tanks in which they were transferred. Such spirits may also be transferred from receiving cisterns or warehouse storage tanks to barrels, drums, tanks, tank cars, or other approved containers, and may be transported in such containers to rectifying houses, for exportation, or for other lawful purposes.

"(b) The Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, is hereby empowered to prescribe all necessary regulations relating to the drawing off, transferring, gauging, storing, and transportation of such spirits; the records to be kept and returns to be made; the size and kind of packages; the tanks or tank cars to be used; the marking, branding, numbering, and stamping of such packages and tanks; the kind of stamps, if any, to be used; the time and manner of paying the tax; and the kind of bond and the penal sum thereof.

"(c) The tax prescribed by law must be paid before such spirits are removed from the distillery premises, or from general bonded warehouse in the case of spirits transferred thereto, except as otherwise provided by law.

"(d) Under such regulations as the Commissioner with the approval of the Secretary of the Treasury may prescribe, distilled spirits may hereafter be drawn from receiving cisterns and deposited in distillery warehouses without having affixed to the packages containing the same distillery warehouse stamps. Such packages, when so deposited in warehouse, may be withdrawn therefrom on the original gauge where the same have remained in such warehouses for a period not exceeding 30 days from the date of deposit."

And in lieu thereof to insert the following:

SEC. 308. The first paragraph of section 602 of the Revenue Act of 1918, approved February 24, 1919, is amended to read as follows:

"SEC. 602. Subject to the provisions of existing law, spirits produced at registered distilleries and reduced in the receiving cisterns in such distilleries to not more than 159 degrees of proof and not less than 100 degrees of proof, may be transferred, by means of pipe lines, direct to storage tanks in the Internal Revenue bonded warehouse located on the bonded premises where produced and be warehoused in such storage tanks, or they may be drawn into approved containers and transferred to any Internal Revenue bonded warehouse for storage therein, or they may be tax-paid in such approved containers in such cistern rooms, without being entered into an Internal Revenue bonded warehouse. Such spirits may be drawn into approved containers from storage tanks in Internal Revenue bonded warehouse located on the bonded premises of the distillery either for storage in bond or tax payments. Such spirits, upon tax payment, may be transported in approved containers for use for beverage purposes only. The Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, is hereby empowered to prescribe all necessary regulations relating to the drawing off, transferring, gauging, storing, and transportation of such spirits; the records to be kept and returns to be made; the size and kind of containers to be used; the marking, branding, numbering, and stamping of such containers; the kind of stamps, if any, to be used; and the kind of bond and the penal sum thereof."

The amendment was agreed to.

The next amendment was, on page 29, after line 7, to strike out:

SEC. 309. Section 3293 of the Revised Statutes, as amended (26 U. S. C., sec. 371, U. S. C., Supp. VII, title 26, sec. 1232 (a) and (b)), is further amended by amending the paragraph thereof immediately following the form "Entry for deposit in distillery warehouse" to read as follows:

"And the entry shall specify the kind of spirits, the whole number of packages, the marks and serial numbers thereon, the number of gauge or wine gallons, proof gallons, and taxable gallons, and the amount of tax on the spirits contained in them; all of which shall be verified by the oath of the distiller or owner of the same attached to the entry. One of said entries shall be retained in the office of the supervisor of the district, one sent to the storekeeper-gauger in charge of the warehouse, to be retained and filed in the warehouse, and one sent with a duplicate of the bond to the Commissioner of Internal Revenue, to be filed in his office. The distiller shall, at the time of making the entry for deposit of spirits in the warehouse, under such regulations as the Secretary of the Treasury shall prescribe, give a monthly or annual warehousing bond, in duplicate, in a penal sum of not less than 50 percent of the tax on the distilled spirits on deposit in the warehouse at any one time, or such higher sum as the Secretary of the Treasury may, by regulations, prescribe, conditioned that the principal named in said bond shall pay the tax on the spirits as specified in the entry, or cause the same to be paid, before removal from said distillery, warehouse, and within 8 years from the date of said entry."

And in lieu thereof to insert the following:

SEC. 309. Section 3293 of the Revised Statutes, as amended (U. S. C., 1934 ed., title 26, sec. 1232), is amended to read as follows:

"SEC. 3293. (a) The distillers of all spirits removed to an Internal Revenue bonded warehouse shall enter the same for deposit in such warehouse, under such regulations as the Commissioner of Internal Revenue may prescribe. Said entry shall be in such form as the Commissioner shall prescribe.

"(b) The tax on all distilled spirits hereafter entered for deposit in Internal Revenue bonded warehouses shall be due and payable before and at the time the same are withdrawn therefrom and within 8 years from the date of the original entry for deposit therein; and warehousing bonds hereafter taken under the provisions of the internal-revenue laws shall be conditioned for the payment of the tax on the spirits as specified in the entry before withdrawal from the Internal Revenue bonded warehouse and within 8 years from the date of said entry. The Commissioner shall prescribe the form and penal sums of bonds covering distilled spirits in Internal Revenue bonded warehouses and in transit to and between such warehouses: *Provided*, That the penal sums of such bonds covering distilled spirits shall not exceed in the aggregate $200,000 for each such warehouse.

"(c) A new bond shall be required in case of the death, insolvency, or removal of the surety or sureties, and may be required in any other contingency affecting its validity or impairing its efficiency, at the discretion of the Commissioner of Internal Revenue. And in case the warehouseman fails or refuses to give the bond required, or to renew the same, or neglects to immediately withdraw the spirits and pay the tax thereon, or if he neglects to withdraw any bonded spirits and pay the tax thereon before the expiration of the time limit in the bond, the collector shall proceed to collect the tax by distraint, issuing his warrant of distraint for the amount of tax found to be due, as ascertained by him from the report of the storekeeper-gauger if no bond was given, or from the terms of the bond if a bond was given. But this provision shall not exclude any other remedy or proceeding provided by law.
